01. Introduction

LocoRoco Midnight Carnival may appears to be a cute little game but it is not meant for everyone. The game is very hard to master if you are not willing to spend lots of effort perfecting your game play.

02. Controls

The game controls are quite simple.
Left Trigger - tilt the screen left
Right Trigger - tilt the screen right
Press both triggers and release 1 or both trigger - jump
Tap Circle - break a large LocoRoco into smaller LocoRocos
Press and hold Circle - merge all the small Locorocos into one.

First of all, you may want to master the jump. Depending on when you release the triggers, the LocoRoco will jump a different height. At time, You need to learn how to control the magnitude of your jumps when clearing certain stages.

Wall jumps - this can be done by tilting and releasing the triggers alternatively.
For example, perform a jump toward the right wall, hold the right trigger. when the LocoRoco hit the right wall, release the right trigger and hold the left trigger. When it hits the left wall, release the left trigger and hold the right trigger. etc.

Boing - Each time you jump sucessfully, your boing counter will increases, up to a maximum of 100. After that, you will get +1000 to your score for each successful boing.

LocoRoco rescue - When your LocoRoco is injured, a ghost like LocoRoco will appears. You need to catch it quickly before it disappears. If it disappears, you will lose one LocoRoco.

03. Stages

There are a total of 16 Stages in this game. The next level is Unlocked once you complete a level.

Scoring mechanism:

Boing from start to end: +100000
Touch the hidden MuiMui in a stage: +100000
Collect all berries: +100000
Collect all pickories : +100000
Eat 1 Pickory: +100
Eat 1 Big Orange Pickory: +1000
Eat 1 Berry: +4000
Kill Moja with 2 braids: +5000

If you had played a LocoRoco game before, you will know that it can be quite difficult to describe exactly what you should do in a stage. So this time round, I will be providing video walkthroughs of some stages using some of the best players' replays. The videos will be uploaded by me and hosted by YouTube.

Stage 01 Chapo-Whar 1
Gold Medal Time: 0:40
Gold Medal Score: 450000
Gold Medal LocoRoco: 6
Gold Medal Pickories: 451

MuiMui + Hidden pickories

From the starting area, go to the place right before a small gap. Jump on the small hump on the left and try to jump as high as possible. You can wall bounce upwards to reveal a hidden area. There is a Moja above, so do be carefull. There are some pickories for you to collect here. You need to reach the top section on the left. There are two thin pieces on the left side, note that the lower one have a slight slope. You need to land your LocoRoco on this slope and then wall bounce upwards in order to reach the top left section. From there, take the passage on the left and slide down to reach a few islands, work towards the right and you will find the MuiMui there. Hang on to the brown flying creature to return to the top area.

If your LocoRoco go into the machine, it will be broken down into many smaller LocoRocos and this will slow you down a lot. Instead of going do the passage, jump upwards and wall bounce to the top area. This way is more tricky but faster.

Practice Area Ticket

Unlocked after clearing Stage 2, BuiBui Fort 1.

There is no stage clear area in this area. So just leave the place anything you want.

BuiBui Crane

Unlocked after clearing Stage 3, Nyokki Land 1.

The BuiBui will tell you which LocoRoco to catch to gain extra points. If you return empty handed, the minigame will end.

Scoring mechanisms:

Correct LocoRoco: 20, 40, 120, 160

Loco Ball

Unlocked after clearing Stage 6, Dolangomeri 1.

Each LocoRoco will cost you 20 pickeries.

One of the 6 openings will be opened with a golden pickory. Try to aim so that a LocoRoco will land there and pick it up. If you managed to do so, the central opening will be opened. Take this opportunity to send in as many LocoRoco to the central portion as possible. Keep on doing this and the central stage will undergo a change that will produce a stage with many pickeries and no enemies. You have a short amount of time to grab all of them up before everything resumes to normal. If you managed to grab all of them, you will get another chance to do the pickeries bonus stage. If you can maintain this stage infinitely, you can earn lots of pickeries. The catch is to do this process with the minimal amount of LocoRoco so that you get a positive gain of pickeries.

Bonus Game 1, 2 and 3

These bonus games will be given to you once you have played the game enough time. You try to gather as many pickeries as you can before the timer runs out. If you decided not to play the bonus games immediately, they will become selectable. However, you will still be given 1 try for each game. While they were selectable, you will not be given that particular bonus game. So, you may want to play the one you like and keep the ones you dislike selectable.

06. Item List

There are many items in the game. You can buy them from the BuiBui shop or earn them when you meet certain requirements. The accessories can be worn by the LocoRoco and may change the song that is played when you are in a stage.
