

four Realms, and you are the only ones who can help...

+=====> 3. Controls <====#+

Here is the standard control:

A - Attack
B - Magic
Z - Turbo
R - Use
C^ - List Up
C\ - List Down
C> - Item Right
C< - Item Left

You can always edit the controlls. Just go to the options menu, then click on controller configuration. Once there, use the controller you want to edit. There are two recommended configurations; Standard (See above), or crossbow (Switches the Z button with the A button). You'll eventually see a title called costum. Click on it to edit the controlls with the controller stick.

+=====> 4. Items <====#+

This section tells you all the items you'll find (If your good enough) throughout the game.

---THE ORDINARY ITEMS---

| Item Name | Gold/Seconds | What it does | rateing |
|-----------------|--------------|---|---------|
| Small Key | 100/1 | Opens doors | 2 |
| ----- | | | |
| Poition | 400/1 | Use it for a barrier(Z+B), a magical circle (B), or you can throw it (>+B). | 7 |
| ----- | | | |
| 3-way shot | 600/30 | Shoot 3 ways | |
| ----- | | | |
| 5-way shot | 1250/30 | Shoot 5 ways | 9 |
| ----- | | | |
| Speed Boost | 500/20 | Go super fast | 2 |
| ----- | | | |
| Levitate | 800/30 | Levitate over traps ? | |
| ----- | | | |
| Reflect Shot | 600/20 | Reflect your shot | 3 |
| ----- | | | |
| Reflect Sheild | 100/10 | Reflect enemys shots | 6 |
| ----- | | | |
| Rapid Fire | 800/40 | Shoot rapidly | 1 |
| ----- | | | |
| Fire Sheild | 1250/10 | A powerful sheild | 10 |
| ----- | | | |
| Electric Sheild | 1250/10 | A powerful sheild | 10 |
| ----- | | | |
| Fire Amulet | 500/30 | Makes your weapon Fire | 1 |
| ----- | | | |

Electric Amulet 500/30 Makes your weapon Electric 1

Acid Amulet 500/3 Makes your weapon acid 1

Light Amulet 500/30 Makes your weapon light 1

Fire Breath 600/5 You can spit out fire 8

Electric Breat 600/5 You can spit out electricity 8

Acid Breath 600/5 You can spit out acid 8

Super Shot 1000/5 The ultimate shooter 8

Timestop 1250/15 Stops time 10

Ivinsibility 1000/30 Makes you invisible 5

Pheonix 800/30 A bird helps by throwing 8
fireballs with you

Player Growth 750/25 You start getting bigger 7

Shrink Enemies 100/30 Shrink the enemies 9

Thunder Hammer 1500/3 Kills all enemies that 10

---UPGRADES---

| Item Name | gold | # of points |
|-----------|------|-------------|
| Health | 1000 | 100 |
| Strength | 800 | 5 |
| Speed | 800 | 5 |
| Magic | 800 | 5 |
| Armour | 800 | 5 |

---RARE ITEMS---

| Item Name | How to get it | Whats it for |
|-----------|-------------------|----------------------|
| Obelisk | Find it in levels | To access new worlds |

| | | |
|------------|-------------------|--|
| Rune Stone | Find it in levels | To teleport to the final Skorne battle |
|------------|-------------------|--|

| | | |
|-------|-------------|-------------------------|
| Shard | Beat bosses | To access the cathedral |
|-------|-------------|-------------------------|

---OTHER ITEMS---

| Item Name | What it does | Comment |
|-----------------|--|---------|
| Invulnerability | This item is hard to find, so you would be lucky if you get one. | |

| | | |
|-----------------|------------------|--------------------------------------|
| Circle of light | Deaths runs away | Get this item after you beat Skorne. |
|-----------------|------------------|--------------------------------------|

HHHHhhmmmm.....looks like items are missing....
Maybe you can help me by e-mailing me and telling me.
Also, sorry if it's hard to read.

+=====> 5. Characters <====#+

This section tells you about all the characters in the whole game and also tells about them.

---The Heros---

| Character | Strength | Speed | Magic | Spl Att. | |
|-----------|-------------------|-------|-------|----------|-------------------------|
| Archer | 100 | 140 | 100 | 80 | B.F.G. |
| Valkyrie | 120 | 130 | 100 | 130 | Sky Lark |
| Wizard | 80 | 120 | 160 | 90 | Rock Shower/Demon Skull |
| Warrior | 150 | 115 | 90 | 120 | Plasma Trail |
| Minotaur | - Same as Warrior | | | | |
| Falconess | - Valkyrie | | | | |
| Jackal | - Same as Wizard | | | | |
| Tigress | - Same as Archer | | | | |
| Sumner | - Same as Wizard | | | | |

+=====> 6. World Guide <====#+

This section shows how to access new worlds.

