- 1 Review :

At least it comes to us. Illbleed the new horror game. Climax has done a great job with this one. Illbleed is a virtual horror land where you must fight your fears. If you succeed, you win 100 millions of dollars. Contrary of what you can think, this game is not like Resident Evil. It's a complete new genre and an original game. Your goal is to find traps before they scared you. Of course, there are battles against zombies, Crash dummies and even woodcutter. I have appreciated the appearance of Dogs, the second hero of Blue Stinger, in Stage 4 and 5 and also the final boss BullStinger which is simply a monster of Blue Stinger. If you doubt that this game is a Climax, then i have given you the proof. The presentation of Illbleed is very cool with english dialogue even in the japanese version and best of all, excellent music. During the game the cinematic are equal to this one. Too bad, the mouth of a character doesn't move when he or she talks.

The graphics go beyond my imagination. The color and the brightness effect are of a rare quality. The sprites in the game are huge and all good. Decors of each cinema are completely different and the game offers really 6 different

atmospheres. You will explore a desolated town, a haunted house and even a morgue. I don't talk of the other to let you discover them.

The strong point in this game is the animation which runs at 60 fps. Two words to describe it : the perfect animation. Characters run smoothly and quickly and in addition to that

you can change the view during the game. The moves in cinematics are fun and adapted to the situation. Here you see the true power of Climax.

I have to say this is the best background music of the DC, except maybe for Sonic Adventure. All the music is excellent. The voice acting is also very good. I will finish with the music of the boss which is perfect.

The control in this game are not ordinary. During a battle for example you can put your guard to avoid an attack, you can also jump which you cannot do in Resident Evil. Sometimes you must really think to win a battle against a

boss. The riddles are welcome because it contributes to play more with the game.

I can talk about it for hundred hours. You can't miss it, buy it now. No wait, buy two and sell one to your best friend so you can be sure he will play with it.

Illbleed is simply a jewel of the dreamcast and i hope that Illbleed 2 (slated for release in 2002) will be on the DC.

2 The legal stuff of this guide :

Please keep in mind that this guide is not a poor translation of the french guide i have sent before. This guide is an original work for english users and i hope that people who are playing the translation will help to describe items like Plaster, Protector and Calculator. I also hope that i will not include too many grammatical errors, but if so, stay cool and correct me instead of taunting me.

THE MOST IMPORTANT THING TO KEEP IN MIND IS THAT THIS GUIDE IS ONLY FOR GAMEFAQS AND MY OWN SITE.

It's simply because Gamefaqs was extremely professionnall to post the french guide on an american site before the english one. That's why they will have the english guide and not other sites. So it's useless to ask for permission, the answer is NO.

3 Characters in the game :

ERIKO CHRISTY (18 years old) : Heroine of the game. She has lost her fear when she was 6. You must help her to save her friends and find out who Michael Reynold is. She is the best character of the game and has an excellent design.

KEVIN KERTSMAN (17 years old): The playboy of this game. He likes Eriko a little more than is necessary. The problem is that he rushes headlong into the danger. He is not a good fighter due to the short range of his attacks.

MICHEL WATERS (17 years old): She is so cool and very quick. The problem is that

she is very weak in battles. Too bad, because except Eriko, she is the best character of the game. She has a better design in the game.

RANDY FAIRBANKS (16 years old): He is the brute. Unfortunately in this game, we need adrenaline and he doesn't have too much. Also he is not very powerful.

JORG S. BAKER : He is a reporter who was invited to Illbleed here to do an investigation. He will be involved in this story more than he thought. He is the fifth playable character of this game. His weak point is the bleeding factor.

MICHAEL REYNOLD : Is the director of Illbleed. He loves fear and searches for an alter ego. Maybe Eriko is the one. It's not a surprise after all, she's his daughter.

4 Generalities about this game :

Let's begin with the game system : In every stage, you must first find the horror monitor. Without it, you can't expect to finish a stage. In stage 2, you will also see that it allows you to see people without their clothes on...

During the battle, X = Jump,
A = Guard. Don't underestimate the guard, it's crucial if you wish to succeed in battle.
Y = Hit with a short range weapon,
R = Hit with a long range weapon.

