

Pokemon Ruby/Sapphire Action Replay V.3 Codes

by loadingNOW

Updated to v3.4 on Feb 8, 2004

This walkthrough was originally written for Pokémon Ruby on the GBA, but the walkthrough is still applicable to the GBA version of the game.

Pokémon Ruby & Sapphire USA Action Replay V.3 Codes FAQ
Ver 3.4

0. Version History, Copyrights & Special Notes.

1. Action Replay V.3 Codes.

1.0 Master Codes.

1.1 Pokemon's Data Codes.

1.1.1 Always Male/Female Codes.*

1.1.2 Always Maxed Genes Codes.*

1.1.3 Pokerus Code.*

1.1.4 Select Ability Code.*

1.1.5 Always Shiny Display Code.*

1.1.6 Always Shiny Code.*

1.1.7 Day Care Codes.

1.1.8 Pickup Ability to Everyone Code.*

1.1.9 Select Personality Codes.*

1.2 Pokémon Encounter Codes.

1.2.1 Wild Pokemon Modifier Codes.*

1.2.2 Wild Pokemon's Level Modifier Codes.*

1.2.3 Route 101 Pokemon Modifier Codes.*

1.2.4 New Wild Pokemon Modifier Codes.

1.2.5 New level Modifier Codes.

1.2.6 New Genes Maxed Out Code.

1.3 Item & TH/HM Moves Codes.

1.3.1 Unlimited Items Code.*

1.3.2 Make Pokémon learn any TM-HM Codes.*

1.3.3 Make HM Moves erasable Code.*

1.3.4 PC Items Codes.

1.3.5 Secret Base Items Codes.

1.3.6 Bag Items Codes.

1.4 Miscellaneous Codes.

1.4.1 Unlock Full Pokedex Codes.

1.4.2 Mirage Island Code.*

1.4.3 Southern Island Event Codes.

- 1.4.4 Feebas Tiles Code.*
- 1.4.5 All badges, Pokedex, Pokenavi... Code.
- 1.4.6 Money Code.
- 1.4.7 Walk Through Walls Code.*
- 1.4.8 Secret Trainer ID Codes.*
- 1.4.9 All Pokémon in Pokedex Codes.
- 1.4.10 All Trainer in Trainer's Eyes Codes.
- 1.4.11 Share Experience After Battle Codes.
- 1.4.12 Trainer Card's Stars Codes.
- 1.4.13 Trainer Card's Back Codes.
- 1.4.14 Fast Egg Hatch Code.
- 1.4.15 Immediate Battle Code.
- 1.4.16 Select Battle Type Codes.
- 1.4.17 Find Feebas Seed Code.*
- 1.4.18 Always Catch Pokemon Code.*
- 1.4.19 Steal other Trainer's Pokemon Code.*
- 1.4.20 Wild Lati@s Codes.*
- 1.4.21 Battle Tower Code.*

1.5 Lavaridge's Egg Code.

- 1.5.1 Lavaridge's Egg Enabler Code.*
- 1.5.2 Lavaridge's Egg Modifier Codes.*

2. Action Replay (and GSA) Codes for Version 1.2 or lower.

2.0 Master Codes.

2.1 Pokemon's Data Codes.

- 2.1.1 Always Male/Female Codes.*
- 2.1.2 Always Maxed Genes Codes.*
- 2.1.3 Pokerus Code.*
- 2.1.4 Select Ability Code.*
- 2.1.5 Always Shiny Display Code.*
- 2.1.6 Always Shiny Code.*
- 2.1.7 Day Care Codes.
- 2.1.8 Pickup Ability to Everyone Code.*
- 2.1.9 Select Personality Codes.*

2.2 Pokémon Encounter Codes.

- 2.2.1 Wild Pokemon Modifier Codes.*
- 2.2.2 Wild Pokemon's Level Modifier Codes.*
- 2.2.3 Route 101 Pokemon Modifier Codes.*

2.3 Item & TH/HM Moves Codes.

- 2.3.1 Unlimited Items Code.*
- 2.3.2 Make Pokémons learn any TM-HM Codes.*
- 2.3.3 Make HM Moves erasable Code.*
- 2.3.4 PC Items Codes.
- 2.3.5 Secret Base Items Codes.

2.4 Miscellaneous Codes.

- 2.4.1 Unlock Full Pokedex Codes.

- 2.4.2 Mirage Island Code.*
- 2.4.3 Southern Island Event Codes.
- 2.4.4 Feebas Tiles Code.*
- 2.4.5 All badges, Pokedex, Pokenavi... Code.
- 2.4.6 Money Code.
- 2.4.7 Walk Through Walls Code.*
- 2.4.8 Secret Trainer ID Codes.*
- 2.4.9 All Pokémon in Pokedex Codes.
- 2.4.10 All Trainer in Trainer's Eyes Codes.
- 2.4.11 Share Experience After Battle Codes.
- 2.4.12 Trainer Card's Stars Codes.
- 2.4.13 Trainer Card's Back Codes.
- 2.4.14 Fast Egg Hatch Code.
- 2.4.15 Immediate Battle Code.
- 2.4.16 Select Battle Type Codes.
- 2.4.17 Find Feebas Seed Code.*
- 2.4.18 Always Catch Pokemon Code.*
- 2.4.19 Steal other Trainer's Pokemon Code.*
- 2.4.20 Wild Lati@s Codes.*
- 2.4.21 Battle Tower Code.*

2.5 Lavaridge's Egg Code.

- 2.5.1 Lavaridge's Egg Enabler Code.*
- 2.5.2 Lavaridge's Egg Modifier Codes.*

3. Thanks.

0. Version History, Copyrights & Special Notes.

- V1.0 : 1st release.
- V1.1 : Made some corrections, added Secret Trainer ID and All Pokemon in Pokedex Codes.
- V1.2 : Added Trainer's Eyes Codes.
- V1.3 : Added Share Experience After Battle Codes.
- V1.4 : Added Trainer Card's Stars and Trainer Card's Back Codes.
- V1.5 : Corrected Sapphire Master Code (should work now).
- V1.6 : Added Fast Egg Hatch Code.
- V1.7 : Corrected Max Genes Codes.
- V1.8 : Added PC Items Codes, Lavaridge's Egg Codes.
- V2.0 : Added Route 101 Pokemon Modifier and Secret Base Items Codes, made a lot of changes/corrections...
- V2.1 : Added Pokerus Code.
- V2.5 : Added Select Ability Code, Always Shiny Display Code, Always Shiny Codes, Immediate Battle Codes, Select Battle Type Codes, Find Feebas Seed Code, Special Note 4, and made some corrections.
- V2.6 : Changed the Find Feebas Seed Code to a *way easier* one to use, added Day Care Codes, added some correction to the Feebas Tiles Code.
- V2.7 : Our Mirage Island Theory was proven false. We apologize, and corrected it. We also made a new (working) code for Mirage Island. We also found out that the Feebas Tiles could change EVERY DAY, at random.
- V2.8 : Added Pickup Ability to Everyone Code, and a link to our Feebas Tile Finder (see 1.4.17 Find Feebas Seed Code)
- v2.8b: Fixed a mistake with Pickup
- v2.8c: Added a note about GamesharK/Action Replay v3

- V2.9 : Corrected some errors, added Select Personality Codes.
- V3.0 : Re-Release with AR v.3 Codes. Added New Wild Pokemon Modifier Codes, New Level Modifier Codes, and New Genes Maxed Out Code for AR v3. Added "All Genes Maxed Out" in the Always Maxed Genes section, Always Catch Pokemon codes and Steal other Trainer's Pokemon for both v1/2 and v3.
- V3.1 : Added Wild Lati@s Codes for both AR V1/2 and V3.
- V3.2 : Corrected the "Steal other Trainer's Pokemon Code." for ARV3, changed the Pokerus Code.
- V3.3 : Verified all the codes, and corrected the non-working ones, and added the Battle Tower Code.
- V3.4 : Corrected an error in the "new level modifier" and the "new genes modifier" codes. Changed the Always Shiny Code so the "Shiny Hack" eggs gets deleted when you have finished with the code.

This document is (c)2003 by Pokemonhacker and loading/pika (hen2k@gmx.de). We worked hard to create these codes so please dont steal them! All trademarks and copyrights contained in this document are owned by their respective trademark and copyright holders. If you plan to use theses codes in your FAQ/Website, give credits where it's due. And we do NOT authorize people to use these codes for any commercial use.

Before emailing please make sure you are using a code suited for your Version. If you bbought your ActionReplay recently chances are you need 1.3 Codes if not and you didn't update for a long time you might have to use .2 Codes.

Special Note 1 : All these codes are in Action Replay format, and work for both Pokémon Ruby and Sapphire games. Most of these codes use a feathure that exists ONLY in the Action Replay. That means these codes won't likely be ported to CBA (Code Breaker Advance), unless they upgrade their device...

Special Note 2 : We put some informations about Nintendo being able to spot if you hacked the game. If you plan to Link you game to the NGC, or transfer Pokémons with the next Pokémon game, don't use codes that Nintendo can spot. Remember : cheating is bad :)

Special Note 3 : These codes shouldn't erase your data nor turn your Pokémon into 'Bad Eggs'. However, if this (or any other problem) happens, we cannot be held reponsible for any dammage done to your cartridge, your AR, your GBA, or yourself. USE THESE CODES AT YOUR OWN RISK.

1. Action Replay v.3 Codes.

!!! IMPORTANT NOTE !!!

These codes do ONLY WORK on Action Replay V.3 if you're using
version .2 or lower refer to the 2nd section of the faq
If you have the cable you may update your device for free,
just get the update from www.codejunkies.com

1.0 Master Codes.

You have to enter these codes in your Action Replay / Gameshark in order
to use the other codes of these FAQ.

