WWE DAY OF RECKONING 2
Create-a-Superstar FAQ
=====
```

By: DrZaius (TheZaius on Gamefaqs) (Eduardo Zayas in real life)

E-mail: Doctorzaius AT e-garfield DOT COM

Version: The third one (1-24-07)

Copyright info: You have NO RIGHT to COPY this FAQ! If you want to use anything from this FAQ, just put something like... "from TheZaius's Day of Reckoning 2 FAQ on GameFAQs" or something.

LAST UPDATE: January 24, 2007

-Added in Marvel characters from Capcom's Marvel Super Heroes fighting game.

PREVIOUS UPDATE: July 22, 2006

-Added in Marvel characters from X-Men: Children of the Atom

-Added in little notes to designate designs that are personal favorites

So yeah, here's my FAQ of sorts. It's... not as detailed as one might expect. See, what I have here is a sort of, uh... outfit guide, if you will. For each character in this guide, I have listed the appropriate clothing and colors to be used when designing... whichever character you plan on making for your game. As a bonus, some Profile information, as well as Weight, is listed in this guide for each character. It is up to you to alter the measurements under Figure for each character. Additional notes I have listed for each character can be found in parentheses (). Maybe in the future, I'll add more information for each character. I doubt it since I'll probably be busy working on a guide for the next Nintendo console WWE wrestling game.

So here's how this guide works. First, I should point out how I determined the heights for each character. Because the height system in CAS mode doesn't give an actual number, I had to improvise a little. Well, after some careful deduction and counting, I figured that the smallest measurement on that meter must be about 5'5 while the largest should be around 7'0. I then placed five points on this range to represent five different height ranges. For the sake of keeping things simple, all created characters in this guide have one of these points listed as their height. Trust me... this is much easier than coming up with 20 different points that represent every single inch between 5'5 and 7'0 or coming up with the exact height for certain characters. If you're confused, I hope this makes things a little easier to understand:

Appearance : Figure : Whole Body:

5'5 and down-5'8:	-100
5'9-6'0:	-60
6'1-6'4:	-20
6'5-6'8:	40
6'9-7'0 and up:	100

So if a character is 6'1, either as fact or as a guess, then you scroll the VOLUME bar until everything says -20. Simple, eh?

Note: When ? is used, that means I have no clue what goes there. When N/A is used, that means that what goes there is irrelevant.

So now onto the meat of the FAQ. Here's where you'll find all the information for each character's outfit. Feel free to edit the information as you see fit for your own personal projects. If you have any questions or suggestions, feel free to e-mail me. I am not accepting requests nor am I putting up anyone else's character info. Also e-mail me if you spot any mistakes. Finally, anything that requires use of the Paint Tool I have not listed. I'm sure you guys can come up with stuff for that on your own. Just be careful... it's a little glitchy.
