Introduction

Pika-pika, Bulba. Saur!, Char! and Hi! Whatever the language....where'd that come from?Well this is my Pokemon Snap strategy guide. I hope this will help you beat or finish the game....Uh....bye?

Levels:

1. Tunnel

Pokemon in this level:

1. Pidgey
2. Doduo
3. Pikachu
4. Butterfree
5. Lapras
6. Snorlax
7. Meowth
8. Magikarp
9. Eevee
10. Chansey
11. Kangaskahn
12. Scyther

What to do:

As soon as you start, three Pidgeys fly at you. Snap their pics...try to get all three in the pic for more points.

After the Pidgeys fly-by, you'll see a Doduo run past quickly....snap it's pic.

Next up is Pikachu. If you have the poke-flute use it to see Pika do an electric attack. Lure it to the surfboard in the middle of the level for many points.

Then up comes Butterfree above a patch of flowers.

After Butterfree look to the ocean for a Lapras...make sure you take the pic or no more will come up in the rest of the beach.

Hit the Snorlax who comes up next with a pester ball and it will raise it's head but with the flute it will stand up and dance. Snap, snap, snap.

Then snap the Meowth and turn to the water for another Lapras.

Hit the next Meowth with pester balls untill it falls so you will stop. Turn to the grass and throw a pester ball where you see grass thrashing upwards. A Scyther will come out. Snap it. If you get the Scyther, two Pikachu will run to tree stumps past the Scyther. Play the flute and take a pic when they do an attack for major points.

Don't miss the Magikarp on the left of the bridge.

Snap the Doduo and get another Scyther from the grass on the left.

Also the Meowth and Pidgey...get them too.

Hit the puff the Eevee is chasing to reveal a Chansey.

On the right down the road is a Kangaskahn. Throw food or a pester ball at it for it to turn around.

Next is the Pidgeys attacking Meowth. Snap that and then hit the Pidgeys with food or balls to get a good pic of Meowth...He dancing.

Get the Magikarp in the lake and you can leave.

Take a pic of the Pikachu. It will toddle a short distance. Snap again and it'll jump on the nearest Electrode for many points.

Next....snap the Electabuzz.

Blow up the next Electrode with a food and Kakuna will fall from the ceiling. A Zubat will fly at you from around the bend. Snap it.

If you have the flute play it for the Pikachu. He'll jump around and shock an egg. A Zapdos will hatch from it.

The purple orbs are Haunters. They'll show up on film.

Another Magikarp is in the lake.

Snap the Diglett. It'll burrow into the ground. Follow the Pikachu and snap the Diglett again. It'll burrow again. Follow the Pika again and snap the Diglett one more time. Next time a Dugtrio will come up. Snap it and another Dugtrio. Snap it one more time and you'll have a Dugtrio trio.

Snap the Electabuzzes

Bomb the Electrode so you can go to the secret entrance to the Volcano.

Pokemon in this level:

What to do:

First to get to this level you need to find the professor's secret cove in the Valley.

When you see the Squirtle in the Valley, hit it with a pester ball.

If you line it up correctly, the Squirtle will hit the Mankey.

Hit the Mankey with a pester ball.

If lined up correctly, he'll fly back into a red button.

A gate will open.

There's the cove.

He'll tell you to find scenery that looks like pokemon in each level.

1. Beach: After the first Pikachu, turn to the left. The rocks make up a Kingler.

2. Tunnel: If you hatch the Zapdos he'll turn on a spotlight. When the light is pointed toward some junk, it makes a Pinsir shadow.

3. Volcano: In the beginning of the level, look at the crater that the Rapidash are circling. Throw a pester ball into it. Smoke shaped like a Koffing will rise up.

4. River: The tree above the Vileplume is shaped like a Cubone. To stop the Vileplume's poison powder, play the flute.

5. Cave: If you turned around near Weepinbell's pool, you see some glittering objects. Snap and they will turn out as Mewtwo on film.

6. Valley: The mountains on the right of the Valley are a Dugtrio.

Mew will first appear in a blue electric shell that won't let you snap it's pic. Hit the shell with an item three times.

After the third hit, He'll appear in a yellow shell. Try to hit it three more times.

After that Mew will come out of the shell. He's now open to snap pics. If you hit it with an item, he'll spin a few times and face you for a few seconds. The highest points i've got is 9,900pts.
