Long ago, in the kindgom of Hyrule, there was a wind sorcerer named Vaati. Link defeated Vaati and sealed him away in the Four Sword Sanctuary. But, Vaati was not defeated. Vaati came back, and then Link defeated the evil being again, sealing him away. But that still did not help, for he struck back and kidnapped Princess Zelda. Now it is up to the four Links to save Hyrule and Princess Zelda from the evil Vaati!

=====  
II. Multiplayer  
=====

To play Multiplayer in The Four Sword Adventures, you must have at least two Game Boy Advances and a link cable for your Gamecube (sold seperately). Once you have those things, plug in the link cable to your Gamecube, and then use the other thing on the link cable to connect to your GBA. After that, go to the main menu screen, and choose Shadow Battle. Once you do that, choose the "Start" option. Next, select a file that you want to play Shadow Battle on, and then you will be brought up to the players screen. Choose how many people will be playing, and then you will be brought up to the link-up screen. Then, just have everyone confirm the link-up by pressing A, then select a stage and have fun playing Shadow Battle with your friends!

IV. Walkthrough  
=====

When you start the game, you will hear a voice calling out to you, then you will appear at the entrance of Hyrule Castle.

=====  
Hyrule Castle  
=====

When you are here, you will see Zelda, and she will start talking about the six Maidens, then the Maidens will call her into the castle, and Link will follow her into the castle. The Maidens will then create a portal of some sort, causing a Shadow Link to appear! Shadow Link will then capture every Maiden into a purple crystal, including Princess Zelda! Link will then go in the portal, to the Four Sword Sanctuary.

=====  
Four Sword Sanctuary  
=====

When you arrive here, Shadow Link will go to the pedestal where the Four Sword lies, then you will be in control of Link. Now, head north and then examine the pedestal, and choose to pull out the sword. Now you will split into four Links, and Shadow Link will leave, and then a tornado will appear and swallow the four Links, and the wind sorcerer Vaati will appear, as he is the one that caused the tornado. You will now hear a voice, and then you will appear on the World Map, so select World One, Whereabouts of the Wind.

=====  
World One: Whereabouts of the Wind  
=====

When you begin this chapter, you will see the four Links sleeping on the floor, and Kaepora Gaebora will awaken you. After he gets done talking,

level one begins.

=====

World 1-1: Lake Hylia

=====

Here, move and Link will get up. Press L to awaken all of your Links. The objective in this area is to cut down every weed you see, kill every bad guy you see, etc. to get some Force Gems. Collect 2000 Force Gems to get the power to repel evil inside your sword, which is required to complete each stage. Now, cut all of the weeds and collect all of the Force Gems that appear, then proceed to the west to the next screen. Here, enter the house you see and talk to the person there if you want, and if you want to learn how to control your four Links, enter the back door and talk to the kids for a tutorial. Whenever you're ready, continue west into the next area. Here, go west and step on the button there to get some Force Gems. Now, go to the huge stone and make a formation of a horizontal line and then push the block into the water, creating a bridge. Go across the newly created bridge and then turn right and lift up the stone, and enter the cave. Here, go north and step on the switch there, and then make a formation of a square. This will open a door, so enter it. In this room, go north and remove the Boomerang from its pedestal, then exit this whole cave. Back outside, head west then north into the next area.

Here, eliminate all of the enemies and you will see Shadow Link. Ignore him, for he will not do anything to you. Well, just approach him so he will not block the door to the house anymore. Now, head south and you will see some brown stones that you cannot lift, and a key is waiting out of reach. How to get it? Simple, really. Just throw your Boomerang and the key will come back to you. Now, pick up the key with R and then walk over to the door and open it. Inside the house, speak with the old lady if you want, then head out the door to the north to the back yard. Here, go to the huge rock and then make a formation of a square, and then pull back and you will lift it. Throw the rock out of the way and grab the Fire Rod with R. Now, exit the back yard and then exit the house. Back here, burn the grass with your new weapon to get a buttload of Force Gems. Now, go west and burn the wood down, giving you access to the huge stone. Now, make a formation of a square and lift up the rock, revealing a hole. Now, enter the hole. Here, head down the stairs and go west up the next set of stairs. Now, hit the crystal switch and cross the bridge revealed. Now, go down and open the chest to get 20 Force Gems. Now, go north up the set of stairs, and exit the cave.

