## 1. INTRODUCTION

\*\*\*\*\*

I first started playing this game not long after it came out, and I was immediately hooked. This NES puzzle game enraptured me, until I got stuck on one of the levels. Frustrated, I quit playing. The game was gradually forgotten as other gaming systems came out, but the acquisition of an NES emulator resurfaced its memory. I started playing Puzznic again, but once again I got stuck. I tried looking on the internet for solutions, but this yielded no results. Finally, I was able to figure out the solution on my own, and I was able to at last beat the entire game.

I am writing this FAQ mainly because I wasn't able to find a complete guide with solutions to all the levels in Puzznic, and I thought there ought to be one. This is for everyone out there who loves this game!

Note: This guide will only cover the Puzznic aspect of the game and not Gravnic. If you want help with Gravnic, there is an excellent walkthrough at GameFAQS.

## 2. VERSION HISTORY

\*\*\*\*\*

Version 1.2 8/17/06

Fixed errors in the solution for level 15-7 and added some clarifications in the solutions for level 15-5 and 16-6. Also fixed a couple small formatting errors.

Version 1.1 3/19/06

Fixed some errors in the solution for level 11-5 and gave credit to the person who pointed out the errors. Also changed my last name to my married name (from Cook to Johnson).

Version 1.0 2/27/04

Added the level solutions for 11-10, 13-10, 15-6, and 15-8. This is now finally a complete walkthrough. Also added a couple more people to the credits section.

Version 0.99 2/15/04

Added all the rest of the level solutions except for levels 11-10, 13-10, 15-6, and 15-8. Also fixed some spelling errors.

Version 0.9 2/17/04

Added level solutions for levels 9-1 through 11-8. Also fixed formatting and a few grammatical errors.

Version 0.8 2/2/04

Added level solutions for levels 7-1 through 8-10. Also added Neoseeker to list of web sites that can post this guide.

Version 0.7 1/21/04 Initial Release

Contains gameplay and controls information, all level maps and passwords, and has level solutions up to Level 6-10 completed.

### 3. GAMEPLAY/CONTROLS

\*\*\*\*\*

Each level in Puzznic starts with a bunch of different blocks arranged in a level, and the object is to get rid of all the blocks in order to go on to the next level. The blocks will disappear when they touch another block of the same type, either side by side or one on top of the other.

#### Controls:

Directional Pad - move the cursor or a block (Note: blocks cannot be moved up since gravity is simulated)

A - hold down to select and move a block

B - same as A

Start - pause and unpause the game; also use to retry or get passwords

Select - selects an option at the beginning of the game (Puzznic, Gravnic, or Password)

#### Game Screen:

Score: Increases by 100 for clearing blocks two at a time, 200 for clearing blocks three at a time, 1000 for clearing a level, and 50 for each second that is left on the time. Bonus points are also awarded for clearing multiple groups of blocks with just one move or at the same time. The score is reset if all retries are used up or if time runs out.

Level: The levels start at 1-1 and goes up to 1-10, then goes to 2-1 up to 2-10 and so on all the way up to 16-10, making 160 levels in all.

Time: If time runs out, the level restarts with reset score, time, and retries. As the levels get harder, the time increases. When the time gets down to 30 seconds, it will change to orange and the music changes. When it gets down to 10 seconds, the time starts to flash and the game cannot be paused.

Retry: You start out with 2 retries. If you wish to start over on a level, push Start, then select "Yes" with the A or B button. If you have no retries left, it will ask "Give up" instead of "Retry". Choosing yes will begin a countdown; push start to retry the level with a reset score, or let the time run out to be game over. (Note: The countdown will also automatically begin if you have no retries left and it becomes impossible to clear the level, i.e. there is only one block left a certain type of block.)

Beneath the retries is a list of all the different types of blocks on the level and the amount of each. It really helps to look at this list for odd numbers of blocks, because those are usually the trickiest to clear since you can't just do them all by twos.

The right part of the screen is the level where the game is played. The cursor cannot be moved outside of the grey walls of the level.

#### 4. LEVEL WALKTHROUGHS

\*\*\*\*\*

I have come up with names for each of the different blocks in order to tell them apart. I will be referring to them throughout this walkthrough as follows:

- emerald: the block with a light green square or rectangle
- grey: the block that is split up into four small, grey squares
- blue: the dark blue block that sort of has a circle in the middle
- plus: the block with a red (or pink) plus sign
- X: the block with a grey X
- circle: the block with a dark green circle
- diamond: the block with a light blue diamond
- triangle: the block with a red (or pink) triangle or pyramid

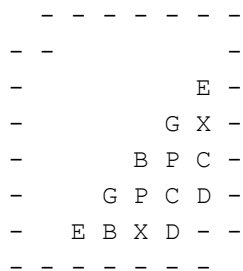

The walkthroughs for the levels will be in this order: the level number, its password, and the time limit; a map of the level (the key for the map is below) and the amounts of each type of block; and a step-by-step solution for the level. For many of the levels there are multiple solutions, but I will provide only one solution for each one. I have tried to find the best and easiest solution for each level, but if you come up with a better solution, please email it to me. (Refer to Section 6 for my email address.) Also, if you just want the passwords and not the solutions, go to Section 5.

Note: In the solutions, when I use the word "clear" (such as "clear the blues") it means to move those blocks together in any way so that they touch and disappear.

Key for the level maps:

- E emerald - wall
- G grey ~ horizontal moving block
- B blue | vertical moving block
- P plus
- X X
- C circle
- D diamond
- T triangle

Drop the higher grey down to the right, then move it all the way left to clear the greys.  
Drop the rightmost diamond down to the right.  
Drop the highest X off to the right to clear all three.  
Drop the highest diamond down to the right and clear it with the rightmost

diamond.

Move the leftmost circle one space to the left--will clear the diamonds--then quickly move it back to the right so that all three circles clear.

Clear the highest emerald with the emerald on the moving block.  
Move the leftmost lowest grey one space to the right.  
Drop the highest blue down to the right underneath the moving block. (It will most likely go on to the moving block when you move it to the right instead of dropping down, so if it does just drop it off to the left when the moving block is all the way to the right.)  
Move the highest grey onto the moving block, then drop it off to the right to clear three of the greys.  
Clear all three emeralds.  
Drop the lowest blue down to the right.  
Drop the rightmost blue down to the left.  
Move the leftmost blue over to clear all three blues.  
clear the greys.

## 6. CONTACT ME

\*\*\*\*\*

If you find a better solution (i.e. takes less time or less steps, etc.) for one of the levels that I have posted so far, please email it to me. If I decide that it's better than my solution, I will post it and you will be given credit for it.

Also, this is my first time writing an FAQ and I would appreciate any feedback. If you have any comments or suggestions for this FAQ, feel free to email them to me.

My email is [fouressentia@yahoo.com](mailto:fouressentia@yahoo.com).

## 7. CREDITS

\*\*\*\*\*

Thanks to:

Taito, for making this game.

Nintendo, for creating the NES.

The makers of NESTen, the first emulator I found that would play a Puzznic ROM.

The Old Computer Dot Com, my source for NES ROMs.

My parents, for first buying this game and getting me addicted to it.

My roommate, for putting up with me while I worked on this.

My brother, for finding alternate solutions to some of the levels.

Brian Beard, for pointing out an error in the solution for level 11-5.
