A Kitchen?

HM: FoMT is one of the best portable games that I've come across...and I'm happy to say that I am a devoted fan to the series. One of the greatest things about FoMT is that there are soooo many possibilities in the game. Some related to girls, others related to crops, and then one of the most interesting...COOKING!

FoMT is packed with recipes and other neat stuff that helps make it a great game. This guide is disighned to teach the user how to work in the kitchen,

so...lets begin with the basics.

To get the kitchen you first must upgrade your farm house at least once. After doing so watch the television everyday. There are four channels on your TV, which you can switch between by using the four directions on the D-Pad. On the left channel you can sometimes catch the home shopping network. If you do so you can buy things from them. To get the kitchen you must wait untill they offer it. Once they do run to Doug's Inn and press the A Button while facing the phone on the counter. It should ask you if you want to use the phone for 10 G. Say yes and it should dial up to the home shopping network. If you have the 4,000 G required to buy the kitchen then its yours! If not, you can try again later. Remember: You also need 10 G for the call.

After getting the kitchen you need to get Utensils so that you can cook your food...which brings us to our next chapter...

=====2

Cooking Utensils

When cooking you need utensils. To get them you must wait untill the Home Shopping Network sells them (see the previous chapter on how to order things from the home shopping network). The utensils cost differently depending on which utensil it is. See the list below for the prices of each utensil (remember, you also must pay 10 G for the phonecall).

- Frying Pan : 1200 G
- Knife : 1500 G
- Mixer : 1200 G
- Oven : 2500 G
- Pot : 1000 G
- Rolling Pin : 750 G
- Seasoning Set : 2500 G
- Whisk : 500 G

As you can see, getting all of the untensils costs a lot of money. Once you do get them, though, you can prepare dishes. To do so you must select certain utensils and certain items. The items that you can use are things like apples, milk and eggs. You can also use your crops to make dishes. The dish that comes out is determined by the utensils you used and the ingrediants that you used. We will see more about dishes in the next chapter.

To begin cooking make sure that you are not carrying items in your rucksack except the ingrediants that you are going to use (if you are making a dish that you have made before then you don't need to have the ingrediants in your rucksack). Next, go to the kitchen counter and press the A Button. If you would like to try creating a new dish you may do so, or you may make a dish that you have in your recipe book.

Next, we must move on to the recipe list. Enjoy!
