VII--omake section (also includes how to get characters and stuff)

*I created this section because I felt like I needed an extra section and people dont like her as much in the game or manga that I know)

NOTE: to jump to each characters move list hold ctrl and press f then type in their name (such as rocklee) and add 9969 at the end. I wont give an example because then youd end up at the front remember name (no spaces) and 9969 This also works with the faqs section and the strategies section and the sakura section (sakurasection then number) you can also look up the end by typing end then 9969 right after

I--VERSION SUMMARY

versionsummary9969

```
====+
```

1.0 first version completed may 1-8, 2003

added: character summaries and quick movelist, quick strategies, sakura section, menu translations, version summary, copyright, table of contents

summary: this is the first version, i included as much basic you know info that i could given the less than month that i had time to work on it. NEXT VERSION WILL BE BETTER! SORRY ^_^~

2.0 update completed may 10-11, 2003

added: changed some errors, added kyuubi naruto movelist, and sharin-kakashi tips. ADDED OMAKE SECTION (only partially finished tho). added ascii still need more ascii. mostly editing and adding strats and secrets.
NOTE: omake section also has unlocking notes.

summary: im kind of busy since i have a hundred presentation coming up so i add or update as much as i liked to. all the time i have on naruto i try to find new things so i add them in guide! SORRY FOR NOT COMPLETING HAKUS MOVE LIST LAST TIME SORRYSORRYSORRY V_V~

2.1 small update completed may 12, 2003
added: small tweaks and strategy editing. changed stuff. nothin big.
summary: heheh i type faster than i think (no im not stupid i type at over 150
i just dont tend to think if i mess up).i re read my faq and noticed
some errors so i just changed a couple.

2.6 medium update completed may 21, 2003
added: actually just refining strategies. against zabuza (cheapest character)
and changed some small errors. changed the layout sort of so its easier
to check out the characters i hope to finish omake section within a
month, but i just bought soul calibur 2 a week ago so i dont think that
going to happen, sorry. also if youre wondering why i only change small
parts at a time, it is because i dont have much time to keep going
through the guide over and over again.
summary: well, i still think there are alot of errors, i keep finding new ones
everytime i read this guide. oh well. since i just bought sc2 i havent
been getting much sleep, jeez that game is addicting. i need quick
help for getting good at it. so if you have any tips for yunsung or
talim or cassandra could you email me... plz??? my email is at the
bottem, thanx ^_~~~~~~

2.7 Small update completed june 1, 2003
added: again a few tweaks here and there, not very big update. no time.
summary: this is going to be one of the last updates since there isnt much
to do in this game. sure its really good and even better with friends
but writing a guide on it is kinda off so. i will still take question
and stuff just email me (bottom)

2.8 another small update completed june 12, 2003
added: changed intro, made getting kyuubi naruto easier.
summary: thanks to people on the message boards who gave me the hint that i
should change my intro. anyway, i think that my "getting kyuubi
naruto" isnt that easy enough to understand so i updated it.
====+====

naruto is a great manga to learn japanese with since most of the words used
are very basic and most of the time its just, what the, and, what for. naruto
is like a redneck in a sense, his dialect is kind of surburban.
and no to you people on the message boards, i wouldnt give a dam/\ / if u were
in a store buying naruto manga. its one of many mainstream manga. sigh.
also, when flaming people on the message boards, please make sense of what
you are saying. it doesnt really make sense when you say that jpop insults
own kind. and then go on being a hypocrit, contradicting half of what you say.
sorry if you cant understand this... for people who probably cant... cough
you people really need to STFU with the mixing of japanese and english
DONT MIX JAPANESE AND ENGLISH IT SOUNDS OBNOXIOUS. what i mean by this since
some of you do not understand this since they are still in middle school...
er hem for example, "hey minna-san, i saw dolls the other day that were
kawaii" mixing like that. using foreign words in japanese is fine since
there arent always words that can be used. normally they dont mix unless
it fits in. if they do then they just plain suck. jpop is crap anyway
jpop is horrible, it IS better than american pop though.