Well you start off with mountain, right? So you would probably be very bored with one world open and besides you need all the worlds to complete the game. OK now, below is the order you get them at (if your playing 1 - player) and just how to get them. Got it?

VALKRIE'S CASTLE - Get this one after you get all three obelisk at the Mountain world

Obelisk 1: Right when you start the Valley of Fire level, go across the bridge. Go to a right and but not up the stairs. Now you should see a switch; push it and a small platform with the obelisk come up.

Obelisk 2: In the Dagger Peak level just keep takeing the high route and you'll eventually find it next to a huge statue.

Obelisk 3: In the Cliffs of Desolation, all you have hear is take the high route when you start. Go to the locked door to the right. Now open it and you should see an Obelisk to the left of the generator.

TOWN - To get this one you also have to get 2 obelisk except they this time, have to be in the Castle World.

Obelisk 1: Somewhere near the end you'll see a branched bridge. Don't cross it just yet. Go back up the stairs and look to the right if you can (you can't see the wall because the camera veiw here is bad). You may see a cracked wall. If not just keep whacking at the wall and you'll eventually discover a hidden switch. Now, push it, and then cross the bridge. You'll come along a

2. Once opened, run to the down route and hit the big rock.
3. Hit the switch and go to the high route, pick up the key and go to the left.
4. Now go to your left, and go up.
5. Now, go to the door you opened with the switch, and go open the key door to you right.
6. Keep going up until you see a Golem resting.
7. Quickly sneak past and go take the path thats leading down.

-----Rune Stone

8. It will eventually lead up and then back down, so just keep sticking to the up routes and you will find a portal

Rune Stone: You'll see a white thing in the wall. Hit it, and it will reveal a Rune Stone.

Level 3: The Cliff of Desolation

1. Grab the key and take the down route twice.
2. Open the locked door to your left, and hit the switch.
3. Go past the door you just opened, and go along the bridge.
4. Take the low route and whack at the wall below the scroll.
5. Hit the switch and go past the door you just opened un till you get to the switch by the bridge.
6. Hit it and cross the bridge.
7. Just keep going and you should get to the portal.

---Bonus Stage

Bonus Stage: Just go to your left of the portal. Collect 15 coins to get the Minotaur (See characters).

Level 4: The Lost Caves

1. Hit the rock wall somewhere in the level.
2. go up, and push the switch.
3. Go up at the spot you whacked the rock at to find yet, another switched
4. Now, go down, right, up, right, up wich is the door you just opened.
5. Go take the path to the right, and just keep going, untill you get the switch at the end.-----Rune Stone
6. Now, from here go to where the arrow points and you'll find the portal.

Rune Stone: You'll probably step on the switch along your way to the switch you really need. Well then, after you push the switch go around to the other side and snatch it.

Level 5: Volcanic Cavern

The enemys make this one hard but theres mostly just one

way so all I'll be talking about on this one is how to get Rasha's Scimitar, and how to get the Rune Stone.

Rasha's Scimitar: Search this whole level for hidden walls. There are 2 hidden walls, and each contains a switch. Once you've got both of the hidden switches you know you know you got the right switch (If you know what I mean). Now, whack every barrel you see untill you see one with a switch under it. Push it, and a platform will come up. It's like an elevator except there will be know problems with it like getting stuck. Now, just cross and you've got the Scimitar.

Rune Stone: Once you've found both of the hidden switches you know the bridge is up for you to get it. It's nearby one of the switches, and it's not as hard as other levels too.

Level 6: The Dragons Lair (Boss)

He'll start of by throwing fireballs, so move fast. Try hiding behind the rock in the middle. Once, after he starts blowing out fire (NOT FIREBALLS) attack him. It would be a good idea if you have 3-way shot with you or 5-way. Oh yeah, make sure it's from a distance though because if you attack him close up even though it will hurt him more, but it will really hurt you even more!

Ice Axe: If you didn't already get this get it before you face him. It's in the castle treasurey. What this will do for you is freeze the dragon for a limited time, so don't waste time and this is your chance you can attack him up close, but you can see when he starts getting unfrozen so get ready to run!