Pokemon Ruby Master Code :

DE00AAFD 2EBD05D0
530823D9 16558191

Pokemon Sapphire Master Code :

DE00AAFD 2EBD05D0
B4564EFE 23F44BF2

1.1 Pokemon's Data Codes.

1.1.1 Always Male/Female Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been
hacked.

Enter one of these codes and you'll set the gender of the next wild Pokémon
you'll see (if it has any gender or course).

Note : It can still be Shiny, with a chance of 1/8192.

Always Female Pokémons Code :

0C3D5307 ABB44D7C
78DA95DF 44018CB4

Always Male Pokémons Code :

0C3D5307 ABB44D7C
141BB87C 83D7018F

1.1.2 Always Maxed Genes Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked.
You can only enter one of these code at the same time.

Gene Maxed Out (value of 31) for wild Pokémons:

HP Gene :

28330312 B9E777D4

141BB87C 83D7018F

Attack Gene :

BD34E89C 46AC3FDD

141BB87C 83D7018F

Defense Gene :

C5F9E49A 1DC472F1

141BB87C 83D7018F

Speed Gene :

05DF5C70 440053F5

25260C8D 25207DAE

Special Attack Gene :

0526A00A F717AC06

141BB87C 83D7018F

Special Defense Gene :

3362EF2D D6B8C92E

141BB87C 83D7018F

All Genes Maxed Out :

AB5FF5EF A7716843

4B5258BD DBEA8F6E

1.1.3 Pokerus Code.*

If you use theses codes, Nintendo will *not* that your Pokémon has been hacked.

Use this code to make ALL your Pokemon catch the Pokerus after a fight.
(even if they already caught it)

C784FC61 63EBC3B6

117279A9 85478753

And here are some explanations about the Pokerus :

The Pokerus is a virus that infects Pokemon. But it's not a bad thing : when a Pokemon has caught the Pokerus, the Effort Values it gains after a battle are doubled ! You see if your Pokemon has the Pokerus by looking at its summary. If you see "STATUS PKRS" under its picture, that means your Pokemon is infected.

To make the Pokerus spread, take the infected Pokemon in your party, and make some battles. After each battle, the other Pokemon will have a chance to get infected by the virus.

The virus will disappear after about four days. At this moment, the "STATUS PKRS" will be gone, but you'll see a black dot to the left of its level's number. That means three things :

- this Pokemon will never be able to be infected again,
- that it'll stop to infect other Pokemon,
- that its EV gains are doubled.

If you put an infected Pokemon in the PC, the virus will not spread, but the infected Pokemon will not loose its Pokerus Status.

There are two ways to get infected by the Pokerus :

- Find a RL Friend whose Pokemon has caught the Pokerus, and ask him to give you one of his infected Pokemon. Make the virus spread to your Pokemons, and then give him his Pokemon back.
- Make a lot of battle. After a battle, you have 1 chance out of 21845 (more precisely 3 chances out of 65536) that one of your Pokemon get infected by the Pokerus. This is very very rare. As a matter of comparison, you have 1 chance out of 8192 to find a shiny Pokemon.

1.1.4 Select Ability Code.*

If you use theses codes, Nintendo *might* know that your Pokémon has been hacked.

You might know that each Pokemon has 1 or 2 abilities (Pick Up Items, Run Away...).

You can't give a Pokemon an ability that he can't have, but you can choose which ability you prefer when a Pokemon that has 2 abilities is created.

Use this code to get the 1st ability :

1801D754 AFDD78F8
8E883EFF 92E9660D

Use this code to get the 2nd ability :

1801D754 AFDD78F8
AD86124F 2823D8DA

If a Pokemon has only 1 ability (most of them do), these codes won't do anything.

1.1.5 Always Shiny Display Code.*

If you use theses codes, Nintendo will not know that your Game has been hacked.

Choose either one of these codes :

- Switch Shiny/Normal Colors in Battle :

With this code, all "normal" Pokemon will look Shiny, and all Shiny Pokemon will look normal during battles. They'll go back to normal once the code is off.

9C9A6FEF 898BA04C
B9D6A4E9 F3B94D86

We choose to make the Shiny Pokemon become normal so you can still find (and catch) them during the game.

- Make all Pokemon have Shiny Colors in "Summary" :

92565F8E 37F62000
BCDCB406 2F2FD763

With this code, all Pokemon will look Shiny when you look at them using the "Summary" Menu. They'll go back to normal once the code is off.

1.1.6 Always Shiny Code.*

If you use these codes, Nintendo *might* know that your Game has been hacked.

It's kinda hard and long to make this code work, so be very careful when using it.

It might destroy your game, so please follow the steps one by one !

!!!

We made this code because it was funny to do it. We won't offer ANY SUPPORT for it. So, if you can't make it work, just don't use it.

And if it destroyed your game, don't blame us.

!!!

This code will NOT WORK with any other Type 6 code, which are the codes that let you choose which Pokemon you encounter in the wild.

HOWEVER, you can get ANY SHINY POKEMON if you do the following :

- Use the Lavaridge's Egg Code to get the Egg of the Pokemon you want, but don't make it hatch yet !!! Save your game.
- Now use the Fast Egg Hatch Code, move one step, and if the Egg didn't hatch, save your game. Repeat until the Egg hatches, and reload your last save.
- Follow the Steps 1-6 (see below) (or steps 5-6 if you have already done 1-4), and make the Egg hatch (by walking a bit).

The Pokemon you chose will be Shiny!

*Step 0 (only if you want to catch Pokemon in battle) :

If you are going for a Shiny rampage, you should have something like 99 Master Balls on you. You will only be able to get the Shiny Pokemons one by one, so it could be better if you get them on your 1st try. Use the code provided in this FAQ (or in mastersord's FAQ) to get them.

*Step 1 :

Turn on the GBA and launch the game without codes.

Make sure you have the 1st slot of your *1st* Pokemon's Box free (in the PC).
Make sure you have in the 2nd slot of the *1st* Pokemon's Box a Pokemon YOU CAUGHT IN THE WILD YOURSELF.

!!!!!!

IF YOU DON'T HAVE A POKEMON YOU CAUGHT YOURSELF IN THE 2ND SLOT OF THE 1ST POKEMON'S BOX, THESE CODES WILL MESS YOUR GAME.

!!!!!!

Turn off the GBA.

*Step 2 :

Turn on the GBA.

Enter these codes in your AR :

976D45AA 70DED391
7C2FA520 AB2B1F18
95B5736A 9A869755
D81AA0D4 AD38898D
3C82432D 373FA918
5241E50F 5AF197B8
07074F51 2D5383FE
4D44B5ED CBA1B894
63E57C61 62BECFC3

Start the game with these codes ON.

Load your game.

Save your game.

Turn off the GBA.

*Step 3 :

Turn on the GBA.

Enter these codes in your AR :

06DDDF96 7C0A8B7E
B36286AE A534289E
4F939A11 40B3158B
F888BD99 2AB439D3
A5590580 6662BF8F
27F0C5E9 303157D9
2BD4B84A D8920C27
F47F7503 7B5DD639
6107155D E974D81C
060683E0 FDA7DFEE

Start the game with these codes ON.

Load your game.
Save your game.
Turn off the GBA.

*Step 4 :

Turn on the GBA and start the game without codes.

Load your game.

Now look in your PC. You'll see a strange Egg in the 1st slot of the 1st box. It'll be named "Shiny Hack".

DONT'T MOVE IT, DON'T LOOK ITS SUMMARY.

Just check it's there. If it isn't, put whatever Pokemon you want in the 1st slot, then move it again to free the 1st slot, then go back to Step 2.

Turn off the GBA.

Now you have created the Shiny Hack Egg. To find Shiny Pokemons, you have to have it in the PC, in the 1st slot of your 1st box, then do steps 5-6. You won't have to redo steps 1-4, unless you loose the Shiny Hack Egg. If you move this egg, the code following codes will crash the game, and you'll have to go back to step 1.

*Step 5 :

Turn on the GBA.

Enter these codes in your AR :

835D1A4F E96484A8
C4536904 F823DE96
10AB0A07 5E2BFCDB

Start the game with these codes ON.

Load your game.

(You'll see your Trainer Name is messed up : don't worry !)

Save your game.

Turn off the GBA.

*Step 6 :

Turn on the GBA.

Enter these codes in your AR :

DECA073C C4CDEFBC
044E75ED E19D9470

Now the next Pokemon that will be created (wild, egg..) will be always Shiny. THIS ONLY WORKS FOR THE 1ST POKEMON THE GAME CREATES.

IF, AFTER THAT, YOU TRY TO ENCOUNTER A WILD POKEMON, CREATE AN EGG (BY BREEDING), MAKE AN EGG HATCH, OR RECEIVE A POKEMON OR AN EGG FROM SOMEONE, THE GAME WILL CRASH!!!

It actually means you can :

- Find a wild Pokemone ONCE, then save your game.

- Receive a Pokemon from someone ONCE, then save your game.
- Receive an EGG from someone ONCE, then save your game.
- Put 2 Pokemon in the Daycare (to make them breed) then save your game.
- Make an EGG hatch, then save your game.

Once you've made one of these, you'll see that your Trainer Name's is back to normal :

THAT MEANS THE NEXT TIME THE GAME CREATES A POKEMON, THE GAME WILL CRASH IF YOU HAVE THE CODE ON.

So save your game, and turn off the GBA!

*Step 7 :

Now, if you want to catch more Shiny Pokemon using this code, just redo steps 1-6.

Else, if you have finish, do the following :

Turn on the GBA.

