-[Introduction Stage - Defense System]-

The first boss you meet shouldn't be too difficult, but for a inexperienced user, you may have problems. The Defense System is a bunch of opening and closing ports that attack you. The way I recommend you defeat the Defense System is by moving back and forth acrossed the screen while rapidly firing. Fill up at any chance you get a power-up.

-[Corridor 1 - Blue Fleepa]-

The Blue Fleepa is pretty simple to kill. He moves towards and away from you randomly. Avoid him, and attack the little squid he attempts to hit you with, then attack the Blue Fleepa. Repeat until he has been defeated.

-[Corridor 12 - Red Fleepa]-

The Red Fleepa has the same concept as the Blue one did, only he is slightly faster and shoots more squid at you. Repeat the same steps as in the Blue Fleepa, avoid his body, kill the squid, and then hit the Red Fleepa until defeated.

-[Corridor 11 - Green Optomon]-

The Green Optomon moves side to side shooting green seaweed at you, you need to avoid this at all costs, because it is his most damaging attack. Move back and forth firing at the Optomon and he should be dead in no time.

-[Corridor 3 - Blue Optomon]-

The Blue Optomon is more difficult than that of your previous meeting with him. First thing you need to remember is to avoid the seaweed he shoots at you, because it causes more damage than it did in the past. Move back and forth firing at the Blue Optomon.

-[Corridor 16 - Red Optomon]-

The Red Optomon is pretty slick, but he is easier than the previous two because you are much more powerful than you were in the last two fights. Same method as described before, avoid the seaweed, fire rapidly as you move back and forth on the screen.

-[Corridor 2 - Crawdaddy]-

The Crawdaddy is pretty tough if you don't know how to defeat him. He bounces around the screen shooting claws all over the screen. In order to kill him equip the fireball weapon and sit stationary and fire it at him.

-[Corridor 13 - Silver Bombarder]-

He looks blue to me, but thats what they call him in the manual. He teleports all over the screen and randomly fires rockets at you, simply use your Saber Lazer and go right to where he appears and use it on him, he'll be dead in no time.

-[Corridor 19 - Red Bombarder]-

Same as previous one, only he is Red and slightly faster in the teleport speed. Use the Saber Lazer on him when he appears and he should be dead fast.

-[Corridor 14 - Silver Clawbot]-

The Sliver (blue) Clawbot moves back and forth and his claws open up shooting a lazer at you. Use the Saber Lazer on his claws, and when they open immediately move, repeat until it falls off. Now just focus on his body and avoid the lazars he shoots like a maniac.

-[Corridor 15 - Green Clawbot]-

Use the same method as before, this time he is slower. Just

use the Saber Lazer on the claws, then your regular weapon on his body, avoiding the lazars.

-[Corridor 20 - Red Clawbot]-

The Red Clawbot is much faster than the previous two, I personally recommend you use the regular weapon against his claws and his body, because the Saber Lazer makes it much more risky.

-[Corridor 4 - Teramute]-

This fire breathing dragon can be a pain at times, but with the correct measures he can be easily defeated. Use the Saber Lazer when he first appears from a teleport, and avoid the fireballs he shoots at you.

-[Corridor 5 - ZibZub]-

He is one of the easiest bosses in the game, avoid the missiles and use your regular fire power to destory him.

-[Corridor 17 - Eyeball Growth 1]-

First use your Saber Lazer and wipe out the first line of small eyeballs, then use the Cutter Lazer to blast the rest of the big eyeballs.

-[Corridor 7 - Eyeball Growth 2]-

Read the guide on defeating Eyeball Growth 1, he is the same.

-[Corridor 18 - Blue Grimgrin]-

This is the hardest boss in the game, don't let this guys sexy looks foul you. <yeah right> He will run around the screen like a mad man and shoot all sorts of body parts at you, you'll need to circle around him and fire with regular weapon, or you can use the Fireball weapo for a quicker kill.

-[Corridor 8 - Red Grimgrin]-

Same method as described above, however you'll have to move faster than you did with the Blue Grimgrin.

-[Corridor 9 - Blue Eyegore]-

The Blue Eyegore isn't too difficult, use your Fireball to get a quick victory. Make sure you kill the skulls and the lazars he attempts to shoot at you.

-[Corridor 10 - Red Eyegore]-

Same as Blue Eyegore, except he is slightly faster. Use methods described on Blue Eyegore.

-[The Escape - It]-

The final boss, use the fireball and move from left to right and shoot when you find an opening. Make sure you don't run into his hands that he moves up and down. Repeat until he is dead. When he turns Red I recommend you use the Enemy Eraser to kill off all the crap It shoots at you, and use your regular weapon to destory him.
