-----Where to download it from legally [dow]-----

The location will probably change when game has been released, but for now it can be got at <http://www.jp.playstation.com/scej/title/kazuo/>

--Notes--

You may want to put the link through google translator, and your psp must be on version 2.71 or above.

-----Instructions [ins]-----

Once you are on a menu press circle on the top option.
Then on the next menu press circle on the bottom option, nut
on the upper options there is a number press left or right to
choose a puzzle. Now the game will begin.

-----Controls [con]-----

Cross: Allows you to mark a square without confirming.

Circle: Allows to place a number in the square.

L and R: Allows you to switch numbers to place.

Square: To take out a marked or placed number.

Start: To pause the game.

-----Rules [rul]-----

How to play

The game is set out in a large grid. In the grids there is nine smaller grids.
In the smaller grids there is nine squares.

To win you must have a different number in each row, column and a different
number in each small grid.

You are timed on this game and you must solve it within five minutes.

On this version you have five lives these lives are used up when you place a number in the wrong square. So think about what you put where.

When all your lives are used up, any time you make a mistake you put on an extra minute on your time.

-----Tips [tip]-----

Here are my tips for playing.

1. When you think about placing a number, think of all the other places the number can be put.
2. Look around the row, column and box to make sure there is not that number there already.
3. Have fun!!!!!!

-----Solutions/walkthrough [sol]-----

If they are really hard or you want to cheat, here are the solutions.

Note these are how it looks on the grid with out the lines.

All question marks mean the blank squares

Email me if you want it hosted on a site.
The only site I will not allow it on is cheatcc.com

-----Additional notes [add]-----

Sorry if this FAQ is a little short but I have covered virtually everything within the demo.

Also I have checked my solutions carefully, but if I have made any mistakes please point them out with an email sent to sam.marks@btinternet.com and I will modify it.

-----Updates [upd]-----

2/6/06 Finished guide will make any changes on download locations
and any mistakes in solutions.
