## \* 1. Version History

---

- Ver. 1.0 (06/30/03) - First version of FAQ. Only Original Teams players and how to complete mission mode.
- Ver. 1.1 (07/03/03) - Some names have been corrected, the mission mode has been completed also and the special teams.
- Ver. 1.2 (07/06/03) - I included the ROSTERS of the legendary teams.
- Ver. 1.3 (07/07/03) - Somebody asked me to include a Controls section, so I did it. But except the Special moves, it's only a transcription of the instructions booklet.
- Ver. 1.4 (07/14/03) - A new Special Team unlocked, a new bug and some ROSTERS.
- Ver. 1.5 (07/28/03) - More ROSTERS.
- Ver. 1.6 (07/29/03) - I finished the ROSTERS. It was hard and time consuming, but I expect it would be worth. This will be the final version unless anybody discovers how to unlock 90's, 94's and 98's legends teams.
- Ver. 1.7 (08/05/03) - Home & away kits of the Club Teams updated to season 03/04.
- Ver. 1.8 (08/09/03) - IRAN squad completed (provided by Behnam Nourparvar) and section 9 has been modified.
- Ver. 1.9 (08/15/03) - A bug has been removed from section 11 (by Daniel Warsén).  
World Cup Legend Teams unlocked (see Section 10).
- Ver. 2.0 (09/20/03) - A new bug has been added.
- Ver. 2.1 (10/17/04) - WOW!! A year has passed since the last update, I added one name by the courtesy of Niko.

## \* 3. Introduction

---

Welcome everybody to my ISS3 (GC) FAQ! This is my first FAQ, I hope you enjoy

it.

ISS3 is the second sequel of the famous ISS series for GC after the appearance of ISS2. Definitely, the game is much better than ISS2.

Firstly, it has a new mode called mission mode which objective is to win several matches in adverse conditions against well-known European clubs.

As a result you obtain points, which you can exchange by several items (T-shirts, socks, etc.), special movements and so on, in the catalogue.

It also includes the classical International Cup, Exhibition matches, Training mode

and World League.

Enjoy it!!

-----  
\* 5. How to score?  
-----

The objective in any football game is to score. So in order to complete Mission Mode, win International Cups or whatever, you should score more goals than your rival.

A) First tip: Free Kick

=====

\*The first thing you should buy in the catalogue is the Super Free Kick(Z+B).

If you don't have it, keep playing until you obtain it.

If you play with 2 players, there is an easy way to score goals. Anytime you have a free kick, the player who don't kick it should go through the wall, then you would notice that you can move the players in the wall

creating a hole. Now the free-kicker could shoot with MAXIMUM POWER through this hole and score an easy goal with the Super Free Kick, try to adjust your shoot to the post. Depending on the distance you should raise the arrow shoot more or less, practicing you will learn it quickly.

\*If you play alone, it is a bit more difficult. First of all, the free-kicker should be very good(Power Shoot 9 or more). Shoot with MAXIMUM POWER with the Super Free Kick but the arrow shoot should never impact under the waist of the wall's players and if it's possible not under the chest. If the free-kicker is VERY GOOD the ball will pass through the wall 'magically' and you will score. The effectiveness is very high, but not as high as the 2-players method.

#### B) Second tip: Corner Kick

=====

The problem of this tip is that it is different with every corner kicker, because it depends on the power shoot of the player. Anyway, the method is always the same:

1. Try to direct the arrow to the front the keeper zone.
2. The end of the arrow should be should be at the same height of the crossbar or lower.
3. Curve the shoot with C-stick a bit, but do not overcurl the shoot because then you will lose power.
4. You should press button X to the maximum.
5. Head the ball pressing B and direct it to the most separated post from the corner.

The effectiveness of this tip depends a lot on your ability, but once you master it, it is very good.

#### C) Third tip: Long Pass

=====

This is my favourite trick.

When you had been playing for a long time, you would get used to watch the radar constantly. It's very important to do this trick. The base of this trick is the counter-attack. When you steal a ball in your defence zone or in the middle of the pitch, then watch the radar and locate your forwards. If one of them is highlighted, then press Y two times very quickly. The result will be a high pass through, then run with your forward to catch the ball. Sometimes a defender will catch the ball before you, but if you're cunny enough you could steal it and go to the goal. Then you will depend on your hand-to-hand ability against the keeper.

#### D) Fourth tip: Hand-to-hand against keeper

=====

There're several ways to score against the keeper, it depends on the situation:

1. If you arrive alone to the area, try to be centred and when you are on the penalty spot then shot pressing B slightly. It's quite effective.
2. Dribble the goalie requires ability and experience. When the keeper comes to intercept you, then try to avoid him running in diagonal. If you dribble them, then you angle of shoot would be very reduced and if you shoot you will miss it. The KEY is: once you dribble the keeper, do not direct the stick to the goal, direct it horizontally like if you want to do a shoot parallel to the goal and then shoot it. It should be goal.

