REVISION HISTORY!

17/08/2001- First version.

10/09/2001- A lot of questions and requests. I am impressed! This has been a lot more fun than I ever expected it to be! Keep those questions coming in. I am so happy also noones decided to flame yet- maybe people are actually READING the mail guidelines! And also thanks to all those who have helped me as well.

Added a Dinosaur Listing, but it's only 29% done- if you wanna add to it you'll be credited so I'm open to everyone expanding the list! Some new FAQ questions, one has been answered correctly... whew. Am I busy or what?

7/10/2001- Completed dino list from Bahamut986. Edited a LOT of FAQ questions with better answers. And a little chunk on water enclosures and how you build them since a LOT of people have gotten confused over this.

28/10/2001- Added cheat codes. Yes, CHEATS. Hope everyone is happy! And a few little tweaks and clear-ups. Right now this guide is as complete as I ever could have hoped it to be!

31/10/2001- This is the second to last update people! One more update before I announce this complete, so if you have ANYTHING to add you'd best send it very fast indeed!!! I added a NOT TO ASK list, I added a semi-complete detailed Dino Guide which will be complete upon the final update. I have cleared up one or two things, I have tested the cheats (they work!). Again, one more update! This

is going to be so hard to let go, I have thoroughly enjoyed writing and updating this guide. But alas, all good things must come to an end... *cries!*

6/11/2001- OK, this is it. The final update, but what an update! The dino list now includes- yes- LOCATIONS! Now you can know where to find your favourite dinosaurs! originally, I was only going to do the most popular dinosaurs... but in the end I listed locations for all 140 dinosaurs... and my hands hurt!

A couple of the cheats had spelling mistakes (I've had verbal slapped wrists!) and I have corrected them. Some new FAQ questions have also been added.

Can I just say here and now I have loved every minute of doing this guide/FAQ. It is my first big success, and I am so happy to have met most of you. Your support and keen observation have saved this guide a thousand times over. I am proud to have done this guide, but my time with it is at an end. See my final, tearful goodbye at the end of the guide.

5/06/2002- HOLY SHIZNIT AND MANIC SONIC DRIVES! An update after 8 months! It's great to finally return to this guide as it's been my most successful.

Anyway, the purpose is to notify you all of new JP3 Park Builder games, as well as iron out some bugs. Well, most of you cried out for another update so here it is people! Enjoy!

1. LAYIN' DOWN DA LAW!

NO-ONE MAY PUT THIS ON THEIR SITE WITHOUT MY DUE PERMISSION! Failure to do so will result in me getting out the chainsaw which I hold so dear and chopping off hands and fingers!!!

I have had walkthroughs stolen before, but now I am getting nasty! I used to review games, I was a reporter for a website- I know what I have to do if anyone steals my work. And my friends a solicitor (lawyer to americans!). She informs me that if you value the money you earn, you must not steal other peoples works!

2. ABOUT JP3

Jurassic Park 3 did not do very well despite being a million times better than THE LOST WORLD.

But it has spawned a lot of spin-offs, JP3: PARK BUILDER for the GBA being my personal fave.

Yep, think THEME PARK with dinosaurs! It's such a cheap, obvious rip off it HAD to work! it has

given me sleepless nights trying to prevent a full-scale Gigantosaurus rampage and made me laugh

when I find out my mystery DNA is from a T-Rex!

if you like Theme Park or Sim City and have a GBA, this is the game for you. Fun, thought provoking and it really makes you wonder- what would you do if T-Rex's rampaged your park?

3. THE MAIN MENUS

The menu systems are brought up by using L and R.

L= MANAGEMENT MENU

This menu lets you control your park, breed Dinos and exchange Dinos.

MAIN OFFICE: This is where you advertise, save, set your entry fee and sort out the parks transportation system. The heart of the operation.

EXCAVATION: This lets you send out excavation teams to find dino fossils, amber and the like so you can make dinos and extinct animals from ancient eras!

