Note, that if you've asked me for permission but don't see your site on the list above, don't worry about it, as it's a real pain to update each time everyone asks me to use this guide on their site. So as long as you've asked me, yes, you can put it up on your site. The sites above are the ones that don't have to ask to use them.

Bushido is copyright Squaresoft 1996/7. Please do not leech any of this to make your own FAQ out of it. Unless you have MY permission DO NOT take anything at all from this guide. Don't edit, don't do anything to it and submit it without e-mailing me with permission first. You can print it out, but only for personal use, no selling this! Summing it

up, do anything for your own personal benefit (apart from reading it) without asking me, AND YOU'LL BURN IN HELL!!!!!!

To get in touch, e-mail me at dc3131@yahoo.com.au

My ICQ# is 34601221

My webpage is <http://www.dcmagus.com>

My MSN contact is dcmagus@hotmail.com, but any email sent to that address will most likely be ignored, as I don't check that account

My AIM name is dcmagus

Be warned that I'm only on the net twice a week, don't expect replies from me which are ten minutes after you've sent the mail. Here's some guidelines about sending me mail:

1. Make sure you put the title of the game you're asking about in the subject. I've made a fair few FAQs, and it's a bit hard to work things out sometimes.

2. If it's an FAQ, make sure that it's not already in the guide!!! If it is, I'll do my best to ignore it.

If it's not in there, make sure that the details you provide are, well, DETAILED, and not sketchy. Examples are "Hi need to know how to get past this part, i'm in a room and stuck", I need to know where you are, etc.

3. Ask nicely. So far, most people have, but if your mail goes along the lines of "Hi, need code for B2, reply within the next hour otherwise I'll bomb you" will not get you anywhere.

That's it. Sorry for being a pain, but it had to be said.

-----  
1) Introduction  
-----

Yes, it's a bit strange writing up a guide for a game which was out yonks ago, but this game deserves the effort. With another quality

fighting game to their name, Tobal, Square decided to release this excellent game. For once, you could say it's realistic fighting. Instead of taking damage and adding it all up, if you get hit in the arm, it falls off. Get a leg chopped off, and you'll limp for the rest of the battle. It's very fun.

2)How to Get to the Well  
-----

There's two endings for each character: one is achieved by defeating all your enemies normally, the other is achieved by going to the well and fighting in there. Here's how to get there:

\*You must wait for your enemy to show up before going on to the next area, and follow the Code of the Bushido\*

- Run all the way up the road and through the tunnel.
- Go across the bridge, turn left and climb up.
- Go forward, into a new area.
- Go forward, turn right and past the building.
- Drop down into a new area.
- Climb into the bamboo.
- Get up the ledges.
- Jump over the fence, into the mud.
- Go forward, drop into the water/ice.
- Cilmb up, head left.
- Jump/climb the stairs.
- Head up the path, exit via the corner.
- Climb up into the new area.
- Jump into the well.

You'll get it downpat after a couple of times.

---

### 3) Bushido Code

---

Being a bushido game, you have to observe the code when fighting.  
This means:

1. No smacking your opponent when he's lying on the ground.
2. No whacking your opponent in the back.
3. No slicing your oppnent when they are climbing a wall to get away from you. Sucks, huh.
4. No beheading your opponent before they are ready. Why are their speeches so long anyway?
5. No blinding yout opponent by throwing something at them (dirt, snow, etc.)

---

### 4) Characters and Moves

---

I've just named the moves after what they look like =)

#### Red Shadow

She is the second fastest character in the game. She is best used with the lighter weapons such as the saber and the long sword. Her agility is her main weapon, and use that to the full.

Utsusemi's son is very, very quick and agile (he's the fastest character available), but he lacks power. But when using the saber

and the rapier, he's so fast that you won't need much power at all.

Mikado

-----  
Mikado is a well balanced character. At first glance you'll probably think, hey, she'll do well with the Katana/Long Sword, but she really canes with those bigger weapons, especially the Naginata and Nodachi. She's pretty fast with those weapons, so she's a great choice.

Utsusemi  
-----

The master. He is one of the most powerful characters in the game, and shows it while using the Katana and Nodachi. While using weapons like the saber and rapier though, he becomes a bit vulnerable, and is at home using the power weapons.
