Baten Kaitos: Eternal Wings and the Lost Ocean
Magnus Location Faq
by Sister
copyright 2008 Cindy Miguez (sis_cindy@hotmail.com)

This is a faq born of frustration. The first time I tried to get all the magnus, I missed the Cypress Creel for Gibari. The second time, Xehla didn't have a camera for Naiad (and I'd already saved over my file), and the last time, about a month ago, I had 1000 magnus and was just filling in the empty spots when I found I could no longer get the Sun Anklet. So, that's where this came from. I have used most of the faqs on this game at one time or another, but special thanks to theWilsse for the Aging Magnus faq, Fei Hong for the One Chance and Constellation faqs, sabin01 for the Equipment faq, exarkunnn for the sidequest faq, Yami Shuryou for his walkthrough, and Badaro for the Magnus List. Extra special thanks to Daredevil3181 for the tremendously helpful Magnus Special Combo Faq. I also received help on the board from HolyKnightSlash, cyberpik, and xylophone2. Thanks, everyone!

A few things to remember:

There are spoilers in this faq - not many, but some necessarily because it lists all the bosses. I would recommend having finished the game at least once before you try getting all the magnus anyway.

I have not attempted to list every location for every magnus - just enough to get what you need with a little deck building on the side now and again. If you think I missed something important, feel free to email and let me know at sis_cindy@hotmail.com.

In this game, you don't have to own a magnus for it to go into the gathering. All you must do is see it, so be sure to check out those shops even if you're not buying.

Give Xelha a camera when you get to Alford even if she's not in your party and leave it in her deck. She will be on her own for a while and she **MUST** have a camera for a boss fight.

There are two unique fights in the game where the deck is blind; you choose cards to match the enemy's. There are cameras in these decks. You **MUST** get pictures of the Ice Goddess of Wazn and the Wizard Shadow at the bottom of Zozma Tower. If you miss the pictures, you'll have to do the fights again. Be sure to save before these fights in case you miss the cameras.

IMPORTANT: I am including a section at the bottom where I list the one-chance items in order; I would suggest you familiarize yourself with the list and check it now and again as you go along.

SUPER IMPORTANT: When aging magnus, be careful not to leave your Gamecube on too soon. For a magnus to be added to the gathering, **YOU MUST SEE IT**, so if you leave your system on all night to age your magnus and a magnus has more than one evolution, you'll skip a step because you didn't see it. It is very important on one-of-a-kind items like the auras and the magical piggy bank to see each evolution, so don't start any hardcore aging until those items are

complete. Many thanks to xylophone2 on the boards for this explanation.

Phantom Goldoba - this is a one-time only dungeon, so make sure to get every chest. Start in the lower right room and work your way around room by room. Be sure to get a picture of the Master Revenant. They only sell for one gil each, so you only need one. Walk into the blue orbs to fight them; these don't respawn. Don't forget the boss picture either.

Don't get rid of any magnus unless you're SURE it isn't needed to evolve into something else or needed for a recipe.

Rotating Magnus - these are magnus that change at given intervals, so they're always changing. The Green Light, for example, will change from Green to Yellow to Red, back to Green...forever.

Evolving Magnus - these are magnus that change into something else after a given amount of time. They differ from rotating magnus in that once they've evolved, they will never return to the original. I do not list the times required for evolving magnus, but keep in mind that some of these things take a very long time (72 hours for Peach Boy to turn into Wonder Momo, for instance - not so long compared to Shampoo...). Check out the Aging Magnus Faq by theWilsle for specifics on the time required for a particular magnus.

Recipes - These are combos performed in battle when you use magnus in particular combinations to create new magnus; they must usually be done in the order listed to work. You also must not combine them with any other magnus that turn for the new magnus to be made. If you want a Paper Fan, for example, you must use Young Bamboo, Rice Paste, and Rice Paper in that exact order and no other magnus that turn to get it. All the recipes are from Daredevil3181's excellent Combo Faq. I have not listed all of the combos - only those required for magnus that can't be found any other way. To complete the combo section of your gathering, check his faq. If you want to use non-Magic users, you can often substitute Mineral Water for Aqua Burst and Large Fire for Fire Burst.

