A.What is virus breeding?.

Virus Breeding is raising viruses at Science Lab in the Virus Breeder. The virus breeder is in the Virus Lab. You will get this late in the game. You will unlock this after the events with Mr. Match. First you must find the viruses. The viruses are in special locations in certain part of the game. You can use these viruses in battles. After you delete them, they will come back and then the'll be transferred to the Virus Breeder. After you gain a virus talk to the guy next to the virus breeding machine. He will give you a chip. Do this after you gain a new virus.

Here are the viruses:

B. Mettaur

It's in ACDC 1. You need the WWW-ID (get this by completing the "Help with Rehab" job). Open the locked door, and it's at the bottom corner. If you don't know where it is. Jack into Lan's computer and enter the Internet through there. Follow the path and turn at the second spot that you are able to. You will fight an Mettaur, Mettaur2 and Mettaur3.

C.Bunny

After you get the virus breeder you'll see a job named "Please adopt a virus!" on the SciLab Job BBS. You need 50 BugFrags before doing this job. Go to the SciLab Square. Take the warp point, go left, down, then left again, now go up. You will see a purple Navi with a Bunny virus. Talk to him. Give him the bugfrags.

D.Spikey

Jack into the gargoyle statue on Hades Isle (one whose eyes are lit up in red) Go straight up, and go to the top of the second bulge out to the upper right.

E.Swordy

NO INFORMATION YET

F.Jelly

NO INFORMATION YET

G.Mushy

Go to the CyberMetro in the SciLab, move up the ramp. Go forward until you reacha left turn and turn both times you see a turn a turn. You'll be behind the stand. The virus is in the right corner.

H.Momogra

Go to ZooComp4. Go right where Beastman was.

I.KillerEye

Jack into the Principal's computer in ACDC School. Go to the first row of desks. Move all the way to the upper right until you come see a flashing display. Press A next to it, you'll see it's a electronic blackboard. The virus is one square down-right from the top square where you are.

J.Scuttlest

You must have beatn Alpha to fight this virus. Go Secret Area 1. Check the left corner. The virus should be close to there. One more thing, This virus may be hard for you.

K.Scuttlest 2

Gead to Secret Area 3. Now go onto the compressed path. Keep going straight until you you turn to your normal size. Don't turn unless the path is turned.

L. Raising These Viruses.

To raise these viruses you need bugfrags. After you have capture any of the viruses, jack into the virus breeder. You will see four teleporting points and one of them straight above. The viruses are in the following pen:

Mettaur and Bunny

--In the bottom warp point

Jelly and Mushy

--Left warp point

Swordy and Spikey

-- Top warp point

Momogra and KillrEye

--Right warp point

Scuttlst