Enter these codes in your AR :

5E753B0E AD4D2313

3D368F37 CC9FE760

74ABD592 EA0FA052

Load your game.

Save your game.

Turn off the GBA.

If you want more shiny Pokemon, just redo steps 5-6.

We made it so the data of the Shiny Pokemon are calculated in a somewhat random way, so the Pokemon will be as close as possible to a Pokemon really created by the game. That means it'll have random gender, random stats...

But, if Nintendo looks closely at the data, they WILL KNOW it has been hacked.

That's it.

1.1.7 Day Care Codes.

If you use theses codes, Nintendo *might* know that your Pokémon has been hacked.

Put 2 Pokemons that can breed into the Day Care (located on Route 117).

Enter one of these codes, and wait for the egg to be created (walk around).

Once the old man is telling you he has an egg for you, press R or L (see below) during the dialog to get the desired effect :

Code #1

Press R to have a Female Pokemon in the egg :

7A2C40E4 06AFEEFA1
9AB20DC0 97849B9B

Code #2

Press L to have a Male Pokemon in the egg :

A0F59292 AB07DEFE
A88D8B3A 975E4033

Special Notes :

- These Codes only work for Pokemon that have a gender!
- You can also use the Fast Egg Hatch codes to get the desired Pokemon very fast :)
- Be aware that you can't use the Always Shiny Pokemon Codes on an egg created with these codes, else any effect of the Day Care Codes you used will be erased.

Now a bit of explanation about breeding and eggs :

When you put 2 pokemon that can breed in the Day Care, they can make an egg. The Egg creation is random, and occurs when you walk. When the egg is created, the game stores a random number (1-65535) somewhere. Then, when you take the egg from the old man, another random number (this time 0-65535) is computed. The game put these two numbers together, and use them to create the Pokemon (for people that used to read the japanese Pokemon thread on cmgscoc, the 2 numbers will become the MAP). Moreover, as the numbers are random, things like shinyness, gender, or traits wont be given by the parents to the child. So breeding 1 or 2 shiny Pokemon won't give more chances to get a shiny child.

1.1.8 Pickup Ability to Everyone Code.*

If you use theses codes, Nintendo will not know that your Pokémon has been hacked.

Enter this code, and all your Pokémon will have the Pickup ability as a bonus (their other ability will still fully work, and with the code they'll have a chance to find items after the fights).

8A56A1C4 8FA1C490
65DA389A 09D8882C

Small note about the Pickup ability :

It works only after a battle you won (either against a wild Pokemon or a Trainer). When the battle ends, all Pokemon in your party that have the Pickup ability have 1 chance out of 10 to find any of the following item :

30% : Super Potion
10% : Ultra Ball
10% : Rare Candy
10% : Full Restore
10% : Revive
10% : Nugget
10% : Protein
5% : Full Heal
4% : PP Up
1% : King's rock

There *might* be a possibility that a special event gives you a Master Ball with Pick Up, but we haven't found anything about it...

1.1.9 Select Personality Codes.

If you use theses codes, Nintendo should *not* know that your Pokémon has been hacked.

Once you've enter one code, all the Pokemons you'll encounter will always have the personality you choosed, until you reload your game. This does not work for Pokemon that hatch from eggs, and for Pokemon that don't appear randomly.

1.2 Pokémon Encounter Codes.

1.2.1 Wild Pokémon Modifier Codes.*

If you use these codes, Nintendo might know that your Pokémon has been hacked if you catch a Pokémon that can't be caught without codes.

Once you've entered one code, you'll encounter only one kind of Pokémon, until you reload your game. These codes work with the wild Pokémons you encounter by walking in the grass, walking in the caves, and surfing (that means it won't work for fishing).

These codes will only make you fight *OLD* Pokémons. For the new Pokémons, you can check '1.2.3 Route 101 Pokémon Modifier Codes' or '1.5.2 Lavaridge's Egg Modifier Codes'.

Note 1 : In case you didn't notice, the Pokémons are listed using the old Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

1.2.2 Wild Pokémon's Level Modifier Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

These codes change the level of the wild Pokémon you encounter. Like the Wild Pokémon Modifier codes, they'll be "always on", until you reload your game.

!! Enabler Code : !!

1.2.3 Route 101 Pokemon Modifier Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked if you catch a Pokémon that can't be caught on Route 101 without codes.

! Use only ONE of these codes at the same time !

These codes will change one of the Pokémon of Route 101 (a Lvl. 2 Zigagoon) to the Pokémon of your choice (that will be Lvl. 2).

Unlike the '1.2.1 Wild Pokémon Modifier Codes', you won't find the choosen Pokémon all the time, you will ONLY find it on Route 101, and you can choose to find one of the new Pokémon.

Remember : you might encounter the Pokémon you choosed at the first battle, or might have to go over 12 (or more) battles before seing it...
It'll just be a matter of luck, so be patient :)

1.2.4 New Wild Pokemon Modifier Codes.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

If you use these codes, you can also use one Type code. That means that you can choose the Pokemon you encounter and its level with the following codes, and then choose its gender (or one of these genes) with a Type 6 code of this FAQ. (You could also use this code with the "Always Shiny" codes).

! Use only ONE of these codes at the same time !

Use only the "New Wild Pokemon Modifier Codes", the "New Level Select Codes" or the "New Genes Maxed Out Code".

You can also use any Type 6 code if you want.

A Type 6 code is a code with the star, "*", after its name.

To make these codes work, you need to enter them in a new game cheat database :

- 1 - On the AR screen, select "Management", then "Add/Edit Game", then "Add New Game".
- 2 - Enter any name (like "Ruby Wild Pokemon Modifier").
- 3 - Now choose "Add/Edit Code", select the game you created, and choose "Add New Code".
- 4 - Enter "(M)" in the code name, then input one of these Master Codes :

New Pokemon Ruby Master Code :

A2E564FE 0FB58A54

530823D9 16558191

New Pokemon Sapphire Master Code :

A2E564FE 0FB58A54

B4564EFE 23F44BF2

- 5 - Now enter the "New Wild Pokemon Modifier Codes" you desire.
(You can also enter the "New Level Modifier Codes", and any Type 6 code).
- 6 - Once you're set, go back to the AR title screen (press B some times), then choose "Select Game", and choose the game you created.
- 7 - Check that the (M) code is ON, and only one of the New Wild Pokemon Modifier Codes is on, that only one of the New Level Modifier Codes is on, and that only one Type 6 code is on, then Press start to start the game.

If the (M) code is OFF (it can happen. It's an Action Replay bug...) you'll have to rename it to anything but "(M)" (or "(m)"). Then set it on manually, then rename it back to "(M)".

1.2.6 New Genes Maxed Out Code.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

See the instructions of the "New New Wild Pokemon Modifier Codes." to know how to this code.

Always Maxed Out Genes :

E81AFCC5 B6A87F8D

1.3 Item & TH/HM Moves Codes.

1.3.1 Unlimited Item Code.*

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item.

When this code is one, the quantity of the items you have will never decrease.

You can also "dupe" items one by one by giving them to a Pokémon.

Note : This code works ONLY when you use items, not when you move them (put in the computer) or sell them...

75602F52 85185328
A05A144C 078B0074

1.3.2 Make Pokémon Learn any TM-HM Codes.*

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learns Moves that it can't learn normally.

With these codes, any Pokémon will be able to learn any TM-HM.

For TM 01-32:
4C8DB8CE 6D013B2A
AD86124F 2823D8DA

For TM 33-50 and all HMs:
4527FEBC 861F2C3C
AD86124F 2823D8DA

1.3.3 Make HM Moves Erasable Code.*

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

ADA17A5E 7BDBE3F1
F3FA719F BF1FDAED

1.3.4 PC Items Codes.

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item, or any item you can't get without codes.

These codes will only change the 1st item that is stored in the PC.

This first code will change the quantity of the 1st item in your PC to 99 :

458DC267 EE7A6705

Use one of the following code to select the item you want to have in the 1st Item slot of your PC :

1.3.5 Secret Base Items Codes.

If you use theses codes, Nintendo should *not* know that your Game has been hacked.

Use these codes to get all the Secret Base's items in your Secret Base's PC.

The missing items aren't in the game. They should be available later, using the Link cable (E-reader or NGC connection).

Desk (9/10):
EE4B7EDB 2C54067D
69788DF2 F560B857

Chair (9/10):
903F4470 9FE94D45

Cushion (10/10):
47EE318A 4AB3E079
3B17BE11 226EEA42

1.3.6 Bag Items Codes.

If you use theses codes, Nintendo *might* know that your Game has been hacked.

Have 90 of all type of Pokeballs in your bag :

2B7C4036 0773258E
C4161565 0894F33B
9C97C47F 11FB19EF
65FF9C95 1C8B48A5

Have 90 of all TH-HM in your bag :

C08356BD 5BD5883E
25A5CFBD E93ED41B
A1920C8D D537F165
891B2E1D E2C5FF5B

1.4 Miscellanous Codes.

1.4.1 Unlock Full Pokédex Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

Once theses codes has been entered, the full Pokédex (counting the 386 Pokémons) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state, you can try the Disable Full Pokédex Codes.

Unlock Full Pokédex Codes :

15E831F4 2F7ED308
DA560CBD BFA58820
6319638A 36FA43D5

A grey color in the Pokedex means the full Pokedex has been enabled. Now you just have to make a change in the pokedex option to see the old pokedex: while in the Pokedex, go in the menu of the Pokedex (press select), then choose "Shift", select "Mode", and choose "National Dex".

Disable Full Pokédex Codes :

92B00E97 E0E376DE
2E555C7B 81CEDCB1
7E1B2819 69F8DDE8

1.4.2 Mirage Island Code.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

With this code on, Mirage Island will always be on route 130.

