How To Win Matches FAQ

This FAQ Explains How You Should Go About Battling in cvs for dreamcast, it is mainly for giving beginners a basic structure for combat, but is also for everyone as it contains tips and + and - points for all characters

[Note:]

I do not mind what you do with this FAQ as long as my above message is still there.

I have split up fighters into basic types:

Long Range

Physical

Mock styles

Cheese/Others

And now the feature presentation

Battle structure:

Long rangers

1.RYU

Ryu is the main capcom character, and very soon you shall see why

Sum Up of character:

Ryu is well balanced and strong, there are many ways to use him

Use him if you are:

1.A beginner

2.A good all-round player

3.none of the above

Don't use him when:

1.you don't like good characters!?

Strategy:

Start the battle with either one of two hadokens (down, down-left, left, x or y) then a short combo of punches/kicks, before they are on their feet use tatsumaki senpukyaku then either shinku hadoken or the devastating shin-shouryuken

And...You win!!! ^\_^

2.KEN

A good Ryu sub, he is strong but quite like Ryu

Sum up of character:

A more kick orientated Ryu ^\_^

Use him if you are:

1.A Ryu player

2.need a ryu-ish variation

3.kicky

Don't use him if:

1.you don like winning!?

Strategy:

Start with a fire shouryuken (shouryuken with y instead of x) hadoken, maybe a few blows or summat, shoryureppa then destroy them with ryu senkyaku or

shippu jinraikaku or even shin-ryu-ken.

### 3.TERRY

Long range right to the core, recommended

Sum up of character:

Long range diving, energy and both together

Use him if you are:

1.a coward

2.a good tactician

Don't use him if you are:

1.close range fighter

2.not good at specials

3.on 2 player mode

Strategy:

A Power wave will give you some time to get your opponent dazed, if they don't move...use burning knuckle if they leap at you use the tackle technique then use crack shot with b then buster wolf, if you're far away or power geyser if in close. And you win!!!

### 4.IORI

For all of you're Medium/long-range needs here's...IORI

Sum up of character:

A little less reach than terry but very good nonetheless

Use him if:

1.you like UN-usual characters

2.you like seeing many move variations

3.you like the prospect of another type of the same character

Don't use him if:

1.he scares you (quite probable, lol)

2.you need longer range moves

Strategy:

Dark crescent is a good way to go at the start, with medium reach its good then floor 'em again with deadly flower X3 and again! (With fireball) and destroy them with maiden masher using y NOT x

### 5.VICE

The best range! Get enemies from miles away!

Sum up:

Y withering force has Max range! Need I say more?

Use her if:

2.you like annoying people

3.you're sick of physical characters

Don't use her if:

1.her actions and taunts annoy you

Strategy:

DA Cide, outrage, gore feast, rave fest then a few physicals and BOOM y withering force from the other side of the screen!!!

A bit like a giant evil female mutated ryu with wings

One of my usual team members

Use if:

1.you hate ryu but like his moves

2.you have any kind of taste

Don't use if:

1.you are somehow mystically shielded from choosing him
