I.Introduction >>>>>>> [INTRO]

Hello and welcome to my Eiyuu Densetsu Zero no Kiseki walkthrough, as usual I make a guide based on my first gameplay, so if something's missing feel free to contact me and email me. As usual I made this guide so people that don't understand japanese can play this game.

I made this guide while making my university final projects. So i think this will be delayed about twice longer than my Last Ranker walkthrough. I hope I can finish this guide within two weeks for the main walkthrough and one/two more weeks for the lists.

#### Note:

I am using hard mode for this Walkthrough. So may be when I said it's kinda hard may be it's not for normal mode. Well, Nightmare mode is just not my thing lol except for Kingdom hearts series's critical mode: P

# Change Log:

- Ver 0.10

Make this walkthrough with some explanation and some stuffs (25/10/2010)

- Ver 0.20

Chapter 2 Finished, some translation fixes, added missing things that forgot to be written (28/10/2010)

- Ver 0.30

Chapter 3 Finished, some content name changes and chapter junction

#### Tips:

- It's definitely impossible to complete all requests and records on the first gameplay. So don't worry too much if you missed things on your first play through.
- Heal often and save often I won't tell you to save at most of the time so, be sure to save before boss fights or after finishing quest etc.
- Most of location name is the same as the game implies, but sometimes I change the name to be easier to be remembered.
- Be sure to hit enemies from the back to get MAX party advantage to have a chance meet a Chance rush command.
- Trade your sepiths (crystal thingy you got from monsters after battle) with money, but don't trade them all. You need them to synthesizing quartz and open slots to your ENIGMA police license.

#### =========

### Craft System

#### ==========

Craft is a skill that can be used almost infinitely as long as you have CP (Craft Points). You got CP when you are being hit by the enemies or you hit the enemies. When your CP reaches 100 you can use S.Craft and remember when you use S.Craft no matter how much your CP are all of them will be depleted. So make sure you have exactly 100/200 CP before casting S.Craft for efficiency matters. The differences between 100 and 200 CP is the damage when you got 200 CP (Max CP) the damage done to the enemies will be greater.

# Example:

You have 100 CP or more and casting a Tiger Charge (Lloyd's S.Craft) and you'll only do 300+ damage to the enemies. When you use Tiger Charge with 200 CP you'll do about 700 damage.

# =========

# Quartz system

#### \_\_\_\_\_

Quartz can teach you arts a.k.a Spells different element of quartz can give you different spells. It's also effecting your character status attributes such as HP,EP,Movement,Speed etc. When casting an arts it consumes EP (energy point) and only can be restored by using items.

# =========

# Chance Rush

#### =========

Sometimes in boss battle you can get a SMT:Persona like team up multihits attacks. This usually shows up at a boss battle or when you hit enemy until they're dizzy.

## ==========

#### Status effects

# ===========

Status effects mostly only lasts for 3 turns as for buffing your characters. A Bad status effects lasts depends on the spells/Arts. Some of them lasts 5

turns,9 turns. Some weapons also can casts status effect automatically when it hit the enemies and this works for enemies too.

Prologue [Chap0]

After starting a new game you'll be inside a train, some event will occur and you can move your party, head into the next area twice to get more events. You'll be automatically back to the train to see more events. When you can move your character again, you will be at Crossbell city.

Now you should enter the door infront of you. Before you can successfully enter the door pres Square to open the menu and choose now you can enter the door, you will found a healing statue here. Since your HP and EP still full you don't have to check this. Continue to the next screen to do a tutorial battle. Choose the 1st option to do tutorial battle then head to the next area, grab a [Tia's herb] inside a chest. Continue to the next area. Hit the enemies on the map by pressing O and approach them to get party's advantage. You can use Arts (the symbol that looked like a Double arrow surrounded Sphere that can cast a Magic alike power) but the problem when using this is you take some delay at turn a.k.a unable to do anything for several turn. If you got MAX party advantage by dizzy-ing the enemies you have a chance to use a Chance rush (a Persona like system when all enemies down).

To the next screen, Fight a bug lookalike enemies and you can use Craft now. A skill that immediately performed (no delay) but Using CP to cast. Cp gained when you attack the enemies or being hit by them.

Against these bugs you surely want to dispatch your party to many directions because your party sticks together at one spot, you'll be easily killed by their area attacks. After defeating these bugs, grab 5 Smoke bombs from the chest and head south to get some Sepith than head into the next area by taking the northern path.

Here you will learn S.Craft a limit break style for this game. When Your CP reach 100 you can use it anytime by pressing Triangle button to open up

S.Craft menu and directional button arrow that corresponds with your character, the one that already have 100 CP has a blinking pic and as for the one that haven't got 100 CP has a darker pic. Press the directional button that correspond with blinking pic and you'll be prompted to choose your enemy to hit. You'll got [Sasmioli X2 and Fresh herb X1]. Continue to the next screen and take the right path, the ladder that goes up can't be used now. Take a Seras herb here and take an elevator at the next area. Head to the north till a dead end area to take 20 Sepith of all elements.

#### Note:

If an enemy missed it's attack you got a chance to counter them.

Head back to the elevator entrance, take the right path to get another Tia's herb. Continue by climbing down the stairs to the next area. Head inside the air duct and continue till you found a child there.

You should choose one of two option:

- Bring the boy back to the town
- Take the boy to find his friend

Choose whatever you like but I suggest to bring the boy. Head back into the air duct and take a Flame Zipper accesories and head left to the next area. Just an info for you, if the boy's dead inside the battle it means auto Gameover so becareful :D. Head to the next area to get Battle Scope X5 and proceed, heal your self at the statue and Save your game.

You should've know why is this Healing statue stands here. It means a boss battle, just like other RPGs ;D

Another option choosing scene occured, choose option 2 and Fight:

Boss 1: Frost Gummy X 5

\_\_\_\_\_

Tips: Saving your S.Craft before the battle bring advantages to you.

Use Ether Burst at 2 middle gummy and it'll be defeated immediately.

Aura rain to boost up your critical attack. Tiger charge to the Right or left Gummy and Crimson gale to the right gummy. Just hope that you're lucky so the Gummy won't attack the boys and if attacked just hope the gummy missed it's attack.

Thanks to my Mom and Dad also Senny chan that supports me all this time.
My friends that encourage me to make this FAQ. I think this is one
hell of a FAQ to make with great database of items etc, many missable things
and requests of course.
I learned many things that you can missed here and this is also the
references of my guide:
http://wiki.mmo-station.com/wiki/eiyuuzero/
http://alphawiki.net/zero psp/index.php?FrontPage
http://g-k-h.com/psp/eiyuzero
It's hard to find some new things outside these references, like checking
Hollow sphere thingy and Location to examined for hospital, etc.