Photos -

Boss photos - you get one shot at these (with the exception of Giacomo, Ayme, and Folon), so don't miss them! Remember, if there are two bosses in a fight, you must get them both. I will not list in the missable section all the boss photos. Just remember that you must get all their pictures or you can't get all the magnus.

Limited time enemies are just that - around for a short time - and should be treated just like bosses.

Regular photos can be done anytime. If you miss one, you can go back for it.

Drops - monsters in this game can drop many different items, so it's a good idea to hang around and fight for a while when you get to a new place. If there's a question mark (?), that means I'm not sure which monster dropped it. Some enemies only show up with others (like shellfish and devilish hands at Detourne), so I'm not positive which dropped it.

*missable and/or one-of-a-kind item

*A note about yells:

Yells degrade over time. It takes a while, but an Aqua Yell III will degrade to an II and eventually back to a I. Since the higher level yells must all be made via combos, I would recommend waiting until you have the necessary ingredients (like the Swan for Wind Yell IV) before you start making yells. If you make all your level III's before you have that last ingredient, you may end up doing them all again, which is a royal pain in the butt (trust me - I found out the hard way).

Hot Rock	- evolve Lava
Oil	- Goldoba; jars in a house in Gemma Village
Pressed Flower	- evolve Nameless Flower

- Mountain Apple - barrels near save point in Celebrai Village
- Apple Vinegar - evolve Mountain Apple Wine
- *Warrior's Memories - evolve Warrior's Mementos for fifty hours
- Warrior's Mementos - These will automatically appear when you get your first blank magnus - DO NOT give these to Gram and Leon's wives in the Ice Palace until they have evolved into Warrior's Memories - there's only one of these in the game. You've got to hang on to them for fifty hours.
- Golden Pick Axe - in maze in Detourne (Mira) - will only appear after you defeat all the enemies in the maze
- Diadem Royal Crest - the crest is at the top of steps in Diadem Castle
- Picture Book - search, Emperor's Room, Imperial Palace
- Adventure Novel - search shelves, Mizuti's house, Gemma Village
- Dead Bluebird - help man with bracelet in Moonguile Forest to catch birds; they will stay there for the rest of the game
- Naughty Novel - in drawers to the left of Quzman's bed (talk to him each time you visit for new things to become available); this becomes available after you've been to Duhr
- Rock Salt - do "jump of courage" in fish hut, Nashira, and old man will give you this
- Mirage Weed - growing on the walls, Detourne, Mira
- *Thunderfish Bone - After you kill the Thunderfish, DO NOT take his skull out of the water; you will need it much later in the game and this is the only one available. Once you pick it up, you have to keep it for the Museum guy, so just leave it until later.
- Mountain Apple Wine - evolve Mountain Apple
- Nameless Flower - water flowers in street of of Pherkad and you can get Nameless Flowers here for the rest of the game
- Explosives - get from Larakush (part of the storyline)
- Sparkling Snow - sparkling spot outside in Wazn machine in Mechanic's room in Lava Caves
- Terrible Painting - get at Quzman's - chest of drawers right of his bed
- Delinquency Stone - appears randomly on the first basement floor of Zozma Tower; you'll have to kill the Breacher standing on the blocks to get it (you can see it under the monster, so you'll know if it's not there if you don't feel like fighting)
- Roasted Bird - put Dead Bluebird in Trill's over in Parnasse Village

Maggot-ridden Meat - evolve Roasted Bird

Family Tree - get from Quzman in Pherkad when you agree to find his family members

Treasured Painting - evolve Unpopular Painting

*Xelha only - I got these chests with Xelha while she was alone in the Imperial Palace. I'm assuming they would still be there later, but as I didn't wait, I can't say for sure.