RESEARCH LAB: Check amber/fossils, make dinos, check DNA... the science stuff. (Dinos cost 5000G to make)

DINO ILLUSTRATION: Check dinos you have made. Simple stuff really.

EXCHANGE: Link-up and trade dinos!

R= CONSTRUCTION MENU

This menu lets you actually build your park!

CONSTRUCTION MODE

Lots of little sub menus to construct your park!

--*-*-*-*-*-*-*-*-*-*-*-*-*-*

ROADS: (Speaks for itself)

Vehicle Road= 100G (For your busses to get to and from your gate)

Walking Path= 100G (This is what you'll be laying most of! Pedestrian pathways!)

Rotary= 2000G (For busses to turn- essential but you will rarely need more than one)

--*-*-*-*-*-*-*-*-*-*-*-*-*

FACILITIES: (Lifes little luxuries if you want them!)

Street Lamp= 3000G (You will need some of these, but place them sparingly!)

Water Fountain= 3000G (Use in the centre of a square for added effect!)

Clock Tower= 3500G (Tells the time, but do you want visitors to do that???)

--*-*-*-*-*-*-*-*-*-*-*-*

VEGETATION: (Plants are necessary to you park for all sorts of reasons!)

Tree= 80G (A basic, dull tree. Use to enclose squares and walkways.)

Grass= 90G (Grass. What can you say about long grass?)

Lotus= 110G (A basic, but pretty and uplifting plant for long stretches of path!)

Cycad= 130G (A very big tree, place next to Brachiosaurus pens for added show!)

Ancient Cedar= 1500G (An expensive tree, but place one or two as features...)

Boulder= 180G (It isn't a plant, but protects areas from little escaped dinos.)

Large Boulder= 2000G (Great, impenetrable boulder. Use to protect valuable areas!)

--*-*-*-*-*-*-*-*-*-*-*-*

SYMBOL: (Statues!)

Goddess Statue= 30000G (A religious statue. Use when you got lotsa cash!)

Stone Raptor= 50000G (Expensive stone statue of a Raptor. Your choice...)

--*-*-*-*-*-*-*-*-*-*-*-*

BUILDINGS: (Here we go...)

Hotel= 50000G (Expensive, but necessary! Keep the price fairly low!)

Shop= 40000G (Souvenir shop. Also a good profit-making idea!)

Enclosure= 25000G (Pens to put dinos in.)

RESTAURANTS-

REX Burger= 30000G (A fast-food joint!)

Spino Grill= 48000G (A nice, posh restaurant!)

Pteranodon Cafe= 42000G (A cafe with a lot going for it.)

--*-*-*-*-*-*-*-*-*-*-*-*

REMOVAL: (80G to remove placed items!)

--*-*-*-*-*-*-*-*-*-*-*-*-*-*

FULL MAP

This mode lets you see the island from an arial view. Check out how much land has been used, how much is free, where potential problems are etc.

FACILITY MANAGEMENT

Upgrading facilities is a must for customers. Small, boring stores/hotels/restaurants will not empty consumer wallets. Also change rates, and check out other small options.

4. BASIC MANAGEMENT TIPS

OK, to start you off I'm gonna tell you what to do first, step by step.

- * You start off with a million. Be warned, it don't last long...
- * Send out an excavation team for 3 months to anywhere. they'll find tons of fossils for you to get DNA from!
- * Build a road up from the gate, and fit a ROTARY for the busses to turn.
- * Build a hotel. And a restaurant. Shops at this time are not neccessary!
- * Advertise your park on SEARCH ENGINE REX. It's cheap.
- * Build some walking paths, allowing room for Dino Enclosures. But don't build any enclosures until you have dinos to put in them.
- * If people are coming, build a shop.
- * When excavation team gets back, check their efforts, make some dinos and get them into the park FAST! Advanced Dino Management tips in section 6.
- * Send out excavation team for 1 month anywhere.
- * Spruce your park up with plants and trees.

