2. - Walkthrough

 Stage 1:

Mountain - Fight your way through the mountains. Watch for land mines and falling rocks.

This whole map is going to the right. Go right and either shoot or crash into the boxes. They will slow you down if you crash into them but it won't kill your car. Kill the two people standing there after the boxes. Now it's time to

dodge all of those land mines. Maneuver around them. When you see part of the mountain your on form a cliff on the bottom of the screen, avoid it. You will fall off the mountain and die. When you come across the second little cliff on the bottom of the screen, slow down. The rocks will start falling and they will fall in whatever path you are on. Slow down to avoid them.

When the rocks hit the ground, shoot at them or avoid them. You can crash into them and that will kill your car. There may be a few points when you have to shoot at the to dodge a land mine or something like that. You will eventually reach a huge wall of rocks after an avalanche. All you have to do here is speed up and hit the jump button. Keep going avoiding or blowing everything up along the way. You will reach another huge wall of rocks along the way. You have to be very careful at this one though. There are two land mines at the other side and there are also two missiles that come out of the sky and down on the ground. There is also a cliff that you can fall off on the bottom too.

Keep going and kill the first few people with guns. There will now be jeeps driving and shooting, some jeeps shoot in more than one direction. Kill them because it's not as easy to avoid them. You will reach a tunnel after you have gone by enough jeeps. There will be a lot of vehicles in there and the grey circle at the top of the screen you will come across is a bomb so don't pick it up thinking it is a power-up. After that bomb will be a bunch of land mines all right next to each other. I suggest now you blow them up because it's not as easy to avoid as the past land mines you have seen. You will now be exiting the tunnel.

Immediately after the tunnel, shoot at the fox hole. There will be people in there shooting in all directions so be careful. This one takes a bit longer than other enemies to destroy so just keep shooting. There will be rocks falling soon after. That is your cue to speed up. There is another wall of rocks there so jump over them. Now just drive forward and don't drive off the cliff. Just keep going and you won't see anybody else. Just watch the short scene of the car driving away. Now it's time to break the enemy lines in the bridge area. Stay alert.

Stage 2:

Bridge - Jump the destroyed areas of bridges. Watch for falling rockets.

This is actually a pretty hard mission because there are two different routes you can take that are right next to each other all of the way through. You must however go on the lower route. The higher route will eventually make you fall into the water. They will both have those jeeps that shoot in all directions. I do however, suggest that you take the lower route. There will be two jeeps shooting in all directions on the higher route. Avoid them to your best ability and continue on. There will next be two of the same jeeps on the bottom but there is still one on the top route. After those jeeps there won't be any enemies for a while.

You will reach two large vehicles shooting in all directions here. Both on the bottom route on each side of the road. If you are on the bottom route then they will be as high and as low as you can go. If you took the top route, you will fall into the water. Keep going along the path killing the next vehicles you come across. Speed up after you have killed the vehicle and there will be a blown off part of the bridge. Gain speed and jump over. This is a large gap so you will have to time your jump right.

After a few seconds when you land the jump, there will be an assault towards you. Kill the truck and the person. Blow up the box and don't crash into it

because there are explosives in it and you might kill your car. Go up the path that switches to the other side of the screen and kill the people on it. You will come across a lot of jeeps that shoot in directions after you made the switch. There will be a small gap after you killed about five jeeps so speed up when you see a jeep on the lower route. Also jump the gap on the lower part of the bridge so you don't crash into a jeep that is on the top part of the bridge after the jump.

Kill the jeeps in your way and you will see a tank on the lower route. Don't worry about that tank though because it can't hit you. Speed up so you can dodge that tank and then jump over the barrier in between the roads. Now there will be another tank with people around it. Just kill it as quick as possible and keep going. Kill the people and after you killed a person that was all alone, speed up. Speed up and keep going up and even into the wall. This jump is pretty tricky. Jump while you are speeding and move up while you are still in the air. Keep going along the bridge.

Stay on the top route here and kill everybody and all of the vehicles. Do not jump to the lower route or else you will have to jump back onto the high route. There is a huge gap and you will just fall into the water if you take the lower route. Keep going on the high route. After a while you will reach a helicopter. This helicopter is a tough fight. Shoot at it and avoid the missiles and machine gun. Once you have avoided the missiles and you see them go off the screen, then jump. The missiles will come back and the only way to avoid them is to jump. Just keep shooting at the helicopter and avoid all of its attacks to get by it. You don't have to blow it up though.

