Revision History

V1-Finished the FAQ/Walkthrough.

B4-Added difficulty

B3-Finished the entire game

B2-Finished the walkthrough to the second level

B1-Started the walkthrough

Being a Fan of the silent scope series, I saved up my lunch money for this game. Well, it's like the first silent scope game, except it's much harder, because you are playing on a 6x6 screen and without the gun.

2) Walkthrough

Stage 1:

Difficulty-*

The president and his family have been attacked by an armed terrorist group. They are demanding freedom for their dictator. Go to the location immediately and save the president and his family.

The police are returning fire, please provide backup.

4 initial Terrorist standing close to the cars. Easy targets, pick them off. After picking them off, another 4 terrorist will appear. 2 are near the trees, and the other two standing close to the trees. Take them out fast as they are quite accurate.

Next, you will be going for some rooftop action. There are two snipers, facing the wrong direction. Pick them off, head shots if possible. After making them fall twenty stories or so, another two snipers will appear, pointing their weapons at you. Pick them off quickly.

Another rooftop battle will happen. Pick the three un-suspecting snipers off. Next, you will be brought towards another rooftop with two snipers. One is patrolling and the other is looking towards the pool. Give a glance towards the pool and catch the girl for a bonus life. Two snipers towards the left appear after you kill the first two. Both are looking at you, so pick them off.

BOSS AREA:

You have 3 choices, tower building, air battle or stadium.

TOWER BUILDING-

Difficulty- **

Take out all surviving snipers from the roof. (Must be an error of some sort)

I have found the president's daughter at the top of the tower building. Go to the location immediately. Wipe out the terrorist and save the president's daughter. It's him! It's Scorpion!

Boss: Scorpion

Life: 10

Weak point: Head

Weapon: Rocket Launcher

This should be quite easy, compared to the arcade series. The helicopter moves only left and right, allowing you to have a much better sight and shot. Just be careful of the extra terrorist and the rocket he shoots. It's close to impossible to shoot the rockets, so the best is to kill him off quickly.

AIR BATTLE-

Difficulty- ****

I have spotted an unidentified aircraft.

Go to hell!

Boss: Scorpion

Life: 10

Weak point: head

Weapon: Aircraft.

It's very difficult and time consuming. If you think this will be like the arcade series, you are totally wrong. That head shot will not come easily, in fact, you will be taking 10 pot shots at him. You need very fast fingers for this, because the time when he stops is one of the times you can easily get him. It takes a lot of time.

STADIUM-

Difficulty- ***

Take out all surviving snipers from the roof (Bug, I think).

The terrorist have kidnapped the president's daughter and are hiding in the stadium. We can't identify them from here. Go and search for them, over!

Boss: Cobra (name from arcade series)

Life: 5

Weak point: Head

Weapon: None

Get that free bonus life at the top. Then, go fro cobra. With footballers swarming all over the place and the helicopter moving left and right, it's a tough one. However, only those terrorist will shoot you. The good thing is that you need not kill him. However, if you are looking for points, killing him will give you an excellent bonus.

We have secured the president's daughter.

Stage 2:

Difficulty- *

We have received information that the first lady has been captured by the terrorist at Hotel Imperial. Find their hideout and remove them all, over.

Here, you will see two men, which you must locate. Two things you must look out for, their shirt color and when you find them, make sure they are holding a weapon of some sort. In the first area, look on the right for a bonus life, before taking them down. The first guy is easy to

spot because of his red shirt color. The second one is usually at the bottom floor. Just keep your eyes peeled. Also, they are not expecting you, so try to gain more points by scoring headshots.

The second area is the repeat of the first one, just that there are three men instead of two. Take note of the civilian at the right hand side, wearing a blue T-shirt. The guys you want are on the left, below, and on the top.

The third of the search area is just a repeat of the first area. The one in blue is the one closer to the centre, not the one at the extreme right. The second guy is at the last floor, somewhere beside the signs of the people you must kill.

BOSS AREA-
Difficult- **

I have found the first lady. She's being held by hornet. He's an expert sniper, be careful.

Boss: Hornet
Life: 5
Weak Point: Head
Weapon: Sniper Rifle
Expert? Not really. Just catch him while he is standing still or running. Do not follow him with your crosshair, but wait at a point for him to run past before shooting him. If you are running out of time, the extra guys are there for you to gain some time. Not much of a challenge, other than the fact that this sniper rifle works like an old AWP with take ages to load up after firing.