You will notice an H in some battles. During them, go on the H mark (H = heliport) and if you press B repeatedly, someone will throw a ladder for you. You will do a Narrow Escape.

When Eriko loses her blood, either don't move or simply walk, but don't run. To slow down your Pulse, do the same thing.

You can use a quick map by pressing Y. It's very useful like all maps, especially in long corridors.

In the hospital, you can heal, resurrect a dead character or you can upgrade your character using various cyberparts you find in the park. It's sure that the first will be Eriko, but you can be curious and you will maybe upgrade the other. Too bad they haven't their own ending.

To upgrade a character you can use the following items :

ARTIFICIAL BRAIN (30 000 \$)
BIO BODY (30 000 \$)
IRON HEART (40 000 \$)
ARTIFICIAL PLASMA (20 000 \$)

You must zap the cinematic if you wish to finish the stage in time.

It's possible to finish the game under 3 hours (personal record = 2 H 40), if you save only Kevin. If you wish to finish the game without saving anyone, you will have more than 3 hours because you must wait 50 minutes in stage 1 (in this case my record = 3 H 10).

Use your sixth sense to avoid shock sequences and to find items.

Last beware of the saving system. If you buy items and then quit the game after a save, it's not sure you will find the items but what's sure is that you will have lost

your money...

TICKET STORE : Decrease the prices of 40% at a hospital located in a stage.

AXE : Powerful and has also a middle range. In stage 3 and 5.

NATA/HATCHET : A very good weapon with a cool combo.

Long range weapons :

FLAME THROWER : Powerful but not so visual. (stage 2)

Mary : Very powerful foe, avoid her knife and hit her.

Stage 5 :

Zombies : Same as in stage 1.

Crash dummies : Same as in stage 1.

Mary : Same as above.

Stage 6 :

Cops women : same as above.

8 Boss :

MISTER BAMBALO : The longest boss of the game.

RACHEL, THE WORM : Use the flame thrower to kill her.

TRENT : You need a good technique to kill this boss.

(LOW) FEAR SPIDER : He is invincible so be smart and run.

KILLERMAN : The best battle of the game except for the last boss.

ZODYK/ZODNIK : A really evil version of our old friend Sonic the Hedgehog.

FEAR SPIDER, OH NO MAN, BULLSTINGER : They are in the order : easy, normal and hard. You must choose one of them to end the game the first time.

MICHAEL REYNOLD : You can fight him only if you don't save your friends and the second time you play the game. He has 2 phases.

9 Tips :

Press X+A on options at the title screen for the mini game.

To see Eriko without her clothes, don't save Eriko's friends in this park (the second time you play the game). It is quite different in the American version due to censorship. I won't say more...

To obtain the bonus in stage 5, you need to save Jorg. He gives the conclusion and allows you to obtain the reward.

To play with Randy without a brain, don't take his brain in stage 3 and save Randy. The ID card is funny in this case.

The code for the two safes are 5271 and 1361, you can win 250 000 dollars or 1863 and 2161 in the American version.

There are 3 endings to the game :

1 : You save all friends except one (Jorg for example) : Eriko thinks of the friend that she has forgotten.

2 : You save everyone : They all go on a beach to leave in peace. Eriko will want to return to Illbleed because she wants to know if Michael is her father or not.

3 : You save no one : After the death of her father, Eriko becomes weak and Kevin protects her. However she receives an invitation to Illbleed for 2002.

10 The walkthrough :

Welcome to the 18th annual speech contest. The game begins with a cinematic where Eriko talks of her own experience with horror. When she was young her father created a horror caravan to amuse her. Unfortunately the only thing she found was fear, again and again. Now she has lost her fear and that's why she wants to be the president of the student council. After that, Kevin and Randy come to congratulate her. Then Michel arrives and shows 4 tickets for Illbleed the virtual horror land. They all decide to go there except for Eriko. After a few days, she gets worried when her friends do not return and decides to go in the amusement park. After a short dialogue with a woodcutter zombie, she enters.

You are in the welcome area. On your left are a bank, a shop and a save house. Straight are the cinemas (the action stages) and to the right are a hospital and a tutorial in a graveyard. Go there.