One-Chance Items

I have put this list together primarily from the Once Chance faq and the Equipment faq plus just having played...a lot. There are a couple that I'm not sure are one chance, but I'll list them just in case. I am not going to list all the boss photos; you know by now to never kill a boss until you've taken its picture.

I am not including items like the Magical Piggy Bank or the class-up items on this list. While they are one of a kind, they're not missable. In other words, you will have chances to go back for them. Other one-of-a-kinds like the Maple Leaf cannot be missed (it's a star map prize). Just remember not not to let them go until they're completely evolved.

IMPORTANT

Some items like the Auras are one-time only then they evolve. You MUST see each of the evolutions or they will not appear in your Magnus Gathering, so check your magnus now and again. DO NOT leave the Gamecube on all night to age your magnus until you're done with the Auras because you risk skipping some levels. I had Beef (Good) skip straight to Beef (Best) and had no idea why until I saw this explanation here on the Gamefaqs boards. Many thanks to xylophone2 for this valuable information. You've got to see the middle evolution of the Magical Piggy Bank, too.

Remember, too, that there is only one of each secret recipe in the game, so DO NOT get rid of them until you've made Secret Recipe #10.

1. Cebalrai - Calm Winds Anklet

Cebalrai Village: speak to the girl milking the cow in the barn. After you've been to Pherkad, go back and tell her you liked it and she'll give you the anklet.

2. Cebalrai - Shampoo

Speak to Maynee at the entrance of Cebalrai to learn that her husband's gone missing. Agree to help her, and she'll give you her pendant. When you get to Rodolfo's Mansion, you'll find Aljeemo locked up in there. Set him free and give him the pendant. He'll give you a magnus. Return to Cebalrai and speak to his wife to get Shampoo. If you forget to return, she'll be there and you can get it later as long as you agreed to help her initially. It's better to get it now, however, because this item must be aged for two weeks to turn into the magnus Splendid Hair, so you might as well get started. Shampoo is also available much later in the game, but only

temporarily, so get it now.

3. Nunki Valley - Nunkirantula

The spider Palolo sends you after is a one-time only - get the photo.

4. Rodolfo's Mansion - get photo of Imperial Soldier

5. Lesser Celestial River - Thunderfish

After you defeat the Thunderfish, walk up to its skull twice (two different locations) and choose the option "Let it drift" to be able to get to the Heron Statue chest in the first screen, but once you can get to the chest, don't bother the Thunderfish again. This is a one-time only quest magnus. Once you take it, it's gone for good. You will need it much, much later in the game, so leave it here for now and come back for it later. Again, DO NOT take the Thunderfish right now or you'll have to carry it for ages.

6. Diadem Castle - All six Auras

You will be asked to help the knights fighting the enemy in the castle. You'll start with four knights (one Senior Knight, one regular, one apprentice, and one squire) that you will distribute as you go. Keep in mind that you can always get more knights in a bedroom on the left side of the castle near the top. Show a knight in the room the royal crest for him to join you. Black knights are twice as strong as red (the equivalent of your senior knights), so use knights accordingly. You MUST get all six auras here because it's the only place they can be acquired and all will evolve through six levels for a total of thirty-six magnus from this one sidequest. While you're at it, you can check all the paintings; you'll pick up a couple extra magnus this way. Save at the red flower at the bottom as soon as possible in case you mess up. When you distribute knights, the enemy knights must fall down and disappear or it didn't work. If Gibari says, "They'll be fine now" and they keep fighting, do it again.

7. Diadem Castle - Imperial Elite and Imperial Blackhelm photos

You will get a couple of chances at the red soldiers but only one at the black, so make sure you get his picture before you kill him.

8. Diadem Castle - Cypress Creel

After you've defeated Iron Beetle V, be sure to speak to the soldier in the throne room near the exit to the Wind Shrine. He has a shop that includes the Cypress Creel. Remember, you don't have to buy it, just see it. At only 350, it's a good buy though. :)

9. Diadem Castle - Glass Earrings

After the battle is over in the castle, help the knights clean up both the east and west wings then talk to the head knight. Not sure if this is one-time only, but you might as well do it now. It can be done as soon as

you've finished at the Wind Shrine.

