By Dazz Hardy

E-mail - Dazer55@hotmail.com

Capcom Vs SNK and all the Capcom stuff is copyright of Capcom
SNK is copyright of SNK Corporation

Dazz Hardy wrote this FAQ.

I put time and effort into it and I hope you enjoy it.

Use this FAQ anyway you want, because even if I said otherwise
you'd probably cut out this part anyway.

If you wish to post this on your site, you can, but please e-mail
me and let me know.

Plagiarism is a crime.

--INTRO-----
Firstly this is not a move list.
Nor does it contain the colours already in the game.
If you want those check out Sailor Bacon's FAQ
also available at Gamefaqs.
The most current version will always be posted at,
www.gamefaqs.com

Creator is Highlighted e.g. Dazz.
Creator is above/before their colour.
Names are from the GameFaq's Message Boards.
If you wish to send in a contribution you will be
given full credit.
Send them to: -
 DAZER55@Hotmail.com

A Britt, using a PAL version of the DC game, produced this FAQ,
so forgive any discrepancies :) and e-mail me any useful changes.
All edits are taken from the Gamefaqs Message board for Capcom
Vs SNK, and are placed here with consent. If you wish for your
colours to be removed please email me. One last thing, this is
my first FAQ so be patient, and feedback is always good as long
as it's constructive.

To select your custom colours: -
1:X+B at character select
2:Y+A at character select

 PLEASE E-MAIL ME

Look out for the next version 'Version D' (2.5) :)

Version 1.5: Added an updates section and cleared up some of the layout. Also ran it through Word's Grammer Checker, so some stuff got changed around :). Also collected colours for the characters that didn't have any in the previous version.

Version 1: The Original Faq

--ProTects Shiny/Ghost-----

SHINY/GHOST COLORS

These colors have only 15 numbers listed. Each number represents a block. To make the golden "shiny" colors, set BOTH the red and green values for each block to the number indicated and leave the blue values at 0. For example, the first block for Shiny Honda would be 4-4-0.

To make the black and white "ghost" colors, set ALL THREE color values for each block to the number indicated. For example, the first block for Ghost King would be 28-28-28.

Thank's to ProTect for these.

Gear Vice is my attempt to make a cool "Robot" version of her.
She's got glossy black hair, black eyes, grey skin, and no
facial features. o_O; Her clothes are a weird shade of black,
and it looks almost like there's a little blood at the midsection.