You've done it! We secured the first lady, over. Standby for your next order. Over.

Stage 3-
Difficulty- ****

I have received information on the location of the enemy base. The president must be imprisoned there. Break into their base.

Here are three guys. Take them off as they will shoot quickly. Following that are four guys, with two at the far end at the right. Shoot the closest one first, then hit the two at the right.

The next area has three enemies, pick them off. The next three enemies appearing will shoot accurately and you will lose at least half a life if you are not fast enough.

Destroy the main power supply box to confuse the enemies, over.

The power box is at the far right, blow it up to allow a girl to run out and make that sniper of yours give a wow sound. Three enemies at

the left will start to make your life miserable. One of them will also use a flash bang which will make your night vision useless for about 5 seconds. There are five enemies which will appear and one of them will again use a flash bang. You need to be fast and accurate for this one, as they are fast and accurate.

The next area shows 4 enemies, with the one on the lower left shooting flash bangs. Take him out first and work your way with the other three. Another four will appear again with the one on the lower left shooting flash bangs. Take them all out.

The next area shows 4 enemies, with the one at the back shooting a flash bang. Kill him off and enjoy with the other three.

BOSS AREA

Difficulty- ***

Boss: Tom (name from the arcade series)

Life: 5

Weak point: head

Weapon: Crossbow

Boss: Jerry (Name from the arcade series)

Life: 5

Weak point: head

Weapon: Throwing knives.

Not as hard as the arcade series, all you have to do is to aim at one of their landing spots, either on the left, or on the right. Only problem is to get that head shot as quick as possible as they move fast. They only stand which they are aiming to shoot, which is one of the best times to give them a headshot. Not too hard, not to mention that huge time extension and the huge amount of points.

The enemy has found us, and we are fighting back. We can't support you anymore. You must rescue the president for us! Any way you can...

This mansion is the one which deserves the 3 stars, with the one in the forest and outside the mansion being a slumber party pillow fight. This new area has two guys, standing beside a woman. Take out the right one with a headshot while the one on the left is harder as he moves a lot. The next area shows 4 enemies. Easy pickings. They are followed by 6 enemies, two hiding behind pillars. Pick off the 4 visible ones before getting the 2 hiding behind pillars. Also, it is quite possible to get the only game's double hit if you are lucky and very very fast.

The next area shows 4 targets, not knowing of your presence. Take them all down, headshots if you have the time. After they fall, another 5 will appear, with one hiding behind a pillar. Pick off the first four and wait for number 5 to appear. He takes around 3 seconds to appear.

There are 8 enemies in the next area, all knowing of your presence. They include 2 hide-and-seekers. One is behind the machine, while the other is at the far end. Take note of the one on the right, closest to you. The eye easily misses him.

The next area has 8 enemies. No hide-and-seekers, thankfully. Take them all down quickly as they are very accurate and you can lose a lot of life due to them.

BOSS AREA-
Difficulty- *****

I will never let go of my sweet president.

Boss: Monica (from the arcade series)
Life: 10
Weak point: head
Weapon: Sub-machine gun/ throwing knife.

She's as tough as she is in the arcade series. However, she does not come flying towards you guys shoots at you while standing on one of the containers instead. Aim at either the left or the right one. A head shot will be nice, but 3 chest/leg shots are enough to proceed. Note that when she shoots, she bend her body towards the right. Aim a bit to the right. Of her chest/head/legs. The best time to shoot is when she bends her knees.
After 3 shots, she will proceed to the moving container area. She is on the left. Aim for her head. Not much of a problem now.

As I expected!! You have done really well to get this far. But do you know what this means? This is a live switch to the bomb which will destroy everything. It's a waste to grind you now.

Let's break the bullet proof glass.

Well. Just shoot until it breaks. Actually, if you have 2 bullets and below, you will reload. If you have at least 3 bullets, you will shoot until it breaks.
Watch him run towards his boat and sail away.

Target his head and bring him down with you last bullet!

Not easy at all. The boat rocks left, right, up and down. Take your time. Shoot only when you are very certain. Sometimes, 1cm off his head will also mean headshot.

Now sit back and watch his boat explode, if you hit.

THE END.
