Round 1 - Vietnam !

---

After you land your helicopter and get out, start to move to the right. An enemy soldier with a knife will jump down from the second tree. After you kill him, another enemy soldier wielding a knife will appear from the right. Move to the second right on this higher platform and another soldier will jump down. Again, another soldier will appear from the higher platform on the boxes. Watch the background from here on out. There will be soldiers on the fence throwing grenades at you, make sure you avoid these. After jumping over the second set of boxes, break the top right box for a gun. Move to the right and another soldier will appear on the boxes.

Around this time, you will notice gun shots rain down from the top left corner toward the middle of the screen. This happens randomly, just make sure to avoid them. At the next higher platform, you will see a mounted gun behind the fence

in the background. Blow that up and continue to the right. Another enemy will fall from the next tree. Keep going while watching for the mounted guns and soldiers in the background with grenades. When you hit the lower platform, you will see another enemy jump out of the tree and one more come from the right. Continue further to the right for another ground trooper and one coming out of the trees. Fall down the hole at the end of this path.

When you fall down, blow up the mounted guns on the ceiling of the cave to the left. Go down the ladder slowly because there is an enemy soldier at the bottom of it. Kill him and continue to the right. Kill the two soldiers on the boxes and keep moving to the right while watching the mounted guns on the ceiling. Kill two more soldiers to the right and fall down the hole at the end of this path. Kill the soldier to the left and fall down the hole to the left. Quickly kill the soldier to the right. Kill the next couple of soldiers and break the top right box on the next set of boxes for another gun upgrade. Move to the right and kill the soldier on the platform, jump up them and enter the next area.

Move to the right to fight a tough helicopter. Your best chance is to stand on top of the third pillar and just fire upward toward the helicopter. From its starting position, it won't hit you. You should be able to kill it before he moves again so just keep firing. After he comes down, move to the right. Kill the enemies in the background and you will reach a tank. Simply jump over his shells he fires and attack the tank until it explodes. Continue to the right while avoiding the tanks in the background and break the first box you see for another gun upgrade. There will be one ground soldier at the very end after the chaos in the background. Kill him and walk off the screen to the right to finish this round.

---

## Round 2 - Praha !

---

Move to the right and kill the three soldiers that will drop from the ceiling. The top left box on the first set of boxes will contain a gun. Jump onto the boxes to continue to the right. Kill a couple more enemies and you will see a submarine in the background over the gap. The top will fire a machine gun shot towards you and the bottom will fire three cannon shells toward the gap. As you go over the boxes, debris will fall from the ceiling so be quick. Continue to the right while killing a couple more soldiers. The right most box on the top row of boxes will have a gun in it. Fall down the ladder at the end after fighting off a few more soldiers.

Fall down the next ladder to the left and quickly kill the two soldiers here. Move to the right while killing a few more enemies. On the second set of boxes, the left boxes on the second highest row of boxes will have a gun. Jump up the platforms to the right to enter the next area when ready. Kill the soldier immediately to the right and break through the boxes to the right. There is a gun on top of the boxes if you need it. After you break through the boxes, move to the right while killing a few more enemies. Debris will fall as you jump onto the next set of boxes. The top right box on this set will also contain a gun upgrade.

Destroy the submarine after the next set of boxes and jump the gap. Move to the right and you will face the submarine boss of this stage. Shoot at the two guns on the right side of the submarine. Stay on the far right of the screen so the left guns won't shoot you. After those guns are gone, shoot at the cannon in the middle of the submarine until it explodes. Kill a couple more enemies as you move to the right after it's dead and watch the cannons on the ship in the background. The top left box of the first set of boxes after the ship has a gun

upgrade. Continue to the right until you reach another submarine boss, this one will have six guns instead of four so be careful. Continue to the right after this boss to finish this round.

---

### Round 3 - Vladivo !

---

Go to the right while killing a couple of enemies and watching the guns on the ships in the background. Jump onto the higher platform when you reach it and then onto the next. Break the top left box for a gun upgrade. Keep moving to the right and jump over a gap to reach the higher dock. Break the top left box of the second set of boxes to reveal another gun upgrade. Fall down the hole to the far right at the end of this path. Move to the left and fall down that ladder, quickly kill the soldier at the bottom of it.

