=*= I) Update History ----- {udh} =*=
=*=*=*=*=*=*=*=*=*=*=*=*=*=*=*=*=
4/27/2006 - Added more names to the credit list, Neoseekers and Anime
                Indepth
4/25/2006 - Updated more questions and answers to the FAQ section.
3/28/2006 - Whoops! I forgot update this part of the guide. Updated the
                link and the FAQ section.
3/23/2006 - Updated on the introduction and FAQ's.
3/15/2006 - First Version Released
_*=*=*=*=*=*=*=*=*=*=*=*=
=*= II) Introduction ---- {int} =*=
=*=*=*=*=*=*=*=*=*=*=*=
I am going to make this introduction short. The reason why I made this
guide is to help save the troubles of the experienced players from
answering the same question twenty times. I hope that the message
board, for this game, can get more legitimate question, instead of the
"lols i ned halp plz". So, I hope you enjoy this guide!
```

I would also like to say that this guide is not 100%. Please spare me the time from reading email saying, "YOU'RE WRONG ON EVERYTHING. MAKE ANOTHER FAQ NOW!" If you do find any mistakes on this, bring it up in

the message board or email it to me.

There will be updates for this guide. Do not expect the updates to be big. Unless I decide to either, add a lot of stuff or edit the look of the whole guide.

If you have any questions, be sure to ask the message. If you want to contact me for anything relating to this guide, send me an email at