also, might i add the incredible pointlessness of online
mmo gaming, you pay, you play, its done. in the end even if the monthly fee
doesnt look like much, you probably waste good money that you could have used
doing other things. for the loser fatarse who sits at a computer or console
playing on and online community and makes "online friends" i feel sorry for
you. MMOs are for losers who cant bear to lose to someone in person like at
arcades. psch suck it up.

and actually americans do piss and moan is music is taken from your own

OVERALL TIPS AND STUFF

=====!!!!

try to be quick with counter (replacement technique) becuae if you get
fast enough with that, you can counter their counters countering your
counter.

combos are always nice too so if youre playing with your good character
be sure to know their combos

play smart, dont just run in to the enemy thinking your combo will do
major damage, they might counter it ESPECIALLY IF YOURE PLAYING DIFF 4
the smart thing to do is plan it. wait until they attack and at the last
second run in

ALSO, DO NOT USE SPECIALS!!!!!! this is a mistake EVERYONE MAKES. specials
may seem cool or fun to do but it uses up your chakra bar which isnt good.
without chakra, you cant counter. countering is VITAL FOR DIFF 4. if you
lose on 4 and wonder so much its probably becuae you cant counter and
therefore you die quicker, or enemy like zabuza side steps and smashes you
with his huge sword.

specials are only alright if you are about to kill them.

also do not mash all the buttons in the combo at once. right as the first
move is done, tap the next button. and as that is at its halfway point tap
another button. its all in a rythmic fashion.

another gameplay tip that is important

sidestepping (r or L) is your friend. if you do it right at the perfect moment you'll avoid an attack and go to the other side of the enemy. it is also helpful for dodging attacks and shurikens/kunais

naruto9969

NAME: uzumaki naruto
CLASS: genin
CLAN SKILL: n/a*

Summary: naruto is the main character of the manga. Years ago a 9 tailed fox (kyuubi) attacked the land. Many ninjas died fighting this fox. The 4th hokage (pronounced ho-ka-ge) rose up and fought against the fox. After defeating the fox, with all of his energy expelled, he wound up the nine tails of the fox and implanted them in narutos navel before dying. He is the living prison of the fox. He has an excessive amount of chakra and even more when he gets emotionally disturbed (sad, etc), or when hes protecting someone (iruka). His favorite technique is kage bunshin no jutsu (skill of shadow clone)

* ((SPOILERS IN HERE)) I guess his skill is taking powers from kyuubi as demonstrated in episode 16 I think when sasuke is supposedly dead. Naruto has flashbacks and gets so angry that the wolfs power is minorly released and charka flows. ALSO NARUTO DOES NOT MEAN DEMON FOX IN JAPANESE if any of you wanted to know. It means dried fish paste cake. Kind of like kamaboko

PROS:
well rounded character
ground attack is awesome but very cheap

CONS:
counter is pretty much useless becuae if you hold a it drains chakra also, his moves are RECKLESS and are easily dodgeable/counterable

NOTE: FOR KYUUBI NARUTO GO TO STRATEGY SECTION

MOVE LIST

=====

A BUTTON MOVES

a	kunai throw
F,A	kunai slash
U,A	throw kunai up

COUNTER

when attacked B+A oiruke no jutsu (sexy no jutsu, girl with bikini, quick)

SPECIAL (requires full chakra bar)

X UZUMAKI NARUTO RENDAN

this is the uzumaki combo. neat stuff! sadly it doesnt deal as much damage as i would like it to. starts with kage bunshin then a bunch of attacks, not a very big cmobo

NARUTO STRATEGIES

naruto has a couple of ways of fighting

if you are good enough or quick enough, a nice thing to do is something like "F+B" or "B+A" becuae youll bash them foward, and then if they counter youll counter that. this only works nicely if they counter.

he doesnt have many strategies so....

you can also try the ground attack (dwn+a) when youre away from them. i really dont like this attack becuae it seems so cheap in a way.

