on March, 26th 2000. Last Updated: Version 3.0 4/26/00

WHATS NEW:

Version 0.5 3/26/00- Just a level walkthrough for now. Expect a little more in the future.

Version 1.0 4/05/00- Added an introduction section and checked some spelling.

Version 1.5 4/07/00- Added some more codes/tricks from cheatplanet.com

Version 2.0 4/19/00- Whoa, been a while hasn't it? Have been busy with other things and other games. What have I been playing? Well I don't own a Dreamcast but I got a chance to play Dead or Alive 2 and that game rocks. Have also been playing WWF WrestleMania 2000 on the 64. Kind of getting tired of WWF SmackDown on the Playstation. Also have been watching a lot of wrestling lately. Ok, enough of that and lets get to the updates. Added a new Frequently Asked Questions section. Also updated the codes and added some other stuff.

Version 2.5 4/24/00- Added some more Frequently Asked Questions. Added a couple of codes. And I finally spell-checked the guide!

Version 3.0 4/26/00- Whoa, the first recent update in quite sometime. Just another pretty small update. Added a brand new Menus section and a few Frequently Asked Questions. Oh yeah, I have a challenge to everyone who has beaten the game. Try beating Level 8 on the Elite Difficulty Setting. Pretty frustrating, isn't it?

- (1.) INTRODUCTION

The PC hit has just hit home consoles. If you haven't played this game, I highly encourage you to do so!

This is a FAQ/Walkthrough on Tom Clancy's Rainbow Six for The N64 only. If you are going to buy/rent this game make it the Nintendo 64 Version because the N64 has the best controls for this game out of all of them. This FAQ may only be reproduced electronically. If you are going to reproduce this FAQ then please e-mail me first! Here are the controls for the game:

Controls:

(Note: You can change these.)

Move Forward: C Up

Move Backwards: C Down

Turn Right: C Right

Turn Left: C Left

Aim Gun: Move Controller Stick

Change Magazine: L

Run: R

Night Vision: Press Left on the D-Pad.

Shoot/Fire: Z Button

Climb: Go up to a ladder or something and press Up

Open Doors: Press Up at a door

Picking Locks: Press Up at a door and hold Up until the meter is complete and the door opens.

Run: Well I edited this control to R. Don't remember what it was originally.

If I missed anything then just e-mail me at toocoolandrikishi@hotmail.com

(2.) Menus

What are menus?

Menus are the options you have when you first load the game.

Briefing:

You will get to find out the story of the level (why you are there, why are you doing what you're doing) from 3 different agents. You will also get Mission Objectives.

Intel:

Just tells you info. Don't know much about this, I only used it once.

Roster:

Which 4 agents you want on your Squad. Opens up a big list of agents to choose from.

Kit:

What you are equipped with. You can choose from a very wide array of body armor. And I mean wide array! Choose your body armor that best camouflages you in that level.

Desert: Wear desert attire (sandy brownish color)

Jungle: Wear green attire.

Building: Dress like a S.W.A.T. Team Member.

You also can equip which weapons you want to use. You have 4 boxes to choose from.

Team:

You choose what team you want your 4 agents on.

Planning:

You plan the mission. Where the CPU will go. Where the terrorists are. I never really found this very useful. Just got me lost the first time I used it.

Execute:

Start Mission. You have to choose the difficulty setting and number of players. Then start mission.

(3.) WALKTHROUGH

Just a word I have to translate just in case you don't get what it means.
SAFETY=START

Level 1 (MO1)

You start off in the jungle. Keep following the trail until it ends. Kill all the bad guys. Then keep going till you get to the house. Go up the stairs and open the door. Kill the bad guy if he is there. Then go up the stairs. You are now on the second floor. Take a right and kill the bad guy. Then keep going till you get to the hostage room. Then kill the enemy and escort the hostage safely back to the starting point.

Level 2 (Mo2)

First start off by going through the front door. Then kill all the enemies in the room. Now go up the stairs to the left side of the lobby. Open the cell and kill the enemy that is patrolling. Kill all the enemies in here. Watch out, there could be one underneath you. There will be a door that this room leads too. Go through it and be careful. Hide behind the wall and carefully kill the terrorist and escort the hostage to safety.

Level 3 (Mo3)

Follow the trail and head into the house. Open the first door to your left then open the door to your right and down the stairs till you reach the basement. Kill all the enemies and rescue the workers to safety.

Level 4 (Mo4)

This level is pretty confusing because it has about a million doors. First go through the door you are facing. Then open the next. Now make a right and keep going till you come to the stairs. Walk up them and you should be in a room with blue carpet. Just keep going and take a right and open the big room up and kill the terrorists and escort the hostages to safety.

Level 5 (Mo5)

First you must open the first door to the left. Make a right and open the door to your left. You should be in the shallow water. Rescue the hostages and escort them to safety.

Level 6 (MO6)

This level is pretty hard. Do not go through any of the cabins yet. Head toward the jeep kill all the enemies that are escaping and protecting it. Then go into one of the cabins and look for a guy on his knees. Kill him and you beat the level.

Level 7 (M07)

Go through the gray door. Open it and keep going till you get to the stairs. Keep going up the flights of stairs till you get to the top. Then go up the stairs and kill every single terrorist you see and rescue the hostages.

