Feebas is an extremely rare Pokison. He can only be found in the water on Route 119. Route 119 is found just before entering Fortree City. You can only catch Feebas using Rods. ALL RODS WORK. This includes using the Super Rod, Good Rod, and Old Rod. Using Surf does NOT work.

Milotic is not a catchable Pok駑on. You can only obtain Milotic be evolving Feebas. Read Section D for more information on how to evolve Feebas into Milotic.

*****		

As I said before, Feebas is an extremely rare Pokkkon. You can't just go up to the water and fish, you must follow certain steps to get this rare Pokkkon.

Firstly, the Dewford Phrase ("trendy phrase") in Dewford City deals with where on Route 119 Feebas is found. There are only 6 random tiles that Feebas is found on. WHAT IS A TILE? A tile is the small section of land that your character stands on. The game is simply made of tiles. Only 6 of these tiles contains Feebas. Now, back to the Dewford Phrase, every time this phrase is changed, the 6 tiles are randomly changed. There is no possible way to find out which these of these 6 tiles are. You must simply fish on each tile until you find him. You can surf into the water, and then fish while your in the water.

Now, if you know someone who caught a Feebas, asking them, "What phrase did you have for the Dewford Phrase?" is absolutely pointless. The 6 tiles are ALWAYS random, even if the phrase is the same as someone else had.

You can use any type of Rod to catch Feebas. Although, I suggest using the Old Rod, so then you will only need to press A once when you have a bite, as opposed to pressing A more than once for using either the Good Rod or the Super Rod. Using surf and swimming around in the water does not work.

Rumors have it that the weather effects if Feebas is their or not. This rumor is NOT true, rain or shine, Feebas will always be in 6 of the tiles on Route 119.

When you start to fish, make sure you have room in your box in your PC, and make sure you have PokHalls to catch Feebas (don't worry though, he's really easy to catch). You may not even need to hurt Feebas, I just threw a Ball at him right away and he was caught on the first try. I suggest using a Ultra Ball or a Net Ball for good results. Make sure your using a Rod. Fish on every tile AT LEAST 3 times, I suggest trying 3-5 times on every tile. To make sure you don't miss a tile, try fishing in a pattern, such as this:

Now, when your looking, there are a hundreds of tiles. PATIENCE IS A VIRTURE!!! When I caught my first Feebas, it probably took around 4 hours total. Some get lucky and find it right away, and others are not so lucky and end up searching for hours. But it definitely pays off when you find him. Once you find the tile he's in, he will be in that same tile forever until the Dewford Phrase is changed. Yesthe Dewford Phrase does change by itself every once in a while, you can also change it by yourself. If you get tired of looking, just save the game where your at, then do some more fishing later.

As I said before, how Feebas can be found on the same tile you find him in forever (until Dewford phrase is changed), other pokemon will be in that same tile too, so don't get worried if he doesn't attack you on your second or third try after you've found Feebas. Just make sure you at least get a female Feebas, so then you can breed it and then you can definitely get as many as you want.

****	**																														

Now, a lot of you are saying, "Eew, Feebas is just a ugly fish, why would I want him?" Well, firstly you want him so you can fill your Pok颯ex, and some of you want him/her because of his/her evolution, Milotic.

Feebas evolves very differently from other Pok**ﷺ**on. Instead of evolving at a specific level or evolving because of a stone, Feebas evolves by getting his/her beauty level up to 170.

How do you get his/her beauty level up to 170? Well, your Feebas has to have a specific nature. The best natures to have are Quiet, Rash, Modest, or Mild. Other natures work too, except for Adamant, Careful, or Impish. Those 3 natures will accept blue or indigo Pok顧locks, BUT, they dislike the taste, resulting in the beauty level not rising as much as it would have otherwise. BLUE or INDIGO Pok饕locks are the only kind of Pok顧locks that raise a Pok驚on's beauty level. If you only have a Feebas with one of the incapable natures, (as listed above) that's where you get your female Feebas and start breeding her, until you do have a Feebas with a capable nature. Once you have a Feebas with a capable nature, feed him/her a lot of Blue and/or Indigo Pok顧locks. Once your Feebas's Beauty level is maxed out, raise it one level and it will evolve into a Milotic.

What berries make blue and indigo Pok $e^{1}$  In the chart (below) should help you determine what berries to blend to make blue and indigo Pok $mathat{B}$ locks.

(The higher the level, the more effective the  ${\tt Pok}{\textstyle{\fbox{\sc lock}}}$  is)

```
BLUE-
Level 10: Chesto Berry
Oran Berry
```

Level 25: Wiki Berry

INDIGO-Level 10: Lum Berry

> Bluk Berry Wepear Berry

Level 25: Kelpsy Berry Hondew Berry Cornn Berry

Level 50: Pamtre Berry

Here is a list of all the moves that Feebas and Milotic learns, along with all the Tm's and Hm's that you can teach them.

FEEBAS:

MOVES-Splash: Lv. 1 Tackle: Lv. 15 Flail: Lv. 30 TM'S-TM03: Water Pulse TM06: Toxic TM07: Hail TM10: Hidden Power TM13: Ice Beam TM14: Blizzard

TM17: Protect TM18: Rain Dance
