

i. -Overview-

Over the years, Nintendo has released the best games of every generation. They have defined the gaming world time and time again, always seeming to come up with new and inventive ideas that market to every single age group. But there's a dark side to the big N, a masochistic and demented side that people always seem to overlook. They love to hide things in their games, knowing that someone somewhere will find it, and they always ALWAYS remain secretive and quiet about it, never revealing how to obtain the secret without cheating. Well no more. I got fed up with them after the Animal Crossing Punch-out!! Fiasco. Want a complete 386 Pokemon Pokedex? Want to have a battle against legends like Mew, Rayquaza, Jirachi, and Deoxys? It's all here. The definitive Pokemon cheat code bible. I collected these codes over a period of six months. Have fun, and enjoy.

As far as I know, this is a *COMPLETE* list of all codes for Pokemon Ruby and Sapphire. You won't find most of these codes anywhere else.

ii. -Master Codes-

Each game has several different master codes, but these should work for most code sets:

Pokemon Ruby Master Code:

9E6AC862823AB7A8
46B7D9E4A709E9E1

Pokemon Sapphire Master Code:

9E6AC862823AB7A8
8365F8FA817CF3E9

If different Master Codes are required elsewhere, I have listed them. All codes work for BOTH Ruby AND Sapphire, the only thing that is different are the Master Codes.

iii. -Gameshark Advance, Code Breaker, and Action Replay-

As far as I know, there are no differences between the cheat devices for the GBA. GSA, Code Breaker, and AR all use the same codes.

iv. *NOTE*

I did NOT create ANY of these codes, and I take NO CREDIT for their creation, only for my work in collecting them all and typing them up. If YOU

created any of these codes and have proof, I will be more than happy to credit you. I have used most of these, and I know they all work, BUT IF YOU FOR SOME REASON HAVE A PROBLEM USING ANY OF THE CODES LISTED HERE, Do NOT contact me and ask me questions, you WILL BE IGNORED. If you decide to use any of these codes, you do so at YOUR OWN RISK. Some of these codes do have undesired effects, and can DESTROY YOUR GAME DATA. I accept no responsibility for lost data.

As far as I know, this is a *COMPLETE* list of all codes for Pokemon Ruby and Sapphire. You won't find most of these codes anywhere else.

Section 1.

Codebreaker Codes

Wild Modifier Codes

These codes work differently from the Route 101 codes everyone is familiar with. These codes work EVERYWHERE, not just on Route 101

For example, enter the Scyther wild modifier code:

123 - Scyther

C4C02E8BCB6C0843

Now, encounter a wild pokemon anywhere (Well, except by fishing), and you'll fight....
a Scyther! ZOMG!?!

This means that if you go to an area like Victory Road, where Pokemon are high in level, your Wild Modified Pokemon of choice will be the same level as the Pokemon normally found there.

Now to remove the code:

For a real Gameboy Advance:

Delete the code, save, turn off your GBA, turn it back on, and re-load your save file.

For emulator users:

Remove all codes from the cheat list, Save with the regular in-game save feature (just like you would on a real Gameboy Advance, NOT BY USING THE F-KEYS!!!), Re-open the ROM File ("File -> Open", then choose your ROM file) and re-load your regular save game (AGAIN NOT THE F-KEY SAVE STATE) the same way you would on a real GBA. Voila.

New Species Codes

These are 3-line type-6 codes, so as of 2004, they Do not not work on a real GBA GSA/AR/CB. They only work on emulators as far. Perhaps one day a device will be made that can handle multiple ROM-write codes, but until then, they are only usable via an emulator.

Get a bad egg that has Pokeruss

Enter this master code:

930403081078

440A5F944DC6

04B97176CAD5

Note: You must have master balls.

If you let it get away, the game
will freeze.

Enter this code:

9F133E9CC468

This code only works about 25% of the time. Either the wild pokemon will not have any HP, or there will be a question mark like on the pokedex. If it's the question mark, catch it with the master ball. It will say the data has been added to the Pokedex. Nickname it ???.

Look at your new Pokemon and there will be a bad egg. Look at its summary. It will say it was obtained at the daycare. It will say that it will take a long time to hatch. Try to get it to hatch as quickly as possible by taking a lot of steps. If you let it hatch really late, it will be a pokemon that you can easily catch, like a Zigzagoon or a Poochyena. If you make it hatch early, it will be a mystery Pokemon. A mystery Pokemon could be anything like a Jirachi, a Rayquaza, one of the Regis family, a Bulbasaur, or a Mewtwo. Unless you get Mewtwo, it won't completely screw up your game. If you get a Mewtwo, turn off the game and leave the egg in the pc. The egg usually (but not always) hatches.

Alternate (m) (must be on)

How to get two Castforms

Use this cheat CE2CCCB25D8D815D

(Allows you to walk through almost any wall/object).

Now just go to the weather institute, go inside, beat
all team Magma/Aqua but not the last one (the one standing
directly in front of guy that gives you the Castform)

Now walk through the wall next to them, talk to the professor

(make sure you have room for two Pokemon in your team) and he will give you a Castform. Go back through the wall and beat the last team Magma/Aqua person and then the professor will give you another Castform.

Use this code to make ALL your Pokemon catch the Pokerus after one battle.

(even if they already caught it):

33969F4A EE0B4CC2

Catch ONLY Shiny Pokémon:

Step 1

Turn on the GBA and launch the game without any codes. Make sure you have the 1st slot of your first Pokemon Box in the PC free. Make sure you fill the 2nd slot

of the first Pokemon Box with a Pokemon
YOU CAUGHT IN THE WILD YOURSELF WITHOUT ANY CODES.
IF YOU DO NOT FOLLOW THESE INSTRUCTIONS THE CODES
WILL *KILL* YOUR GAME SAVE.