Level 8 (Mo8)

This is the hardest level in the game. You start off on the roof. JUST KILL ALL YOUR PARTNERS because they will screw up your mission. First go through the door that is facing sideways. Go down the ladder and turn around. If there is an enemy there fire your whole magazine at it. Shoot any wall that has a red guy near it. Kill the enemy without him spotting you and dash through the door behind the desk. Close the door and shut down the security system. Then proceed to the room with blue carpet. Scan the area for enemies. After that go up the stairs, keep going and do not enter the hallway facing you. Head south and open the big door that leads into the office. Head to the computer and download all the files. After that head back to the start.

Level 9 (MO9)

This level is a piece of cake. First go up to the road and wait for the cars/trucks to come by. Kill all the enemies and escort the hostage. Take the hostage back to the start and leave him with your other two guys. Now keep following the road and kill all the enemies you see until you complete the level.

Level 10 (MO10)

First go up the ladder. Take a left and follow the narrow path. Kill all the enemies and enter the building on the left. Inside kill all the enemies and escort the hostages back to the start.

Level 11 (M011)

This level is kind of hard because it is so huge. First go through the tunnel that you are facing when you start the level. Go up the flights of stairs and open the door. Kill all the enemies and go through the room with pillars. Go to the room on the right with a wet floor sign. Keep going

till you get into the cage. Open the door inside it and disarm the security system. Then go through the door in the middle of the room that sticks out of the floor. Then disarm the bomb.

Level 12 (Mo12)

This level is the 2nd hardest level in the game. There are about a million enemies in this level. First go through the door you are able to go through. Just keep walking around the room until you get to the same shaped door you already went to. Kill every single enemy you see. then take a right and go up the stairs. Then go through the door and then go up another set of stairs. Just keep moving till you get to a big room in the center. Keep on moving and go down the orange and yellow ramp. Open the door with 2 lights above it. Now you are in the lab. Keep walking till you get in to the room with the guy in it. You will be automatically directed there so just wait about 30 seconds.

Congratulations you have just completed Rainbow Six.

Get a FlameThrower:

Go to KIT and hold L + R + A + B and press c-up, c-down, c-left, c-right, c-up, c-left. You should hear a flame sound and there should be a flame thrower in the secondary weapons list

Make Operatives Dance:

This code is really obvious. All you have to do is repeatedly push up, then down on the control stick while pushing C up.(Or down.)

Inside the wall glitch:

In level 4: Eagle Watch there is a glitch that will let you get inside the walls. You start the level and go into the other big room and go into the blue hallway and go straight until you reach the gold hallway and take a right on the first right in the gold hallway next go straight and take the first left and stop take a look at the wall to your left now walk right into it. YOUR ARE NOW INSIDE THE WALLS

Flashbangs will not affect you:

This trick works in every level. Before entering a room where there are terrorists read these steps carefully, TURN NIGHT VISION ON, THROW FLASH BANG INTO ROOM, QUICKLY SWITCH TO YOUR PRIMARY WEAPON, ENTER ROOM AND KILL ALL TERRORIST. This trick is affective and takes no skill to master it.

The Following Cheats come from n64cc.com

Boom Box in M04 Eagle Watch

By: NetSparc@aol.com

To find a boom box throwing out tunes in Rainbow Six choose M04 Eagle Watch. Then, as soon as you start, go strait until you come to a corner. Go around the corner to the right, but keep going the same direction until you come to a wall. The room is through the door to your left. Go in, and at the desk there are two computers and in the center there's a boom box (you should hear the music). How do I turn off the music you ask? Simply place a well aimed shot at the thing and it brings sense to why the call it a Boom Box

M08 Deep Magic Glitch

By: Mike Rossini (Dr21487@aol.com)

First, start on M08 using the two player mode. Stay on the roof and either you or your friend has to walk to any side of the helicopter pad where the drop-off is. Do not fall off yet. Now face your friend and fall off backwards, but at the same time have your friend shoot you in one of your

legs. If done correctly you should fall through the building and land on something. This glitch works better in different spots so move around and do the trick more than once.

(5.) Frequently Asked Questions

This is a Frequently asked Questions section about the toughest and most confusing parts of the game.

Q: There is no screen to type a password in? What do I do?

A: By far the most confusing part of the game. It was made so complicated. There is no password section or nothing! Ok, first take out your Controller Pak (memory card). Then go to Quick Start. It may sound easy but it is not!

Q: How do I run?

A: Edit your controls to R or look it up.

Q: I want to stop having a team member escorting me around, how do I make he/she stop following me without killing him/her?

A: This is kind of complicated to explain. At that screen there should be 4 agents divided up in to two teams, (Gold, Red, Green, AND Blue.) Two of those teams will have two agents in them. First click on two of the agents on one of those two teams and move them to an unoccupied team. Now no one will follow you around!

Q: How do I escort a hostage.

A: Believe it or not this took me a while to figure out. Simply hit start and change your mode to escort. The hostages will come straight toward you and will follow you around.

Q: How do I move?

A: Uh, just hit the C Buttons. Shouldn't take long to figure out!

Q: Should I buy or rent this game?

A: If you have the money buy it. If you don't just rent it.

Q: I致e completed the game, I there anything left to do now?

A: You can look for glitches in the game. Try beating it on the Veteran and Elite Difficulty Settings. Not so easy now, is it?

Q: Is this game hard?

A: Depends on the difficulty setting. Level 8 is hard, no matter what difficulty setting you have it set on.

Recruit: One word: Simple

Veteran: Not a big difference from the Recruit difficulty setting. Just a little harder.

Elite: You'll see the big difference that this has from the other two as soon as you play level one. Try beating level 8 with this difficulty.

Well that'll do it for this section for now but I will continue to update this section in future updates!