9684190D 465C0E8B
65DA389A 09D8882C

Mirage Island's FAQ:

Q - What is Mirage Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - What was that long Mirage Island FAQ you had before ?

A - A big mistake... We were wrong, and we admit it. It seems that a random number is computed each day, and if this number match one of your Pokemon number, Mirage Island will appear. If the number is really random (we're looking into that), that means your chances to see Mirage Island is 65536 divided by the number of Pokemon you have. And no female/male thing involved, any Pokemon can do the trick.

Q - So, now, how do I go to Mirage Island without cheats ?

A - Just bring ALL you pokemon to the old man in the bottom right house of Pacifidlog Town, and do that each day, until he sees Mirage Island.

1.4.3 Southern Island Event Codes.

If you use these codes, Nintendo might know that your Game has been hacked.

This code will enable Latios/Latias battle on the Southern Island.

70C6F3CC 16235BDF

Plus, if you have the "Eon Ticket", you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battle Latios/Latias everytime you examine the "stone" (or egg, or whatever it is) (without this code, you'll encounter Latios/Latias only one time) :

1EC46531 BC58670E

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the "Eon Ticket", and that Latios/Latias will appear if you examine the stone).

The 2nd code sets "off" the flag that says that you have already done the stone island event (this flag is set on when you examine the egg and encounter Latios/Latias (obviously by using the 1st code I gave you). Once it has been set on, you can't go to Southern Island / encounter Latios/Latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

1.4.4 Feebas Tiles Code.*

If you use this code, Nintendo will *not* that your Game has been hacked.

Feebas mystery revealed :

As some people mentioned, Feebas only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles.

When you fish on a Feebas Tile, you have 1 chance out of 2 to actually find Feebas (and 1 chance out of 2 to find another fish).

The Feebas level will range from 20-25.

Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

You can catch it with ANY rod. And the rod you use won't help finding it, nor make it being at a better level.

The location of Feebas Tiles are random. When you create a new game, the game computes some random numbers. One of these random numbers will be used as the "seed" of the Feebas Tiles (other number will be used for the Trainer ID, secret Trainer ID...).

This number *can* change EACH DAY, AT RANDOM, and can also be changed with the "Trendy Phrase" (see below).

Conclusion : Feebas's tiles are random. There can be from one to six tiles.

With this Type 6 code, Feebas will appear everytime, on every tile of water of route 119...

Enjoy!

```
1DFB9212 A112FE48
AD86124F 2823D8DA
```

Special Note about the TRENDY PHRASE :

If you go to Dewford Town, and change the Trendy Phrase, the Feebas Tiles will change (FYI, you have to talk to the child above the PC to submit a new Trendy Phrase).

To be more precise, the Feebas Tiles will only change if you actually change the Phrase, not if you submit a new phase and it get rejected.

Be aware that this doesn't apply for the very first Trendy Phrase you submit. The very first phrase you submit will always be accepted, and won't change the Feebas Tiles.

The word you use in the Trendy Phrase seem to have no link with the new Feebas Tiles.

What really happens, when you change the Trendy Phrase, is that a new random "seed" for the Feebas Tiles is computed, so that all the Feebas Tiles will change.

Moreover, having your Trendy Phrase accepted has nothing to do with the words you use.

You can submit the exact same words 10 times, and they'll be rejected 9 times, and accepted the 10th time. It's only a matter of "luck".

Finally, we suggest you don't change the Trendy Phrase, unless during one day you have tried all the fishing spot of Route 119 and didn't find Feebas (without our GS code obviously). Else, you'll loose your Feebas Fishing spot (if you found any)...

1.4.5 All badges, pokedex, pokenavi... Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

All badges, pokedex, pokenavi... Code:

A12FCE77 0C1EC556

1.4.6 Money Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

Lotta Money :

D190B41E FAE74D9E

1.4.7 Walk Through Walls Code.*

If you use theses codes, Nintendo might know that your Game has been hacked, if you go to places that you can't go the normal way.

Walk Through Walls Code :

E03B0649 5D67050C
78DA95DF 44018CB4

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

-walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).

-Go out of the map limit. Each map (each route, room, etc...) is a rectangle of tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map). That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)

1.4.8 Secret Trainer ID Codes.*

If you use theses codes, Nintendo will **not** know that your Game has been hacked (unless you tell them your secret ID).

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit

messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your Feebas tiles... And, who knows, maybe more!

D20EAE69 9DD6C961
EB50DE1D 23B8A928

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:

CC8629C0 25DFAFD3
02FECFE9 4D39B39F

2nd code:

CC8629C0 25DFAFD3
FDF29BEB 6CBF0D9D

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

1.4.9 All Pokémon in Pokédex Codes.

If you use theses codes, Nintendo might know that your Game has been hacked, if you put in your Pokédex Pokémons that aren't in the game.

Enter these codes, then start your game with only these codes activated. Load your game, press R, verify that you have all the Pokemon in the Pokedex, then save your game, and set this code off.

767CB1FC DD748434
1285CF69 1834F175
DBB87FCA 6276D975
9A732B89 F770B329

DBB87FCA 6276D975
1F0A9164 737E93CD
DBB87FCA 6276D975
200DBA91 E6D90173
DBB87FCA 6276D975

1.4.10 All Trainer in Trainer's Eyes Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

Once these codes have been entered, press R and your Trainer's Eyes will be completed (69 Trainers registered).

093B0187 A2BD4A82
66E31915 146834D4
C231F067 0D9DE187

1.4.11 Share Experience After Battle Codes.

If you use theses codes, Nintendo will **not** know that your Game has been hacked.

If you use theses codes, you won't have to switch your Pokémon during battles to make them gain experience. Just beat your opponent with 1 Pokémon, and the game will think all your Pokémon have fought the battle, and will give experience to all of them!

62FFDFA4 2DF44B8C
B1283857 DB34BCE4

1.4.12 Trainer Card's Stars Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

First, I'd like to say that I did some research, and I found that there were only 4 Stars in the game. Not 5, 4.
There still might be a very slim chance that I missed something, and that the last star could be obtainable using the Link cable, but I seriously doubt

about it...

1st Star Code :

This star is unlocked when you finish the game.

With these code, you'll have finished the game in 15 minutes.

60314334 498FA5AB

5DE95E2D B165DBD1

2nd Star Code :

This star is given to you when you beat the Battle Tower.

With this codes, you'll have beaten the Battle Tower 999 times.

B5F4326A 7C9CD5F6

3rd Star Code :

This star is given to you when you win all the contest.

These codes will do the trick.

737DA248 9535D358

52780D3C 4BB0E715

274E1CD0 4D964F4A

BB2CEDC7 216EE9BB

3B352956 C7E1EE43

4th Star Code :

This star is unlocked when you have caught 202 Pokémon in the Pokédex.

Use the codes at section 1.4.9 to fulfill this requirement.

1.4.13 Trainer Card's Back Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

Use these codes to fill the back of your trainer card.

Line 1 : First Hall of Fame.

60314334 498FA5AB

5DE95E2D B165DBD1

Line 6 : Battle Tower.

C092C3B7 3C902EA5

1.4.14 Fast Egg Hatch Code.

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

With this code, every step you make will count for 255 steps.
That mean eggs will hatch very very fast !

9E17B966 367DE205

1.4.15 Immediate Battle Code.

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

Enter these codes, then press L+R one second to enter a battle :

B6C5368A 08BE8FF4
3D0D314F 0B31D0FA

Note : you have to be in a cave, in the grass, on the water (...) to make the code work.

1.4.16 Select Battle Type Codes.

If you use theses codes, Nintendo will *not* know that your Game has been hacked (unless they see you using them action!).

Enter one of these set of codes, then press L+R to enter the type of battle you want :

(#1)

Only makes 1 on 1 wild Pokemon Battle :

B6C5368A 08BE8FF4
6FD608D0 B9151D51
B6C5368A 08BE8FF4
3D0D314F 0B31D0FA

(#2)

Only make 2 on 2 wild Pokemon Battle :

B6C5368A 08BE8FF4
C2E5457B 194BACAC
B6C5368A 08BE8FF4
3D0D314F 0B31D0FA

(#3)

Only make 1 on 1 Trainer Pokemon Battle :

B6C5368A 08BE8FF4
603B9AF4 6BEB589A
B6C5368A 08BE8FF4
3D0D314F 0B31D0FA

(#4)

Only make 2 on 2 Trainer Pokemon Battle :

B6C5368A 08BE8FF4
3194D376 EF1658C1
B6C5368A 08BE8FF4
3D0D314F 0B31D0FA

IMPORTANT NOTES :

- If you use the set of codes #2, you'll face 2 Pokemons, but the fight will end as soon as one of these Pokemon is killed.

- Before using a Trainer Pokemon Battle code, you have to fight a Trainer the normal way. After that, you'll fight this Trainer over and over with the codes.

- If you fight a trainer that has only 1 Pokemon using the set of codes #4, you'll encounter 2 Pokemon, but you'll have to kill only one of them to win the battle.

- You can force Trainer Battle to be 1 on 1 or 2 on 2. To do this, enter either the set of codes #3 or #4, talk to a trainer, then press L+R during the talk, keep L+R pushed, and press A once (fast) to end the talk. That way, you can make "normal 2 on 2 battle" be 1 on 1, or "usual 1 on 1 battle" be 2 on 2.

If you use theses codes, Nintendo will *not* know that your Game has been hacked (unless you tell them your Feebas Seed number).

Find out your Feebas Seed Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy, but it'll display your Feebas Seed number instead of your regular Trainer ID. If the game crash, and you can't see your Trainer ID number, read the note below.