10. Celestial Tree - Boss Photos

At the Celestial Tree, be sure to take pictures of BOTH the Tree Guardian and a Tentacle.

11. Trail of Souls - Zelmer, Ghost Claws, Ghost Cap, Secret Recipe 4

I hate this place... That, of course, is irrelevant, isn't it? Anyway, you must get four items here that cannot be found anywhere else. After you've finished with the Goldoba, go outside to meet Mizuti. Now save. Speak to Xelha inside to get started. Other faqs tell you how this places works, so I won't go into all that. Just remember, if you fall far enough behind that you can't see Mizuti, you'll start again from the beginning. Use that to your advantage. You must get photos of the Zelmer and Devil Claws. A Zelmer must also drop a Frost Cap. Fight as many of these enemies as you wish (they drop pretty good stuff), making sure to get the three items mentioned. I let Mizuti run ahead of me here and pick up a few things then try to get all the magnus in the next round. The only magnus you MUST get is the last one - Secret Recipe 4. The Camera 2 in the 11th wave is really nice, too - lots of prizes here, but that Secret Recipe is the one you must get for your magnus gathering. If you don't have all four of the items when you're done, you'll have to do it again. Don't forget a photo of the boss here either.

12. Mintaka - Secret Recipe #6

Search the second spike just above Melodia's airship as soon as you arrive in Mintaka. Look for the exclamation point. The door through is right behind the guy with the bracelet.

13. Mintaka - Limited-time Pictures

Imperial Guard and Elite Imperial Guard - these guys appear after you go to Lyude's house. They respawn so you can take as much time as you need here, but once you leave, they're gone for good, so be sure to get their pictures.

14. Goldoba - Limited-time Picture

This is the only time you can get the Imperial Walker, so don't forget its photo. It respawns, so you have plenty of chances; just get it before you go.

****Give Xelha a camera before the boss in the Lava Caves. NOW!! NOW!!**

15. Azha - Platinum Buckle

Give a hot rock to the daughter of the old woman with a backache then talk to the old woman; you must do this before Azha evacuates, so go ahead and do it now. Just fight monsters while lava cools into hot rock.

****Give Xelha a camera before the boss in the Lava Caves. NOW!! NOW!!**

16. Azha - Mephistopheles Cloak and Secret Recipe 7

Three little kids will follow you around constantly in Azha either asking you for magnus or telling you they're starving. Give them a total of twenty-one quest magnus (I just run back and forth with lava but sparkling snow would work, too) then speak to the guy sitting on the ground by the lava caves to receive these two items.

**Did you give Xehla a camera?

17. Interdemensional Crack - Photo of Naiad

The Interdemensional Cracks are located at all the places where you got the End Magnus. There's nothing at the one in Sadal Suud, but it will close if you go there (it closes on its own if you leave it until last if you want to skip that one). Each must be opened with whatever that place is famous for:

Anuenu: Celestial Flower Seed (a Celestial bud or flower will work) - Savyna

Diadem: Cloud from the Cloud machine - Gabari

Alfard: Lava - Lyude

Mira: Mirage Weed - Mizuti

It doesn't matter what order you do them in (just depends on which characters you want first); Naiad will always be first and Xelha must have a camera and get its picture. The other three bosses must be photographed, too, of course, but you should have more cameras available as you pick up your people.

**You have a brief time while you're going back and forth between the Interdemensional Cracks to go wherever you wish, so get some running around done while you can. I would recommend that you go see Quzman and pick up a Terrible Picture. Take it to Reverence in Mira to send Misjah to Quzman's. Now go back and get another Terrible Picture and have her sign it. It will turn into an Unpopular Picture, which takes forty hours to evolve into the Treasured Painting, so you might want to get that started. Just a suggestion. :)

18. Mintaka - Girls Thoughts

Go back to Scalla's house and look at her diary. You can now get Girls Thoughts. You must have these to get into the back room in Azha, and this must be done before the town evacuates to the Nihal Desert. There's nothing urgent here, but if you want to do all the sidequests, you'll have to do this now. The Girls Thoughts will continue to be there for the rest of the game.