```

*** Thanks goes to Spectre-123 for some content in this section ***
Before you people freak out since this game is in Japanese, I'll guide
you on how to navigate through this. It's easy to navigate, really,
since most of the options are in English. So, let's get this game
```

sang.kun@gmail.com

started!

After all of the loading, you'll get into a screen with a silhouette of a butterfly and petals falling to the bottom of the screen. There are four different options to choose from, and they are:

So, do the obvious by choosing the second option. Again, don't panic since you are seeing more Japanese than the previous screen. These are the controls to navigate through this mess.

Triangle - Switch Character Set Square - Space Circle - Select X - Erase

Start - Finish

This is what we are going to do. First, if you want to enter your name in Japanese, you otaku you, just enter the name you want in hiragana, which the first set. If you hit the triangle once, you'll end up in the katakana section. If you want to enter your name in English, hit the triangle button twice. The English section also has the Kanji (Chinese characters), so if you want to use them, go right ahead. If you wondering what the right three kanji's in the right of the screen, they are as follows (top to bottom):

- -Space
- -Delete Character
- -Finish

After you are done with everything, hit start and circle to accept. Then a menu will come up to confirm the name that you want. Choose the left choice to say yes.

After you have done that, just sit back and watch the two mini introductions.

When you are finish with the introduction, you'll be in the main screen with the silhouette of the butterfly and the petals falling. *Author's note: I love the music for this section, if anyone can tell me what it's called, I would appreciate it* Press the start button then there are two options. The GAME START allows you go to into the game. The LIMITED SITE, it's practically an useless option, just skip it.

Now you are in the main menu for this game! Go to the next sections to get the low down on what each of the options does.

In this section, I will be explaining the basics of each choices you can choose from. I'll be covering on choices from story to bonus/shop. So, I'll start with the story mode.

Story mode (the option with Orhime) is similar to other games that has it. You basically choose a character, advance through a plot by fighting certain amount of battles. I can't really add in the translation to the dialouges, not only it will take a long time, but I can't understand any of dialogue. Here are the list of characters you can use in the story mode.

Author's Note: If you beat this mode with all the characters available, you will unlock a third option for the introduction menu (the menu with the silhouette of the butterfly). Go read the FAQ page to understand this option

Free Battle (the option with Ichimaru) is basically a generic fight with an AI. You can use any characters for this mode.

Time Attack (the option with Toushiro) is what the name implies. In this mode, you try to win as many battle as possible, within the 30 minutes that give you. All characters are available in this mode.

Survival (the option with Renji) has one goal, to see how many battles you can win before you die. There isn't more to explain to make this more clear (as if it wasn't clear already). All the characters are available in this mode.

**_*_*_*_*

Gotei 13 Mode (with option with Byakuya) is probably one of the most annoying modes ever created on the face of the planet. What it is, you fight in each of in the 13 squads available (except for the first squad) and become the captain in each squad. In order to unlock the First Squad, you have to finish the other 12 squads. However, you can unlock a character by becoming captain in all squads. All characters are available in this mode.

Sounds easy, doesn't? *BZZZ* WRONG! To reach the captain in each squads, you have to fight more than (reported to be the lowest) 50 battles. That is if you get lucky, it is normal to get about 60 to 70 battles! I know what you are saying right now, "WTF I AM NOT DOING THIS!" Unless you do not want to spend a good chunk of time doing this, there is an alternative of doing this. You can enter passwords for all twelve squads. If you really want to know the password, just open the link below.

http://img70.imageshack.us/img70/2504/yoruichihax7vv7sl.jpg

(I know, aren't I nice :D)

Author's note: if you going to use this method to get the captain rank for all the squads, remember to start with squad 2 to squad 13, and then squad 1.

If you managed to enter the passwords correctly, you'll notice that couple of windows will come up. They're just messages saying that you have unlocked certain stuff (i.e. voice sets, galleries, etc.)
Author's note: It's been a while since I last saw these messages, so send me an email on what exactly you unlock There are some passwords that requires kanji, so try to figure out which one is which. If you get all these passwords entered correctly, you can get the amazing...*drum roll*...Yorichi!

Soul Mode (the option with Rukia) is the multiplayer option in this game. I haven't played it, so I don't have much to say.

VS CPU. (the option with Ichigo) is basically free battle, but with random computer battles. All characters are available in this mode.

*** A big thanks for the content in this section goes to Spectre-123 $^{+++}$

Oh boy, this section is all in Japanese. Don't worry, I got the

translation for this section.

To get the auto-save feature on, go to the save/load settings. From there, you should be able to figure it out, since they're in English. (It's the third option, left choice).

The Bonus/Shop menu (the option with Urahara) has the options to buy cards and view certain movies and galleries. You also can listen to the sound galleries in this section. Check the Bonus Stuff section for more details.

To get cards in this game, it is like getting cards from the previous version. You collect points through the Story Mode, Free Battle, Time Attack, and Survival Mode. To get the cards, you browse though the menus until you reach into the shop section (A picture with Urahara with a fan, the guy in a green suit and hat). Hit the accept button and you will go to a section with three different things to choose from.

>> Combo #27 <<

...and here is the are the explanations of these choices

Card Shop - A section where you can buy cards.

Password - A section where you can enter passwords for points. (I don't know any passwords, perhaps I can get some in the next update)

Card Gallery - A section where you can view your nifty looking cards.

As it says, go into the Card Shop. Then you will be given a set of four cards, but they have their backs facing toward you. This means that this is going to be random each time you buy one. These cards cost about 100 points, and there are 217 to collect (which means that it going to cost a lot of money, not to mention that you can get duplicates).

What's the point in collecting these cards? As you buy cards in this game, you can unlock extras. You can unlock things like sound bits, picture galleries, and even Sealed Sword Ichigo, from the previous version! (Check the Cheat Codes & Secrets to see the complete list)

