

you see and go in the door to the right of it.

"The exit of every area is blocked by an evil, putrid, Queen Morphoid. You must defeat her to proceed to the next level."

After that, you can fall down and kill the queen morphoid in front of the door. After you kill her, enter the door to the right and go down the elevator. Go to the left and you will see an armadillo that's already open. Quickly kill it and keep moving to the left. You can't go in the mouth above you. There will be two queen morphoids and two armadillos before the door. If you want the extra gold, kill the armadillo on the high platform, if not, just avoid him. Go through the door when you reach it.

Kill the armadillo on the platform above you. Go along the higher platform for the sake of avoiding the bats and the spikes. There's also a door you will run across. Enter the door for some free money.

"Take this \$40 and spend it wisely!"

Run to the left and kill the queen morphoids that appear. Quickly jump into the window and start slicing your sword to the left to kill the armadillo that will start attacking you right away. Crouch and start moving to the left. Hop into the first window when you reach it. Start moving to the left. You will eventually reach a bridge that will keep growing and shrinking. Run across half while it's full and jump the rest. Enter the door when you reach it.

"You still have a BABY Heat Knife? For \$10, I'll make it much more powerful! Ah! You kept me waiting for a long time. Thanks."

Give him the ten dollars since you can get that for killing one enemy. Go all the way back to the right you just came in through and jump into that window. Continue moving to the left. Jump through that window and take the lower path to avoid most of the enemies. The first chance you get to take the high road, take it. Move to the left along the platforms and enter the door for an easy challenge.

"Hey, boy! Won't you wrestle with me betting \$160? Listen up! When "GO!" appears, press A button repeatedly. If you push me into a corner, you win. Are you ready?"

Just keep pressing A repeatedly. It's really easy to win.

"I'll give you \$160 as promised, but I won't be beaten next time."

Move to the left and fall down. Kill the queen morphoid and go through the door to the left. Go down the elevator and start moving to the right. Kill the walking fossils as you reach them. Jump over the spikes, enter the next building if you want to rest for health for eighty dollars. Press A if you want to rest or B or down to leave.

"Rest up, brave warrior! For \$80, you can regain your strength."

Keep moving to the right and go through the door when you reach it. Just keep moving to the right until you see a hole in the wall you can jump into. Go in there and start moving to the right. The first door will just have a message.

"Your secret lies behind the three blue pillars."

Keep moving to the right and enter the next entrance. You have to move along the higher path here. Keep killing the enemies in your way and jump the spikes

when you reach them. Enter the next door for a message.

"The Queen Rabatall is downstairs. Make sure you have enough energy before the battle. Use the elevator, they are mopping the stairs."

Go to the right and down the elevator. Move a little to the left until you can crouch. Stay crouched and move to the far right. From here, turn around and stay crouched. With this new weapon you bought earlier, you can easily hurt Queen Rabatall. Just stay crouched in the right corner and shooting that sword until she dies. Just jump if she ever stands in the far left and shoots at you because that one won't go above you.

-----  
Area 2  
-----

Start going to the right and take the lower route. Enter the door when you reach it for a weapon upgrade. Skip the first door you see because the man will ask you to power up your spud gun. Only problem is, you don't have it yet! Go through the door at the end of the path. The door on the higher platforms is only a message.

"A rain of death is said to fall in the dark....."

Go through the door at the end of this path. Go all the way to the bottom of the elevator here. Go to the left in this dark area and kill the enemies when you can spot them. Jump onto the higher platforms when you get your first chance. Move to the right and kill the bat flying around the torch. Move to the far right edge of this platform and jump to the right. You will enter a hole. Move to the right and jump to the platform up there. Jump to the left up there to enter the next hole. Move to the right and enter the door.

"For only \$80 I'll give you these Infra-Red Goggles to see in the dark."

Press A to buy the item.

"Thank you, I'll give you the item now."

Just go back the way you came in. Go down the elevator and move all the way to the left. Avoid those drips of water and enter the hole at the very end. Move to the right until you reach the next hole, go in it. Go to the left and go through the lower door for a wrestling match again.

"Hey, boy! Won't you wrestle with me betting \$160? Listen up! When "GO!" appears, press A button repeatedly. If you push me into a corner, you win. Are you ready?"

Just keep pressing A repeatedly. It's really easy to win.

"I'll give you \$160 as promised, but I won't be beaten next time."

Go along the higher platforms here and jump into the hole. This is where an earlier message plays in. You can only move through the pillars when they are flashing blue. They don't flash in any particular order so pay attention. Also, if you touch them while they're any other color, you will lost health really quickly and die. Enter the door at the end for a new weapon.

"Got a Laser Disc here. It's like an electric yo-yo! Powerful enough to penetrate everything! Only \$80, OK? Thank you for your patronage."