After that, write down this number, and turn the code off (switch off your GBA WITHOUT saving). Then, go to this link :

<http://users.nerdspace.net/loading/feebas.php>

and enter your Feebas Seed number. Voilà, you can see your Feebas Tiles!

Find Feebas Seed Code :

D20EAE69 9DD6C961
2BC3AB6D 126F4680

NOTE :

If your game crash when you look at your Trainer Card with this code, go to Dewford Town and talk to the young boy above the Pokemon Center. Change your Trendy Phrase so that the boy accepts it (if it is the first time you do it, change the phrase twice). Be aware that the fact the boy accepts the new Trendy Phrase has nothing to do with the word you choose. Only luck matters... Once you have changed the Trendy Phrase, and it has been approved by the boy, you can try again the Find Feebas Seed Codes.

1.4.18 Always Catch Pokemon Code.*

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

Enter this code, and you'll catch any Pokemon on your 1st try :

6637A9FB98D7FAA4
8BB602F78CEB681A

1.4.19 Steal other Trainer's Pokemon Code.*

If you use theses codes, Nintendo *might* know that your Game has been

hacked.

Enter these codes :

B6C5368A 08BE8FF4
6FD608D0 B9151D51
084197CA 3EA6DE4F
8E883EFF 92E9660D

Fight any trainer, press L+R, and launch a Pokéball...

1.4.20 Wild Lati@s Codes.*

If you use theses codes, Nintendo *might* know that your Game has been hacked.

After you beat the E4, new events will be available in Pokémon Ru/Sa world. One of them is the wild Lati@s encounter. To activate this event, you need to look at the TV in the 1st floor of your house. You'll see a "Special Report", that will tell you that a new flying Pokemon has been seen. That means that Lati@s is somewhere...

If you're looking for the wild Lati@s, be aware that it doesn't appear everywhere.

Lati@s can only be encountered on the following 20 Routes :
110, 111, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, and 134. (In short, that makes 110, 110, 117 to 134).

You won't ever find Lati@s anywhere else (without cheating of course).

When you enable the Wild Lati@s event (by watching the TV in the 1st floor of your house), it will appear at a RANDOM place. Then, it'll move or fly. Here is how it works :

-If you enter/exit any house, go up/down the stairs of any house, fly to anywhere, or when you load your save, it'll fly to a RANDOM place. It will also fly to a RANDOM place if it escapes during the fight.

-If you move from a city to a Route, from a Route to a Route, or from a Route to a City, Lati@s will RANDOMLY move to one of the Routes close to its current location. For exemple, if it was on route 134, it could move either to Route 110 or Route 133.

Now here is something that will help people that want to catch Lati@s without cheating.

We calculated the % of finding Lati@s for each Route, provided that you teleport to a city then walk on that Route :

Route 118 (Teleport to Mauville) : 9.58%
Route 121 (Teleport to Lilycove) : 7.5%
Route 127 (Teleport to Mossdeep): 7.5%
Route 110 (Teleport to Mauville or Slateport) : 6.83%

Route 124 (Teleport to Lilycove or Mossdeep) : 6.66%
Route 131 (Teleport to Pacifidlog) : 5%
Route 132 (Teleport to Pacifidlog) : 5%
Route 120 (Teleport to Fortree) : 4.17%
Route 128 (Teleport to Ever Grande) : 4.17%
Route 111 (Teleport to Mauville) : 3.92%
Route 117 (Teleport to Verdantuf or Mauville) : 3.92%
Route 134 (Teleport to Slateport) : 3.75%
Route 119 (Teleport to Fortree) : 3.5%
Route 125 (Teleport to Mossdeep) : 3.33%
Route 126 (Teleport to Sootopolis): 3.33%

As you can see, if you Teleport to Mauville, then walk on Route 118, you have 9.58% of chances that Lati@s will be on that Route. So this is the best

place to hunt Lati@s...

And this is the place we gonna use in the following text as exemple.

Once you are on the same Route than Lati@s, you have to fight wild Pokemons. Lati@s will appear in a regular fight, so using Repel won't help you finding it. It won't make the things go worse either (it'll just make you loose some time).

You can either kill all the Pokemon you find, or run away from them. It doesn't change anything.

Once you are on the same Route than Lati@s, you have exactly 25% of chances to find it each time you find a wild Pokemon.

So do at least 4 battles (but 8 or 10 should be safer) before flying back to Mauville, and walking again to Route 118.

Btw, if you prefer, you can also walk back to Mauville, and enter/exit any house (like the Pokecenter, to heal your Pokemons) to make Lati@s fly away to a random location, (and then walk back on Route 118 to try to find it another time).

Now come the codes :

Enable the TV event (this is a normal code).

(Watch the TV on the 1st floor of your house to make Lati@s appear)

This will make Lati@s appear, even if you killed it or if you already caught it.

AF9D4840 6F57FCEF

Make Lati@s be always on Route 110 (this is a normal code) :

0B8A1422 CB9E28CB

Find Lati@s on the 1st try (you need to be on the same Route than it :

This is a Type 6 code * :

FDF72C7E B170B68E

8E883EFF 92E9660D

1.4.21 Battle Tower Code.*

If you use theses codes, Nintendo *might* know that your Game has been hacked.

Use this code, and you'll be able to register any allowed Pokemon, regardless of its level (that mean Lvl 100 will be able to enter the Lvl 50 challenge).

3DB4C7B7 334D4A16
D09C0A28 ADE6DB2E

Note : The game will show you that the Pokemon are "Not Able" to enter, however you'll be able to select them.

1.5 Lavaridge's Egg Code.

1.5.1 Lavaridge's Egg Enabler Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

Enter this code, and the old lady near the hot springs of Lavaridge will always give you a Wynaut egg :

46813A10 82A13FB1

1.5.2 Lavaridge's Egg Modifier Codes.*

If you use theses codes, Nintendo might know that your Game has been hacked.

Enter one of these codes, and instead of having a Wynaut egg from the old lady of Lavaridge, you'll get the egg of the Pokémon of your choice. To make the egg hatch faster, use the Fast Egg Hatch Code (1.4.14).

Use only ONE of these code at the same time.

2. Gameshark/AR Codes for Version 1.2 or lower.

2.0 Master Codes.

!!! IMPORTANT NOTE !!!

These codes do NOT WORK on 1.3 Sharks/ActionReplay refer to
the first section of the FAQ for 1.3 codes

You have to enter these codes in your Action Replay / Gameshark in order
to use the other codes of these FAQ.

Pokemon Ruby Master Code :

9E6AC862 823AB7A8

46B7D9E4 A709E9E1

Pokemon Sapphire Master Code :

9E6AC862 823AB7A8

8365F8FA 817CF3E9

2.1 Pokemon's Data Codes.

2.1.1 Always Male/Female Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Enter one of these codes and you'll set the gender of the next wild Pokémon you'll see (if it has any gender or course).

Note : It can still be Shiny, with a chance of 1/8192.

Always Female Pokémons Code :

B917F77E0FD658EB

Always Male Pokémons Code :

3537AAD42B010F73

2.1.2 Always Maxed Genes Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked. You can only enter one of these code at the same time.

Gene Maxed Out (value of 31) for wild Pokémons:

HP Gene :

60C7C028 82820B6F

Attack Gene :

2CEFA3FD 3A1F566D

Defense Gene :

871BD5C0 05576B47

Speed Gene :

04DB5910 0AA12920

Special Attack Gene :

20DAB881 C1E06EF7

Special Defense Gene :

6568BC1F 64A183EE

All Genes Maxed out :

D95E6845 60A3B6CF

2.1.3 Pokerus Code.*

If you use these codes, Nintendo will *not* that your Pokémon has been hacked.

Use this code to make ALL your Pokemon catch the Pokerus after a fight.
(even if they already caught it)

33969F4A EE0B4CC2

And here are some explanations about the Pokerus :

The Pokerus is a virus that infects Pokemon. But it's not a bad thing : when a Pokemon has caught the Pokerus, the Effort Values it gains after a battle are doubled ! You see if your Pokemon has the Pokerus by looking at its summary. If you see "STATUS PKRS" under its picture, that means your Pokemon is infected.

To make the Pokerus spread, take the infected Pokemon in your party, and make some battles. After each battle, the other Pokemon will have a chance to get infected by the virus.

The virus will disappear after about four days. At this moment, the "STATUS PKRS" will be gone, but you'll see a black dot to the left of its level's number. That means three things :

- this Pokemon will never be able to be infected again,
- that it'll stop to infect other Pokemon,
- that its EV gains are doubled.

If you put an infected Pokemon in the PC, the virus will not spread, but the infected Pokemon will not lose its Pokerus Status.

There are two ways to get infected by the Pokerus :

- Find a RL Friend whose Pokemon has caught the Pokerus, and ask him to give you one of his infected Pokemon. Make the virus spread to your Pokemons, and then give him his Pokemon back.
- Make a lot of battle. After a battle, you have 1 chance out of 21845 (more precisely 3 chances out of 65536) that one of your Pokemon get infected by the Pokerus. This is very very rare. As a matter of comparison, you have 1 chance out of 8192 to find a shiny Pokemon.

2.1.4 Select Ability Code.*

If you use these codes, Nintendo *might* know that your Pokémon has been hacked.

You might know that each Pokemon has 1 or 2 abilities (Pick Up Items, Run Away...).

You can't give a Pokemon an ability that he can't have, but you can choose which ability you prefer when a Pokemon that has 2 abilities is created.

Use this code to get the 1st ability :

02B9D483 35E6766F

Use this code to get the 2nd ability :

DF39283D 2929E240

If a Pokemon has only 1 ability (most of them do), these codes won't do anything.

2.1.5 Always Shiny Display Code.*

If you use theses codes, Nintendo will not know that your Game has been hacked.