Turn off the GBA.

Step 2

Turn on the GBA.

Enter these codes in your GSA/AR:

7E5D9AF7 D9D32B17
C70FC474 E276A579
3BC474AA A9392507
DEF526FD C0120242
1DE2A65D C774F615
667B915F 86A23D5A
C5259E55 27D383AF
639B1F5C 1FA26FB5
24A766C4 73C0AD82

Start the game with these codes ON.

Load your game.

Save your game.

Turn off the GBA.

Step 3

Turn on the GBA.

Enter these codes in your GSA/AR:

5398D115 E9AE8AFC
A90EF609 D2B39D98
4FDCAF5C 32905BB9
51BA1E07 C546973F
659EC2AF A0A1714C
351F1B94 DC32DAAE
24BDB599 04A7AE40
AEA85451 0DD453FD
5662572E C8845667
C94EE97E 808029FD

Start the game with these codes ON.

Load your game.

Save your game.

Turn off the GBA.

Step 4

Turn on the GBA and start the game without codes.

Load your game.

Now look in your PC. You'll see a strange Egg in the 1st slot of the 1st box. It'll be named "Shiny Hack". DONT'T MOVE IT. DON'T LOOK ITS SUMMARY. DON'T REMOVE IT. Just make sure that it's there. If it isn't, put whatever Pokemon you want in the 1st slot, then move it again to free the 1st slot, then go back and repeat Step 2.

Turn off the GBA.

You have now re-created the Shiny Hack Egg. To find Shiny Pokemon, you must have it in the PC, in the 1st slot of your 1st box, then move on to steps 5-6. You won't have to redo steps 1-4, unless you somehow lose the Shiny Hack Egg. If you move this egg, the following codes will crash the game, and you'll have to start again from step 1.

Step 5

Turn on the GBA.

Enter these codes in your GSA/AR:

1E1650E3 267CE8CC
FD1581BB CD466792
EFABCDC7 10C10904

Start the game with these codes ON.

Load your game.

(You'll see your Trainer Name is messed up - don't worry, this is normal!)

Save your game.

Turn off the GBA.

Step 6:

Turn on the GBA.

Enter this code in your GSA/AR:

D11444FA 2866D302

Now the next Pokemon generated by the game (wild or egg.) will be always Shiny.

THIS ONLY WORKS FOR THE 1ST POKEMON THE GAME CREATES. IF, AFTER THAT, YOU TRY TO ENCOUNTER A WILD POKEMON, CREATE AN EGG (BY BREEDING), MAKE AN EGG HATCH, OR RECEIVE A POKEMON OR AN EGG FROM SOMEONE, THE GAME WILL CRASH AND YOUR SAVE WILL BE GARBAGE!!!

What this actually means is, you can :

- Find a wild Pokemon ONCE, then save your game.
- Receive a Pokemon from someone ONCE, then save your game.
- Receive an EGG from someone ONCE, then save your game.
- Put 2 Pokemon in the Daycare (to make them breed) then save your game.
- Make an EGG hatch, then save your game.

Once you've made one of these, you'll see that your Trainer Name's is back to normal:

THAT MEANS THE NEXT TIME THE GAME CREATES A POKEMON,
THE GAME WILL CRASH IF YOU
HAVE THE CODE ON.

So save your game, and turn off the GBA!

Step 7:

Now, if you want to catch more Shiny Pokemon using this code,
just redo steps 1-6.

Else, if you have finished, do the following :

Turn on the GBA.

Enter these codes in your GSA/AR:

33B0BD02 A96038C8
2C7461AC 6912B9F8
A38D6566 5FE97854
7B0D49A2 37C8DBF7
6B985CD3 855A5970
9F7C6183 C3908197

Load your game.

Save your game.

Turn off the GBA.

If you want more shiny Pokemon, just repeat steps 5-6.

Mirage Island will always on route 130.

61260541 1EB19C53

Enable Latios/Latias battle on the Southern Island.

0332305F 41A5F851

This code will allow you to battle Latios/Latias every time you examine the "stone" (or egg, or whatever it is) (without this code, you'll encounter Latios/Latias only one time) :

7C4D9034 783EE1E6

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the "Eon Ticket", and that Latios/Latias will appear if you examine the stone).

The 2nd code sets "off" the flag that says that you have already done the stone island event (this flag is set on when you examine the egg and encounter Latios/Latias (obviously by using the 1st code). Once it has been set on, you can't go to Southern Island / encounter Latios/Latias again).

You must have finished the game for the 1st code to work (or at least gone far enough, so you can already take the boat to go to battle tower or other places).

Feebas always appears on route 119

11E58406 0C731B08

Fast egg hatching

With this code, every step you make will count for 255 steps. That means eggs will hatch very very fast !

D7A2E463 9F64ABFA

2 on 2 battle codes.

Only make 2 on 2 wild Pokemon Battle :

FB089E40 B13D1214

BE283E95 E6978689

NOTE: With this code, stand in grass, then Press R and L together. Within the second, a battle will start, and you will face 2 of the same pokémon. You only need to defeat one to win, however.

Only make 2 on 2 Trainer Pokemon Battles :

FB089E40 B13D1214

69D6B016 FDDD4E2B

FB089E40 B13D1214
BE283E95 E6978689

With this code on, talk to the trainer you want to fight. When the trainer is blabbing, you press and hold R and L. Keep pressing A to get them to finish talking. Then when the battle starts, let go of R and L when it says "So and so wants to battle". The battle will now be 2 vs. 2.

Laveridge egg code

Enter this code, and the old lady near the hot springs of Lavaridge will always give you a Wynaut egg :

C6500699 A423FC68

Use these codes when you use the code above at the same time to change the egg from a Wynaut egg to the desired species.