After this, it's up to you.

5. CONSTRUCTION TIPS

OK, here are some features you might wanna consider.

ROUNDAABOUT

Use: When you have more than one hotel!
Why?: Busses can turn off to other stopping points.
How?: Two rotaries. Simple enough to do.

THE PICNIC SQUARE

Use: To make consumers rest and relax.
Why?: It's pretty and people will stop there to relax.
How?: Place a WATER FOUNTAIN and build WALKING PATH around it.

NATURE WALK

Use: To give visitors exercise!
Why?: Placing food at the end of it brings in money! Also looks nice.
How?: Pathway with plants beside it (about 10-15 path pieces long!). Place a RESTAURANT at the end of the walk. They'll be hungry and buy food and drink!

KIDDIES KORNER

Use: Coz kids come to the park as well!
Why?: Happy kids mean happy parents. Happy people spend happy money.
How?: Build a small 4X4 square of path. Surround with little boulders (or large ones for added security!). Kids will play there. Add a REX Burger there too for extra money making profit! tip- keep it as far from dino enclosures as possible...

TREE MAZE

Use: For pure entertainment.

Why?: People like mazes. They are fun.

How?: Make a multi-path maze (not too complex!). Line the sides with trees. For some extra enjoyment, add a Raptor Statue or Goddess statue in the middle. Happy people.

DINO TRAIL

Use: People are coming to see the dinos dammit!

Why?: Otherwise they can't see the dinos!

How?: Build a basic zoo trail. Put dino enclosures right next to the path. Now add dinos and watch people point, stare and enjoy your dinos!

WATER ENCLOSURES

Use: For water Dinos.

Why?: Otherwise they die very fast.

How? Part of the enclosure must be on land... thats the greatest misconception of all. I mean, would you dive into a pool of carnivourous dinos? Of course not...

6. ADVANCED MANAGEMENT TIPS

- * Keep your entry fee and hotel fee level. 1000G is normally OK for the beginners.
- * Keep dino enclosure security at max to avoid breakouts.
- * Don't place dinos until you are making a profit.
- * Dino rampages are not good news... boulders can protect people.
- * Dying dinos are not good for business so keep them happy and healthy!
- * Ocean animals die fast. So beware of that... they only live 2-3 months...
- * Charge a lot for food. About 1/3 your hotel fee for REX Burger, 1/2 for the grill and cafe.
- * Use my construction tips wisely. They are there to keep people happy and to make you money!
- * Until you are making a good profit, do not place statues.
- * Start advertising on the cheap. Work your way up. The most expensive advertising isn't 100% reliable anyway! Just coz it costs more, doesn't mean it's better value.
- * ALWAYS have your restaurants upgraded to 5*. Hygiene costs, but it emptys walllets much faster!
- * Keep tabs on your shop. If people can't find what they want it's not in it's line up, so build another shop and stock that item they want in.
- * Shop items depend on what Dinos you have! So keep a good eye out... you never know when you might get an unexpected item!
- * Never place carnivores together in the same enclosure, and do not place herbivores in with carnivores (makes sense when you think about it!)
- * You can keep 3 herbivore dinos in the same enclosure, but be careful.
- * Ancient bugs can go anywhere. They only feed on the dinos blood. They don't do much damage. So don't keep bugs in their own enclosure- it's a waste of money!
- * Be wary of T-Rex's and Gigantosaurus. And keep their enclosures at max security.
- * Same for raptors. Be careful. Max security tho doesn't always help... but they are deterred by small boulders! And never place long grass near a raptor pen. Otherwise you won't know they escaped until it's too late!
- * Finally, when you do something right and there are no angry bubbles on people, SAVE! It's hard to keep the fickle public happy. When you do you are on a roll and should save in case something goes hideously wrong!

7. DINOSAUR LIST

Finally, my own list! And it's been HELL! But I am pleased to say for many of you I have given the most asked-for dinos locations where you may find them! Enjoy them...