Choose either one of these codes :

- Switch Shiny/Normal Colors in Battle :

With this code, all "normal" Pokemon will look Shiny, and all Shiny Pokemon will look normal during battles. They'll go back to normal once the code is off.

CD9A8B2C 402EA528

We choose to make the Shiny Pokemon become normal so you can still find (and catch) them during the game.

- Make all Pokemon have Shiny Colors in "Summary" :

551C263B E5D3DC38

With this code, all Pokemon will look Shiny when you look at them using the "Summary" Menu. They'll go back to normal once the code is off.

2.1.6 Always Shiny Code.*

If you use theses codes, Nintendo *might* know that your Game has been hacked.

It's kinda hard and long to make this code work, so be very careful when using it.

It might destroy your game, so please follow the steps one by one !

!!!

We made this code because it was funny to do it. We won't offer ANY SUPPORT for it. So, if you can't make it work, just don't use it.

And if it destroyed your game, don't blame us.

!!!

This codes will NOT WORK with any other Type 6 code, which are the codes that let you choose wich Pokemon you encounter in the wild.

HOWEVER, you can get ANY SHINY POKEMON if you do the following :

- Use the Lavaridge's Egg Code to get the Egg of the Pokemon you want, but don't make it hatch yet !!! Save your game.
- Now use the Fast Egg Hatch Code, move one step, and if the Egg didn't hatch, save your game. Repeat until the Egg hatch, and reload your last save.
- Follow the Steps 1-6 (see below) (or steps 5-6 if you have already done 1-4), and make the Egg hatch (by walking a bit).

The Pokemon you choosed will be Shiny!

*Step 0 (only if you want to catch Pokemon in battle) :

If you are going for a Shiny rampage, you should have something like 99 Master Balls on you. You will only be able to get the Shiny Pokemons one by one, so it could be better if you get them on your 1st try. Use the code provided in this FAQ (or in mastersord's FAQ) to get them.

*Step 1 :

Turn on the GBA and launch the game without codes.

Make sure you have the 1st slot of your *1st* Pokemon's Box free (in the PC).
Make sure you have in the 2nd slot of the *1st* Pokemon's Box a Pokemon YOU CAUGHT IN THE WILD YOURSELF.

!!!!!!

IF YOU DON'T HAVE A POKEMON YOU CAUGHT YOURSELF IN THE 2ND SLOT OF THE 1ST POKEMON'S BOX, THESE CODES WILL MESS YOUR GAME.

!!!!!!

Turn off the GBA.

*Step 2 :

Turn on the GBA.

Enter these codes in your GSA/AR :

```
7E5D9AF7 D9D32B17
C70FC474 E276A579
3BC474AA A9392507
DEF526FD C0120242
1DE2A65D C774F615
667B915F 86A23D5A
C5259E55 27D383AF
639B1F5C 1FA26FB5
24A766C4 73C0AD82
```

Start the game with these codes ON.

Load your game.

Save your game.

Turn off the GBA.

*Step 3 :

Turn on the GBA.

Enter these codes in your GSA/AR :

```
5398D115 E9AE8AFC
```

A90EF609 D2B39D98
4FDCAF5C 32905BB9
51BA1E07 C546973F
659EC2AF A0A1714C
351F1B94 DC32DAAE
24BDB599 04A7AE40
AEA85451 ODD453FD
5662572E C8845667
C94EE97E 808029FD

Start the game with these codes ON.

Load your game.

Save your game.

Turn off the GBA.

*Step 4 :

Turn on the GBA and start the game without codes.

Load your game.

Now look in your PC. You'll see a strange Egg in the 1st slot of the 1st box. It'll be named "Shiny Hack".

DONT'T MOVE IT, DON'T LOOK ITS SUMMARY.

Just check it's there. If it isn't, put whatever Pokemon you want in the 1st slot, then move it again to free the 1st slot, then go back to Step 2.

Turn off the GBA.

Now you have created the Shiny Hack Egg. To find Shiny Pokemons, you have to have it in the PC, in the 1st slot of your 1st box, then do steps 5-6.

You won't have to redo steps 1-4, unless you loose the Shiny Hack Egg.

If you move this egg, the code following codes will crash the game, and

you'll have to go back to step 1.

*Step 5 :

Turn on the GBA.

Enter these codes in your GSA/AR :

1E1650E3 267CE8CC

FD1581BB CD466792

EFABCDC7 10C10904

Start the game with these codes ON.

Load your game.

(You'll see your Trainer Name is messed up : don't worry !)

Save your game.

Turn off the GBA.

*Step 6 :

Turn on the GBA.

Enter these codes in your GSA/AR :

D11444FA 2866D302

Now the next Pokemon that will be created (wild, egg..) will be always Shiny.
THIS ONLY WORKS FOR THE 1ST POKEMON THE GAME CREATES.
IF, AFTER THAT, YOU TRY TO ENCOUNTER A WILD POKEMON, CREATE AN EGG (BY
BREEDING), MAKE AN EGG HATCH, OR RECEIVE A POKEMON OR AN EGG FROM SOMEONE,
THE GAME WILL CRASH!!!

It actually means you can :

- Find a wild Pokemone ONCE, then save your game.
- Receive a Pokemon from someone ONCE, then save your game.
- Receive an EGG from someone ONCE, then save your game.
- Put 2 Pokemon in the Daycare (to make them breed) then save your game.
- Make an EGG hatch, then save your game.

Once you've made one of these, you'll see that your Trainer Name's is back to normal :

THAT MEANS THE NEXT TIME THE GAME CREATES A POKEMON, THE GAME WILL CRASH IF YOU HAVE THE CODE ON.

So save your game, and turn off the GBA!

*Step 7 :

Now, if you want to catch more Shiny Pokemon using this code, just redo steps 1-6.

Else, if you have finish, do the following :

Turn on the GBA.

Enter these codes in your GSA/AR :

33B0BD02 A96038C8
2C7461AC 6912B9F8
A38D6566 5FE97854
7B0D49A2 37C8DBF7
6B985CD3 855A5970
9F7C6183 C3908197

Load your game.

Save your game.

Turn off the GBA.

If you want more shiny Pokemon, just redo steps 5-6.

We made it so the data of the Shiny Pokemon are calculated in a somewhat random way, so the Pokemon will be as close as possible to a Pokemon really created by the game. That means it'll have random gender, random stats...

But, if Nintendo looks closely at the data, they WILL KNOW it has been hacked.

That's it.

2.1.7 Day Care Codes.

If you use theses codes, Nintendo *might* know that your Pokémon has been hacked.

Put 2 Pokemons that can breed into the Day Care (located on Route 117).
Enter one of these codes, and wait for the egg to be created (walk around).
Once the old man is telling you he has an egg for you, press R or L (see below)
during the dialog to get the desired effect :

Code #1

Press R to have a Female Pokemon in the egg :

F1AC20E0 BDC21FAF
F20B5BBC 9A988181

Code #2

Press L to have a Male Pokemon in the egg :

89AD87D7 23990C6E
2FD3E590 3B5377E6

Special Notes :

- These Codes only work for Pokemon that have a gender!
- You can also use the Fast Egg Hatch codes to get the desired Pokemon very fast :)
- Be aware that you can't use the Always Shiny Pokemon Codes on an egg created with these codes, else any effect of the Day Care Codes you used will be erased.

Now a bit of explanation about breeding and eggs :

When you put 2 pokemon that can breed in the Day Care, they can make an egg. The Egg creation is random, and occurs when you walk. When the egg is created, the game stores a random number (1-65535) somewhere. Then, when you take the egg from the old man, another random number (this time 0-65535) is computed. The game put these two numbers together, and use them to create the Pokemon (for people that used to read the japanese Pokemon thread on cmgsgcc, the 2 numbers will become the MAP). Moreover, as the numbers are random, things like shinyness, gender, or traits wont be given by the parents to the child. So breeding 1 or 2 shiny Pokemon won't give more chances to get a shiny child.

2.1.8 Pickup Ability to Everyone Code.*

If you use theses codes, Nintendo will not know that your Pokémon has been hacked.

Enter this code, and all your Pokémon will have the Pickup ability as a bonus (their other ability will still fully work, and with the code they'll have a chance to find items after the fights).

Small note about the Pickup ability :

It works only after a battle you won (either against a wild Pokemon or a Trainer). When the battle ends, all Pokemon in your party that have the Pickup ability have 1 chance out of 10 to find any of the following item :

- 30% : Super Potion
- 10% : Ultra Ball
- 10% : Rare Candy
- 10% : Full Restore
- 10% : Revive
- 10% : Nugget
- 10% : Protein
- 5% : Full Heal
- 4% : PP Up
- 1% : King's rock

There *might* be a possibility that a special event gives you a Master Ball with Pick Up, but we haven't found anything about it...

2.1.9 Select Personality Codes.

If you use theses codes, Nintendo should *not* know that your Pokémon has been hacked.

Once you've enter one code, all the Pokemons you'll encounter will always have the personality you choosed, until you reload your game. This does not work for Pokemon that hatch from eggs, and for Pokemon that don't appear randomly.

2.2 Pokémon Encounter Codes.

2.2.1 Wild Pokémon Modifier Codes.*

If you use these codes, Nintendo might know that your Pokémon has been hacked if you catch a Pokémon that can't be caught without codes.

Once you've entered one code, you'll encounter only one kind of Pokémon, until you reload your game. These codes work with the wild Pokémons you encounter by walking in the grass, walking in the caves, and surfing (that means it won't work for fishing).

These codes will only make you fight *OLD* Pokémons. For the new Pokémons, you can check '1.2.3 Route 101 Pokémon Modifier Codes' or '1.5.2 Lavaridge's Egg Modifier Codes'.