VALKYRIES CASTLE

```
/\__      /\//\//\//\//\//\//\
{|_|_|  ^  ___^
  //      | 0  0|
  //   /\-----/\
//
```

Level 1: The Castle Courtyard

1. Start by going forward and hitting the switch.
 2. Go up into the corner for a switch.
 3. Go down past the door you opened for a key (Oh, and try to find all the keys you can for later on in this level) and then open the door.
- Rune Stone
4. Keep going untill you see a wall blocking the stairs.
 5. Whack the wall, and go up the steps.
 6. Go forward and you'll see a switch
 7. Push it and run to the nearby sand mound.
 8. Whack it, and push the switch that was under it.
 9. Push it and run past the door you just opened.
 10. Open the lock door, and hit the switch.
 11. Go down the stairs and keep going around untill you see a switch wich should be hidden, and wich should be by a generator.

----- Multi Tip

12. Cross the nearby bridge you got by pushing the switch, and push this switch.
13. Now go up the stairs from where you are, and then go to the door that you just opened when you pushed the switch.
14. There are several lock doors in this area with switches inside, so just make sure you have enough keys to keep opening doors.
15. After all that's done you'll come to the portal.

Multi-player Tip: One player here, can stand on on switch while the other can cross and hold the switch for the other person so they can too, cross. Now go down and get the switch by the generator.

Rune stone: This one's not too hard. Try to find a way to go on the pile of wood. Well, once on, whack that big grey wick is really a rock and you'll find a Rune Stone.

Level 2: Dungeon Of Torment

1. Go down the steps and hit the cracked wall by the spike traps. -----Rune Stone
2. push the switch and go down the next set of stairs to the left.
3. There is a hidden wall that contains a switch in the middle of the first generators you see here.
4. Push it and then run to the other switch which is at the end of this area.
5. Run to the other sets of stairs and go to the very west for another switch.
6. Go back to the other area you were just at and cross the very little bridge.
7. Push the switch underneath the Golem, and then go past the door you just opened, and up the stairs.
----- Rune Stone P2
8. Here you'll find a switch.
9. Push it and go on across this bridge.
10. Go up the steps and push the switch up there.
11. Now push the switch on the bridge.
12. Hit the wall at the end of the area to the left.
13. You'll uncover a hidden area.
14. Cross over to it and push the switch and then go up the several steps and there will be a portal.

Rune Stone: Now you can see if you look very closely; a Rune Stone. The problem is; You've got to somehow open the gate, and to do that you have to find a switch right? Rune Stone Part 2: The switch is up from this switch in that barrel. Push it, and then cross the first bridge you saw when you started this level. Now run to the rune, and it's yours!

Level 3: Castle Armory

1. Grab the key and open the locked door.
2. Hit the switch, and then hit the other switch that's

in the room that you were just in.

3. Make your way down the stairs, then to the other side (little to the right at the bottom of where you started.)
4. There is a hidden wall to the east of you; break it and push the switch.
5. Go south from where the switch is pointing down.
6. Go NE (North East) from the down arrow.
7. Hit the switch and go down the nearby stairs.
8. Search the walls for a hidden switch.

-----Rune Stone

9. Push the other (unhidden) switch.
10. Now go up the stairs and just keep going and you'll eventually reach the portal.

Rune Stone: This is the switch to activate the Rune Stone. Once pushed, go to where you start and there is a Rune Stone.

Level 4: Castle Treasury

1. Hit the cracked wall and push the switch.
2. Go past the door you just open and hit the black dents for switches.
3. Go up the stairs that don't curve and then go right, down, right and hit the cracked wall for a switch.
4. Push it, and go to your left for another switch.
5. Look for a teleporter; Once found, go through all of them until you are at the throne room.
6. Go on top of the chair for another switch.
7. Go down the stairs and up the stairs.
8. You'll see the Ice Axe -----Ice Axe
9. This room isn't that important though so go to the other room and destroy stuff and you might find switches.
10. Keep going up the steps and you'll find a portal

-----Bonus Stage

Ice Axe: Yep, this is a very valuable treasury. Start with the right side, and then the left. What I mean is get the switches on the right and then left and then go up and make the elevator go down to get that switch, and rip the wall in front of you for four switches! You just unlocked 7 more switches around the axe (This proves sevens a lucky number). Now, go destroy all the barrels in the room you haven't visited; there's a switch under one of them that brings down the ICE AXE!!!