BTW As for locations, all are accurate. Me and my brother Daniel worked our butts off in research to discover the locations...

As for locations, I split it up into several sections- Canada, USA, South America, Europe, Africa, Asia and Australia. I trust we all know where these locations are.

Dino List

001. Eoraptor
Carnivore 1
Location: South America

002. Herrerasaurus
Carnivore 2
Location: South America

003. Carnotaurus
Carnivore 2
Location: South America

004. Masiakasaurus
carnivore 2
Location: Africa

005. Majungatholus
Carnivore 2
Location: Africa

006. Ceratosaurus
Carnivore 2
Location: USA

007. Coelophysis
Carnivore 1
Location: USA

008. Dilophosaurus
Carnivore 2
Location: USA

009. Allosaurus
Carnivore 3
Location: USA & Australia

010. Monolophosaurus
Carnivore 2
Location: Asia

011. Giganotosaurus
Carnivore 3
Location: South America

012. Acrocanthosaurus
Carnivore 3
Location: USA & Canada

013. Irritator
Carnivore 1

Location: South America

014. Spinosaurus

Carnivore 3

Location: Africa

015. Baryonyx

Carnivore 1

Location: Europe

016. Megalosaurus

Carnivore 2

Location: Europe

017. Yangchuanosaurus

Carnivore 3

Location: Asia

018. Albertosaurus

Carnivore 3

Location: Canada

019. Tarbosaurus

Carnivore 3

Location: Africa & Asia

020. Tyrannosaurus

Carnivore 3

Location: Canada

021. Mini. Tyrannosaurus

Carnivore 1

Location: USA

022. Avimimus

Carnivore 1

Location: Africa & Asia

023. Unenlagia

Carnivore 1

Location: South America

024. Ornitholestes

Carnivore 1

Location: USA

025. Coelurus

Carnivore 2

Location: USA

026. Compsognathus

Carnivore 1

Location: Europe

027. Sinosauropteryx

Carnivore 1

Location: Asia

028. Gallimimus

Carnivore 1

Location: Africa

029. Ornithomimus
Carnivore 1
Location: USA & Canada

030. Struthiomimus
Carnivore 1
Location: Canada

031. Dromiceiomimus
Carnivore 1
Location: Canada

032. Pelecanimimus
Carnivore 1
Location: Europe

033. Mononychus
Carnivore 1
Location: Africa

034. Segnosaurus
Herbivore 1
Location: Africa

035. Therizinosaurus
Herbivore 2
Location: Africa

036. Beipiaosaurus
Herbivore 1
Location: Asia

037. Oviraptor
Carnivore 1
Location: Africa

038. Conchoraptor
Carnivore 1
Location: Africa

039. Troodon
Carnivore 1
Location: USA

040. Velociraptor M
Carnivore 2
Location: Africa

041. Velociraptor F
Carnivore 2
Location: Africa

042. Deinonychus
Carnivore 2
Location: USA

043. Utahraptor
Carnivore 2

Location: Utah, USA (Hmm...)