Get out of this area the same way you came in and go to the left through the door. Jump on that small platform and look to the right. Attack that pole when nobody else is there and grab the extra life that will drop. Move all the way to the left and go down the elevator. You will now have to fight the boss. Jump to the platform that he is not on and keep throwing your new laser disc at him. When he goes up, drop and jump to the other platform. Just keep doing this until he dies.

-----  
Area 3  
-----

Immediately start moving to the left and jump across the platforms. Jump into the hole and you will enter a cave with two paths. Take the higher path and enter the hole at the end. Jump along the clouds to the left and jump in the hole at the end while killing the clouds. Enter the building to your right and buy the Bolo from the person in this shop. It's only \$100.

"You'll need this protection Bolo to ward off nasty Momoka. \$100. Thank you for your patronage."

Now keep going to the left and just return to the cave with the two paths. Take the lower path and move all the way to the left. Enter that hole. Move to the right and enter that door for a wrestling match and a cool \$160.

"Hey, boy! Won't you wrestle with me betting \$160? Listen up! When "GO!" appears, press A button repeatedly. If you push me into a corner, you win. Are you ready?"

Just keep pressing A repeatedly. It's really easy to win.

"I'll give you \$160 as promised, but I won't be beaten next time."

Move to the left and enter the second hole you see. Go to the right and enter the hole at the end of this path. Keep just going straight to the right until you reach a doorway. Enter that door and upgrade your Laser Disc for \$40.

"I will make your Laser Disc more powerful for \$40. Ah! You kept me waiting a long time. Thanks."

Go back to the left through the hole you just came from. Go to the left through the hole again and you will be back to where you just were. Move all the way to the left. Right before the door will be this big vine tree. Go to the second platform from the left and throw your laser disc at it. A block will break open revealing a secret item that will refill your health. Grab it and enter the door.

Go down the elevator and you will fight the boss of the level. The Queen Dragon is actually a very easy boss, especially with the upgraded laser disc. Now you can throw two at a time. Throw both of them to the right and move all the way to the left. You will be close enough to the wall that the queen will not touch you. When she jumps away, turn around and throw two more. Keep doing that until she dies.

-----  
Area 4  
-----

Start off by moving to the left. Kill the enemies in your path and go down the elevator. At the bottom of the elevator, start heading to your right. Enter the

door at the end of that path. Upgrade your Bolo and head back to where you started.

"For \$60 I'll make your protection Bolo more powerful. Ah! You kept me waiting a long time. Thanks."

Once you get back to where you began, go all the way to the right and up the elevator. Start moving to the left when you reach the top. Jump the gaps when you reach them and enter the door at the end of this path. Go up the elevator and to the right. Go to the right up here and jump on the blocks when you reach them. Look to the left on the higher block and jump and shoot. It will reveal a hidden hole, enter it. Crouch and move to the left. Enter the door.

"Would you like to transform?"

Press A when you talk to the lady in there and you will transform into a robot, or a monster depending on the version you're playing. If you're playing the North American version, you will become a robot. If you're playing the Japanese version, you will turn into a monster. Either way, the game is still the same so let's go on. Your only weapon now is your bare fist. Move to the right and you gain the new ability of destroying blocks in your path. Destroy those blocks and hop in the hole again.

Keep jumping to the right to the higher platforms. Enter the first hole you see and start moving to the left. Kill the enemies and destroy the blocks you can't avoid. Enter the door at the end of this road for a nice new weapon.

"You are a promising young man, since you have made it this far. Take this weapon... the Psychic Blow. It's very powerful!"

Go back to the right and go through the hole you came from. Keep moving all the way to the right and enter the hole at the end of that path. Break the top block that will block your path and jump over the wall. Kill the enemies and enter the first door to transform back into a human.

"Open this door to transform back. You can never transform again. Look! You've reverted to what you were before."

Continue to the right and crawl through the small hole. Keep moving to the right. Go through the door and continue to the right. Enter the second hole you see, it will be the only hole you can reach. Start moving to the left and enter the first hole. Go to the right and enter the door, buy the protective item.

"This special Mental Shield will cut your damage in half, only \$80. Thank you, I'll give you the item now."

Head back to the hole and continue to the left. Enter the second hole if you need to refill your health. If you do, go back to this current hallway and continue to the left. Enter the last hole and you will be in a similar cave. Go in the next hole to the left. Start moving to the right and buy the Thundersword in the door at the end.

"Don't be a wimp! Buy this Thundersword! It's only \$200. Thank you for your patronage."

Go back to the left and end the hole. Crawl through the holes and hop into the next hole. Go all the way to the left and through the doorway, go down the elevator here. Now you have to fight the boss. All the boss will do is fly in an X shape and shoot in random directions. You will generally be safe in the bottom left corner except for when he flies down and to the left. You could

jump at the right time to avoid his attacks or just move. Just keep attacking him until he dies.