Bonus Stage: Don't go up all the steps yet. First just go up 1 set of stairs and go to your right. Collect 50 coins on this one to get Falconess. (see characters)

Level 5: Chimera's Keep (boss)

Don't go to close, and not in the middle of the boss. Just attack 1 at a time and it will be much easier. Oh, and it will help if you have 3-way shot or 5. It helps on all bosses.

Rasha's Scimitar: You should have this before you fight

this creep. It is in the level called the Volcanic Cavern wich is in the world called Warriors Mountain. Well, on the other hand if you have it this will help you by chopping off the lion head wich is in the middle, and it will kill him for good. The rest is up to you.

World 3: Town

```
      +
     / | | | \
```

Level 1: Poisonous Fields

1. Go NE from where you started.
2. Just keep going forward untill you reach some kind of farm house.
3. Well, anyways, search for a door and whack it for a switch.
4. Push it, and then go SW and you'll come upon a some sort of walkway foing down in the water.
5. Go across, push the switch, go back, and rush through the bushes (make sure you grab at least one key along the way) on the left side.
6. You'll see a key door.
7. Open it and stop on the bridge when you go half way.
8. There is a hidden area to your right.
9. hit it, go down the elevator, and push the switch.
10. Go back up and proceed through the door on the bridge that you just opened.
11. Go North, and as you go north stick to the very left and you'll see the portal.-----Bonus Stage

Bonus Stage: As you go left you might as well see a hill. Go up and you'll see a switch. Push it and now go where the switch points and you'll find the bonus. After you collect 50 coins in this one you'll unlock Tigress.

Level 2: The Cemetery

1. Hit the switch in the gate in the middle of the top part of the gate.
 2. Keep going ontill you see a tomb to the south.
 3. Whack the door open, hit the switch, and proceed to the door to the north.
 4. Just stick to the north, and you'll come upon a high platform with the item "Timestop" on it.
 5. Hit the barrel north from it and push the switch.
- Rune Stone
6. Now keep going and you'll come to this place with several gates.
 7. Go in these orders; south, west, north, and east.
 8. You probably land on a bridge.
 9. Well, go across the bridge, open the door, push the switch, and go to the door you just opened.
 10. Keep going and you'll reach the portal.

Rune Stone: Now go and hit all the small tombs and there will be one with a switch in it that wil bring down the Timestop item. Get it and you'll push a switch as you get it. Go to the first tomb to the left. It contains a

Rune Stone.

Level 3: The Spire

1.

Rune Stone:

MORE COMING SOON.....

+=====> 8. Codes, Tips, and Tricks <====+

Codes

1. Infinity "Timestop" or "Shrink enemys

I figured this code out by accident. First go to a boss. When your ready to die use the item before it runs out right when you die. Select continue, and go to a level and there will be either know enemys (If you used timestop) or the enemys are all small (If you used shrink enemys). This helps a lot if your not good at this game or if you just want to beat it badly. To stop the code just use your item untill it gets to zero or get more of that item.

2. Weird Name

Put your name as either Skorne or Sumner. If you done this correct you'll here a scream. Now, push B and you'll have a weird name. The reason it's weird is because it has a *.)# when you can't have that in your name. You can also try to make it a more weirder name by flipping through the letters. There are those letters again.

NOTE: If you flip to far or it will turn back into the regular letters.

Tricks

1. Ilusions

To do this trick just use a whole bunch of items at the same time (make sure yor useing the thunder hammer, the super shot, or both) and then un-equip all of them. You'll still have a thunder hammer or super shot in your hand, but you'll attack regularly. I also found this code out all by myslef.

2. Forget Rapid Fire

All you have to do to use rapid fire but really not is attack an enemy without pushing any buttons but the controller stick. While your attacking, hold Z and you'll attack rapidly but some things wont get affected.

3. CHEAP TRICK!!!!

Do the timestop code, and go to the level - Valley Of Fire wich is in Mountain. What is that you want; health, money, or items. Grab everything there is. Now, sell all the items you've got and keep reapeing this. You'll end up with probably your maximum number of health, and a wacky number of gold. Now you can buy whatever you want, you can also keep up with your experience by

buying upgrades.

Tips

- Scrolls sometimes give good advice
- Bosses are more easier when you use the ledgendary weapons
- Sell amulets, and other weak items for upgrades (This is very helpful)
- Upgrade your weapons by gaining to levels 10, 25, 50, 75, and 99
- Get 50 coins in bonus stages to get secret characters
