Digimon Level Limit:
to know what's your new digimon's level limit after
DNA digivolving is a simple formula. first digimon +
second digimon/5 = third digimon. what this means is
that you get the digimon with the lowest level round
it to the nearest multiple of 5, then you divide it by
5 and what you get you added to the digimon of the
highest level and what you get it's your new digimon's
limit level.