-----  
Area 5  
-----

Go to the right killing the organs in your path. Enter the first doorway for a message on how to beat the level.

"You are inside the Queen Morphoid. To clear this area, you must destroy all three of the Queen's hearts which are hidden somewhere. If you've destroyed all three, turn to the left! For ahead is the exit. I've said all I know. Hurry up!"

The left he means is the door you saw to the left of where you began. Continue to the right killing the organs. Enter the next door you see for all the weapons.

"For just \$250, you could buy all of the weapons available. Go on! Your skill is important for your journey!"

Go through the door to the right and jump through the hole. Go all the way to the left and enter the door down there. Keep moving to the left and enter the second hole. Go to the right and buy the infra-red glasses. Go all the way back to the first hole you entered and go to the right. Enter the next hole you come across. Crawl to the right. Enter the hole and keep going to the right. Go through the door and you will get onto an elevator. Even though the ground is there, go down. You will have to destroy one of the Queen's hearts here.

The heart will keep shooting random shots. What you should do is equip your thundersword. Go all the way to the left and get on the highest platform you can get on. Crouch and just keep shooting the heart with the thundersword until it explodes. When it does, jump through the hole. Go to the right and down the elevator. Go to the left when you reach the floor, don't go down again or you will just go back to where the heart was.

Go to the left and go through the hole. Crawl through the cave and go through the hole to the left again. Now start going to the right and go through the last hole. Go to the left and jump through the next hole. Keep killing enemies in your path and continue all the way to the left. Go through the door when you reach it. Keep going to the left until you reach an elevator. Go to the top and kill this heart just like you killed the last.

You will enter the same room you entered when you killed the first heart. Go to the left and enter the first door. Keep pressing A until you get the jet boots. Now go back down to the second room of the level, the room with the three holes. Go to the hole all the way to the left. Keep moving all the way to the far left of these rooms until you reach three holes. Go in the middle hole and go to the right. Keep going to the wall, jump and you can walk through a higher part of the wall. Go through the door and go down the elevator. Kill the last heart just like you've killed the others.

You should still have the jet boots from earlier, quickly rush to the beginning of the level. Don't worry because there isn't any enemies to bother you so just run. As a matter of fact, you could bunny hop. If you jump as you move, you will move faster. So just get back to the beginning as soon as possible. Go to the left when you get there and keep going through the holes and doors until you reach the Queen Morphoid.

I suggest saving money until the end of this part. If you have full health or extra lives, stay on the far right. Just jump over the enemies in this part and go into the queen morphoidn when you can. Avoid the fireballs and stuff inside, just don't go too far to the right or you'll die. At the end you will reach the final heart. Stand in the bottom left corner and keep firing the spud gun until the heart. If you run out of money, there's a small section to the bottom left of the heart. There's a small shield around the heart. You can stand just to the bottom left where it appears your character's right side would touch the shield if it were lower. You could stand there without being touched by the attacks. Either way, just keep attacking it until it dies.

=====  
3. - E N E M I E S  
=====

-----  
Area 1  
-----

- Bat - These are flying around the screen a lot of the time. If you don't move, they will keep flying around so stay on the move!
- Armadillo - These things will float up and down for a bit. After a while, they will open out of their shell and start walking around.
- Queen Morphoid - These are a lot stronger. They will walk around at average speed and shoot at you too.
- Walking Fossil - These just walk around like normal, nothing major.
- Shooting Bats - These fly around randomly and shoot at you.

-----  
Area 2  
-----

- Jelly Fish - These are just like the bats from the previous area. However they only fly side to side instead of diagonally.
- Fish - These will float sideways too, except they will stop and go down instead of just turning around. They will eventually turn into queen snakes if you wait too long.
- Queen Snake - These are just like the Queen Morphoids except they have a snake model opposed to a Morphoid model.
- Shadow Monsters - These are in the dark areas. They vary from bats to snakes to just plain old monsters. They all take one hit and you can only really see their eyes.
- Blue Dot - These are basically the same as the bats from the previous area.

-----  
Area 3  
-----

- Snake - For some reason, these snakes just float through the air like the bats from the first level.
- Gator - These are pretty big. They just walk around and shoot every now and then.
- Zombies - These include skeletons, worms, and little eye ball creatures. They just walk around.
- Cloud - These will float around and randomly shoot lightning bolts under it.

-----  
Area 4  
-----

| |  
| |  
| |

\*\*Queen's Vitality is the boss' health. You will notice that at the start of each stage, it will be zero. As you progress through the level, it will increase at a steady rate. That leaves you up to the option. Would you like to rush through each level for an easy boss fight or explore for all the goodies and have a tougher fight. It's your choice.