TUTORIAL AREA :

In the tutorial you find a horror monitor, a happy drink and an ampoule. After you understand what a horror monitor is by reading the lesson on the wall you can exit and take the direction to the first action stage.

STAGE 1 : THE HOMERUN OF DEATH :

In this stage your goal is to find Mister Bamballo. This guy killed teenagers in the past. He has a good reason, though. The kids burned his house and his son Jimmy who was training in the basement. Now you must find his ghost and stop him.

After the save corridor, you arrive here. Search the fountain on the left for Jimmy's home run batte. Now search the tree right across from the fountain for an item and last search on the right of the courtyard an item sensor. Also on the corner near the item sensor is a random trap. Enter in the house by the other door.

CORRIDOR 2 :

You can save here. You can also find 2 items in the lockers.

B1 : You can save here and go to the hospital. After that go to B2.

BASEMENT 2 : It's time to use Jimmy's trophy and put it in the case on the right. Then put the testimonial on the wall straight ahead. After that, go in the blue square that appears suddenly. You will watch 4 scenes.

BOSS : MISTER BAMBALLO :

PHASE 1 : You must run because he has infinite energy and go on the H.

Press B to ask for a ladder. You must avoid his flame thrower breath.

PHASE 2 : Now that you have escaped, the goal is to run in the next corridor and avoid the boss. If you failed and fight him again, you must run and be on the H to ask for a ladder. You arrive in the toilets where you watch another scene.

After that, search the speed ladder and the hasssy. Run again until you can save the game.

PHASE 3 : It's time to fight the boss and kill him. If this is the second time you play and if you don't want to save Kevin, you must wait until the time goes over 50 minutes (or 1 hour in the us version). Then don't walk toward the body of Kevin. The first time you play this game, walk toward the body to rescue him. Then search an amazone and a protector and go up.

PHASE 4 : The idea (to avoid a quick game over) is to jump from a boat to another and press A to avoid the hit of the boss. After a long run you arrived at the electric station.

PHASE 5 : The guy wants to use the monster to kill you, so kill him. Take the ID card and the chinese noodle on the table. You must exit of here and return to a fork. Use the other way until the exit. Use the ID card to open the exit door. Now you can go to the exit.

STAGE 2 : THE REVENGE OF QUEEN WORM :

CONDITIONS TO WIN 80 000 DOLLARS :

TIME	: 30 MIN	UNDER
TRAPS	: 0	OVER
HEART RATE	: 120/MIN	UNDER
HIT POINTS	: 90	OVER
ADRENALINE	: 200	OVER
BLEEDING	: 30 cc/min	UNDER

You begin by going to the left to take an artificial brain and a newspaper on a dead body. Go straight to find the horror monitor. Unfortunately, a monkiller steals it. He runs and open the new area. Go on the right and before you go in the next area search in a dead body, the item sensor. Now advance. You will watch a scene with Eriko without clothes on (if you are playing Kevin it's the same thing). Then you watch a second scene. The goal here is to run as fast as possible to the exit. You can use the map (quick map by pressing Y) to collect items. They are :

A metal pipe, an artificial plasma, a chinese noodle, (there is a battle at this point) a speed ladder, a bandage, a diary 1, a diary 2, a save point, a plaster, a nitro, an artificial brain, an amazone and before the exit a battle. If you meet a worm, simply run by using the H on the battlefield.

Go to the station for a scene. Then go in the garage to fight 3 monkillers and save Michel. Now return to the station and pass the open door. Jump on the roof of the car and then on the ground (but not on the earth or you will fight the boss) to find a baby bottle. Bring it to the ghost at the station. You can now enter. Collect the items on the shelf. Then talk to the ghost and take the rusty key from a box. It opens a door behind the station.

Open this door and be sure to fight 2 cop women. Then you arrived in a big place. Search another battle. Then you can collect a memo and an item. Continue to arrive near a house. Search near the sign for the flame thrower. Enter the house to find a wrench and others things. Now search all the signs of the Dummy man movie and use the wrench on it. Return to where you find the baby bottle. Now you can jump without risking a battle with the boss. After you reach the barrel, fill the flame thrower.

