What are chips?

In the Mega Man Battle Network games, chips were used to defeat viruses and enemy bosses. They could damage the enemy with a set amount of damage (in some cases, damage depends on circumstances, like Muramasa does the amount of HP you've lost), and were quite useful. They could be collected from viruses, Navis, chip traders, and could be bought. In this game, although the setup system is somewhat different, their importance is still the same, if not more important.

How do I collect chips?

You can collect chips by either beating other people in netbattles, or you can buy chips from 3 different shops. The first choice in a shop gives you one chip, the second gives you a bunch of chips for 10x the price, and they are random from what I see.

What use are these chips?

Chips act in a variety of way, but they can be divided between attack and

support. But support has a lot of different subcategories. Attack, damages the enemy. Support could recover your hp, keep attacks under 200 damage from harming you, cause more damage from an attack chip, change the fields, and other stuff.

4/03/04-Now that the English game is out, I updated this FAQ.

21/08/03-I've easily got at least 4/5ths, maybe even 5/6ths done on this chip FAQ now.

15/08/03- I can't believe I did all that work in 1 day. Over half of the chips have been covered.

IMPORTANT NOTE: THIS FAQ is ONLY FOR STATS, and will not contain anything on descriptions or locations; hence the name 'Chip List'.
