FAQ version 1.0

September 24, 2003 Started at 2am and finished the list by 7am.
Few more details to add, but that will be
in the next update whenever I get around to
it. Hopefully soon, before the end of the
week.

FAQ version 1.0

December 20, 2004 I fixed a misnamed item. Only thing updated.

-I. How to grow Solar Fruits-

Solar Fruits are grown in the hollow roots of the Solar Tree. You will come across the Solar Tree relatively early in the game after getting through Bloodrust Mansion and breaking the seal to the next area, the floating block you may have seen to the east of the path before entering the Mansion. It is withered because the energy is being sucked out of it by the darkness.

As the name implies, you need Solar energy to grow the Solar Fruits. They still grow on their own, but using the Gun del Sol speeds up the process GREATLY. Depending on what Fruit you are trying to grow, it will take longer. The rarer the item, the longer it will take to grow. Makes sense, no? Use either _Sol_ lenses or _Earth_ lenses to make the plants grow. (I didn't think of using an Earth lens, I read it on the Message Boards in a couple of places.)

When you plant item(s) in a root hollow, it starts as a small sprout.

Solar Fruits have 4 phases. The plant grows to its' next phase after either a) you supply enough solar power using the Gun del Sol, or b) enough time passes where the sun sensor has had solar energy hitting it, the plant will grow to the next phase. It gets bigger and sprouts leaves in its second phase. In its third phase, a flower blooms. In its fourth and final phase, the bloom shrinks a little bit and the petals are multicolored. Solar Fruits can then be picked by walking up to them and pressing A.

A word of warning, be careful when doing this because its VERY easy to OVERHEAT while growing Solar Fruits if you're in bright direct sunlight. ;)

-II. Frames/Lenses that do not work-

The following Frames can't be used to grow Solar Fruits:

Fighter - \
Knife \ \
Dagger > Flat out don't work
Gradius / \
Calamity_ / \
Phantom (sucks the life out of the plant, since its a Dark Frame)

The following Lens types should NOT be used:

Luna (does absolutely nothing)
Flame (destroys the plants)
Frost (destroys the plants)
Cloud (does absolutely nothing)
Dark (sucks the life out of the plants)
Star (only stores solar energy in the Solar Station)

-III. Solar Fruit combinations-

If you are low on certain items for combos to make other Solar Fruits, you can plant just one item and produce more of that item. You'll find how many of each you will receive in the below list.

Green Apple	5
Red Apple	3
Gold Apple	2
Heal Fruit	5 (LOTS of solar energy needed)
Solar Nut	3
See-All Nut	2
Tiptoe Nut	3
Speed Nut	2
Banana	4
Evil Banana	3
Redshroom	2
Blueshroom	4
Flame Nut	5
