(4/5/2001)1.0 - Started writing this FAQ. Haven't documented some stuff, so some of it is pretty empty. May have blanks here and there since I'm currently typing from memory.

(6/5/2001)1.1 - Someone e-mailed me about the formula to calculate Level Limit. I checked it and it's correct. Soooooo, I've changed it =P. I also discovered a few things here and there and added them in, added more info I've missed on my first submission, added more Digivolve Info, DNA Combinations, more Digimon to the Digimon Analyzer, and a few more skills to the skills section. I'm currently still a bit lazy to check the MP cost of some skills. I simply can't remember them, maybe I'll print out a whole skills list from CMGSCCC to keep record. Of course I still need to find out what category the skill belongs to, so I still have to get the skill myself. It's going to make my life easier, since I got another FAQ I want to update, write a ton of other FAQs and update my site.

\*Gets stressed out big time x\_x\*

(12/5/2001)1.2 - Made some corrections to the FAQ. Added some other important info and seperated out the skills into it's own section. Did a layout change. Added more info to the Digivolve and DNA Digivolve section. Added more skills and Digimon to the Digimon Analyzer. Started a Frequently Asked Questions Section. Questions that I got through e-mail will be placed there. It helps me out by not having to answer the same questions again and again. Currently trying to figure out how to put some skills into my Seraphimon. Darn, isn't there anyway to get a Flamedramon or a Raidramon through DNA Evolution?

(24/5/2001)1.3 - Finally! I've completed the game and opened Tera Domain. Now I have access to every single recurable digimon in the game. Duh! But still, I haven't found any DNA evolutions for Flamedramon and Raidramon =( The Digivolve list is finally completed ^\_^ . Now you can digivolve any digimon that you want. Added some more DNA Digi-evolution combinations. Of course, filled in some more blanks in the Digimon Analyzer and Skills section and added more questions into the Frequently Asked Questions section.

(19/7/2001)1.4 - I've finished filling up all the digimon's skills and added most of a digimon's info into the digimon analyzer. I'm currently researching into DNA Digi-evolution and how it works, with the help of information given by 2 people. I'll change the DNA Digivolve section once I have managed to discover the secret of DNA Digi-evolution.

(29/10/2001)1.5 - Not much of an update this time, but I've changed the format of the faq a little. Research on DNA Digi-Evolution is a bit slow though, cause I have other games that I want to play too. But I've already discovered some interesting facts on it. It seems that the resulting digimon seems to be affected by the digimon group you use that is of less dominant gene. There should be another factor, which I can't seem to find..... I have a feeling it may affect the digimon that needs higher DP to Digivolve into that form. For example, Flamedramon and Raidramon. Sigh. Hopefully I can find the factor soon.....

=====

1.0 What this FAQ is for

=====

Wow! This game is vast! And the most complicated part of this game is probably the way Digimon Digivolve and the DNA Digivolve. And this is what this FAQ is for. It is to help you get what Digimon you want faster and easier. It also documents what skills each digimon learns so that you can manipulate the skills you want on which ever digimon you want easier.

NOTE: If you want to ask questions about how to cross the game, ask other people, don't ask me! I'll only answer queries on what this FAQ covers. And if you see any mistakes, e-mail me about that too. I may have overlooked it. Mistakes like putting a digimon in the wrong section, etc.

=====

2.0 Digimon Digivolve

=====

What a digimon digivolves into is affected by it's Digivolve Points(DP). You can only see a digimon's DP when you go to the Digivolve Lab and click on a particular digimon. It may look like nothing to you, but it affects greatly what a Digimon Digivolves into. A digimon's DP will increase by 1 from the digimon with the highest DP whenever you DNA Digivolve it. You can increase DP by using DNA UpChip and decrease DP by using DNA DnChip.

### 3.0 DNA Digivolve

At the start, there are some restrains on what Digimon can be DNA Digivolved together. If you're in the Black Sword Guard Team, you can't DNA Digivolve with any Vaccine Type Digimon. If you're in the Blue Falcon Guard Team, you can't DNA Digivolve with any Virus Type Digimon and if you're in the Gold Hawk Guard Team, you can't DNA Digivolve with any Data Type Digimon. You will only be able to DNA Digivolve your Digimon of any type only when you have opened Device Dome.

When you DNA Digivolve your digimon, there are certain rules to the type of Digimon you'll get back. Below lists the type you'll get back when you DNA Digivolve.

Virus + Virus = Virus  
 Virus + Data = Virus  
 Virus + Vaccine = Vaccine  
 Data + Vaccine = Data  
 Data + Data = Data  
 Vaccine + Vaccine = Vaccine

I've found out that you don't always get a rookie digimon back very time you DNA Digivolve. It depends on the Level of the Digimon. And when I say level, I mean Rookie, Champion, etc.