Here, go west into the next area. Here, lift up the stones here and head north up the stairs. Shadow Link is in this area, and he is smashing the ground with a hammer that causes you to get dizzy if you get near it. Get on the square switch and make a formation of a square. Doing this will cause millions of them Force Gems to fall down. Collect the gems and then go west and lift the huge stone there. Now, go west and north into the next area. Here, lift the small stones you see and then jump into the water. Swim under the bridge to the east and then go east and jump on the small platform there. Now, go north up the stairs there and lift the huge stone and you will rescue Tingle. When he gets done talking, go east then south and jump into the water. Swim to the east and then dive under the water with B and collect the Force Gem under the water, then go west into the previous area. Here, go west, then southeast into the next area. Here, dive under the water and collect all the Force Gems there. Now, go north and get on the platform, then go north up the stairs and enter the cave there.

Here, go east and hop into the cannon, then shoot up to the west platform, and enter the door there. Back outside, go south and cut the grass there and step on the switch and then enter the next cave there. Here, go up the stairs and hop into the cannon, then blast up into the next cannon, then blast out of the cave. If you were fast enough, you can collect the Force Gems here before they vanish. Either way, head north into the next area. Here, head northeast and go in the cave behind the third waterfall. Here, go north and speak with the guy if you want, then press X to gain control of one Link. With one Link, step on one switch, then press X to get another Link, then step on another switch with him. Do the same thing with all four Links. This will cause a bridge to appear on the other side of the cave. Now, exit this cave and enter the cave behind the second waterfall. In this cave, go north across the bridge and open the two chests to get 100 Force Gems, and a Heart Container. Now, go east and then go south and get control of one Link, and step on the switch. Gain control of another Link, and cross the bridge, then gather all your Links back up with L. Now, go south and exit the cave.

Back outside, go south and drop down into the water. Now, swim to the south and into the next area. Here, go south down the waterfall. Now, go west and dive down underwater and grab the Force Gems here. Now, go southeast and go inside the whirlpool there. Here, go southwest, then swim up to the north, then go up the ladder and into the next area. Here, go northwest and make into a horizontal line and push the block down and you will reveal some platforms. Get on the platforms and you will find it is an elevator. When it carries you to the other side, go south and step on the square switch with a formation of a square to open a door. Enter the door and open the two chests to get a Blue Bracelet and some Force Gems. Now, go north and into the previous area. Back here, go north and up the stairs into the next area. Here, cut the weeds down and you will reveal a hole. Drop down the hole and into the next area.

Here, hold left on the Control Stick to land on the western platform. Now, continue west and up the next set of stairs out of this area. Here, go west into the next area. Here, go north and fight all of the soldiers here, then go west into the next area. In this area, you will fight a miniboss. To kill it, simply wait til it charges at you, then sneak up behind its back and hit him with your sword. Repeat until you win. Once you win, millions of Force Gems will fall, so get them all. Now, go west into the next area. Here, go north and attack those eyes if you have 2000 or over for Force Gems. If you don't, you will get the option to go back and get some more gems, so do so and you will be returned here when you get 2000 gems. Once you kill the eyes, step in the portal and you will gain some Force Fairies, and return to the World Map. Save your game when it asks you to, and then select Level 1-2, the Cave of No Return.

=====  
World 1-2: Cave of No Return  
=====

When you enter this level, go north and the door will open, so go inside to get to the true part of the level. This area is very dark, and you can't see a thing. So, go northeast, then go north and grab a Lamp off of the pedestal. You can now see inside the cave. Now, go north and light the torches with A, and a door will open, so enter it into the next area. In this area, you will see Shadow Link. Ignore him and light the torch to the west, then go north west and light the other torch. Collect all of the Force Gems that fall down to the ground. Now, go west, then north and move the second block up. Doing

this will allow you to pass. Go north and then push the second block to the left. Push it north, then push the one right next to you to the right. Doing this will make an entrance for you. Go north and kill the rat there, and then open the chest to receive 100 Force Gems. Now, go south, then go northeast and then push the fourth block to the south. Then, push the one right next to you to the west, then go south into the place with a chest in the middle. Here, go west and push the block to the left, then go right and push the next block to the east. Go south and push the block there to the east, then go west and push the block to the west. Doing this will cause the flames around the chest to unlight. Open the chest in the middle of the room to receive a Small Key. Now, carry the key to the northeast, then go south and unlock the door there. Enter that unlocked door.