044. Anchisaurus

Herbivore 2

Location: USA

045. Plateosaurus

Herbivore 2

Location: Europe

046. Massospondylus

Herbivore 2

Location: Africa

047. Camarasaurus

Herbivore 2

Location: USA & Europe

048. Cetiosaurus

Herbivore 2

Location: South America & Europe

049. Amargasaurus

Herbivore 2

Location: South America

050. Saltasaurus

Herbivore 2

Location: South America & Africa

051. Shunosaurus

Herbivore 2

Location: Asia

052. Apatosaurus (AKA Brontosaurus)

Herbivore 3

Location: USA

053. Diplodocus

Herbivore 2

Location: USA

054. Supersaurus

Herbivore 3

Location: USA

055. Seismosaurus

Herbivore 3

Location: USA

056. Barosaurus

Herbivore 3

Location: USA & Australia

057. Brachiosaurus

Herbivore 3

Location: USA, Africa, Australia & Europe

058. Mamenchisaurus

Herbivore 3

Location: Asia

059. Lesothosaurus
Herbivore 1
Location: Africa

060. Scelidosaurus
Herbivore 2
Location: Europe

061. Minmi
Herbivore 1
Location: Australia

062. Stegosaurus
Herbivore 1
Location: USA

063. Mini. Stegosaurus
Herbivore 1
Location: USA

064. Kentrosaurus
Herbivore
Location: Australia

065. Wuerhosaurus
Herbivore 2
Location: Asia

066. Tuojiangosaurus
Herbivore 3
Location: Asia

067. Yingshanosaurus
Herbivore 2
Location: Asia

068. Edmontonia
Herbivore 3
Location: Canada

069. Polacanthus
Herbivore 2
Location: Europe

070. Nodosaurus
Herbivore 2
Location: USA

071. Saichania
Herbivore 2
Location: Africa

072. Ankylosaurus
Herbivore 2
Location: USA & Africa

073. Euoplocephalus
Herbivore 3

Location: USA & Canada

074. Hypsilophodon

Herbivore 1

Location: Europe

075. Othnielia

Herbivore 1

Location: USA

076. Muttaburrasaurus

Herbivore 1

Location: Australia

077. Heterodotosaurus

Herbivore 1

Location: Africa

078. Iguanodon

Herbivore 2

Location: USA & Europe

079. Ouranosaurus

Herbivore 1

Location: Africa

080. Altirhinus

Herbivore 1

Location: Africa

081. Camptosaurus

Herbivore 2

Location: USA & Europe

082. Edmontosaurus

Herbivore 2

Location: USA

083. Hadrosaurus

Herbivore 2

Location: USA

084. Parasaurolophus

Herbivore 2

Location: USA & Canada

085. Maiasaura

Herbivore 2

Location: USA

086. Corythosaurus

Herbivore 2

Location: USA & Canada

087. Nipponosaurus

Herbivore 1

Location: Asia

088. Hypacrosaurus

Herbivore 3

Location: USA

089. Lambeosaurus
Herbivore 3

Location: Canada

090. Stygimoloch
Herbivore 1

Location: USA

091. Stegoceras
Herbivore 1

Location: USA & Canada

092. Pachycephalosaurus
Herbivore 2

Location: USA & Canada

093. Homalocephale
Herbivore 2

Location: Africa

094. Goyocephale
Herbivore 2

Location: Africa

095. Psittacosaurus
Herbivore 1

Location: Africa & Asia

096. Protoceratops
Herbivore 2

Location: Africa & Asia

097. Chasmosaurus
Herbivore 2

Location: Canada

098. Styracosaurus
Herbivore 2

Location: USA & Canada

099. Centrosaurus

8. FAQ & CODES

Oh sweet mother Mary! I mention to people I am doing this FAQ and they bombard me with a variety of questions!

Q. Can you emulate it?

A: Yes, but remember people- it's ILLEGAL! So don't ask for any roms from me ever, as I will not supply them.

Q. Can you speed the time lapse up?

A: Yes, go to MAIN OFFICE and crank up the time speed.

Q. How many dinosaurs are there?

A: 140 in total, over six catagories.

Q. Can I get out of 1,000,000G debt?

A: A MILLION?!?! Thats game over pal. Sorry.

Q. Will JP3:PB be released on PC/PS2/GC/X-Box?

A. Go to Section 12. And enjoy! YEE-HAW!

Q. Why do some veggie dinosaurs fight?

A. Overcrowding- ship some out to new enclosures.

Q. I can't build any more enclosures! HELP!

A. I dunno why, but I can't build more than 8 either! Its just a restriction in the game...

Q. Why will noone visit my hotel?

A. If you go to Disneyland, does everyone have to stay in that cool hotel?

No. But those that do demand the best... lvl 5 helps too!