19. Anuenu - Sagitta and Fairy Barrette

Go to Sadal Suud and get some Pow Milk. Let it age to Pow Milk Yogurt and take it to the guard in Corellia's Palace who missed the festival. He's on the far left of the first room in the palace. He'll thank you and give you Sagitta for the Star Map and tell you to come back later for something better. Come back AFTER you've been to the Celestial Alps for the Fairy Barrette.

20. Wazn - Warrior's Memories

DO NOT give the Warrior's Mementos to the widows of Gram and Leon. You must

wait until they've evolved into Warrior's Memories (fifty hours). Since you should have all the Auras by now and the Magical Piggy Bank should be done evolving, it should be safe to leave the Gamecube on overnight at this point if you want to or come back later.

21. Wazn - Ice Goddess Picture

When Xelha goes down for the Ocean Mirror, you must get a picture of the Ice Goddess. If you defeat her before you find the camera in the deck, do it again.

**If you missed anything in Azha earlier, they're all still here after you have finished the Imperial Palace. This is your last chance...

22. Zosma Tower - Agyo and Ungyo

Make sure to take pictures of BOTH bosses here. As soon as you're done with this boss fight, put Mizuti in your party and make sure you have ALL of your cameras equipped. Save your game before you head to the top of the tower. Although there is a scene with Mizuti in Algorab, she will not automatically be part of your party, so put her in.

23. Algorab Village - Maskless Mizuti and Mega Rare Mizuti

Mizuti must be in your party for the fight with Malpercio; it's your only chance to get these two pictures of her. Don't forget a picture of the boss while you're at it.

24. Gemma Village - Sun Anklet

When your fight with Malpercio is over, you'll find yourself in Gemma. After you receive the Broken Heaven Sword, go out and speak to the person standing on the steps on the far left. He'll give you the Sun Anklet. Get it now because he'll be gone later.

25. Celestial Alps - Giacomo, Ayme, and Folon

After you've been to see Larikush, the Celestial Alps become available. If you do not have photos of Giacomo, Ayme, and/or Folon, this is your last chance to get them.

*Once you're done with the Celestial Alps, you'll finally be able to travel at will. Sidequests for each of the characters' final Class Up become available now; which order you do them in is up to you, so they may not be in the same order below.

26. Komo Mai - Fairy Barrette

When you're done with the Celestial Alps, you'll be back in Komo Mai. Go see the soldier you gave Pow Yogurt to so long ago, and he'll give you Savyna's Fairy Barrette now.

27. Mira - Broken Birdie

Speak to the Librarian at Duke Calbren's Manor, and he'll ask you to find new exhibits. Take him the Thunderfish that you left at the Lesser Celestial River so long ago, a Delinquency Stone, a Golden Pickax, and an Adventure Novel.

28. Phantom Goldoba (appears when you fly to Mira after Celestial Alps)

There are several items here that cannot be found elsewhere. You'll start out in a room with a chest. There are chests in both the bunk rooms at the top corners. Be sure to get them before you go to the lower left room (where the red save was on the original Goldoba). There are three chests in there and once you leave this room, the boss will show up, so get the chests and a picture of a Master Revenant before you go in that room. The enemies here DO NOT respawn, so get that picture (and the boss, too).

29. Nihal Desert - Shampoo

If you missed getting Shampoo from Maynee early in the game, you can get it now from the same guy who rewarded you for helping out the kids in Azha. The shop here, however, is temporary. As soon as you beat the boss in Nihal Desert, he will be gone with everyone else, so get it now if you need it. He's set up in the back of the cave.

30. ***Zosma Tower - Wizard Shadow

Just like the Ice Goddess of Wazn, you must draw a camera in Mizuti's fight to get this picture. If you finish without it, do it again. Be sure to save on B4 of Zosma Tower before you take on the boss. It's an easy fight; just get that photo!
