Introduction
=====

This is my first FAQ I've ever written which means this is definitely a learning experience for me. I will be doing my best to help you defeat the bosses in Lego Star Wars.

I don't know what it is about this game, but it has made me write a review for it, and now a Boss FAQ. Maybe it's because of how surprisingly good a Lego made game is. This game really isn't about complicating you, or trying to tick you off, it's all about having fun, and kicking some butt in the process. Because of these very reasons, I feel like I at least owe something to the game so I'm doing this...

So far there have been 6 Star Wars movies, but there are only 3 episodes in this game to play through. In these 3 episodes there are many bosses.

Note: THIS FAQ CONTAINS SPOILERS FOR THE MOVIES!

The episodes in the game are:

- Star Wars Episode I: The Phantom Menace
 - Star Wars Episode II: Attack of The Clones
 - Star Wars Episode III: Revenge of The Sith

3) BOSS SECTION:

=====

There are different bosses in this game in each episode which means you will need a different strategy to beat the boss you are facing.

=====

4) BOSS: Darth Maul

=====

Boss Info:

Movie: Star Wars Episode I: The Phantom Menace
Game Chapter: 6
Weapon: Red Dual bladed lightsaber
Description: A Sith, and also a coward who uses the dark side of the force and has no emotions at all besides hatred.
Defeated with: Qui-Gon Jinn and Obi Wan Kenobi

In the beginning a cutscene will occur when you first find Darth Maul. He cuts off a platform so you and your partner can't reach him. He's on the other side with robots shooting at you. Defend yourself by pressing B causing the lasers to be hit back at the robots. After you killed the robots, Maul will begin to throw objects at you which you must throw back at him by using the forcing (holding X down.) This sequence happens 3 times before the parts of the bridge/platform come down so you can repair it by using the force.

Maul will run into a room directly ahead of you. Enter the room and follow him on the platforms. There will be 2 instances where you have to use the force for a platform to slide out so you can jump onto it. Enter the room he leads you into. You will have to jump from two platforms to get to the main platform. Robots will now start coming from everywhere, and it will seem like they won't go away. After awhile of destroying them, two droids will appear on platforms. They will fire at you and you must defend yourself by pressing B to hit direct it back at them. After affecting their shields, they will come down and you can now easily kill them. You and your partner must jump on the platforms the droids were standing on. On them will be 2 buttons which you have to step on, and another platform comes up which allows you to get to Darth Maul. Double jump to the platform. There will be another platform after that to double jump onto as well.

Afterwards Maul will go through a room with shields that you must get through by using the force with your partner. Use the force on the switches which causes the shields to come down. Now you will enter a room where you and Maul finally duke it out. Defend his attack, and then Double Jump and press B while in the air which causes a downward strike to occur. After you get him down to 4 hearts/health, he will jump onto a platform and will throw more objects at use. Use the force again, by holding down X. This will throw the objects back

at Maul. He will come down after awhile. On both sides of the entrance there are 3 switches you need to turn down by using the force. Now that Maul is down he can now raise you in the air. You will have a red glow surrounding you when you are being raises. Press Y while raised to switch to your partner and attack him while he's holding your partner up. Do this 4 times on him and a cutscene of Maul dying will appear.

Award: Can now unlock Darth Maul for 15,000 studs from Dexter.

=====
5) BOSS: Jango Fett Part 1

When you first find Jango Fett he runs out of the room and robots will shoot at you. Kill them and head out the door and there will be more robots to defend yourself against. After you defeat them, he heads into a room on the right, follow him. In that room is an open hole/tunnel in the wall that you follow Jango into. He will set flashing bombs which will make a noise before it explodes. Jump back to protect yourself. A total of seven bombs will go off causing platforms to collapse. To get to the undamaged platforms, you must double jump. After the bombs, there will be a button you must step on which causes a platform to slide out halfway. Your partner must fly across to step on the other button so it connects the platforms.

Now there will be Legos blocking a door entry that your partner must activate. You must hold down X to move the Legos. Now your partner can activate it so you can open the door to enter the room. Now an elevator appears which takes you to a room with robots shooting at you again. There's a tunnel where they keep coming out of. Your partner can block the tunnel by deactivating the buttons on the side of the wall. Legos are now blocking another door which you must use the force to move it, and have R4 activate the door to open.

The fight between you and Jango Fett finally begins. He has 10 lives, and you can either make his bullets hit him back, or attack him with your lightsaber. After he's hit 3 times, he raises in the air and the Slave I ship begins shooting at you. You can either deflect the bullets to hit Jango, or jump up and attack him. After being hit so many times, he starts to throw bombs which you throw back at him by holding X down. After being hit by his own bombs twice he comes down until you can corner him for one more attack. He doesn't die this time, and is able to get away in the ship.

11) Conclusion
=====

I must say this game was a great fun, and I'm glad I wrote this FAQ. I figured writing a FAQ would be not enjoyable, but I really had a good time with it. Probably because it was such a great game. Anyways, I hope you have fun, and learn from this FAQ. I will likely add to it as this isn't the final release.