#### E) Fifth tip: Wing L-dribble

=====

This is another of my favourite tricks.

The base of this method is the L-dribble. Look at the map and follow the instructions:

If you followed my tips to score goals, it wouldn't be so hard. Furthermore, you could use Pennine when you unlock it or use an original team. If you choose the second option (like I did), you could transfer to your team some players you create (See section 8).

CPU Physical condition: Normal

Objective: Win scoring a goal with a heading, volley or overhead kick after a corner kick.

Tip: The difficulty here is to create a corner kick. I only have one suggestion: If you have a VERY GOOD player(9 Power Shoot or more), you can create a corner (and sometimes score) shooting from the front of the area but you should be centred. Shoot pressing B-button until you reach the middle of the bar and if a defender didn't block it, the goalie would send it out making a corner kick.

Mission 3-2            Rival: Rhein

\*\*\*\*\*

Your Psychological condition: Normal

Your Physical condition: Normal

CPU Psychological condition: Normal

CPU Physical condition: Normal

Objective: Win scoring a goal from the outside of the CPU's area.

Tip: The easiest way to score a goal from the outside of the area, is using the Super Free Kick(see Section 5). But in order to use it, you have to provoke a foul. How? When you were near the CPU's area, try to dribble the defenders running, in many cases they make a foul tackling you. Do NOT try to dribble them without pressing R, because then they will steal the ball with Z+A and as you know the referee won't whistle.

CPU Physical condition: Normal

Objective: Win with 80% of possession of the ball or more.

Tip: The key here is to score a goal in the first 10-15 minutes, because if you score later it would be impossible to complete the mission. Once you score, try to recover the ball and pass it to your defenders. Then lose time passing the ball from one defender to another(the keeper also). I strongly recommend to look at the radar to not miss any pass.

Mission 4-1            Rival: Cataluna

\*\*\*\*\*

Your Psychological condition: Low

Your Physical condition: Low

CPU Psychological condition: High

CPU Physical condition: High

Objective: Win.

Tip1: There is no tip for this one. All your players have an average of 2.5 and the CPU's ones have 10(perfect players). If you want to win them, show all what you have learned in the previous missions to defeat them.

Tip2: Use a 4-3-3 formation and to bombard the team with loads of chipped through balls, but play them just before the player is in line with the last defender. This is because the defender will take the ball down, but your momentum will make you take the ball from him, leaving with a clear

run on goal. Also, play as London, as more or less all the opponents attacks will be caught offside.(Tip provided by Ikanent1)

A) Clubs

=====

This section includes the real names the 16 teams you can unlock on Mission Mode. I included the original uniforms also(only the home uniform, in the future I will include the away too).

All the players are displayed in the original order they appear in the game. If any number should be changed, then you would see (N) at the end of that names.

If any name should be changed more for an special reason, then you would see (\*) at the end of that names.

Feedback will be appreciated, if you notice any mistake.

This team is a real mess. As everybody knows, Ronaldo is number 11 and Savio left the team last year, like Munitis and Ivan Campo. Moreover, it's a crime that the first keeper is Cesar instead of Casillas.

#### B) Legendary Teams

=====

About this section I should say that the reliability of the names is about 95%, because it was very hard to found these names. The squad of a club doesn't change very much during 2-3 years but the legend teams are formed with players of different World Cups, so I revised the squad of all the Worl Cups and review of them to now who were the best players. REALLY time-consuming. If you see a gap in a name, then it means that I've no idea who that player is. Your help will be imprescindible to complet this section. Although you haven't unlocked these teams yet, as I explain in section 9, you can edit the names of the players if you press A B Y X Down Left Up Right Start on the initial screen(that which says 'Press Start')

\* 9. Edit Teams  
-----

A) Create Players

If you decide to create a player, I have a priceless tip I discovered in ISS2 that works on ISS3 too.

Although you create 2 players with Speed 10, one will be quicker. Why? It depends on their height and weight. If you want to create an unstoppable player, create a very thin dwarf with Speed 10, Acceleration 10, Shoot 10 and Precision 10. The most valuable ability is the one that allows you to shoot from any position(Wide Vision).

Create two players with these skills and transfer them to your original team. But change them by substitute players, because if you put them in the initial team, in missions 1-X they could be sent off and consequently you couldn't use them.

If you want to create a perfect player(all parameters 10 and 10 skills), it will cost you 10512 points.