Champion + Champion = Rookie(EL 1)  
 Champion + Ultimate = Rookie(EL 1)  
 Champion + Mega = Rookie(EL 1)  
 Ultimate + Ultimate = Champion(EL 11)  
 Ultimate + Mega = Champion(EL 11)

Mega + Mega = Ultimate(EL 21)

I've tried out the DNA Evolutions into a Champion Digimon. I was wrong with my first theory. You will not lose the Rookie Skills. It's just you have to learn it back. The skills the Digimon has when you DNA Digivolve will be passed onto the resulting digimon. And you only lose the skills only if you don't learn it on your new digimon and pass it on. The stats will be the same, so your Digimon will still be very strong. But the method of calculating EL limit is the same. Go ahead and DNA all you want! But due to some research, a digimon will be it's strongest only if you DNA Mega and Mega. Or maybe a really strong Champion may do the trick too.

---

### 3.1 Level Limit

---

Every digimon has a level limit. It is depicted with a whole ton of 9s on your digimon's exp needed to get to the next level. So when you see this, even when you fight more battles, the exp values will not decrease. To get a higher level limit, you have to DNA Digivolve! And only digimon who are at Champion Level or higher can DNA Digivolve.

A recruited digimon's level limit will always be the same. It will only change when you recruit a higher level Digi. There is no formula for calculating this (I couldn't find it anyway. This applies to traded digimon too. But I've somehow bumped into some exceptional cases...

When you DNA Digivolve, your digi's EL limit will increase. There is actually a formula for calculating this. Someone gave me the actual formula. (Thanks pinoymegaman003@cs.com) I've tried it a few times and it works. (Better than mine anyway)

$\text{digimon1}(\text{highest level}) + \text{digimon 2's level} \div 5(\text{round down})$

example: greymon lv 15 + airdramon lv 13  
add 15 to  $13/5$ ...  $13/5$  equals 2  
 $15+2=17$ , your new digimon's max level.

#### Steps Explanation

1. Take the ELs of the 2 digimon that you want to DNA Digivolve
2. Take the digimon with the lower EL and divide by 5 (If it's the same, just take anyone of them)
3. Round down the result to the nearest whole number
4. Add the result to the digimon with the higher EL
5. The end result is the EL limit of your new digimon

---

Virus Attack	Weakens all Virus Digimon	36
Water Ray	Attacks water FX to attack	10
Zen Recovery	Full parameter recovery	40
Zip Boom	Boosts digimon's speed	12

=====  
Q. Where can you find a DNA UpChip?

A. There is one as a prize after beating one of the Tournament Ranks. I can't remember which one though. I've also found DNA-UpChips in Treasure Chests in Tera Domain.

Q. How do you increase your DP?

A. You have to DNA Digivolve in order to increase DP. Everytime you DNA Digivolve, your digimon's DP will increase by one from the digimon with the highest DP that you used to DNA Digivolve. You can raise DP by one by using DNA UpChip and decrease DP by one when you use the DNA DnChip.

Q. Can you change and delete skills for a digimon?

A. Yes you can. Just use the choose option when a digimon learns new skills and choose what you want to keep and delete. A digimon can only have a maximum of 12 skills altogether regardless of category.

Q. Where is the Tera Domain?

A. It is only opened after you complete the game. Same as getting the Machinedramon Card in Digimon World.

Q. How come I see a lot of 999999999999 on my digimon at certain levels?

A. Your Digimon has hit EL limit (Level limit) and its level cannot go higher. You have to DNA Digivolve to increase EL limit.

Q. How do you recruit new digimon?

A. First, you need gifts for the respective digimon type. Then when you see the digimon you want to recruit, hit square[] until you see the info for the digimon you want. Then you hit X and select the gift you want to use. Continue giving gifts until you see a very big heart on top of the digimon. Then fight the digimon. The last digimon you kill MAY join you. Please take note you need the shooter gun to shoot gifts to digimon.

Q. How does a digimon inherit skills?

A. A digimon inherits all the skills it's parents have, not including any of it's stage's default skill. So if a digimon does not have the skill it's parents have, it cannot be passed onto the child. In other words, Digimon only inherits skills from it's parents, but not it's grandparents, even if you know who they are.

#### Credits

\*\*\*\*\*

- Me for typing out this FAQ.
- My sister for helping me get some of the info
- My brother for helping out too
- pinoymegaman003@cs.com for giving me the correct formula for calculating EL Limit
- Darien Blaque (adam7684@hotmail.com) for offering to help me to complete the DNA Digivolve list.
- Terriermon at the DW2 MB for helping me out big time.
- DavidRod@erols.com for providing his theory of DNA Digi-evolution.
- Anyone else who helped in anyway with this FAQ, no matter how small.

- Bandai and anyone involved for making this game.
- Whoever created the GameShark. If it weren't for the GameShark, I don't think my sister and I would have been able to do this easily ^\_^
