## Section 1: Overview

Hi There, This is my first written FAQ so I apologize if it's a little messy. This FAQ is made for the sole purpose of cheating :) If think cheating spoils all the fun of the game and makes too easy then you're in the wrong place. But if you have a gameshark and a need to cheat then continue on my friend, great treasure awaits you further down the page :)

This FAQ was originally made for the Japanese version of the game and now that it has been released in America I started making codes for the American version too. There will be two versions of each codes, the top codes are for

## Item Codes

-----  
For sheer simplicity I set this code to replace the first item, which is probably an early weapon or item,

F7403F2D 445E3C21 - 99 Nosadas (to learn the Two Swords Ability)

## Section 5: Thanks

\*\*\*\*\*

I must thank AstroBlue for making such a great FAQ, I wouldn't know a N'Mou from a Banga without his FAQ. I also wouldn't know any names for the weapons and abilities without his FAQs, which will be added eventually.

Thanks to Hironori Taniguchi for noticing the speed code didn't work.

I must also thank GameFaqs.com for always being there for me in my time of need :-P