Next there will be a gap. You can either jump over it because it is a small gap or you can just change to the lower route. If you jumped the gap and stayed on the high route, then jump down to the low route because there is no way you will jump over the next gap. You will now need to go into the tunnel. There will be about five jeeps shooting in all directions until you reach a tank. Kill all of them and continue through the exit of the tunnel.

Slow down here so you can get the power-up floating through the screen. Time it right so you will accelerate and grab it before it is too late. Go up the bridge and change routes when you must. Kill the two trucks up there and then jump down to the lower route. Kill the people down there and either kill or avoid the cars that drive by shooting at you. They are much faster than other vehicles you have come across so far so be careful. Kill the two trucks that will take up most of the road and speed up so you can jump the gap.

Now speed up and stay to the top of the road. Jump the next gap and it will be just like the other one that you had to jump up and move up while you are in the air. When you can jump onto the lower route and slow down to avoid the missiles. There will also be a jeep on the lower side of the road. Go up the bridge to switch sides again and kill the people there. Slow down to avoid the rockets that come out of the sky. Now is the time to be careful. There will be jeeps and land mines all over the place. Kill the jeeps and blow up the land mines that get in your way. Watch the car drive away and onto the other side of the bridge. Now it's time to break the enemy lines in the prairie. Stay alert.

Stage 3:

Prairie - Be ready to jump the pond while fighting the enemies.

Avoid the land mines in the beginning. After the land mines will be a lot of people shooting at you. Kill them and move on. After a while you will see a river. You can either take the bridge or jump over it. After the river, watch

for land mines. There will be four right after it and that will be it. Speed up but be careful for the two cars on the top part of the screen. Get the power-up that is floating through the sky and continue on.

After the two cars will be a lot more land mines so be careful. Keep going and kill the people and the fox hole after the land mines. Pay attention to land mines because they will now be scatter all over the place and then you will come across two tanks. Kill them and kill the people near the second tank. Be careful though because those people are standing in front of land mines. Jump over the fences in your way and be careful for the land mines.

Next will be a part with the water and the road will be narrower. Be careful here because there will be an assortment of different things to either kill or avoid. After that part will be a few land mines here and there. Blow them up and kill the vehicles and the people you come across. You will reach a fox hole after a while, blow that up and speed up.

This part is pretty tricky. Drive onto the dock there and jump the river. You will land on a very small island so keep speeding and get ready to jump yet again. Also be careful on the island because there is a land mine right in the middle of it. Jump over the rest of the river to continue on with the level. After the river will be a few land mines and a fox hole. Just avoid this fox hole because it is hard to kill. There will be a lot of people here now. Just shoot out a few of them that are shooting at you and jump over the fences.

There will be no enemies after that except for two helicopters. Use the same strategy as you used for the last mission. When you reach a fence in the middle of the path, go on the bottom. This route will make it easier to avoid the upcoming fox hole and then jump over the fence when you have to. There will be two jeeps after that part and then you will drive off to the next mission. Now it's time to break the enemy line in the city. Stay alert.

Stage 4:

City - You are almost to the airfield. Keep fighting.

Go along the road and there will eventually be a jeep in the middle of the road. There will be two of the same vehicles on each side of the road after you have killed that first one. There will be one of those fast cars in the middle of the road but that's the least of your problems here. There will be a person with a machine gun in the window in the red building there. You can't kill him so just go to the top of the road. When they stop shooting for a second, speed up. You should make it past them.

There will be two cars in the middle of the road after that person with the machine gun though so be careful. There will be a few people near each other so kill them and move on. There will be another machine gunner in a red house with vines growing up it so use the same strategy and keep going. Kill everybody you come across.

Once you see the first set of land mines, that will tell you there is yet another machine gunner in the red building. Use the same strategy to avoid him and avoid the land mines after that. You can also just speed by the truck right after the machine gunner too. There will however be another truck just ahead of you though with a jeep near it. After that will be land mines scattered across the road so be careful and avoid them in any way possible.

Once you see the first vehicle, that means the land mines will stop coming up but also that more vehicles will come up. They will be slow moving or they will

not move at all. They do shoot in all directions though o be careful. When the road seperates into two pieces, go on the bottom route. After the road comes back together again, stay on the bottom part. Shoot forward and kill the jeeps that come up. Kill all of the vehicles that you come across.

When there are barriers in the middle of the road, then take the high route. It is fairly hard to get into but there is nobody on that route. Just keep going and wave hello to the people you drive by. It will however be hard to merge back onto the road because of the enemies you will come across when you have to merge back onto the road. Just stay on the high part of the road again to avoid all of the people you drive by.

