Information about Low, Normal, and High stats came from looking at the stat increases of each Digimon and comparing them to what the numbers should be given Low, Normal, and High. If you notice that one is incorrect, please let me know! (You probably need to take at least 15 sample points before you get the full range.)

=====
Introduction (IN)
=====

I've noticed that the stats gained by Digimon vary quite a bit from level to level and even Digimon to Digimon. I guess no one spent the time to really take an in-depth look into what actually happens (probably because you would need some type of load/save state ability or it would take forever). I decided to see if there was a pattern and/or formula for how the stats are assigned. After plotting 20+ data points for each level for multiple Digimon, I can easily say that there is a pattern. However, there appears to be no "formula".

HP & MP are calculated the same way. Att & Def are calculated the same way. Speed is its own calculation based on the total speed stat. The following sections will go over the formula for each rank of Digimon.

How many stat points you have or what you gained the previous level has no bearing at all on the next level, except for speed. The stat gains are fully independent. Also, DP does not affect the stat gains.

Some things to think about:

If you want to maximize your attack/defense, make sure you Digivolve as soon as possible. If you miss the (x)2 level, you will miss out on your biggest Att/Def increase.

Low, Normal, and High HP/MP does not affect levels 12 to 21. The range is the same regardless.

Normal and High have the same maximum value (except HP/MP Levels 2-11). High just has a better chance of getting the maximum value.

If you do not Digivolve as soon as possible, Att and Defense will always increase by 0 or 1, regardless of Low, Normal, or High.

After level 41, you will only gain 0 to 1 points, except Speed which could go up 2.

I would like to thank cocoochicken for posting the Digimon World 2 Prima Guide that shows Low, Normal, and High data for most of the Digimon in the game. I also want to thank Prima Guide itself. :) From that data, I was able to find the stat pattern that this guide was trying to show. However, it did not get all of them correct. I had to manually go back and test each one to make sure they were all correct (they are now).

I also want to thank FenixRonin for doing some preliminary research that helped push me in the right direction. :)

Rookie Stats (RS)

=====

Here is the level/stat chart for Rookies:

Stat	Level	Low	Normal	High
HP & MP	2-11	8-11	9-11	9-12
HP & MP	12-21	5-7	5-7	5-7
HP & MP	22-31	3-4	3-5	4-5
HP & MP	32-41	1-2	1-3	2-3
HP & MP	42+	0-1	0-1	0-1
Att & Def	2	3-5	3-5	3-5

Att & Def	3-4	2-3	2-4	3-4
Att & Def	5-7	1-2	1-3	2-3
Att & Def	8-11	0-1	0-2	1-2
Att & Def	12+	0-1	0-1	0-1
Speed	<= 50	1-2	1-3	2-3
Speed	<= 100	0-1	0-2	1-2
Speed	> 100	0-1	0-1	0-1

To read this, let's take Level 5 for example. If the Digimon you chose happened to have Normal for all stats, you can expect it to gain:

9 to 11 HP
 9 to 11 MP
 1 to 3 Att
 1 to 3 Def
 1 to 3 Speed (at 45 stat points)

=====

Champion Stats (CS)

=====

Here is the level/stat chart for Champions:

Stat	Level	Low	Normal	High
HP & MP	12-21	5-7	5-7	5-7
HP & MP	22-31	3-4	3-5	4-5
HP & MP	32-41	1-2	1-3	2-3
HP & MP	42+	0-1	0-1	0-1
Att & Def	12	3-5	3-5	3-5
Att & Def	13-14	2-3	2-4	3-4
Att & Def	15-17	1-2	1-3	2-3
Att & Def	18-21	0-1	0-2	1-2
Att & Def	22+	0-1	0-1	0-1
Speed	<= 50	1-2	1-3	2-3
Speed	<= 100	0-1	0-2	1-2
Speed	> 100	0-1	0-1	0-1

To read this, let's take Level 15 for example. If the Digimon you chose happened to have High for all stats, you can expect it to gain:

5 to 7 HP
 5 to 7 MP
 2 to 3 Att
 2 to 3 Def
 1 to 2 Speed (at 75 stat points)

=====

Ultimate Stats (US)

HP & MP	42+	0-1	0-1	0-1
Att & Def	22	3-5	3-5	3-5
Att & Def	23-24	2-3	2-4	3-4
Att & Def	25-27	1-2	1-3	2-3
Att & Def	28-31	0-1	0-2	1-2

Speed	<= 50	1-2	1-3	2-3
Speed	<= 100	0-1	0-2	1-2
Speed	> 100	0-1	0-1	0-1

To read this, let's take Level 25 for example. If the Digimon you chose happened to have High for all stats, you can expect it to gain:

4 to 5 HP
 4 to 5 MP
 2 to 3 Att
 2 to 3 Def
 1 to 2 Speed (at 75 stat points)

Speed	<= 100	0-1	0-2	1-2
Speed	> 100	0-1	0-1	0-1

To read this, let's take Level 35 for example. If the Digimon you chose happened to have Low for all stats, you can expect it to gain:

1 to 2 HP
 1 to 2 MP
 1 to 2 Att
 1 to 2 Def
 0 to 1 Speed (at 75 stat points)