Note 1 : In case you didn't notice, the Pokémons are listed using the old Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

2.2.2 Wild Pokémon's Level Modifier Codes.*

If you use these codes, Nintendo might know that your Pokémon has been hacked.

These codes change the level of the wild Pokémon you encounter. Like the Wild Pokémon Modifier codes, they'll be "always on", until you reload your game.

2.2.3 Route 101 Pokemon Modifier Codes.*

If you use theses codes, Nintendo might know that your Pokémon has been hacked if you catch a Pokémon that can't be caught on Route 101 without codes.

! Use only ONE of these codes at the same time !

These codes will change one of the Pokémon of Route 101 (a Lvl. 2 Zigagoon) to the Pokémon of your choice (that will be Lvl. 2).

Unlike the '1.2.1 Wild Pokémon Modifier Codes', you won't find the choosen Pokémon all the time, you will ONLY find it on Route 101, and you can choose to find one of the new Pokémon.

Remember : you might encounter the Pokémon you choosed at the first battle, or might have to go over 12 (or more) battles before seing it...
It'll just be a matter of luck, so be patient :)

2.3 Item & TH/HM Moves Codes.

2.3.1 Unlimited Item Code.*

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item.

When this code is one, the quantity of the items you have will never decrease.

You can also "dupe" items one by one by giving them to a Pokémon.

Note : This code works ONLY when you use items, not when you move them (put in the computer) or sell them...

A1D75FBC CEC709E8

2.3.2 Make Pokémon Learn any TM-HM Codes.*

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learns Moves that it can't learn normally.

With these codes, any Pokémon will be able to learn any TM-HM.

For TM 01-32:

5AC15E9E 77A6E0ED

For TM 33-50 and all HMs:

15325455 AA59B848

2.3.3 Make HM Moves Erasable Code.*

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

960CBF3C 14553BAE

2.3.4 PC Items Codes.

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item, or any item you can't get without codes.

These codes will only change the 1st item that is stored in the PC.

This first code will change the quantity of the 1st item in your PC to 99 :

D261DC6D 197B4DC2

Use one of the following code to select the item you want to have in the 1st Item slot of your PC :

2.3.5 Secret Base Items Codes.

If you use theses codes, Nintendo should *not* know that your Game has been hacked.

Use these codes to get all the Secret Base's items in your Secret Base's PC.

The missing items aren't in the game. They should be available later, using the Link cable (E-reader or NGC connection).

Desk (9/10):

2.4.1 Unlock Full Pokédex Codes.

If you use these codes, Nintendo might know that your Game has been hacked.

Once these codes have been entered, the full Pokédex (counting the 386 Pokémon) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state, you can try the Disable Full Pokédex Codes.

Unlock Full Pokédex Codes :

E7343B1C 1E9465D8
03C39BA2 B0541E66
85DC5BF3 76315A10

A grey color in the Pokedex means the full Pokedex has been enabled. Now you just have to make a change in the pokedex option to see the old pokedex: while in the Pokedex, go in the menu of the Pokedex (press select), then choose "Shift", select "Mode", and choose "National Dex".

Disable Full Pokédex Codes :

267905C7 7608FA24
2C770C00 9DC9D688
AEA1B760 4DC4E1C2

2.4.2 Mirage Island Code.*

If you use these codes, Nintendo might know that your Pokémon has been hacked.

With this code on, Mirage Island will always be on route 130.

61260541 1EB19C53

Mirage Island's FAQ:

Q - What is Mirage Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - What was that long Mirage Island FAQ you had before ?

A - A big mistake... We were wrong, and we admit it. It seems that a random number is computed each day, and if this number match one of your Pokemon number, Mirage Island will appear. If the number is really random (we're looking into that), that means your chances to see Mirage Island is 65536 divided by the number of Pokemon you have. And no female/male thing involved, any Pokemon can do the trick.

Q - So, now, how do I go to Mirage Island without cheats ?

A - Just bring ALL you pokemon to the old man in the bottom right house of Pacifidlog Town, and do that each day, until he sees Mirage Island.

2.4.3 Southern Island Event Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

This code will enable Latios/Latias battle on the Southern Island.

0332305F 41A5F851

Plus, if you have the "Eon Ticket", you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battle Latios/Latias everytime you examine the "stone" (or egg, or whatever it is) (without this code, you'll encounter Latios/Latias only one time) :

7C4D9034 783EE1E6

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the "Eon Ticket", and that Latios/Latias will appear if you examine the stone).

The 2nd code sets "off" the flag that says that you have already done the stone island event (this flag is set on when you examine the egg and encounter Latios /Latias (obvioulsy by using the 1st code I gave you). Once it has been set on, you can't go to Southern Island / encounter Latios/Latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

2.4.4 Feebas Tiles Code.*

If you use this code, Nintendo will *not* that your Game has been hacked.

Feebas mystery revealed :

As some people mentioned, Feebas only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles.

When you fish on a Feebas Tile, you have 1 chance out of 2 to actually find Feebas (and 1 chance out of 2 to find another fish).

The Feebas level will range from 20-25.

Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

You can catch it with ANY rod. And the rod you use won't help finding it, nor make it being at a better level.

The location of Feebas Tiles are random. When you create a new game, the game computes some random numbers. One of these random numbers will be used as the "seed" of the Feebas Tiles (other number will be used for the Trainer ID, secret Trainer ID...).

This number *can* change EACH DAY, AT RANDOM, and can also be changed with the "Trendy Phrase" (see below).

Conclusion : Feebas's tiles are random. There can be from one to six tiles.

With this Type 6 code, Feebas will appear everytime, on every tile of water of route 119...

Enjoy!

11E58406 0C731B08

Special Note about the TRENDY PHRASE :

If you go to Dewford Town, and change the Trendy Phrase, the Feebas Tiles will change (FYI, you have to talk to the child above the PC to submit a new Trendy Phrase).

To be more precise, the Feebas Tiles will only change if you actually change the Phrase, not if you submit a new phase and it get rejected.

Be aware that this doesn't apply for the very first Trendy Phrase you submit. The very first phrase you submit will always be accepted, and won't change the Feebas Tiles.

The word you use in the Trendy Phrase seem to have no link with the new Feebas Tiles.

What really happens, when you change the Trendy Phrase, is that a new random "seed" for the Feebas Tiles is computed, so that all the Feebas Tiles will change.

Moreover, having your Trendy Phrase accepted has nothing to do with the words you use.

You can submit the exact same words 10 times, and they'll be rejected 9 times, and accepted the 10th time. It's only a matter of "luck".

Finally, we suggest you don't change the Trendy Phrase, unless during one day you have tried all the fishing spot of Route 119 and didn't find Feebas (without our GS code obviously). Else, you'll loose your Feebas Fishing spot (if you found any)...

2.4.5 All badges, pokedex, pokenavi... Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

All badges, pokedex, pokenavi... Code:

BC33578D 82482A93

2.4.6 Money Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

Lotta Money :

EF6BB9F3 A0BDF629

2.4.7 Walk Through Walls Code.*

If you use theses codes, Nintendo might know that your Game has been hacked, if you go to places that you can't go the normal way.

Walk Through Walls Code :

CE2CCCB2 5D8D815D

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

-walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).

-Go out of the map limit. Each map (each route, room, etc...) is a rectangle of tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map).

That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)

2.4.8 Secret Trainer ID Codes.*

If you use these codes, Nintendo will *not* know that your Game has been hacked (unless you tell them your secret ID).

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your Feebas tiles... And, who knows, maybe more!

A5B23891 B0F9BB70

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:

33AAEAD0 C0161DD8

2nd code:

78146786 CF7E996B

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

2.4.9 All Pokémon in Pokédex Codes.

If you use these codes, Nintendo might know that your Game has been hacked, if you put in your Pokédex Pokémon that aren't in the game.

By entering those codes, you'll have your Pokédex completed.
(all Pokémon Seen & caught)

We split these codes so you can enter them easily.

2.4.10 All Trainer in Trainer's Eyes Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

You can enter theses lines of codes one by one if you prefer.
Once all these codes have been entered, your Trainer's Eyes
will be completed (69 Trainers registred).

4B689657 A08309DB

2.4.11 Share Experience After Battle Codes.

If you use theses codes, Nintendo will **not** know that your Game has been hacked.

If you use theses codes, you won't have to switch your Pokémon during battles to make them gain experience. Just beat your oppoment with 1 Pokémon, and the game will think all your Pokémon have fought the battle, and will give experience to all of them!

3E9BD973 F2C8482E
E5CB6F7F C97AA5CC

2.4.12 Trainer Card's Stars Codes.

If you use theses codes, Nintendo might know that your Game has been hacked.

First, I'd like to say that I did some research, and I found that there were only 4 Stars in the game. Not 5, 4.
There still might be a very slim chance that I missed something, and that the last star could be obtanaible using the Link cable, but I seriously doubt about it...

1st Star Code :

This star is unlocked when you finish the game.

With these code, you'll have finished the game in 15 minutes.

2386CABF E4C81DF6
401BD020 2D17E69B

2nd Star Code :

This star is given to you when you beat the Battle Tower.

With this codes, you'll have beaten the Battle Tower 999 times.

7A7EFB08 A3EEF22D

3rd Star Code :

This star is given to you when you win all the contest.

These codes will do the trick.

DAFDDF4D C962B7ED
6B3371E1 294ACF7A
863A43B3 84DD0596
A0E7843B 7D709392
18EC989C 113D5A5B

4th Star Code :

This star is unlocked when you have caught 202 Pokémon in the Pokédex.
Use the codes at section 1.4.9 to fulfill this requirement.

