## 1. GAME INFORMATION

=====

-----

### 1.1 Additional Info

-----

70 ROBOT ANIME GEPPY-X  
console: Sony Playstation/PSone  
genre: side scrolling shooter  
release date: 1999  
publisher: Aroma  
developer: Aroma  
number of CD ROM(S): 4  
number of player(S): 1  
required memory card block: 1-15  
retail price: 5800 yen  
Pocketstation support: no  
analog controler support: yes

-----

### 1.2 About This Game

-----

Anime Robot 70: Geppy X is a side scrolling shooter game released in 1999 by Aroma for Sony Playstation console consist of 4 CD-ROMs, and don't seem to be published in US.

This game seems to be a parody from one of most famous and legendary Super Robot anime created by Nagai Go in the decade of 70's, (and later got a sequel in the end of 89's and remaked as 13 episodes OVA with totally new - and unrelated - world in 1998-1999, the next OVA entittled Shin Getta vs Neo Getta come in 2000) Getta Robo & Getta Robo G. You'll gonna noticed it easily, especially because MANY likenesses (especially about character). Anyway, if you're looking for an Individual Getta Robo game, I reccomend you to play Getta Robo daikessen, a SRW - like strategy game, developed by Technosoft, published by Emotion/Bandai visual and exclusively previewed by the end of vol.5 & 6 OVA if you watch the original japanese version.....

Anyway, this game also unique in some way. It because each stage (I'll listed of Episode later in the faqs), have Opening, Ending movie, even Commercial(!), and most of stage BGM is not only usual instrumental music, but REAL song performed by famous artist that also done the soundtrack for many anime and game series, as example Kageyama Hironobu (my favourite one, have done soundtrack for Kishin Douji Zenki, Psychic Force 1 & 2, Many Super Robot Taisen

songs, Dragonball Z, Choujin Sentai Jetman etc...etc), Sasaki Isao (who also done the song for Wakusei Robot Danguard Ace, Getta Robo, Getta Robo G, etc...) MIO (which also sang the lyrics version of "Time to Come", Shuujuinkou theme in SRW4,F,FF one of the best SRW song I ever heard). So when you're playing this game you'll gonna feel that you're watching a TV Anime series than playing a game. Unfortunately, this game is not so long, and perhaps some stage will seems too easy & short for a side scrolling even you need to finish the game at least 3x because there's 3 different endings depend of your decision. But I think, it's acceptable because nobody perfect on this world^^;

---

### 1.3 Character Info

---

This section will covered info for some major character that appeared in main scenario, here we go .....

Kei: Pilot of Geppy X1. He's similar with Ryouma in Getta Robo and Getta Robo G series, a brave and hot blooded person, plus the fact that Kei also voiced by Kamiya Akira (Saeba Ryou of City Hunter, Mouri Kogoro of Metantei Conan, also done Nagare Ryouma for Getta Robo and Getta Robo G) the hero of this game imho.

Jin: Pilot of Geppy X2. Similar with Hayato, in Getta Robo series. Only, he got a long hair and he's also a "Woman Killer" type man. Still, he's a cool guy.

Riki: Pilot of Geppy X3. Similar with Musashi from original Getta Robo series,only, he didn't wear a cape & sword and he speak in Kansai - Ben (?).

Dr. Kureishi: the creator of Geppy X, VERY DIFFERENT attitude and look with professor Saotome in Getta Robo. Anyway, did...Kureishi mean "Crazy" if it's written in Kana?

Kyuo: "Female version" of Kei, an energetic person and Tomboyish girl as well

Suzu: The Incho (Class Leader) during Kei's Senior highschool age, looks like she's have a special feeling with Kei

Romi: an Idol Singer, which surprised all of Geppy team's member when she's joined (because Kei and Jin, are her fans?)

Mio: Pilot of Queen Fairy, (daughter of Professor Kureishi?) have sweet attitude, and often serve Geppy team. She don't resembles Saotome Michiru afterall....

Lord of Darkness Devin: Leader of Uchuu Akuma Teikoku, and the person behind everything, he'll be your last opponent.

Hisser: This woman is one of Uchuu Akuma teikoku's leader, have a tragic love story with Jin

Jyag: Another leader in Devin's army, wearing mask. A Char Aznable parody????

---

### 1.4 Unit Guide

-----  
Geppy X:

Your playable robot during 4 first episode and first half of episode 5, just like Getta Robo, it has 3 different types depend of formation, Balance (Geppy X1), Speed (Geppy X2) and power (Geppy X3), anyway all of player will used Geppy X1 more often than the other formation because it's fast and controlable X's beam similar to Getter Robo's infamous Getter beam)

Geppy Double X (Geppy XX):

The replacement of the former Geppy X, you'll acquired this robot since the 2nd half of Episode 5. Consist of 3 formation too: Geppy Fire (Balance) Geppy Thunder (Speed) and Geppy Tornado (Power). Have better status and Super compared with original Geppy X1 for Geppy Fire, unfortunately.....The Geppy Thunder's super move become NOT as useful as Geppy X2's super because it's limited range and already lose it's ability to "Chase" the enemy and destroy ALL enemy in the screen

Queen Fairy:

Geppy X and Double X's support unit, pilloted by Mio. She'll appeared after you grab a special item. She'll deliver some free extra health and status upgrade items for you .

