A-----INTRODUCTION

Fact is, most tie-in games are bad. Whether it's a video game for the block buster movie of the summer or a title starring your favorite cartoon characters -- they almost universally terrible. Typically, little effort goes into the development of such titles as they are merely viewed as promotional items or just trying to cash in on the popularity of the franchise; however, sometimes some decent tie-in titles are produced. For instance, the Capcom series of NES games starring different Disney franchises. Those are all great games. The sad part is that for every Duck Tales or Rescue Rangers there are 12 Total Recalls or Ghostbusters. This trend holds true even in modern gaming.

G.I. Joe was one of my favorite TV shows as a kid in the Eighties and early Nineties. I had many of the figures and tons of the vehicles and a myriad of trading cards. I begged for the G.I. Joe NES game, but I had little economic pull in the family as an 8 year old. Eventually, I got my hands on this game in middle school. I was stunned by how good it actually was and how well it kept true to the Joe universe. Many of my favorite Joes were playable and as well as many of my favorite Cobra villains were in the title. The game even throws a bone to fans by including several authentic vehicles too. In other words, the game is a true rarity -- not only is it a good game in its own right, it's also a truly good tie-in title.

The game was made by Taxan. Taxan is one of those unknown video game firms that produced a few titles for the NES. Their most notable titles would be Low G Man and Burai Fighter. Some may also include Fist of the Northstar too. G.I. Joe's basic game engine reminds me almost exactly of Low G Man's engine only tweaked and improved. The graphics are also nearly identical in as far as animation and sprite appearance. Most of Taxan's games are playable although far from great. Average is the best way to describe their top games. Somehow, with the aid of software developer, Kid, they managed to put together one great and must play NES game.

Bottom line, even if this title weren't Joe related, it would be a near top tier NES title.
