

Spider-Man 2 Hideout Tokens Guide

by guy_noeyes

Updated to v1.1 on Jan 31, 2005

This walkthrough was originally written for Spider-Man 2 on the GC, but the walkthrough is still applicable to the PSX version of the game.

Spider-Man 2 Hideouts Walkthrough

Section 1

Version History

Version 1.0 - I made the walkthrough on January 13, 2005

Version 1.1 - I checked the Spider-man 2 FAQ section and noticed that there were walkthroughs for all of the tokens except for the "hideout" tokens. So after having my walkthrough rejected once for "duplication" (does this mean that there is one already? or do they think I copied this?) I figured I'd submit it again. Maybe this time it'll get accepted since there aren't any walkthroughs for "hideout" tokens. How could it be a "duplication"?

=====
Section 2

How to use this walkthrough

It's pretty straightforward; just follow the directions the way they're given. Any time I refer to a "red box" I mean the red mark on the radar that shows a hideout. When I refer to a "blue star" I mean the icon used for the races.

=====

Section 3

The walkthrough

- #1 - Go to the grassy area on the southern tip of the island. On the in-game map look for the 2 paths side by side on the grassy area. Follow the paths to the road and a little north on that road you should see the little red box on the radar. Go in and get the first token.
- #2 - From the last place head west to the water. On the in-game map look for the grassy area running north to south along the water. Go to the north-east corner of the grass and you should see the red box on the radar.
- #3 - Now head to the east side of the island. On the in-game map look for the docks. There's the building to the south with the 4 little docks, 5 skinny docks north of that and a fat dock after the skinny ones. There's a blue star on the building where the 5th (most northern of the 5) skinny dock meets the road. Go there and you'll see the red box on the radar.
- #4 - Back to the west. Look at the in-game map for the 2 slanted docks, north of FC and west of Tribeca. Take the street east where the 2nd (most northern) slanted dock meets the road. At the end of that street make a right and then your first left. There should be 2 warehouse type of buildings surrounded by a wall. It's in one of those buildings.
- #5 - Head back towards the east near the 5 skinny docks mentioned earlier. A little north-east of the docks are 2 walled in areas side by side along the water. Go to the path that runs between the 2 sets of walls. If you head north from this spot you'll come out to a road, keep going north until you see the red box on the left, should be some sort of dance club.
- #6 - Head back to the 2 enclosed areas. From the north-east corner of those enclosed areas take the road curving east to north. Take the 2nd left (should have a blue star near the corner) and on the building set to the right has the red box. It's in the zig-zag alley.
- #7 - Head back to the road you came from (the 2nd left from #6). Go west on this street and take the 2nd right (should be a 4 lane street). Head north along this street and the red box will appear on your right.
- #8 - With your back facing the door going into #7, go up the street you are looking down and take the first right. Up that street on the right the red box should appear. It's on the balcony level inside the fitness club.
- #9 - Go to Mary Jane's place. From her doorstep head north, take the first left. At the end of that street make another left. Head down that street and just after the first intersection you come across you should see the red box. It's in behind the building.
- #10- Go back to Mary Jane's. From her doorstep head north. Then make a right then a left right after. Head north up that street until the 3rd right. Take that street right and you should see the red box. Go up the fire escape on that building and it's through the door at the top.