In this section, I will include some teams I created. Send your creations also.

NIPPON

Flag: Japanese flag

Comments: I'm a fanatic of Captain Tsubasa, a manga and anime based on a boy who plays football and how he improves until he plays in the national team of Japan. This is my tribute to this manga. You should be crazy to create a team with 22 perfect players as I did, but they are pretty good.

	Height	Weight	Foot	Face	JAW	Skin	Hair	Color

### B) Creating Badges(Flags)

Firstly, creating a badge from "nothingness" is really hard. If you have the badge you want to draw in your computer, you should convert this gif, jpeg, bmp or whatever into a 60x94 pixels image with 256 colors.

Why 60x94 pixels? ISS3's flags' dimensions are these.

Why 256 colors? ISS3 pallete has 240 colors, so the most similar format is 256 colors. Using good image software like Photoshop or Paint Shop Pro will make it easier. Follow the next steps:

- 1) Create a 60x94 pixels blank image with 256 colors.
- 2) Open your file with your badge and resize it to an image with a height of 60 pixels.
- 3) Copy your image in the clipboard and paste it in the first image you created like a layer.
- 4) Automatically the program will arrenge the colors.
- 5) If the background of the badge isn't monochromatic(one color), then you should edit the background also.
- 6) Then image should be completed in your computer, and use a super zoom on it.
- 7) Finally, you should copy pixel by pixel from the computer to the flag in ISS3 using the most appropriate color.

\* 10. Special Teams  
-----

You can obtain All Star teams clearing the International Cup\* on hard level with:

- Any European Team(Italy, Germany, France recommended)--> Europe All Stars
  - Any American Team(Argentina and Brazil recommended)----> America All Stars
  - Any African Team(Nigeria and Cameroon recommended)-----> Africa All Stars
  - Any Asian Team(Australia and Japan recommended)-----> Asia All Stars
- \* VERY IMPORTANT: play from the beginning including the Regional Qualifying Matches, because if you play from the Group League you will NOT unlock these teams.

How to unlock Gladius(World All Stars):

1. All the regional stars teams had been unlocked AND purchased in the catalog.
  2. I commenced an International Cup in the GROUP LEAGUE mode with Brazil.
  3. I won the competition, gaining the awards for point and assist king.
  4. I then played and beat Gladius, and they are now unlocked in the catalog, costing 7000 points.
- Thanks to Ikanentl.

You can obtain Legend teams clearing the World League on hard level with:

- England----> England Legends
- Holland----> Holland Legends
- Italy-----> Italy Legends
- Germany----> Germany Legends
- Brazil-----> Brazil Legends
- Argentina--> Argentina Legends

How to unlock World Cup Legendary Teams:(Provided by Sarah Angella)

Clear an International Cup in the GROUP LEAGUE on hard level. I'm not sure, but I recommend unlocking the rest of Special teams before getting these teams. Assists King and Top Scorer King are not necessary.

France  
USA  
Italy

The order is not really important. As you complete the game with these teams you get the team legends in this order:

1st. 98's Legends  
2nd. 94's Legends  
3rd. 90's Legends

---

\* 11. Bugs

---

These are the bugs I've found until now:

- If you play with 1 player in the International Cup and you save your evolution. When you reload your game(another day), the special moves you unlock in the catalogue won't be available in your saved game. With 2 players there is no problem, at least in the Spanish version.
- I noticed also a bug while playing with any original team including clubs. Although you change their uniform, when you use them if the former uniform's color coincides with the used by your rival, your uniform would change to the second uniform. To avoid it, I've the same uniform for local and away.
- If you go straight into an International Cup or World League match, you are unable to perform the special skills and new player cursor you have bought in the catalog. It is annoying yet there is a way around it. All you need to do is go into the free training mode and do a couple of skills then it will work fine for the rest of the game.  
(provided by Ikanent1)
- You can't change the language of the game, because this feature isn't in the game settings. But there is a way to change it:
  1. Turn on your Gamecube without a disc on it.
  2. Go to options and change the language of your console. The available languages for this game are English, French, German, Italian and Spanish.
  3. Now you can enjoy the comments of Papin and Schuster among others.

\* 13. Special Thanks

---

Konami Computer Entertainment Osaka for creating this game.  
Almond(my brother Jordi) for his initial feedback.  
Bloch for his corrections on players' names.  
lkanentl for the special teams and his comments.  
Ralf Babe for his correction on the mission mode.  
Behnam Nourparvar for the IRAN squad.  
Daniel Warsén for correcting a bug in the bugs section.  
BIG BIG THANKS to Sarah Angella for unlocking World Cup Legendary Teams.
