I decided to make write this FAQ because I really love that game and that I like to play it with a FAQ by my side, to make sure I don't miss a thing. But I realized that there was no FAQ on chams. So I decided to write it myself.

Section 3: What to know about chams/abirik chams/choms

=====

A Cham is a very small fragment of a moonstone. Fina's pet, Cupil, will eat them to grow stronger. The more cham you give to Cupil, the stronger he will be.

When you will approach a cham, Cupil will get excited. Your controller will be rumbling and you will hear Cupil voice. Only wander until an arrow appears under Cupil. Then press A to find the cham.

But to find a cham, you will have to get Fina in your party, which means that you will have to escape the Grand Fortress first. To feed Cupil, go in your menu and check your inventory, then click on Cham.

There is a grand total of 30 chams and 3 abirik chams. Abirik chams are another type of cham which help Cupil grow stronger.

On the other hand, Chom are moonstone fragment that will make Cupil vomit all the Chams and Abirik Chams he ate until the beginning of the game.