2.4.13 Trainer Card's Back Codes.

If you use these codes, Nintendo might know that your Game has been hacked.

Use these codes to fill the back of your trainer card.

Line 1 : First Hall of Fame.

2386CABF E4C81DF6
401BD020 2D17E69B

Line 2 : Link Card Battle.

4542178D 2292164E
2231C98B DA8E001C

Line 3 : Pokémon Trades.

BF67A939 850B3235

Line 4 : Pokéblocks w/ Friends.

834F8751 40BE607A

Line 5 : Contests w/ Friends.

C2101573 0E0FDA5F

Line 6 : Battle Tower.

7A7EFB08 A3EEF22D

2.4.14 Fast Egg Hatch Code.

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

With this code, every step you make will count for 255 steps.
That mean eggs will hatch very very fast !

D7A2E463 9F64ABFA

2.4.15 Immediate Battle Code.

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

Enter these codes, then press L+R one second to enter a battle :

FB089E40 B13D1214
BE283E95 E6978689

Note : you have to be in a cave, in the grass, on the water (...) to make the code work.

2.4.16 Select Battle Type Codes.

If you use theses codes, Nintendo will *not* know that your Game has been hacked (unless they see you using them action!).

Enter one of these set of codes, then press L+R to enter the type of battle you want :

(#1)
Only makes 1 on 1 wild Pokemon Battle :

FB089E40 B13D1214
096A963E 6F9250B0
FB089E40 B13D1214
BE283E95 E6978689

(#2)
Only make 2 on 2 wild Pokemon Battle :

FB089E40 B13D1214
120652AF 6372144C
FB089E40 B13D1214
BE283E95 E6978689

(#3)
Only make 1 on 1 Trainer Pokemon Battle :

FB089E40 B13D1214
14762353 436723D8
FB089E40 B13D1214
BE283E95 E6978689

(#4)

Only make 2 on 2 Trainer Pokemon Battle :

FB089E40 B13D1214
69D6B016 FDDD4E2B
FB089E40 B13D1214
BE283E95 E6978689

IMPORTANT NOTES :

- If you use the set of codes #2, you'll face 2 Pokemons, but the fight will end as soon as one of these Pokemon is killed.

- Before using a Trainer Pokemon Battle code, you have to fight a Trainer the normal way. After that, you'll fight this Trainer over and over with the codes.

- If you fight a trainer that has only 1 Pokemon using the set of codes #4, you'll encounter 2 Pokemon, but you'll have to kill only one of them to win the battle.

- You can force Trainer Battle to be 1 on 1 or 2 on 2. To do this, enter either the set of codes #3 or #4, talk to a trainer, then press L+R during the talk, keep L+R pushed, and press A once (fast) to end the talk. That way, you can make "normal 2 on 2 battle" be 1 on 1, or "usual 1 on 1 battle" be 2 on 2.

2.4.17 Find Feebas Seed Code.*

If you use theses codes, Nintendo will *not* know that your Game has been hacked (unless you tell them your Feebas Seed number).

Find out your Feebas Seed Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy, but it'll display your Feebas Seed number instead of your regular Trainer ID. If the game crash, and you can't see your Trainer ID number, read the note below.

After that, write down this number, and turn the code off (switch off your GBA WITHOUT saving). Then, go to this link :

<http://users.nerdspace.net/loading/feebas.php>

and enter your Feebas Seed number. Voilà, you can see your Feebas Tiles!

Find Feebas Seed Code :

9438D4DE FBC02019

NOTE :

If your game crash when you look at your Trainer Card with this code, go to Dewford Town and talk to the young boy above the Pokemon Center. Change your Trendy Phrase so that the boy accepts it (if it is the first time you do it, change the phrase twice). Be aware that the fact the boy accepts the new Trendy Phrase has nothing to do with the word you choose. Only luck matters... Once you have changed the Trendy Phrase, and it has been approved by the boy, you can try again the Find Feebas Seed Codes.

2.4.18 Always Catch Pokemon Code.*

If you use theses codes, Nintendo will *not* know that your Game has been hacked.

Enter this code, and you'll catch any Pokemon on your 1st try :

6937E6C8 DEF25C87

2.4.19 Steal other Trainer's Pokemon Code.*

If you use theses codes, Nintendo *might* know that your Game has been hacked.

Enter these codes :

FB089E40 B13D1214
096A963E 6F9250E0
006085A5 81627261

Fight any trainer, press L+R, and launch a Pokéball...

2.4.20 Wild Lati@s Codes.*

1.4.20 Wild Lati@s Codes.*

If you use these codes, Nintendo *might* know that your Game has been hacked.

After you beat the E4, new events will be available in Pokémon Ru/Sa world.

One of them is the wild Lati@s encounter.

To activate this event, you need to look at the TV in the 1st floor of your house. You'll see a "Special Report", that will tell you that a new flying Pokémon has been seen. That means that Lati@s is somewhere...

If you're looking for the wild Lati@s, be aware that it doesn't appear everywhere.

Lati@s can only be encountered on the following 20 Routes :

110, 111, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, and 134. (In short, that makes 110, 111, 117 to 134).

You won't ever find Lati@s anywhere else (without cheating of course).

When you enable the Wild Lati@s event (by watching the TV in the 1st floor of your house), it will appear at a RANDOM place. Then, it'll move or fly.

Here is how it works :

-If you enter/exit any house, go up/down the stairs of any house, fly to anywhere, or when you load your save, it'll fly to a RANDOM place. It will also fly to a RANDOM place if it escapes during the fight.

-If you move from a city to a Route, from a Route to a Route, or from a Route to a City, Lati@s will RANDOMLY move to one of the Routes close to its current location. For example, if it was on route 134, it could move either to Route 110 or Route 133.

Now here is something that will help people that want to catch Lati@s without cheating.

We calculated the % of finding Lati@s for each Route, provided that you teleport to a city then walk on that Route :

Route 118 (Teleport to Mauville) : 9.58%
Route 121 (Teleport to Lilycove) : 7.5%
Route 127 (Teleport to Mossdeep): 7.5%
Route 110 (Teleport to Mauville or Slateport) : 6.83%
Route 124 (Teleport to Lilycove or Mossdeep) : 6.66%
Route 131 (Teleport to Pacifidlog) : 5%
Route 132 (Teleport to Pacifidlog) : 5%
Route 120 (Teleport to Fortree) : 4.17%
Route 128 (Teleport to Ever Grande) : 4.17%
Route 111 (Teleport to Mauville) : 3.92%
Route 117 (Teleport to Verdanturf or Mauville) : 3.92%
Route 134 (Teleport to Slateport) : 3.75%
Route 119 (Teleport to Fortree) : 3.5%
Route 125 (Teleport to Mossdeep) : 3.33%
Route 126 (Teleport to Sootopolis): 3.33%

As you can see, if you Teleport to Mauville, then walk on Route 118, you have 9.58% of chances that Lati@s will be on that Route. So this is the best

place to hunt Lati@s...

And this is the place we gonna use in the following text as example.

Once you are on the same Route than Lati@s, you have to fight wild Pokemons. Lati@s will appear in a regular fight, so using Repel won't help you finding it. It won't make the things go worse either (it'll just make you loose some time).

You can either kill all the Pokemon you find, or run away from them. It doesn't change anything.

Once you are on the same Route than Lati@s, you have exactly 25% of chances to find it each time you find a wild Pokemon.

So do at least 4 battles (but 8 or 10 should be safer) before flying back to Mauville, and walking again to Route 118.

Btw, if you prefer, you can also walk back to Mauville, and enter/exit any house (like the Pokecenter, to heal your Pokemons) to make Lati@s fly away to a random location, (and then walk back on Route 118 to try to find it another time).

Now come the codes :

Enable the TV event (this is a normal code).

(Watch the TV on the 1st floor of your house to make Lati@s appear)

This will make Lati@s appear, even if you killed it or if you already caught it.

2E03AADD DCC659C5

Make Lati@s be always on Route 110 (this is a normal code):

073448ED C7D76312

Find Lati@s on the 1st try (you need to be on the same Route than it) :

This is a Type 6 code * :

3762D7F7 59A352C2

2.4.21 Battle Tower Code.*

If you use theses codes, Nintendo *might* know that your Game has been hacked.

Use this code, and you'll be able to register any allowed Pokemon, regardless of its level (that mean Lvl 100 will be able to enter the Lvl 50 challenge).

5B6BAF8A F02EE472

Note : The game will show you that the Pokemon are "Not Able" to enter, however you'll be able to select them.

2.5 Lavaridge's Egg Code.

2.5.1 Lavaridge's Egg Enabler Code.

If you use theses codes, Nintendo might know that your Game has been hacked.

Enter this code, and the old lady near the hot springs of Lavaridge will always give you a Wynaut egg :

C6500699 A423FC68

2.5.2 Lavaridge's Egg Modifier Codes.*

If you use theses codes, Nintendo might know that your Game has been hacked.

Enter one of these codes, and instead of having a Wynaut egg from the old lady of Lavaridge, you'll get the egg of the Pokémon of your choice. To make the egg hatch faster, use the Fast Egg Hatch Code (1.4.14).

Use only ONE of these code at the same time.

3. Thanks.

Thanks to all the people at CMGSCCC that supported us.
(especially L3reakmanx and Mastersord)

Thanks to Mastersord for having host our Codes FAQ in his FAQ on
www.gamefaqs.com.

Big Thanks for Forgotten, and his great emulator, VBA (<http://vboy.emuhq.com>).
Without it, this FAQ won't ever exists.

Very Big Thanks to Parasyte and the GSCentral Guys : you rock !

Thanks to Datel for having created such a nice device!

And thanks to all the people who use these codes :)
