=====

## 3. Planets/levels

Tatooine:

Information:

The First planet and the easiest mostly quite slow and harmless enemies

Enemies:

Womp rats:

Danger Level: 2/10

Attack: Bite, some may poison you

Droids:

Danger level: Normal: 4/10 Other: 6-8/10

Attack: Blaster Rifle

Tuscan Raider (Sand Men)

Danger Level: 4/10

Attack: Will stab you with long spear

Anoobas:

Danger level: 5/10

Attack: Will bite with more damage than Womp rats

Jabba's guard:

Danger Level: 4/10

Attack: Will Stab you

Robot guards;

Danger level: 5/10

Attack: Laser

Basic level guide:

Tatooine:

Begin from your ship to Mos Espa killing Womp rats as you go, talk with a few citizens before heading west though Xelric Draw to the Womp rat caves. When inside the cave head to the box areas and kill the pesky Anoobas. You'll be warped to outside the cave were a bounty hunter will be waiting, Dodge the Thermal Detonator and make your way back to Mos Espa killing her associates on the way. When back in town head north to talk to Watto. He will tell you to check out the moisture farms, be ready to fight all kinds of enemies including droids. You'll be asked to free some farmers in the dune sea. When you have Anakin will be captured and taken to Jabba's dungeon. Escape the dungeon and set prisoners free, prepare to encounter Robot guards and Jabba's men. There are many jump traps in this section so be ready with force Jump. When you finally escape (this levels massive!) Anakin will be challenged by the first boss.

Killing the Boss:

This boss can be killed very easily by using the slice attack (A + Down) continually as her health will fall quickly. Be aware of the deadly Sarlacc pit, one fall in there and at least half your health is gone. On two the next planet!

Coruscant:

Enemies:

Droids: (Normal, Cortisis)

Danger level: From 4/10 to 7/10

Attack: laser

Robot guard:

Danger Level 2/10

Attack: Laser

Greedo's

Danger level: 4/10

Attack: Blaster pistol

Basic level guide:

Make you're way through the high city fighting the Droids back and helping out people on the way then through the Underlevels battling even more droids and helping out even more people. When finally you reach Benthos Nightclub proceed into the core bay, this section can be passed very easily by running down the right side of the map as it is straight and if you keep moving the bad guys wont be able to shoot you. When past the core bay there will be a Cutscene were Anakin will meet Dooku and he will tell him that he is going to destroy the Jedi Archives. Dooku will also send a Cortisis to attack you. Destroy it and continue. A good tip for this area is to hide behind those things that look like bookshelves and when a droid is trying to shoot you through it force push and kill it! When you reach the end of the archives you will meet Trenox!!

Killing the Boss:

A very hard boss to kill as he keeps doing heavy slashing attacks that hurt you about 30 health each time, a good way to kill him is to: when you start draw you're Lightsaber and walk slightly towards him begin to use the slash attack before he reaches you after you're first attack he should be on minimal health. Run away into a corner or get him trap running into a wall so you can regain health using meditate. Use the tactic as above and it'll be easy.

Metalorn:

Enemies:

Droids (all kinds)

Danger level 4/10 to 7/10

Attack: Blaster Rifle

Basic level guide:

From the Factory outskirts make you're way in killing the droids as you go, when in the production facility's you'll have to dodge the spray things and the lava be careful of droids after you make jumps as they will be waiting for you. Then into the Cortisis processing plant, avoid getting tangled with civilians as you engage with the droids at the end of the map you'll meet a bosses...

#### Killing the Boss:

These two are incredibly hard to kill so walk back into the small corridor you came from and take them on one by one, using swirl attack and slash attack. Letting them both attack at the same time is deadly.

#### Basic level guide continued:

After you kill the two Jedi's Anakin will pick up some Thermal Detonators (you will need to use these on the main reactor), It is only a short way to the next Boss...

#### Killing the Boss:

You'll enter a room with Wat Tambor who will introduce you to the next boss, he is a bounty hunter who can hover in the air. To kill him use force push to bring him to the ground when he is on the floor use any attack (just as long as you hit him) and repeat, it will take quite a few attacks to kill him. If you run low on health just hide in a corner and use meditate.

#### Basic Level guide continued:

From here you will have to race the bombs out of the core as well as escorting Wat Tambor this will take you a few tries because of the amount of time you set is only 2 minutes. When this done you will finally face..... Dooku!

#### Killing the Boss:

You would think that Dooku is the hardest boss to kill but actually he is quite easy, He will enter from a room on the other side of the arena and give you some mouth! So Anakin gives some mouth back and the fight begins...

Kill Dooku easily by using the slice attack but watch out for his force attack, when he is down to low health he will say some more stuff and then continue, use the same tactic and you'll be victorious. His last words are: Dooku: "So I am beaten. Now you have tasted the power of the darkside" Anakin: "No you are wrong Dooku" Dooku: Am I. My master foresaw my defeat", You have yet to realize your importance young Skywalker", Today you have ensured the fall of the republic".

THE END

Now enjoy the credits!

### 5. Force Powers

#### Speed:

#### Description:

You will always have this force power on you, use it to run away from a enemy when in danger or you're in a hurry. Gives you a quick burst of speed until you force bar runs out.

#### Jump:

#### Description:

You will need this force power on some missions to jump over large gaps or you can use it for confusing enemies by jumping behind them. Launches you into the air and forward in the direction you are facing. Gained near the beginning.

#### Push:

A very help force power use to stun or kill enemies like a secondary weapon. Pushes enemies away from you or kills them.

#### Hide:

Description:

Use this force power to make yourself temporally invisible so you can sneak pass enemies without fighting. Very useful when on low health. And as some Jedi said: There are alternatives to fighting! Or something like that!

Medi (Short for meditate)

Description:

This is the last force that you will gain (near the end) and it is the most useful, when activated Anakin will kneel down and meditate. This gains you health and force.

Now go finish off Dooku!!!
