As you could see, I'm missing the decks of the underground players. I don't know how to let them appear when having used the code for all cards, as that means you already have their special cards. I need to use the all cards code because I need Misery Gate, and starting a new game and coming all the way to that point again... Pheh that's gonna be annoying, so I'll probably do that later.

Also, does LV35 exist? I looked up every location of the folders and that site was missing LV68 as well, so I don't know if LV35 exists or not. Let me know on the message boards if you have more information.