There will be land mines in the higher route after a while but there will only be three of them. When the road seperates, take the high route. Kill the person there and avoid the land mines. Keep going avoiding land mines and killing people along the way. The next time the road splits in half again, go either route. Just kill the vehicles in the beginning of the split. Now just keep going straight and there won't be anymore enemies you drive by. That will be the end of the level and watch your car drive off. Now it's off to the last level. PK430 in the next area. Recover it and fly back. Good Luck.

Stage 5:

Recover the Aircraft - Jump the walls and find the airport. Fly back home.

You will start in the middle of a runway. Stay in the middle or go to the top because there are a lot of people on the bottom of it. Avoid the land mines that you come across and then you will reach the vehicles. Shoot at them before they shoot and you and move on. After the first two vehicles will be a few land mines and then two people shooting at you. Stay to the top of the screen when you see the two people shooting at you and then shoot at the fox hole up there.

Jump over the wall to continue on with the level. Be careful once you have jumped over the wall though. There are land mines scattered around and there are two vehicles shooting in all directions. After that barrage of attacks, go to the top part of the screen. If you stay to the top, you can avoid all of the land mines and the vehicles that drive by the bottom of the road. When you reach the silos, kill the two vehicles that will come out. After that will be some land mines you need to avoid.

You can easily avoid the next two people and the truck by staying along the top part of the road. There will however be motorcycles that come out after those people. There will be a lot of people after that but they are scattered around good so they are easy to avoid. After a while when you see the first truck is when you have to be careful. there will be land mines and more vehicles driving around. Just keep going killing or avoiding the vehicles and the land mines.

Jump over the wall you will eventually reach and be careful because there are land mines past it. There will be a lot of land mines scattered around here so be careful. When the road gets narrow, there will be a fox hole. Blow that up and continue on through the level. The next fox hole will be the part you have to be careful for again. There will be rockets near it and land mines scattered around there so be careful. Kill or avoid the land mines.

Jump over the next wall and be careful. There will be a lot of people shooting at you and they are all standing in front of or behind land mines. You can try and speed through the next assault of fox holes and jeeps or you can shoot at them. There are a lot at once so you have to be very careful since they all shoot in different directions. Once the road narrows down, there will be a lot

of people scattered around shooting at you. Once you past the people that are shooting at you while hiding behind boxes speed up.

Speed up and avoid the jeeps that speed by you from behind. There will also be groups of people here and there while you are speeding so keep shooting your gun so you don't make any stupid mistakes. Kill all of the people that you come across if you must, the easier way to do it is to just avoid them though. You will reach a fox hole on the bottom of the screen so be careful. Shoot at the barrels in the middle of the road. Kill the vehicles that you come across and keep going through the level.

Jump over the next wall when you get there. There will be a fox hole and a helicopter there. Just speed by them along the bottom of the screen and jump over the next wall. There will be another helicopter, just avoid them again by speeding along the bottom of the screen. When you reach the two land mines on the bottom of the screen, be careful. Now is the time to slow down. Kill the people and land mines there and move on.

Avoid all of the land mines and when the road narrows, slow down. There will be rockets coming out of the sky. After that will be a part that is pretty hard. There is a fox hole, two vehicles, and a few people. This part is hard to speed by so just slow down and kill them. Jump over the wall that you will come across after that part. This part is actually pretty easy to speed by. Just fly through this part and then the part when the road narrows is easy. Watch your car drive away and you're done. Congratulations! Through your bravery, you have recovered the stolen aircraft. Watch the cut scene of you getting out of your car and into the jet.

Congratulations! You just beat BreakThru and recaptured the stolen jet!

3. - Cheats

The following are Game Genie codes. You must have a game genie to enter them.

GZUKYPVG - Infinite lives for both players
GZKSLZVG - Freeze weapon timer
PEUKPZLA - Player 1 start with 1 life
PEKGGZLA - Player 2 start with 1 life
TEUKPZLA - Player 1 start with 6 lives
TEKGGZLA - Player 2 start with 6 lives
PEUKPZLE - Player 1 start with 9 lives
PEKGGZLE - Player 2 start with 9 lives
ZANKLZPA - Start game on level 2
LANKLZPA - Start game on level 3
GANKLZPA - Start game on level 4

IANKLZPA - Start game on level 5

LTUKTLAA - Start each life with 3-way firing and 99 seconds