- #11- Go to the west coast and look for West Village. On the in-game map look for the bunch of slanted docks (a little north of the 2 mentioned in #4). Take the street heading east from where the second most southern dock juts out. At the second right you should notice the red box, keep going until the third right and head right between the buildings. It has a "club" above the door ("club" like the ace of "clubs").
- #12- Go back to the docks and head north along the road that goes along the water. Way up the road (about 13 powered up long jumps) on the right is the red box.
- #13- Head to the Daily Bugle. From the south-eastern corner of the building head east along the road that is just north of the corner of the building. Take a right at the end then take the first left. Take a left at the end and then take the first right. Head east on this road and at the 2nd right you should see the red box.
- #14- Go back to the south-east corner of the Daily Bugle. Just south of the corner you'll notice a fork in the road, take the road on the right (it's the one that goes a little to the west). Go down this road and take the 3rd right. Down this street a little and on the right is the red box.
- #15- Back to the south-east corner of the Bugle. This time take the left fork (the only road in the game running directly north - south). Head south and take the 2nd left. Go to the end of the street and take a right and then a left into the alley. In this alley is the red box.
- #16- Go to the northern tip of the Bugle. From there head north and take the first left, just up the street on the right is the red box. The entrance is in the back of the building.
- #17- Go to the Pizza shop. Head north along the shore. Take the 1st right then the 2nd left. Head north on this street and you'll see the red box on the right.
- #18- Go to the Chrysler building, it's the 2nd tallest building in the game, the one with the pointy things sticking out the sides. There's a grassy patch on the south side of the building, head east along the road to the south of that patch and you'll see the red box on the right.
- #19- Back to the Chrysler building. Take the road on the east side of the building north. When you get to the end make a left and then your 1st right (should have 4 lanes). Head north and on the 4th street to the right you'll see the red box.
- #20- Go to the south-east corner of Central Park. Head east along the road on the south side of the park When you get to the end climb over the building in front of you and continue east along the road on the other side Make a right and the red box is just up the street.
- #21- Head to the bridge that goes to Roosevelt Island. Follow the road along the shore south from the bridge and you'll see the red box. The token should be behind a forklift.
- #22- From the pizza shop head north and between the 6th and 7th intersection you'll see the red box on the right.
- #23- As you come out of #22 head north. After the 3rd intersection you'll see the red box on the right.

- #24- Head north from #23 and take the 2nd right. Just up the street you'll see the red box. It's small on the radar so look close.
- #25- Go to the north end of the island. Look at the in-game map. On the north-west tip of the island you can see a little beige area (the basketball courts) and a path going from it towards a larger beige area. The red box is in there.
- #26- From the south-east corner of the large beige area mentioned above, head south. Keep going south (quite a ways) until you see the red box on the left. There should be a sign to the right of the doorway of a spoon, a knife and a fork.
- #27- From here go north back up the street until you reach the intersection with the slanted 4 lane street. Stop here and look left, you should see an alley with a building on the right and a wall on the left, head down this alley to find the red box.
- #28- Go to Central Park. There are 3 roads going through the park, the northern, the southern and the middle. Go to where the northern road and the road running along the west side of the park intersect. From that point head south and take the 2nd right. Up that street a ways on the left is the red box.
- #29- Keep going up the street #28 was on and you'll see the red box on the right.
- #30- Go to the middle road in Central Park and head east, just up the road on the left is the red box.
- #31- From #30, head east and take the 1st street on the right. It's just up the street on the left.
- #32- Go to the road that runs along the north side of Central Park. On the in-game map find the slanted road (north-west - south-east) that ends on the road you're on. Head north-west on that road and take the 1st right then the 1st left.. Head up that road and you should see the red box off to the right. Take the 1st alley right and the door is on the roof, not the very top of the building but kind of in the middle.
- #33- On the northern tip of the island (look on the in-game map) find the most northern blue star, a little south-east of there is a 4 lane road heading south. Take that road south and you'll see the red box on the left, it's a little south of where the road you're on intersects with another 4 lane road.
- #34- Go to the east coast where the bridge to Roosevelt island is and follow the coast north. Quite a distance north you'll find the red box.. It has a sign of an arm with a dumbbell above the doorway.
- #35- From #34 head north along the coast and you'll see the red box on the left. It's a bowling alley.
- #36- Go to the bridge to Roosevelt Island, this time though you're going across the bridge. On the left side of the bridge just as you get onto Roosevelt Island is the red box.
- #37- It's on the northern side of Roosevelt Island and has a beer mug sign sticking out of the building. Roosevelt Island is pretty small so it

should be easy enough to spot on the radar.

And there you go you vigilant explorer you.
