[2] Objectives and Evolutions of this faq

Why this faq ?

Because a player using a French game will have a lot of difficulties to translate most of in-game terms. In most case, the French term is not the translation of the English one, this is the problem. Thanks to this faq, any player will be able to use any in-depth faq with the French game.

What is coming next ?

This faq is complete, only minor changes should be done.

What will never be done ?

Anything useless to use other faqs.