Wild John:

A cowboy robot from america, almost similar with Texas Mack in Getta Robo series, as with queen fairy, he'll appeared after you got a special item, but it's not as useful as queen fairy, cuz he's only send some projectile shoot into your enemy and then leave.

Atlanger:

A Grandizer like robot with "mazinger-like" face. have same function with Wild John. Anyway, why the creator of this game add a Grandizer like robots? is that because there's a team-up movie between Getta Robo G, Grandizer and Mazinger?

R-64 Robo:

A COMIC RELIEF on this game, imagine!!! die suddenly before hurt his enemy!!!! anyway, it's also playable later in the game, and I believe you'll feel that it's speed will overwhelmed you....cuz it's way to slow.....

R-74 Robo:

New and better upgrade version of R-64, have better speed, weapon, even can also transformed into a plane, anyway...why it's only got 50 Pts more for armor point?

-----  
1.5 Control  
-----

Square Button: .....Shoot Main weapon  
X button: .....Shoot Sub weapon  
Circle Button: .....Change Direction  
Triangle Button: .....perform a Deadblow (after X-Power bar, fully filled)  
R1:.....Change Formation (for Geppy X, Geppy XX, and R-74)  
Shield (for Queen Fairy, Wild John, R-64 and Atlanger)  
Charging Square Button, then release.....Main Super Move  
Charging X button.....Sub Super Move  
=====

## 2. Episode Guide

=====  
This is a brief episode Strategy guide, I'll listed some important points may occurred in the game. I will not spoil the story as it's better to know the story and watching the scene/pictures,...etc by yourself. have Fun!!

-----  
Episode 1: Saikyou Geppy X Toujou  
-----

Part 1: Not a difficult stage, if you're new for this game, you may use this stage to practice and learn the gameplay for a while, before step into more difficult stage.

Boss Fight: Armadilo Beast Ball Mark II

Nothing special with him. It'll only stay in the top right side of the screen and while shooting many escapable projectile. Sometime it'll also move forward or backward, and standing. Anyway, I believe you won't have any problem with this one, just kill it with your fully charged X-Beam.

Part 2:

Almost as easy as part 1

Boss Fight: Tori beast Rapras IIIIG

you'll fight this giant bird robot while flying in full speed, some time it'll escaped for a moment just for changing direction. Make sure your projectile and special already powered up, and the battle will be pretty easy.

-----  
Episode 2: Shinkai Akuma Sakusen o tatakae  
-----

Part 1: An easy stage I gues, the real problem will come in second part because you'll gonna fight "Daimanji D7"

Sub Boss: Daimanji D7

Daimanji D7 will chase you in almost entire stage. In case to against this, I think is better to use Geppy X2 than Geppy X1 at least in my opinion. be careful when you're reaching the end of stage, because, before Daimanji D7 fall down to the sea, it'll also damaging you.

Boss: Uchi Beast Toyama 5200

When you fight him for the first time, it'll only show half of his body, then, if you already decreas about 1/5 from it's HP, Toyama 5200 will show his entire body on airborne. Simply, kill him with your special attack.

Part 2:

An Underwater stage, nothing to worried.....by the end of stage, you'll entered an underwater cave.

Boss: Shark beast Nochira

At first you'll supported with a goverment robot (sometime?). After it's HP only left around 60%, it's mask will be broken and it'll change the path to the left.

special movie: Finish him with Geppy-X 2

-----  
Episode 3: Unare! Hissatsu Rokuzan Oroshi  
-----

Sub Boss: Bubuka

Appeared at very beginning of stage, Destroy!!! because it's appearance will bothering you

Boss: Yeti(?) Beast Kantaro Mk. I

An Easy boss, you can kill him easily if your Main Weapon already fully upgraded

Special Movie: Finished Kantaro with Geppy X1

Bos: Mammoth Beast Burizand D7

Not so difficult, even it's pretty huge. Just always be aware with those damn small Montaros.....

Special Movie: Destroy it with Geppy X3

-----  
Episode 4: Saraba Tomoyo Fujisan Bakuhatu no Mae  
-----

Hisser's Warship:

Almost in entire stage, your job is only to destroy this gigantic warship.

<Part 1>: Head

Be careful with it's Thunder Spark attack, It wont be a problem if you always be aware and know how to hide safely

<Part 2>: Tire and Rotor

Make sure to destroy Tire before, because it'll open a way that Geppy X can passed. After destroyed the Rotor, you'll got an extra Heart bubble,

<Part 3>: Destroy the Magnet, don't forget to destroy the Gunpods too

(Use X-Power attack to finish 'em quickly)

Boss Fight: Oktobas G9

Be aware with the Lightning Beam Projectile, cuz if you're unlucky, you're no longer able to escape....anyway, if your X-Beam already powered up, it's possible to stop it....