his Bx6 combo is the easiest combo to know/use and it does a great amount of damage and fills up your chakra meter if you hit every time. but there is one flaw, the last hit doesnt always connect. so i would reccomend using the "Bx5, A" combo instead since the last hit is an air shuriken and doesnt miss

ok changed this. i actually found that HOLDING A while in the counter will make it stay longer. BUT BEWARE THIS DRAINS CHAKRA EXTREMELY FAST. i still wouldnt reccomend using it

actually the counter is VERY annoying, the normal hold no drain length is around 1.4 seconds long. it is perfect for countering enemies becuae it deals a ridiculous amount of damage for counter attack

the time it takes to active the counter is about .80 seconds

kyuubi naruto movelist:

F,B lunge slash

Bck,B heavy slash

Dwn,B sweep

U,B kick

A slash

F,A 2 hand slash

Bck,A slash

U,A slash uppercut

Dwn,a dig slash

jump,a Downslash

Dump,b punch

PROS

extremely strong

special does a bleep load of damage

counter does a bleep load of damage

combos do a bleep load of damage

CONS

no projectiles and im not sure if his claws can block kunai.

cheap

dashing a and b are basically more slashes and crap

as you can see, most of kyuubi naruto moves, involves slashes and stuff like that. kyuubi naruto is drasatically different than normal naruto becuase his speed is increased and his strength is increased.

his combos also deal mostly with slashes.

his counter is also different and deals more damage if properly done. it isnt sexy no jutsu anymore instead he bursts with a huge blast of chakra

his super is a 9 hit combo (pretty sure) that involves slashes with a chakra burst

at the end. note that this move is incredibly cheap and deals OVER 60% PERCENT OF A HEALTH BAR. that means its

MOVE LIST

=====

A BUTTON MOVES

A shuriken throw/kunai throw
Dwn,a dotonshinjuzanshu no jutsu (pulls enemy underground
then hit up
J,a shuriken throw/kunai throw
D,a dashing slash
F,a slash
U,a throw

B BUTTON MOVES

B punch
F,B jump uppercut
Bck,B hit
Dwn,B sweep
U,B jump kick
D,B dash hit
J,B jump kick

COUNTER

BCK,a ichaichaparadisus! youll do the ass poke!

SPECIAL (requires full chakra bar)

X raikiri (lightning edge)

KAKASHI STRATEGIES

hes kind of warped when it comes to fighting. the icha icha paradise counter is great for damage and enjoyment. his attacks are pretty insane. the only sad thing, is that the way he plays in the game doesn't seem as strong as in the anime.

another upside about his counter that, instead of countering right in front of the enemy. he warps to the other side and "1000 years of pain"

his attacks are quick and have very small delay or charge time. unlike naruto his combos always hit and sadly i can only say that his combos are flashy, they don't do any extra damage, they just look cool

icha icha paradisus has a really long active period time when it comes to counters. the long active time is an advantage because instead of having to wait for exactly the right time to execute, you have a longer time range

the Down+a special is one of the greatest moves ever. its awesome for a surprise because instead of just shooting out like naruto, he pulls them partially underground and then slams them up, it deals more damage than naruto also

HIS SPECIAL is really good because even if you are blocking, its unavoidable the only way to block it is to jump.

PROS:

hidden mist! does nice damage
really really really fast

CONS:

hes big and strong, but his sword attacks are really slow, giving you
enough time to counter

MOVE LIST

=====

A BUTTON MOVES

A overhead slash
F,a side slash (hold to charge)
Dwn,a downward slash
J,a jumping down to up slash
up,A

B BUTTON MOVES

B punch
F,B jump kick
Bck,B hit
Dwn,B sweep
U,B jump kick
D,B dash hit
J,B jump kick

COUNTER

BCK,a this move will launch an attack from above

SPECIAL (requires full chakra bar)

X sirento kiringu (silent killing technique)

ZABUZA STRATEGIES

when playing with zabuza, be careful of your timing. his sword attacks
combo extremely well and deal alot of damage, BUT are easily countered
or blocked because of their sluggish.. ness..

his special deals a great amount of damage. BUT HE IS AN UNBELIEVABLY
CHEAP CHARACTER

playing with zabuza, try F,b. youll do an attack similar to narutos minues
the annoying jump that naruto has to no. this is an advantage over the
jump delay since all zabuza does is pull his fist back and slam.