Q. How do I avoid hurricanes?

A. You don't unless there is a cheat to stop them. Since they are random events if you save often and it totally destroys your park, restart. Thats the best advice I can give anybody...

Q. Are you sure walking around works? The manual says you must use busses to be able to view dinos!

A. Since I'm now on Year 15, take it from me- you can use busses, but pathways are a little bit cheaper, and they do work!

Q. Dinos have broken loose! What do I do?

A: If it's some herbivores or bugs don't panic. If it's a T-Rex, raptor or a gigantosarus it's Game Over unless you have got superb security!

Q. Any secret name entry cheats?

A: Will let you know when I find some genuine ones... but so far- NOTHING!

Q. Why do angry people leave?

A: Is that a question? Umm... because they are angry? Learn from their thought bubbles. You can correct those problems.

Q. How do you finish the game?

A: Thnx to MikeTheMan for telling me the game automatically ends after 20 years and I have reached 10! Halfway there...

Q. I noticed theres a male and female velociraptor- can you breed them?

A: Much like Nidorans in Pokemon red/blue/yellow.... no.

Q. What happens really if a dinosaur escapes?

A: Err... I dunno coz I've never let it happen! If anyone has been wierd enough to let their dinos escape, let me know...

Q. People invaded my island. What happened?

A: Umm... never seen that, but it might be thieves trying to get your dino DNA to start a rival park (Hint- JP1 and JP2!). Deter them by blocking their docking points with Large Boulders.

Q: I've taken all your hints and I still get into serious debt. HELP!

A: Take these hints in MODERATION. Don't place them all at once... gently flesh out your park over time. Slow and steady wins the race!

CODES!

OK, I found one myself but the majority of these are from GrindKing1989. Thanks very much mate! Enter these as park names.

Isla Nublar - Start with blank terrain.

Zero-Park - Start with no dinosaur DNA

Bonus-Park - Start with loadsa money!
LuckyBus-20 - Start with 20 busses!
Items-park - Start with all shop items ready for sale!
love-park - Everyone will love your park!

9. CONTACT ME!

OK, Stalkers do not read this section coz if you persue me I will have to resort to nasty things like trojans to get rid of you... don't waste my time.

OK, my e-mail address is kamikazekintaro@aladdinscave.net - I have rules about mailing me to help me filter the ton of mail I get daily!:-

- *No flames. All flames get directed either to my deleted items folder or they are posted in my forums for people to take the mickey out of!
- *Don't say, "Sorry to waste your time but" or something similar to it. You are not wasting my time. I enjoy getting your mail and I enjoy replying. It's fun! If you need the help, I am always more than willing to give it.
- *Please for gods sake don't abuse me. If I do not reply to your mail you either flamed me and got ignored or it's been answered in the FAQ in this walkthrough! Phrases like "You b*****d you never replied to me!" are generally put in my forums and they are pointed and laughed at!
- *Do not use my address to sign up to anything- you won't believe how many times people have done that and it pisses me off to a point I can't describe. I will report you to wherever you used my e-mail address and you will be removed!
- *Finally, do NOT ever ever EVER use my address to spam my inbox with useless junk I won't ever read. One, stealing e-mail addys like that is an offence! And two, I get 100 mails a day and I don't need any more!!

10. QUESTIONS NOT TO ASK ME PLEASE!

I am forced into doing this to save me valuable inbox space. I get asked some of the most stupid questions, and unfortunately I have stopped finding them amusing! No offence meant to anybody, but I try to reply to every e-mail and I am getting tired...

