This is an Enemy Encyclopedia for Crisis Core. In other words, this is a list with all relevant information regarding the enemies you can encounter and fight in Crisis Core.

There may be errors here and there. Feel free to point them out to me. I will go over the document myself various times in the nearby future, so all I can say is I'll do my best. There just happen to be a very large amount of enemies.

Note: I could *really* use some help from someone who can read Japanese, when it comes down to enemy attacks. There is a Japanese list available, but an English List does not exist. Please contact me if you wish to help me.

Please take a minute to read this and step out of the Guide for a second. You can greatly support me and others, perhaps even for free.

I sincerely hope you will find this Guide useful. If you found it to be handy and useful, consider the possibility of sending a donation. I'm a student and.. you can probably figure the rest. I will continue to work on Game Guides, although your help is greatly appreciated. You also automatically help supporting the free online gaming community. Thank you very much.

Note: Use the Attacker's MAG, and the Defender's SPR.

||                    Status Effects Formulas                    ||  
Oo\*=-\*-=-\*-=-\*-=-\*-=-\*-=-\*-=-\*-=-\*-=-\*-=-\*-=-\*oO

Enemies can either be immune to a status, or have a status rating. In the case of a rating, a formula determines the chance for the status effect to work.

MAIN FORMULA:  
=====

Note: You get the Base Power from the Materia Section.  
Note: Some Materia have 100% chance to inflict the status, as long as the enemy isn't immune to the status. Examples are Stop, Silence, Poison.

-----  
Chance = Base Power + Attacker's LVL\*2 - (Defender's Resis. + Defender's LVL\*2)  
-----

EXAMPLE:  
-----

Zack's at Level 30, and is fighting a G Warrior. and uses Blizzard. Since this can inflict Stun, we will now check what chance this has to inflict G Warrior.

- G Warrior's Stun Rating = 100
- Blizzard Base Stun Power = 30, and Growth = 14
- Blizzard is Master Level (LVL = 5)
- Base Power = 30 + 5\*14 = 100

Chance = 100 + 30\*2 - (100 + 15\*2) = 160 - 130 = 30% Chance.

ZANTETSUKEN FORMULA:  
=====

| Defender Stagger - Attack's Stagger: | Stagger Effect Size: |
|--------------------------------------|----------------------|
| 1 or less                            | Heavy                |
| 1 - 3                                | Light                |
| 4 - 5                                | Briefly              |
| 6 or higher                          | No Effect            |

- o Interrupt = If an enemy is doing an attack, you can prevent them from doing it by attacking them. This only works if the enemy is not immune. An enemy is either immune to this, or not.
- o Float = Indicates if the enemy is aerial or not. Aerial enemies are never hit by the ground magic spell Quake.
- o Drops & Steal = The first number indicates the chance (1/8th, for example). Then the possible items are listed for both Common and Rare.
- o Locations = Self-explanatory. The locations of the enemy.
- o Attacks = Work in progress. Will currently usually list how many attacks a certain enemy has. Later on, all attacks will be listed here.

Note: I could \*really\* use some help from someone who can read Japanese, when it comes down to enemy attacks. There is a Japanese list available, but an English List does not exist. Please contact me if you wish to help me.
