Hi, and welcome to my One Piece FAQ. You're free to use this guide for personal use, and if you feel like reproducing it elsewhere, ask for permission first (it's common courtesy) or else I'll use the power of my "FAQ FAQ" fruit to freak you out! Maybe not.

1. Introduction

This game is based on One Piece, an excellent manga (and not so good anime) series about a boy called Luffy D Monkey who wants to get the legendary treasure One Piece and become the king of pirates. About the game, it's an action game (almost 3d) with Super-Deformed characters (ain't them cute?). By the way, it's a version of the "One Piece Ocean Dream" PSX game (thank god it's not a card game anymore)

Let's move on!

2. Basics

A : Uses the 1st slot equipped attack
B : Uses the 2nd slot equipped attack
A + B: Uses the 3rd slot equipped attack
L/R: Changes between allies (in battles with more than 1 character)
Select: In the pre-battle menu, allows to change slot attacks

Sometimes, performing the A+B move near a enemy will trigger a 'special animation' and you'll see the portrait of your attacking character.

Rarely, when performing the A+B move near a CPU-controlled ally, a simultaneous 'special animation' will trigger: a Mix Up. It's an annoyingly hard to get feature (see the Mix Ups section for more).

To advance through the adventure, you must get cards for your character by playing the "mini-game" of selecting the charas/objects whose silhouette is showed by the card. To develop the story, you'll have to get Story cards, and to get more moves, you'll have to get Attack cards.

There are various types of battles in the game: defeat all the enemies, destroy all the trees/boxes, protect animals/barrels, get the hidden treasure, solve the puzzle (the 'dash' some characters have is quite useful here) and solve the quiz game, though the latter two are only optional (you can complete the game without playing these).

3. Moves

You'll get almost all the characters in the first minutes of the game. The eighth character (Bon Clay, Bibi or Ace) will only stay with you for a short amount of time.

Here's the movelist for the characters:

Luffy D Monkey

5. Mix Ups

To perform a Mix Up, stand for quite a long time near a CPU-controlled ally (three or four squares away will do the trick) who is currently fighting (you needn't to), until lightbulbs appear over both your heads. Then, press A+B (if you are in the middle of a combo, it won't work), and you'll get the Mix Up. The lightbulbs only stay there for two or three seconds, so hurry up!

These are all the combinations for the Mix Ups. The eighth characters (Bon Clay, Bibi and Ace) don't have Mix Ups.
