You can use this guide for whatever you want. I really don't care. You don't need to email me if you want to add it in your site. I've done this for the purpose of helping others, and the only thing you need to do is recognize that.

### 3. Gameplay mechanics

=====

#### 1 - Combos

Combos are done by mixing normal attacks with strong attacks([+/\]). Note that the combos change for each character. You can see the list for each one( with a preview of the attack ) in the second option from the Pause Menu.

#### 2 - Ex Mode

After taking or doing damage the bar below your health will begin to increase. The colors will change from Blue, to Green and finally to Orange.

If you activate Ex Mode when the gauge is Blue, it will give a boost to your attacks.

If activated when Green,you will receive the boost and if you hold L+[], the character will perform his/her Ex Attack 1.

If activated when Orange,you will receive the boost and if you hold L+/\, the character will perform his/her Ex attack 2( Note that you can only do this one After reaching level 10 ).

Note that killing a Boss with the Ex Attacks will change the enemy portrait.In this one her/his clothes will be destroyed.

#### 3 - Leveling Up

Everytime you clear a chapter you will receive EXP points.They will be used for level up your character.

Keep using your Ex Attacks for boosting your score.Note that doing High Combos will help you a lot too.

The MAX level you can achieve is 30.Beyond this point,you will no longer receive EXP points.

=====

### 4. Characters

=====

I will not list the inicial characters since they are all unlocked from the start.

The characters that you can unlock are:

- Sousou Moutoku - Clear All the 3 Story Modes
- Saji Genpou - Clear Arcade Mode of one character
- Ryu Hakufu - Clear Hakufu's Arcade Mode
- Ryu Gentoku - Clear Gentoku's Arcade Mode

=====

### 5. The Game

=====

This Game is composed of 2 modes.The Story Mode, and the Arcade Mode. The Story Mode is composed of 3 teams, while in the Arcade Mode you can select the Girl/Guy you want to play.

The Story Mode have between 5 and 6 chapters. The characters you play change

each chapter.

In the Arcade Mode, you can play with a total of 17 characters. This mode is composed of 6 chapters and at the end of each one, you have to defeat a boss ( 2 in the Third chapter ) to progress.

I will not write a Guide for each Boss, since the game is pretty easy. Just keep mixing combos that you will do fine!

---

## 6. Unlockables

---

### Gallery

Each character has a Gallery. To Unlock it, reach Level 7 with the desired character. ( Saji Genpou unlock it at level 4. )

Note that the Pictures of the desired character will only appear After you finish her/his Arcade Mode.

In the Gallery you can see:

- The description of the character
- Her/His portraits
- Her/His Special and Defeat Portraits
- Some Pictures
- Her/His Voices
- The Musics of the Game

### More Outfits

To open 3 more outfits for each character, Clear her/his respective Arcade Mode. You can Only use them at Arcade Mode. To do it Select the character and then press L/R.

Note that Ryu Gentoku, Ryu Hakufu and Sousou Moutoku don't have other outfits.

### Continues

When you clear Story Mode you will be rewarded with 2 more continues. If you Clear the Game 2 more times you can have a Total of 9 Continues.

Ps: There is a cheat that gives you infinite continues, but I have no idea how to make it. If someone know, send to my email and I will put here.
