================
1. Introduction:
================
Vattroller X is a little known RPG/Fighting game for the Game Boy Advance
released in 2004 to celebrate of the tenth anniversary of the V-Jump
manga magazine. It also had a short manga story and a trading card game.

Battles in this game take place in arenas with holes on their corners.
When a fighter is out of HP, they turn into a ball and must avoid
being knocked into the holes by their opponents.

There was a trading card game of the series which featured passwords that
could be used in the game to unlock some weapons, characters
and even the last Story mode chapter.

The secret characters are guests from three other Jump comics.
One of them is Zoro from the ever-popular One Piece and despite this
it seems I was the only person in the west that knew about this (but had
no idea where to look for the passwords), as there were no english
references and information ANYWHERE about this game's unlockables.

Heck, even the Japanese seem to have precious little information about
the companion manga for the game!

Thankfully, a fellow blogger guy named E. Shiroma looked up the passwords
on a japanese game cheats site and sent them to me along with some
interesting info. Now I will tell you ladies and gentlemen about them.

============================
2. How to use the passwords:
============================
In RPG mode (unlock it by beating the first 3 story mode chapters, little
```

grasshopper), go to any of the red machines used for inventory management
and choose the fourth option in their menu to enter the password screen.

================
3. Password List
================
-Unlockable Story Mode chapter:
D=Nuts = Unlocks the secret Story Mode Chapter

The secret chapter will be available in the main menu with the others. Be
careful when you start playing it: the arena the battles will take place in
has its holes blocked, so you have to break some walls as soon as possible!

-Guest Fighters:
uogneK = Zoro from One Piece ("Kengou" means swordmaster)
okkayB = Kogenta from Onmy? Taisenki ("Byakko" means white tiger)
retsuB = Beet from Beet the Vandel Buster (Buster is what Beet is)

Buy those characters at the top of the item shop in Globe City. Each of
them costs 2000VP. Sadly, you can only use them in VRX mode, which is a
simple free play mode in which you can play as the NPCs you've fought.
Where is this VRX mode, you ask? Well, if your're on the item shop I
mentioned, cross the bridge to the other building and go down one floor.

-Player Skins:
NEWman = New boy avatars for RPG Mode
NEWwom = New girl avatars for RPG Mode

Those two allow you to begin a new game in RPG mode with the generic
characters used by the NPCs.

-Equipment:
JinSWD = Fiburn (ファイバーン)
Houou0 = Fiberush (ファイバラッシュ)
GLDius = Gladius (グランディウス)
ShuINT = Intention (インテンション)
RyoKEN = Komagasane (コマガサネ)
TotaAX = Veldseng (ベルドセング)
GreBLD = Excerise (エクセリーゼ)
INZwei = Intention Z (インテンションZ)
uyRuoS = SouRyu (ソウリュウ)
BWGrey = Gracer (グレイサー)
HevenB = Heaven Breaker (ヘブンズブレイカー)
10LEGS = Diamander (ディアマンダー)
Tiamat = Tenturks (テンタークス)
NecRom = Necromarder (ネクロマーダー)
ExrioB = Excellion Blade (エクセリオンブレード)
VoltiA = Boltic Axe (ボルティックアックス)
ClownS = Crown Shield (クラウンシールド)
Wadou1 = Wadou Ichimonji (ワドウイチモンジ)
YubKit = Yubashiri and Kitetsu (ユバシリトキテツ)
Seikai = Kotetsu (コテツ)
BOUGYO = Bougyo no In (ボウギョのイン)

Buy those weapons at the top of the item shop in Globe City. The ones that
belong to the guest characters have no type and therefore can be equipped

as soon as possible (especially because save slots share items).

-Armulet:
Dor@go = Dragoon (ドラグーン)
Lione1 = Lionel (ライオネル)
Ange1N = Angelan (エンジェラン)
Go1ems = Golem (ゴレムス)
Fa1con = Falcon (ファルコーン)
Beel2e = Belzeve (ベルゼーブ)
Kr@Ken = Kraken (クラッケン)
Asur@m = Ashram (アシュラム)
De@thR = Death Lord (デスロード)
Poheni = Fibard (ファイバード)
3mpero = Emperor (エンペリオル)

Those passwords unlock more "Armulets" (portmanteau of "Arm" and "Amulet")
which are those animal things the characters summon and change into. Each of
them have different stats. Start a new game in RPG mode to use them.

==========
4. Credits:
==========
E. Shiroma (http://edushiroma.wordpress.com/), for telling me the passwords
when i asked about them on Twitter.
Wazap! (http://jp.wazap.com), which was the source of the passwords.

====================
5. Legal Disclaimer:
====================
For now (19/01/2012), this FAQ which is written by Hyper Emerson is supposed
to only appear in GameFAQS. Feel free to read and learn from this guide,
but this must not be posted anywhere without my permission, you know.

=============
6. Changelog:
=============
V1.0 (17/01/2012) - Initial release. Published as a FAQ because Gamefaqs
wouldn't allow me to post the passwords in the Cheat section for some reason.
V1.01 (19/01/2012) - Tried so fix the weird one word lines that appeared
when I uploaded the file to GameFAQS. I can't figure out how to make the
japanese text work normally, though. JWPce messes them up, too!
V1.02 (17/09/2018) - Fixed typos. Vattroller X hasn't become any more popular
six years later and I still have no real idea what the manga was about.

THANKS FOR READ