- * DON'T ASK if Park Builder will appear on any other console. It looks like it is. Section 12 has all I know so far. Gawp, stare and spread wild and unfounded rumours.
- * DON'T ASK me for any reference to emulated copies or save files. I am partial to SNES and Genesis emulatiomn, but nothing after that. It's illegal, wrong and it's killing the games industry.
- * DON'T ASK me to do detailed step-by-step guides for individuals anymore. It takes up valuable time, and since I am a web designer, I need to start making time for myself.
- * DON'T ASK for cheats. They are up now. See? I have tested them. They work. And they work amazingly well as well! The Loadsa Money cheat works amazingly well! Maybe too well...
- * DON'T ASK me ever again why you are losing money. First up, unless you can be more accurate I can't help. And secondly, all your facilities cost money every month. Learn from this.

- * DON'T ASK for where you can find Dinos. This has been the main focus, I have updated with a bigger Dinos list with more detail. Please do not ask for this ever again, you have it.
- * DON'T ASK me to help you with a Park Builder fansite. I do not do freebies anymore. I am a web designer, freebies are killing me and I cannot afford to do them anymore. Sorry!
- * DON'T ASK ever again if you can upload this onto your website. I am finding it hard to keep track of it now... unless you are a qualified cheats site you may NOT use this on your site. A thousand apologies...
- * DON'T ASK me a question and proceed with flames (you know who you are! Yes... you're in my mutants list!) as you will be totally ignored and reported to your ISP. And I have ruined a lot of people this way!
- * DON'T ASK personal questions. This seems obvious but you would be very surprised how many times people ask for my telephone number, address etc. You will be totally ignored. Full stop!

 11. CREDITS AND MUTANTS LIST

CREDITS:

DANIEL & CHRISTOPHER REED

Coz they're my brothers and I love them. They inspire me. Daniel especially as he's a big JP fan and forced me into doing this FAQ!

HR GIGAS

For those smutty Street Fighter pics which keep me awake laughing!!!

SANJEET SIRAH

Another buddie, but we've been pals for ages now. He's cool!

EWOUUD VAN HEEREBEEK

Yet another buddie- thanks for making me waste so much time chatting to ya!

LAUNA WILLIAMS (Juggernaught)

My cousin. Peace!

DANNY KOBALÉ

My friend and webhost- cheers pal!

BAHAMUT986/HAUNTER986

For completing the dinos list.

BRIAN PETTY

For the info regarding JP3PB on other systems! Thanks mate!

GRINDKING 1989

Cheats are great thankyou!

NINTENDO

Coz the GBA rulez!

YOU

For reading this guide.

ME

Coz I wrote it and deserve credit. Oh, bite me.

MUTANTS:

YOWZER42

Viruses are BAD! You nasty person. Your ISP knows BTW.

FINALFALLACY21

I have better things to do than read daily rantings and flames.

DARKSTAR

Racism might be freedom of speech but I have the right not to hear it thankyou.

PISTOLA

Don't keep complaining that I keep outsmart you. I usually do that to everyone.

WYSIWYG2001

I have family who died in NY. Your ICQ convo about how cool it was has been posted everywhere, with your IP address. You deserve to be hacked.

12. JURASSIC PARK BUILDER ON OTHER CONSOLES

SOURCE: <http://www.dansjp3page.com/index2.asp>

Big Thanks go to Brian Petty for sending me this info. It seems at E3 a new Park Builder for X-Box, Gamecube and PS2 is well on it's way, most people missed it however and there isn't much to go on because it was sorely overlooked.

The screenshot looks VERY hot, and if/when it's launched, you can bet your last dollar that I will do a FULL GUIDE when it is released. I will let you ALL know when there is more information available. Meanwhile, go to that site - and gawp at the great screenshot that is there, and pray to the highest forms of gaming life that we will get it before the year is out!

13. THE FINAL FAREWELL

So many people have mailed me with comments like, "You're leaving? Why?" and "But what if the FAQ isn't complete?" and so on. I am happy to know so many of you have managed to learn from this FAQ, and pleased so many of you come back to it time and time again.

truth is, if I could I would always update this guide monthly. But the sad fact is I do not have the time. I am a web designer and it's how I make my living I'm afraid. I need to earn money! It's a ver