```
-*-*-*-*-*-*-*-*-*-*-*-

-*- Sound -- {snd} -*-

-*-*-*-*-*-*-*-*-*-*-
```

In this section, you can listen to the sounds and voices that are in the game. Since there are a bit of a confusion about which characters are which, here is the list of names in order (assuming you are going to the right)

**_*_*_*_*_*

**_*_*_*_*_*_*_*_*_*_	
-*-Gallery {gry} -*-	

In this section, you get to view 8 different sets of picture galleries. I think there are about 20 different pictures in each sets. To navigate this section, just go left or right to view each thumbnail. Then hit the circle button to view a larger, colored image of it. You can press up and down to play around with the image. If you want to get out, just

hit X.

**_*_*_

In this section, you can view different movies that are found in this

game. Here are the list that goes in order (assuming you are hitting to right).

*** Thanks goes to abcd9416 for the information ***

In order to unlock this section, you have to collect 200 cards. So, better get those points if you want to play this mini-game.

In the single player mode, you play through 21 levels where you break the blocks to form the picture.

In the two-player mode, you and a friend play 10 different levels. To compensate for the two players, each player gets one-half of the screen to play in. The players compete to see who can clear their blocks as fast as possible.

=*= VIII) Tips ---- {tip} =*=
_*=*=*=*=*=*=*=*=*=
I don't have any real tips to give. So I'll impart to you, the reader,
my short knowledge of this game.
```

Tip #1: Yourichi and Byakuya are the only characters in the game that can easily spam with their flash steps. This is a good way to defeat your in a cheap manner.

Tip #2: Certain characters have a strain of combo's that they can unleash on enemies, without giving the enemy a chance to fight back. There was one for Rukia, which my brother does, that can easily destroy the enemy without giving opponent the chance to fight back. If my memory serves me right</Kaga>, it only really work if you can hit the enemy at the right.

Tip #3: Toushiro's circle combo is pretty beastly. You can land a good 14 hit within four strokes. So, take him into a consideration while playing this game. (He happens to be my favorite non-cheap character)

=*=*=*=*=*=*=*=*=*=*= =*= IX) FAQs -- {faq} =*= =*=*=*=*=*=*=*=*=*=

Question #1: Does this game work on an American PSP?

Answer: Yes, you can run Bleach HtS2 on an American PSP. I don't think you would have to update the firmware (if you are one of those type of guys, if you get my drift).

I'm not sure whether it can work on an European PSP. If you can answer that, just give me an email and I'll give you credit for it.

Question #2: Are there any bankai's. I want to do some badass damage!

Answer: No, there aren't any bankai's in this game. Don't ask me why there aren't any. My only guess is the fact that this game was released before they revealed the most of the bankai's in the anime. If anyone has a better explanation for this, feel free to share it with me. If it sounds logical, I'll put it in this guide and give you credit.

Question #3: Should I really get this game?

Answer: That is entirely up to you. It's a fun game to play, but (IMO) it gets pretty repetitive after a while.

However, there will be a third installment to the series. That game will come out July 20th, 2006. Apparently, this game will have 33 characters, which will include all the captains *Woot for Kenpachi!*, and different battle modes. So, if you can wait for a couple of months for the third game, go right ahead.

Question #4: How do I get Yoruichi?

Answer: You get her as a prize for completing the Gotei 13 Squad Mode. You can do it the long way by becoming the captain in each squad. In order to become captain, you have to fight an unnecessary amount of battles until you encounter the captain (Whose name should be in red text). If you don't want to do that, there is an alternative to get Yoruichi. I'll explain it in the next question.

Question #5: Okay, what's the easier way to get Yoruichi?

Answer: First you have to unlock the password page that can be found in

the menu with the two options GAME START and LIMITED SITE. *Author's note: Don't confuse this password menu with the one in the card section.* In order to unlock this option, you have to beat the story mode with all the characters in it (like I how I mentioned in the story mode). If you are confused by the kanji, don't worry, that's the right one. After you go select the option, you'll see a screen just like when you had to enter your name. Just type the passwords found in this link.

http://img70.imageshack.us/img70/2504/yoruichihax7vv7sl.jpg

Author's note: Don't forget about what I said about the passwords. If you don't remember, here it is. When you are inputting the passwords in, input the SECOND squad's pass FIRST, and then the rest. The reason is that, you need to unlock the first squad by completing the other 12 first. So, just enter the password for squads 2 to 13, and then enter the first squad's password.