UP+A is an alright move...

also, a good combo, i think it is, is b,b,b,a,b its another knock in air
combo

if you jump and press B youll slam into the ground, this is like rock
lees move in which it startles the opponent giving you an open attack

CONS:

his normal attacks dont seem to do enough damage

MOVE LIST

=====

A BUTTON MOVES

A needle throw
D,a dash needle
F,a slash
Dwn,a head slam
J,a needle throw, NOTE: if you hold a when your in the air
 the needles will stay in the air until you release given
 if you have enough chakra.

B BUTTON MOVES

B punch
F,B somersault
Bck,B hit
Dwn,B sweep
U,B jump kick
D,B dash hit
J,B jump kick

COUNTER

BCK,a this move will launch an attack from above

SPECIAL (requires full chakra bar)

X hijutsu makyou hyora shora (basically, ice mirrors)
 sounds like makyochobu but isnt

HAKU STRATEGIES

hakus moves are greatly effective.

another topside for haku is that one of his attacks can stop counters
pressing up b will make him do a somersault kick. youll hit out air
and counter has no effect making this very useful

his special will raise your score becuae the combo is like 30 something

WAIT, when you jump and hold A youll throw delayed needles right? what this
is good for is blocking counters, combos, and air attacks. if is extremely
helpful if you do this close to the ground and they are against the wall
becuase youll hit them around 14 times and then youll be good for a combo.

one of the best combos is Dwn+B, A, A. because if they block the first kick
youll jump over them and when you press a, youll launch an unblockable dash
you dont need a the second time but i deals more damage.

Why are you so mean on the message boards?

Ok, look im very sorry. This got me in trouble so much in high school. Im really blunt with EVERYTHING. If you said to me that you liked something like American pop I would say something like, that isnt music and I really hate it. Plus I actually dont country bash on the message boards. Im just saying that I like japan better. Its a habit I have.

Arhhhh I cant beat difficulty level 4, got any tips?

OK READ THIS. For difficulty 4, if you are having trouble I have some pointers. One, get a Japanese style arcade stick. That was how I got started, its easier. If you dont want to spend 50 bucks on it ill give you some joypad tips. For your character, REMEMBER ALL COUNTERS AND SPECIALS. Also, combo-ing isnt necessary, its just there to get points. In difficulty four you have to be a technical player, and not a bulk player. Like yao and shaq, yao is technical and shaq is about bulkness. Try to stick with long range if you can or short attacks like jabs or something. If it is really easy for you then thats cool. If you arent that great at fighting games and bought it because you are a fan, then stick to one or two characters and build up your skill with that character. It took me about 2 minutes to get the hang of diff 4 (thats a really long time).

You dont seem to speak very good Japanese.

Thats a comment not a question. Also I come from a very small prefecture and speak a slang dialect. I can understand and speak most dialects in japan (from travel) so dont?t hate me.

Why did you make an FAQs section on your guide, you havent asked any questions and two it isnt possible to have frequently asked questions on a first version technically?

...hey it helps right

i beat time attack with: difficulty 4, rounds 2, time 60, damage 2,

in about 4 minutes with kyuubi naruto. (huge accomplishment). after that it said new game mode setting!!! difficulty level 4!!!

note that this setting is whacked up. kyuubi narutos super is a one hit kill with it. and zabuza is incredibly hard.

FOR A CHALLENGE, TRY BEATING THE GAME ON:

DIFFICULTY 4

TIME 60

ROUNDS 2

DAMAGE 4

it took me around 5 tries

=====

if you still cant seem to get kyuubi naruto then this is what you need to do: you have to unlock each character voice in sound player under sound mode in the omake section. first all you need to do is unlock sound mode. and then beat the game with each character. then beat the game again with kakashi to get sharingan kakashi

to get rock lee, beat story mode (i think without continuing) and hell challenge you, beat him and you get him

OMAKE (note it isnt pronounce o make, its o-ma-ke

=====

note this is the first version of the omake section so itll need major updates. i have horrible vision and i can barely read the kanji, when im updating ill go to my friends house to watch on big screen so i can read the blurry red font kanji. sorry