Special Movie: Destroy her with Geppy X1

Part 2:

You'll flying descend into the crater of mountain. Watch out! the enemy will appeared from both sides (left and right), near the end of stage 5 zakyun will appeared (this one make me remember with Sentai). I don't know what must

I do with 'em because I can't kill them in any way. So.....? I think it's better to let them passed away from you...

Boss Fight: Usshi Beast Horstein Mark IV

This giant bull (cow?) robot appeared in mountain crater to explode the Fuji-san (Fuji Mountain). Because it size, it won't give you any wide place to move on.

Watch out for it's projectile shot, keep to stick it with your special attack and stay cool.

DECISION POINT:

by finishing Horstein Mk IV with respective formation, will affected the story and ending, here it goes:

Destroy with Geppy X3 --> Let Riki die --> you got Romi --> Bad Ending

Destroy with Geppy X1 --> Let Kei die --> you got Kyoko --> Normal Ending  
Destroy with Geppy X2 --> Let Jin die --> you got Suzu --> Good Ending

END OF DISC 1

-----  
Episode 5: Yumikaeru Geppy X Fuichi no youni  
-----

Boss: Banda

always try to move behind it's projectile reach, since his lance shoot  
can't hurt you if you're on pretty close distance -below it's lance-  
near him, use your special weapon, but be careful since it's  
still able to shoot small projectiles

Boss: Banda Baira

Not need to worry, since your old Geppy X already replaced with brand-new  
Geppy XX, with better Beam Shoot (Fire Beaaamm!!!). Now you can kill  
him easily, even He's now stronger than before.

-----  
Episode 6: Shi o Yobu Syu ga Kuri yokou  
-----

Boss: Shinkansen beast Torebian 7200

Torebian 7200 will run to the left path of screen at first, however...  
it'll change his direction after some time

special movie: kill him with Geppy XX Tornado

Boss: Ni Geppy

This fake Geppy XX, perhaps will known as the boss with the most HP.  
By decreasing it's HP 1 level, it'll transform into Geppy XX Thunder,  
decreasing 1 more level, will make him transform into Geppy XX Tornado,  
and then if his HP only left 1 level, it'll transform back into Geppy XX  
Fire.

special movie: Kill this fake Geppy, with Geppy XX Thunder

END OF DISC 2

-----  
Episode 7: Uchuu Akuma no Kyoufu! Habatake Geppy-XX!!!  
-----

Boss: Jellyfish Beast Krange V3

Pretty Easy, and slow. Watch out those 2 orbs. After it's HP only left  
about 50%, the Krange V3's protective layer will broken, and you  
can't destroy that, but the battle will be easier.

Boss: Jyag 6666

Your X-Power attack don't really can hurt him. And you can only hurt  
this bastard via shooting his head and chest. Be aware with it's tail  
and remember the attack pattern.

special movie: Kill him with Geppy XX Fire

END OF DISC 3

-----  
Episode 8 (FINAL STAGE)  
-----

boss: Kujaku Beast Sbx-00

After you can drain about 20% of it's HP, Sbx-00 will spread it's tail. If you got a chance, it's better to hide behind it's tail because it's laser beam projectile will not reflected into your sides, otherwise still be careful cuz it's still have many variant of attack.

Final stage: Mecha Devin

<First form>: you CAN't hurt, even kill him. wait for several moment untill Atlanger do a Kamikaze to destorying it's anti beam layer

<Second form> Even you'll gonna wish to kill him when he's turning back...you'll take a note that Devin still can shoot many dangerous projectile that can kill you easily if you're stupid enough. So.. be careful not move too close with him....

<Third Form> He's very strong!!!! especially, his projectile attack ALSO very brutal!!!!, I don't really have strategy to kill him, just try to always keep cool, and keep attack him with Fire Beam.

After he's died....CONGRATULATION! put your joystick and watch the pretty long Ending Movie.....

END OF DISC 4

=====  
3. CODES AND CHEATS  
=====

Most of these codes performed during PRESS START BUTTON screen. After you're finished to input the codes, go to "extra stage option" to play the extra stages.

Enable Wild John Stage:

codes: up,down,right,up,down,right,up + triangle

Enable R-64 Robo Stage: This robot is SUCK!!! it's SLOW and the Armor points only 200 pts. But, it's also got a storyline and in stage 4, R-64 will replaced by R-74 which pretty much better, also have ability to transform into a "plane form"

codes: up,up,down,down,right,left,right + triangle

Enable Atlanger Stage: You'll like this, even Atlanger is pretty slow but you got 999 ARMOR POINTS!!! so...who care? his projectile also very big. That's why I think beat the game with Atlanger won't be so difficult. Unfortunately I haven't beat this one yet.....

codes: left, right, right,down, left, left, right + triangle

Enable Queen Fairy Stage

codes: left, right, left, down, down, right, right + triangle

Enable Star Geppy Stage:

codes: down, left, left, down, down, right, right + triangle

Infinite Credits: Beat the game in any difficulty setting ONCE

Don't steal or just Rip - off ANY part of this faq please.....
