## Monster Building Help

This FAQ was written to help users understand where monster stats come from so that they may build the type of monster they want to. Questions and comments should be sent to dengarsw@aol.com with a heading that reads "AMAZING ISLAND FAQ".

### Updates:

- 1.2 (1/30/05)- Shane's Item Locations.
- 1.1 (5/13/05)- Sister of Night's Item Locations.
- 1.0 (10/14/04)- FAQ first uploaded.

## 1. Monster Notes

Here are a few things I've figured out so far:

- A. Item size, location, body part (i.e. head, left arm) and color DO NOT alter statistics. The item itself is what gives your creature it's bonuses.
- B. Pattern variety, painting, and sliding within a single type (i.e. cow, zigzag) DOES NOT alter stats.
- C. Eye location, size, and position DO NOT alter statistics.
- D. Voice variety (i.e. robotic, high) within the same voice selection (i.e. horse, wolf) DO NOT alter statistics, but the voice itself DOES.
- E. Names DO NOT alter statistics.
- F. Accessories AND pattern decide attribute, but it seems as though accessories are stronger (i.e. all wings makes a monster a wind, even if the pattern is a water variety).
- G. All items ARE NOT equal. For example, a horn is not just a horn! One may give 3 to speed, 8 to power, 4 to mental, and 1 to stamina, while another gives 1/10/0/6.

- H. Some items subtract stats (i.e. ogre horn gives 4/-2/2/0 to the head).
- I. Frames ARE NOT equal. Drawing something EXACTLY the same in a different frame WILL NOT give your monster the same stats.
- J. What you draw as your frame DOES alter stats. Size, location, and shape DO matter, as well as inflation.
- K. On the Dragon-Man Frame, my tests (5 attempts using a circle stamp on the same area with the 5 different inflation types) said that arm thickness does not matter.
- L. Stats given by items are the same on all frames.

---

## 2. 100% Item List and Statistics

### A. IMPORTANT NOTES!

-All stats are based on a dog frame with only normal inflated spheres for hands, starting with the dragon pattern and dinosaur voice, so pattern and voice statistics are changes from the originals. For example, the Lizard pattern does NOT give -1/2/-1/4. This is the number it gives when COMPARED to the pattern.

-The dragon pattern's stats compared to other patterns are as follows:

- Speed- Nine pattern groups are above it.
- Mental- Five pattern groups are above it.
- Strength- One pattern group is above it.
- Stamina- Four pattern groups are above it.

-Eyes are done in pairs (duh).

-The dinosaur voice's stats compared to other voices are as follows:

- Speed- In the middle of the voice groups.
- Mental- Five voice groups above it.
- Strength- Top group of voices.
- Stamina- Four voice groups above it.

-Original testing took place on several other frames and body parts, all of varying size and inflation, and confirmed notes one through twelve, but further testing may be needed.

-Stats are listed speed/mental/power/stamina.

-Items that I THINK are from the GBA mini-game are marked with a @ next to them. Items with an @+ are from the GBA Link battles.
