1 CHOSE YOUR CAR

FORD FOCUS
4x4
300 c.v.
1230 Kg

This is the star of the game (Colin Mcrae's car).It has an excellent stability,a very good top speed and a remarkable driving manover. Ford Focus is the best car to play the World Rally Championship.

TOYOTA COROLLA
4x4
296 c.v
1230 Kg

This car has a very good acceleration but the

top speed isn't very good.If you are a true rally driver you will be able to win the game with this car, but if you spend many time doing the corners you wont be able to place in top positions.

PEUGEOT 206

4x4

300 c.v.

1230 Kg

Very good acceleration and maximum speed. The driving manover is very hard and poor. It's very hard to drive this car since it has the worst stability of the game.

MITSUBISHI LANCER

4x4

300 c.v.

1260 Kg

Good acceleration,top speed and driving manover.If you chose this car you will lose time becuse of it's weight.

SUBARU IMPRESA

4x4

300 c.v.

1230 Kg

The Subaru is a classic in this game.It doesn't have a very good acceleration but the driving control at the corners is the best.The best one for rokie players.

SEAT CORDOBA

4x4

300 c.v.

1230 Kg

The Seat has a good acceleration but in the snow stages the driving control isvery bad.

Don't ever forget that to win in a rally game you must practice a lot.Win the game and you will have new cars to drive.

FORD FOCUS 1999

LANCER ROAD CAR

DELTA INTEGRALE

FORD SIERRA COSWORTH

MINI COOPER

MG METRO

LANCIA STRATOS

PEUGEOT 205 TURBO

FORD PUMA

Braking

This is the most difficult technique of the game. If you cannot reduce speed quickly you be unable to place first position. Just try to brake as hard as you can.

Accelerating

To get the fast time you must keep the accelerator pressed down as much as possible. At corners try to accelerate as quickly as possible in order to lose almost no time.

The corners

Brake as hard as you can as you approach the corner. Once you have turned sufficiently lose the brake and accelerate out of the corner.

Make changes

Don't ever forget to see the weather and the surface type of the rally stages. Make changes in your car in order to get maximum speed.

3 / The World Rally stages

FINLAND

Set the car to maximum speed because in this stage aren't very hard corners. Also use a very hard suspension. Set the tyres to gravel.

Greece

The car must be at minimum speed because this stage has probably the more difficult corners in the game. Use gravel tyres.

France

Use the hard suspension and set the driving manover of the car to the maximum level. You must be very fast doing the corners to set the first position.

Sueden

Use snow tyres and don't use the brakes at corners. Just lose speed at the start of the corner and turne the car.

Australia

Set the car to maximum speed and use a soft suspension. This stage is very easy if you use gravel tyres.

Kenia

Use gravel tyres and a big ratio in the gear

box.Be careful with the corners that can be very difficult to make.

Italy

Don't use the brakes too much and use the driving manover at a very high level.The corners are very easy to be made.Set the speed to the maximum.

United Kingdom

This is the most difficult rally.In this stage you must be very careful when doing the corners. Set the car to maximum acceleration.

4 / Secret codes

All codes must be enter at driver edit

HELLOCLEVELAND - set the difficult level

ONECAREFULOWNER - all the cars

GREATBALLSOF - Use balls of fire

MOONLANDER - Low gravity

RORRIMSCART - Strange stages

NEURALNIGHTMARE - Super drivers

RUBBERTREES - Strange suspencion

ROCKETFUEL - Maximum speed

EASYROLLER - Big tyres

PRUNEJUICE - Ultra speed