Move to the right for a very tough tank boss. It has two machine guns, one on top and one under the cannon, and a cannon that shoots at an arc. Try to get the top machine gun first since it will aim right at you. With this down, it's a lot easier. If possible, try to get the other machine gun but that one doesn't really matter. Stay to the far left and basically keep shooting the body of it above the treads until it gets close to you. When it starts to get close, fall in the left hole and just duck. Wait for it to turn back and keep firing at it. This boss is very tough so be very careful.

Go to the right after the tank is destroyed and kill two more soldiers. Destroy the top left box for an extra life and then climb the platforms to enter the next part of this round. Break open the top right box on the first set of boxes for a gun upgrade and watch the guns in the background. On the next set of platform, climb to the top and break the top left box for a gun upgrade. Keep following this path to the far right while killing enemies in the foreground and background and you will be all set once you reach the helicopter.

---

### Round 4 - Colombia !

---

This round is all based on a moving train. You will notice guns and enemies in the background. Be careful because the background will start to repeat and there are a lot of guns in the background toward the end. The best way to avoid the guns in the background is to never stop moving. If you keep moving to the right, you will never get hit by the cannons unless you jump high as they're firing. You will notice a couple of large sentry guns every now and then. They fire slowly so avoid the first shot and then jump over it. Just do that to every sentry gun and kill the enemies in this surprisingly easy round.

At the very end of the train, you will enter a different screen to fight the boss. There are no background enemies so you are able to focus solely on the boss. There will be three destroyable guns in the middle of the helicopter with extra guns on the front and rear ends. It also fires cannons and a couple of soldiers will jump out of it from time to time. It is a really easy fight if you have the triple shot gun for it. Don't bother aiming for each individual gun in the middle, just do a lot of damage to it quickly to bring it down. Move to the right when he is destroyed to finish this round.

---

### Round 5 - Afghan !

---

Move to the right watching the background for enemies and guns as usual. Kill a

couple of enemies and break the top left of the first set of boxes to get a gun upgrade. Right after you climb the higher platform, break the top box for another gun upgrade. Keep moving to the right and break the top left box of the last set of boxes. Climb the ladder there and kill the soldiers you meet along the way. Break the top right of the left set of boxes at the top for another weapon upgrade. Continue to the right while killing enemies when you reach the top of the ladder.

When you reach the hole, go down it and press Down+A to jump through the platform you're on until you reach the bottom. Continue to the right and watch the statues in the background. They will shoot shots of their heads toward you. When you reach the high platform, you will see a couple of boxes just before it. Break the top left one for a gun upgrade. Continue to the right while killing just a couple of soldiers but avoiding a lot of guns in the background. After a while, you will finally reach the boss.

You will notice this boss have a lot of orbs floating around him. He will fire random shots out of it toward you. Every now and then, you will also see three white orbs appear in front of him. They will spiral outward in all directions. Avoid both of those attacks as he just floats around the top portion of the screen. Keep firing away at him until he dies and run off the screen to the right to finish off this round.

---

### Round 6 - Shatol !

---

Move to the right and break the top left box of the first set of boxes you see for a weapon upgrade. Keep going to the right and kill the enemies while watching the background. You will see a box hanging on a chain, it contains a weapon upgrade. You can also break the higher of the first box almost directly under that one for another weapon upgrade. Break the right most lower box for another gun upgrade in the next set of boxes. The platforms will rise pretty high and go back down again. Break the top left box when you reach the lowest platform again for another gun upgrade. There isn't much else to this round, so keep moving to the right until you reach the boss.

This boss moves from side to side along the top portion of the screen. You will see machine guns on the far left and right sides. It will also have smaller undestructable machine guns on the top corners. That's just it for the machine guns. The top also features two cannons, all of which are aimed directly at you. Every now and then, it will also fire a shot that waves down to the bottom of the screen while moving side to side. You can destroy the side machine guns if you want. Just keep firing at the body of the space ship until it finally explodes. Run off the screen to the right to finish this round.