BOSS : RACHEL, THE QUEEN WORM :

It's simple, run, and use the flame thrower by pressing R. After that, you find a gas tank. Put it on the car near the station to end this stage.

STAGE 3 : WOODPUPPETS :

This stage is different if you play the japanese version or the american one. I will show the difference in this guide.

A man has found a way to change humans into puppets. Unfortunately he died, killed by his own process. Now it's your turn.

CONDITIONS TO WIN 120 000 DOLLARS :

TIME : 50 MIN UNDER
TRAPS : 18 OVER
HEART RATE : 70/MIN UNDER
HIT POINTS : 130 OVER
ADRENALINE : 400 OVER
BLEEDING : 15 cc/min UNDER

When you can play, go left and search for a horror monitor. There are also two battles here, the lorry to the right near the sand and a doll will jump from the top of the door on your right.

Traps : The truck of the left, and randomly the log on the ground.

You can find a deep breath, a hasssy drink and an iron heart. Then enter in the museum.

MACLACLHAN'S MUSEUM :

Look at the right for a trap then on the log on the left. Continue to use the stairs. There is a trap in the painting. Now you can take an item and "talk" with two statues. After the woodcutter you collect an axe. After the statue of Maclachlan is a wood memo with a riddle on it. IF you play the japanese version it's a memo with MURDER on it. The riddle is quite different in the us version. Now go down. You will find a calculator.

3 traps : The blood on the ground, the boxes, and the light from the window. Continue. The next trap is the window. You find a gauze wrap. Then beware of the window of the left OR the window straight. You find a discount ticket and another item. Exit.

CORRIDOR :

you will fight a doll. Then advance to watch a scene with Randy. The next trap is the window on the right. Now exit. You find an artificial brain in the box. You see a hospital and stairs. Use the stairs to go down and save. Near the save point are boxes with a gauze wrap. Pass the door.

THE FACTORY :

There is one trap here : The ground on the other side of the coats. Now you meet a woodcutter. Take a log (a piece of wood) from him. Try to exit. The woodcutter then comes to life and tries to kill you. Fight him and exit.

In the next corridor use the monitor for the traps on the ground, then exit.

In the next room, there are 3 traps :

The ground, the blood on the wall and the hole in the wall. Advance. It's possible you do a first fight against two dolls. Then another with a doll in the box of the little room. Anyway, visit this little room to find Randy's brain. Now use the stairs. You can use the piece of wood on the control pannel.

AMERICAN VERSION :

Look at the riddle on the wood memo. Then enter the code 9663.

JAPANESE VERSION :

Look at the memo : MURDER. Write it in katakanas and search the coordinate of MA and DA in a true table of katakana. The code is 1564.

I received a mail about this riddle, my way is a simple one to find this code, but there is another way if you really know japanese :

"Hi,

The hint given is MURDER, which in the memo, is trailed by another word "hito koroshi" in japanese, which means "Kill a person".

Now, "hito" could mean a person or single (of things) which leads to the first number 1, the following word "koroshi" gives the other three numbers: "ko" sounds close to "go" which means 5, "ro" ressembles "roku" which is 6 (some times "roku" is indeed pronounced as "ro" if used with another number) and the last one, "shi" is the pronounciation for number 4 (or "yon" in some other case). This is how I found the code.

Regards,
Choy"

On the contrary of what Choy though i don't think it's just a coincidence, the word "Murder" was chosen in english to help foreign players who don't know japanese very well. The fact is that there is a meaning for japanese and that's why i include in this update the way to find the code. As in all my guides, i don't want to offend people who speak japanese. I just included my way to solve the riddle. In any case the most important thing is to find the code, no matter how you did it.

After this, jump in the hole to become a woodpuppet. Exit. In the next corridor there is one trap, the light on the ceiling. In the corridor where you saw Randy, there is 3 traps each time in the machine on the left or the right. Exit. In the next corridor you watch a strange scene. After that, collect on the left the manual and the list on the right after you talk to the zombie. Enter.

