### 0.1. How to Use This Guide

---

Hello there, and welcome to this Harvest Moon: Magical Melody gifting guide. This is a reference tool for all 13,262 character reactions for each of the 349 items when given to all 38 characters. All of these reactions are recorded here, explicitly or implicitly (see below).

All the information contained in this guide will be separated by reaction type:

-> "Love": The character smiles (most of the time) and makes an excited sound or giggle. Three hearts can be seen floating over their head.

-> "Like": The character smiles (most of the time) and makes an excited sound or giggle. Two green happiness lines can be seen appearing over their head.

-> "Hate": The character moans or makes a disappointed sound. A red annoyed pound sign can be seen appearing over their head.

All other reactions are lumped into "Indifference" and are not written down in this guide. The other reactions are the following:

-> "Meh": The character does not react.

-> "Go home": The character does not react. However, the text that the character says is not the same as the "Meh" reaction.

-> "...": The character does not take the item. Only the Dry Grass item has yielded this reaction, and has yielded it from every character.

As was mentioned earlier, all reactions are recorded in this guide. However, only "Love", "Like" and "Hate" will be written down here. This is to avoid overcrowding this guide with reactions that nobody will ever bother trying to obtain (or to avoid). Therefore, if an item is missing from a character's section, or if a character is missing from an item's section, this means that the character in question reacted with "Indifference" to receiving the item in question.

All reactions regarding grown crops are those corresponding to the highest quality of those crops.

The first section of this guide is separated by character. The second section is separated by item. To skip to a specific character's or item's section, use the [Ctrl + F] function to search for that item by typing in the item, preceded by and ending with the hashtag (#) symbol (e.g. #shiny wool#, or #Jamie#).

The items with typos in their names will be copied as they are written in the game, but their search code will be both the corrected version of the name and the erroneous version (e.g. "Salted Halfback"; search codes would be "#salted halfbeak#" or "#salted halfback#").

This guide is exhaustive, and contains all the information all characters and items for all possible reactions. Section 0.4. Condensed Guide is an abridged version of this information, detailing only the best possible reactions for all the characters and items. Searching in section 0.4 works as detailed above, but with the underscore (\_) symbol instead of the hashtag (#). If an item is absent from section 0.4, it did not elicit the "Love" reaction from any character.

I acknowledge that the presence of errors is possible, as all the data has been collected by hand. If there are any questions regarding the guide, as well as comments or corrections that need to be made, please contact me at SoftPraise@outlook.com.

## 0.3. Special Thanks

---

Special thanks to:

- Freyashawk, for his guides (Characters and Recipes) on which we based ourselves to avoid character birthdays to collect data, as well as to know how to make each recipe.
  - Wolfire, for his guide (Fishing) on which we based ourselves to know where and when to fish each fish in the game.
  - ArsenicFairy, for her tremendous help with data collection, without whom this guide would not exist.

## 0.4. Condensed Guide

---

This section will only cover what each character loves, and what items are loved by at least one character, for quick consultation. Please see sections 1 and 2 for more complete information. Searching through this section uses a similar system as the rest of the guide, but uses the underscore (\_) symbol rather than the hashtag (#). See section 0.1. "How to Use This Guide" for more information.

----- 2. The Guide Section II: The Items -----

---

\*\*\* To skip to a specific item's section, use the [Ctrl + F] function to search for that item by typing in the item, preceding it by "#" and ending with "#" (without the quotes; e.g. "#Shiny Wool#"). The items with typos in their name

will be copied as they are written in the game, but their search code will be both the corrected version of the name and the erroneous version (e.g. "Salted Halfback"; search codes would be "#Salted Halfbeak#" or "#Salted Halfback#").

## 2.1. Crops and Foraging

---

This section includes all 45 items that are considered to be included in "Crops and Foraging", including grown crops and fruit, wild crops and fruit, wild herbs, honey, and everything else you find in the wild that is or was alive as a plant or on a plant. This section does not include Coral, which can be transformed into jewelry, and was thus included in the Minerals and Jewelry section.

Please note: For grown crops, only the reactions for high quality crops were recorded (the item description ends with a musical note).
