

Minor update, and probably my last, unfortunately. Nothing of a change really. I've added a note at the beginning of this faq. I've also updated my copyright.

Version 1.35

Didn't add very many new mixes. Mainly fixed more errors in the faq. Also added brief descriptions for the dress-up items.

October 22, 2000
Version 1.32

I have been playing the game a lot to get the last items in my own inventory. I finally got them so I will have plenty of time to work on the faq. Fairly minor update. Fixed a few things, though. The crown mixes were a little messed up, and also I fixed some prices. I added a few more mixes, mainly from special cards and other cards. Unfortunately, since Mr. Black found so many mixes, he is having a tough time finding more mixes. I am starting to run out of mixes to find. Hopefully I will figure out an easy/easier ways to get the exciting book, and Emperor's Crown and Light Stone. I don't think this is possible however.

October 15, 2000
Version 1.25

Whoohoo! Just worked big time on the faq!
HUGE update on new mixes. Thanks to Mr. Black and Victini for most of the new mixes, especially Mr. Black. He devotes all his time and effort to constantly give me more mixes I got a few mixes myself, but they gave me most of them. Added the buy/sell prices for the Jack-In-The-Box, and added the wood material. I also put the price on how much fireworks costs.

October 10, 2000
Version 1.1

Made item list more readable. I got rid of some items parts where it says "other ways" and it puts more ways to create the item. I just put number 4, 5, etc. ways to mix to get an item. I did this to hopefully make it more readable. Oh and beyond number 3 these mixes are NOT listed in the item book! And also some other mixes aren't shown in the book as well, keep this in mind. Also added Jack-In-The-Box.

Fixed some stuff in my faq

=====

Forgot to give ShadoWangTang credit! Sorry ShadoWangTang!!

Also fixed little things like the essence list, and misspellings and other little things. Also, in the hammer item there was a wood sword... Have no idea what it is/was, but I fixed that.

Version 1.0

This faq is created!

=====

Hi there, I am here to help you get the rest of the items you are in need of! I can be seen posting messages on the powerstone 2 message board, my name is Pharaoh Walker(a.k.a. Perfect Chaos) and you can email me with some additions, if you notice any errors, or have any ideas of anything new to add email me at bennetch@mediaone.net. You will be given credit if you help me in any way. Please note that this faq is still under construction (that is pretty obvious though) , and I will add stuff as often as I can. Thanks to Vib Rib for a huge part of the item list itself! And this faq may not be terrific looking because it is my first faq that I have ever made, but it should be readable.

II. A Item List

=====

Shown here is every way that I know to get/make every weapon. As I figure out more ways to get an item I will change this. But, if I find tons of ways to find a weapon, I am not going to list every way. One example of this is the arm gun. If you want me to list absolutely everything then give me an e-mail. For example I have already found tons of ways to get the arm gun, and some others, but since it is so easy to get some of the weapons just experiment with special card if you don't have the ingredients in any of the mixes. As far as I know, you can only receive level 6 items with special cards... The levels of the item just means how rare it is. The higher the number, the rarer it is and the harder it is to find it in the game.

button and then press the "roulette" button. If you don't see a good item, just press the "B" button and go in the game again until you see a good item. When you see an item you want, figure out what color the segment is that will give you the good item. Now, to make the odds higher hold "A" while moving the control stick. You can extend it to 12 sections for 60,000g which makes it ALOT easier to win. When you get a text, press the "talk" button then press the "present" button and finally select the text and press the "A" button and now the mixes for that weapon will work.

About these "beat difficulty 1" and such. To get these, you have to beat the game very fast, shouldn't be tough, just don't waste time. I usually get them so you shouldn't have a hard time getting them. Now difficulty 8 might be another story... I can only beat the first level in this difficulty, and I can only get to the final boss in difficulty 7 so I don't know what that gives you. People that can beat these difficulties please email me and tell me what you get so I can put them in this faq and you will be credited.

Thanks to:

1. Vib Rib for most of the item list. Thank goodness so much for his list, it saved me so much time, but that does not mean I didn't put a lot of work into this faq.
2. Victini for showing another way to get the crown (not the emperor's crown) and the bracelet. Also, he showed me many other mixes. Still waiting for him to give me a mix for the exciting book though! If you can, try and get him to show his other part of his "awesome" list...
3. FA010S telling another way to make the dragons.ShadowWangTang for telling me a few new mixes. He also told me what the bouquet is used for because I forgot :) Props08 for giving me yet even more mixes.
4. Mr. Black for give TONS AND TONS of mixes, thanks so much Mr. Black!
5. Ravenskatel for a few mixes.

And a few more people I may have forgotten to put here.

Since this is such a big list I have decided to put the rest of the people here without descriptions of what they did because they all gave me mixes and so it

is not needed to show what everyone did. Thanks to the people above and:
PokeFan200, Sykotic99.

(His list was a guide, but nevertheless his list was a big help and I used his
list so I give him credit for it.) Tell me if I am wrong about some of these
things and you will be credited on this list as well.