THE KILLING GAME SHOW :

The goal is to run, if a woodcutter catches you, you must fight him. Use the map to arrive in an area with a plant on the stairs. Continue until you can take some Wuddola. Use them to free the access to the stairs. Use the stairs to arrive in a save room. Collect items here and exit. Continue on the green path, you will fight 2 woodcutters. Then you will arrive at a fork. Go in the hospital and fight 2 doctor dolls to save Randy (you can find a bio body under another bed). Now you can use the other way to exit the maze. On the way it's possible to avoid the battle if you run to the exit. You arrive in the locker room. In this room, you must kill 2 woodcutters and find a sacrifice Mary. You see another fork, go straight to become human. Then go left and jump on the boxes. You will arrive in the boss room.

BOSS : TRENT :

It's easy and long. Go right and hit his root one once (or two if you do it quickly) then put your guard. Repeat the process until he dies. Follow the way to the exit.

STAGE 4 : KILLER DEPARTEMENT STORE :

In this store, you can find two secret safes. If you do so, you will earn 250 000 dollars. A lot of people tried before you and died. But i'm sure you will find them...

CONDITIONS TO WIN 150 000 DOLLARS :

TIME	: 1H15 MIN	UNDER
TRAPS	: 28	OVER
HEART RATE	: 80/MIN	UNDER
HIT POINTS	: 150	OVER
ADRENALINE	: 250	OVER

BLEEDING : 40 cc/min UNDER

At the beginning go through a door on the left to collect a horror monitor and a lot of items and manuals. There is a trap in the dead body. Exit. Take the severed head on the ground and beware of the caddy. Advance.

Traps : The dummy pop corn on the left.
The tongue in front of you OR the head of the clown.
The tongue on the other department
The blue sweet OR the yellow sweet
The hand OR the pink department just under.

Then you will fight a doll. You arrive in a new department.
Traps : The yellow dress and the purple bulb on the ceiling.
The pink dress of the department on the left.

Then you arrive near the drink.
Traps : The green hassy (worm)
The brown hassy and the shelf on the left
The cash desk.

Now go into the bakery. You find the Nata there. There are also traps :
The bread (then you will fight monsters)
Two swords on the wall
Two traps on the oven. Take the baked cake. Exit.

Finish this corridor for more traps : The mouth on the ceiling. You will fight and find the last trap in the strawberries. You can now take a strawberry. You have probably noticed a strange cake. Talk to him and offer the strawberry, the baked cake and the severed head.
He refuses two items and accepts the head. Now take him (hell cake in the inventory). There a trap around here, the pen in the kiosk. You find a hassy on the table and you can use the stairs to go down. Save.

11 Faqs :

I'm stuck at stage 3, what is the code of the control pannel ?
It is 1564 for the japanese version, 9663 for the american one.

What are the code of the two safes in stage 4 ?
It's 5271 for the first and 1361 for the second. You can win a total of 250 000 dollars by finding them, so don't hesitate. In the american version it is 1863 and 2161.

Some of the traps you give in this guide are wrong, why ?
It's simple. A lot traps are random in this game, you can play it for hundred of hours without seeing any of the traps i mentioned. I'm sure that there are special traps when Eriko lost all of her clothes. I don't give them to let you discover a little the surprise.

What is the Plaster use for ?
Exactly like the protector, this item is useless. It give a boost to a category like Damage (the protector) or Heart but you don't really feel the difference.

What are the strawberry and the baked cake use for ?
Give them to the hell cake of stage 4, but he doesn't want them and throws them to you. A decoy in fact.

Where can i use the Mary's stick ?
In stage 4, just before the elevator that brings you to the boss, use it on the painting to open the way to the second safe.

What is the answer to the quiz at stage 5 ?
It's Killerman, but to obtain the reward you need to save Jorg in stage 5.

Can i save Jorg in stage 5 ?
Of course you can and you must do it the first time you play the game to earn 1 000 000 of dollars. Don't think to buy him at the bank, he costs 375 000 dollars.

Is there any secrets if all conditions are OK ?
No.

Can i upgrade more than one character in this game ?
It's quite useless to upgrade another character than Eriko. However in the game if you find all the secrets, you can upgrade at least 2 characters. The problem is not money, it is the material. In one session there is just enough for 2 characters.