Here, go east, then go southeast and make a formation of a square and move the big block there. Now, break the two pots there and head south. Now, go to the east and make a formation of a square and push the block there. Now, go north and then east, then north again, then go east and then south and push the huge block there with a formation of a square. Now, break the pots and then go to the south and then form in a formation of a horizontal line and push the huge block to the south. Now, go west and then north and break the two pots there, then push the huge block there to the east. Open the chest there to receive a Small Key. Now, go southwest, then go southeast and go northeast and unlock the door there. In this next area, you will see some colorful blocks. There is a red block, a blue block, a purple block, and a green block. So, here is what we do. First, gain control of the red Link, and push the red block to the right. Then, gain control of the green Link, and then walk to the east and push the green block to the right. Then, gather all of your Links up, and then go northeast, then go south and then push the green block with the green Link to the west, then go south and north and open the chest there to get 100 Force Gems. Now, push the purple block with purple Link to the south. Now, go east and then north and push the green block with green Link to the east. Next, go east then north and push the red block to the west with the red Link, then push the blue block with blue Link to the south, then, as purple Link, push the purple block to the east, and finally, push the green block as green Link to the south. Now, go east and then light the two torches there to open a door, so enter it.

In this area, go north and then east and be careful, because there are floor traps everywhere in this room. If you fall down, just enter the white portal to get back to the upper level. When you make it across, eliminate the enemies and then light all of the torches. Now, go north and into the next area. In this area, go north and light the two torches there, then make it so where you have control of one Link, then lift up one of the Links and then toss him across over to the next ledge. Now, gain control of which ever Link you tossed across, then press L to get them all across the platform. Now, open the chest to receive a Blue Bracelet. Now, go left and light the torch there, then hit the crystal switch to reveal a bridge, then go across the small bridge and go south to the previous area. In this area, go southeast into the next room. Here, break every single pot you see, and eventually you will hit a switch, revealing a chest. Open it to receive a Heart Container. Now, continue breaking the pots while avoiding the fireballs getting spit out at you. One of the pots in this room contains a Small Key, so break every single pot, then bring the Small Key out of this room. Back here, go north into the next area. Here once again, go northwest and unlock the door there using your Small Key. Don't enter the room yet, so go south and once again, toss a Link over to the platform, then pick up the Bow off of its pedestal. Now, hit the crystal switch to reveal a bridge, so cross it and then go northwest into the next room.

Here, go all the way west and then stand next to the torch to the north.

Now, shoot an arrow through the flame. Doing this will light each torch to the north. Now, go east and shoot an arrow through that torch, as well. This will light the next set of torches. Now, go east and shoot an arrow through that torch, as well, to light the next set of torches. And finally, go east and shoot an arrow through the torch to light the last set of torches. Doing this will cause a lot of bats to appear. Defeat the bats with your Bow. Doing this will cause a bridge to appear, and millions of Force Gems to fall. Collect all the Force Gems, then collect the last couple of big gems to the left and right using your sword,, then enter the next door to the north. In this area, go east and down the stairs into the next area. In this area, go west, then north and speak with the old lady if you want, then head in the cave to the east. Here, open the two chests to receive 5 Force Gems, and 20 Force Gems. Now, go north into the next area. Here, enter the cave to the left into the next area. Here, open the two chests to get 50 Force Gems, and 100 Force Gems. Now, go north into the next area. Here, go in the cave to the east. In this area, go north up the set of stairs into the next area.

In here, go northwest and make a vertical line, and pull the lever there to reveal a chest. Open the chest to get a Heart Container. Pull the lever to the east to open the door, then enter it. In this room, you will see Shadow Link, and will have to defeat him. To win, just attack him with your sword, and when he turns into one of the color Links, you must fight him with that color of Link. When you defeat him, a passageway will reveal. Pick up the gems he drops, then enter the next door. In this room, you will see the eyeballs. Defeat them with the "Power to Repel Evil" in your sword, or if you don't have 2000 Force Gems, travel back in time and get some more. Once you kill the eyes, step in the portal to receive some more Fairies, and complete the level. Onto World 1-3.

Boss Strategy: To defeat Phantom Ganon, make a formation of a triangle type thing. You should know what I'm talking about. Anyways, wait until he fires an energy ball at you, then slash it with your sword, and then continue tapping B. You should eventually stun him. Now, walk up to him and hit him with your sword. Repeat this same process until he explodes.

#### Arrghus

Boss Strategy: To defeat the Arrghus creature, drop into one of the holes in the arena, and grab a Boomerang from the pedestal, then return to where Arrghus is. Back at the arena, throw your Boomerang at the rocks that are surrounding Arrghus, then hit one with your sword. Repeat this until all of the rocks are gone. Once the rocks are all gone, Arrghus will jump in the air, and slam back down. If you get too close to the shockwave that occurs, you will get dizzy. He will now start bouncing off the walls. Now you must hit him with your sword and continue to slice n' dice him until he jumps in the air again. When he lands, he will yet again bounce off the walls. Repeat the same process until he is defeated.
